Saddlery May Reopen.

The Annual meeting of the Canada Saddlery and Harware Co. was held on Monday and again adjourned. The directors are negotiating with an outside party to take over the factory and plant and made him a proposition. In case the factory is opened the Walkerton Electric Light and Power Co. has promised free power for two years.

+ + +

Patriotic Fund Canvass

A meeting of the Walkerton Patriotic Fund Committee is being held at the Town Hall this afternoon to discuss plans for the coming year. The suggestion has been made that this Committee and the Red Cross Society join forces in a big campaign along the lines of the Trafalgar Day Canvass. A great deal of money is coming into this town from the Patriotic Fund and it is felt that Walkerton should do something handsome this year.

Soldiers To Teeswater

Large recruiting meetings will be held in Teeswater, on Friday March 17th 1916, in the afternoon and evening, with prominent speakers for the occasion. The 160th Band will be in attendance to enliven the day. If it can be arranged by volunteer conveyances to take a detachment of soldiers over from Walkerton to help the cause along, it will be appreciated by the 160th Battalion. All farmers and others who are willing to assist, will kindly get in touch with Mr. Duncan McKerracher who has the matter in hand.

+ + +

A Brant Presentation

A large gathering of neighbors and friends took place at the home of Mr. and Mrs. W. A. Bell on Monday evening to say good-bye to the family prior to their leaving for Walkerton where they are to take up their residence. In spite of the stormy weather, some fifty or sixty were present. A pleasant feature was the reading of a very nice address by Mr. Geo. McCallum, on behalf of the people of the neighborhood, expressing their high appreciation and regard for them and their regret at the severing of old ties. At the same time, Mr. Jack Johnston presented handsome chairs to Mr. and Mrs. Bell and to Mrs. Bell, sr. a very fine dress, as slight tokens of appreciation and remembrance. The company then enjoyed a season of music and dancing before departing with best wishes for the future happiness and prosperity of the Bell family. They are removing to Walkerton to-day and taking up residence in the residence which Mr. Bell purchased recently, next to Mr. John McLean's on Gibson St.

Building is Settling

There are indications that the walls of the Town Hall building are settling. Large cracks in the wall plaster have appeared, several of the door frames have moved so that it is difficult to open and shut the doors, and the floors on several of the rooms including the auditorium have sunk from one to two inches. Chief Ferguson has refused to permit any more dances being held in the building until the Town Council looks into the matter. This is not the first time there have been signs of settling. It was found necessary a couple of years ago to brace the west end of the building with iron bands.

+ + +

A Great Success

A very large crowd was present at the box Social in the Maple High School on Friday evening which was a grand success, both socially and financially. The evening's entertainment commenced a few minute's after eight with Mayor Lippert in the chair, and the Hanover Orchestra providing the music. Solos by Miss Rimel of Walkerton, Miss Cunningham of Greenock, and Mr. Wahn of Brant, recitations by Misses Irwin; Cunningham, and Norrish of Walkerton, Mr. Teeple of Paisley, and Mr. Barltropp of Hanover and dialogues conducted by Miss Teeple, are some of the numbers worthy of special mention. George Hilgartner of Hanover sold the boxes in his usual able manner. One person worthy of special praise was William Ernest, who with one team brought over thirty-three from Walkerton. Altogether the social was a grand affair. (Mostly due to the never tiring efforts of Miss Teeple) and the handsome sum of one hundred dollars was raised for the Patriotic Society.

Bildstein—Schell

A very happy event took place at Formosa on Monday March 6th when Miss Sadie Schell, daughter of Mr. Andrew Schell, became the wife of Mr. Alfred Bildstein, son of Mr. and Mrs. C. Bildstein of Formosa. The nuptial knot was tied by Rev. Father Brohman. The bride who was given away by her father looked charming in a travelling suit of old brass cloth with hat to match. She was attended by her sister Miss Nellie Schell, who wore a suit of Copenhagen blue, while the groom was supported by Harold Bildstein. The wedding march, from Lohengrin, was played by Mr. Isadore Gfroerer, organist, of Formosa. After the ceremony, the happy couple accompanied by relatives and a few intimate friends repaired to the home of the bride where a dainty wedding dinner was served. The groom's present to the bride was a handsome Victrola, to the bridesmaid a brooch set with pearls and to the groomsman a set consisting of gold tie pins and cuff links. Numerous and costly presents were received by the bride among them being a substantial cheque and purse of gold. Those from a distance attending the wedding included Mr. and Mrs. N. P. Schwindt of Walkerton Alex. J. Schell of North Battleford Sask., Mrs. Flach of Buffalo, Mr. and Mrs. Wendel Lehman of Kerrobert Sask. and Mr. John Lehman also of Kerrobert. The happy couple leave shortly for Saskatoon where their home will be.

NOTE OF APPRECIATION

Mr. Editor:

Will you permit me through the medium of your paper to express my appreciation of the generosity of the staff officers and recruits of the 160th Bruce Batt., in contributing the handsome sum of $18 23 to the Muskoka Free Hospital for consumptives. The sums making up the $18.23 were donated as follows:—

No. 1 Platoon, A Company	$5.00
No. 2 " B "	1.85
No. 3 " C "	5.38
No. 4 " D "	4.00
Officers of the School	2.00

I had the privilege of meeting No. 2 Company before at their home town and received a nice donation from them there, the above being an additional sum.

I wish also to say that I was particularly impressed with the character and personality of the commanding officers of the 160th Batt and their advanced methods of organization in filling up their ranks so splendidly.

T. H. Race.

BORN

STEWART — In Greenock, on Feb. 28th, to Mr. and Mrs. R. W. Stewart, a son.

TIEDE — At Formosa, on Feb. 28th, to Mr. and Mrs. Ed. Tiede (nee Blenco Duerer), a son.

MARRIED

BURROUGH—REDDON — At the residence of the bride's parents, Mr. and Mrs. Peter Reddon, Carrick, on Feb. 23rd, by Rev. H. J. Lemon, of Clifford, Miss Emma Reddon to Mr. Herbert W. Burrough.

DIED

SKALITZKY — At Dunkeld, on Friday, March 3rd, Mrs. J. J. Skalitzky, (nee Lizzie Schuler), aged 33 years, 7 months, 3 days.

'TWIXT LOVE AND PRIDE

"Yes, but I would not have married Harry for all the world," Mildred declared. "He is very kind and good, I know, but he would not suit me; and there are so many Harrys in the world. Besides, if I am to be married, mamma, why, I am, you know, and I dare say 'he' will condescend to come even so far as this for me. Indeed, it will be better for us to stay at home quietly this year."

So the matter was settled and the family stayed at home. Sir George fretted and fumed over it a good deal for a few days, and finally tried to insist upon their going, offering to sell all manner of things about the farm to enable them. But Mildred was firm and after a time the question was dropped. Sir George, however, going up to London himself on business for a day or two toward the close of July, brought back to Mildred a very handsome bracelet, which she felt was meant as some sort of compensation for the loss she had sustained so bravely, and prized it accordingly.

The Trevanions were determined also to follow up their lately begun economical designs by having a quiet autumn and winter at home, and had actually made up their minds, with Spartan heroism, not even to invite their usual number of friends for the hunting season at King's Abbott—a determination that agreed very ill with poor Sir George's digestion, as it was his delight to see the old house crammed with visitors of all ages—when there reached them the unlucky letter from the Younges, saying how much the head of the family desired to see the friend of his boyhood,—namely, Sir George.

This letter put a full stop to all their plans, and was looked upon as a brain blow in more ways than one, as not only did it ensure an expensive winter, but, what was worse, upon examination it was discovered that these friends of Sir George's youth were most disreputable in their antecedents, having been in trade. A cotton merchant! It sounded horrible. Cotton could not possibly mean anything but low birth, and low birth, of course, meant vulgarity.

"Who was the old man's father, my dear?" Lady Caroline had asked her husband; and he had been obliged to confess that the rank held by his friend's father was utterly unknown to him.

"We were great chums at school and at college," he said, "and Younge came home with me once for a vacation; but I do not remember ever being at his place or hearing what his father was. Perhaps I knew then, but that is long ago, and I certainly have no recollection on the subject now."

Whereupon Lady Caroline groaned in spirit, and thought dismally of what the Deverills and the Blounts and the Stanleys would say, finally going off to consult with her Prime Minister, Mildred.

"It is all over," she began; "they must be asked."

"I never heard of such a thing in my life," said Miss Trevanion. "It is perfectly indecent—their asking themselves here. But what can one expect from such people? Good gracious, mamma, fancy a cotton merchant! It quite makes me shiver. How many of them are there?"

"Four," answered her mother. "Father and mother, daughter and son."

"Any more?" inquired Mildred, sarcastically.

"No, no more. Do you not think four too many?" asked Lady Caroline with surprise—never in her life, good soul, could she understand anything approaching sarcasm. "Of course, now they are coming, Mildred, we must only make the best of it, though I do wish it had been wine instead of cotton—it is so much more respectable—and I wish also that Miss Rachel Younge and her brother were not coming."

"What is his name?" Mildred demanded.

"Denzil, I believe—yes, Denzil Younge."

"What a pity they didn't call him Brigham Younge when they were about it!" Miss Trevanion said, and they both laughed.

"How can you be so absurd?" Lady Caroline exclaimed; afterward changing her tone to one of entreaty, she said, "But, really, you know, darling, we must be very civil to them, if only to please your papa. You will promise to be that, Mildred, will you not?"

"I suppose I could not go to Aunt Agnes for the next two months, could I?" Mildred asked, irrelevantly.

"Oh, Mildred!" cried poor Lady Caroline, tears coming into her eyes at the mere idea of being thus deserted in her need.

"I am a selfish wretch," declared Miss Trevanion, caressing her mother's hand and becoming penitent on the spot. Of course, mamma, I will not leave you on any account in the hands of these terrible barbarians. I only said it half out of mischief and bad temper; why, you might be devoured by the time I got back! Have you told Mabel?"

"No; I came to you first about it. What rooms shall we give them? The blue rooms, do you think, or the rooms in the western wing?"

"The blue rooms; they are the furthest off," said Miss Trevanion, unamiably.

"Very good; I will tell Holland. Do you know they are coming on Friday, if—as Mr. Younge says in his letter—we can conveniently receive them on that day? Dear me, Mildred, I wonder what they will be like, and how long they will stay?"

"Oh, as to what they will be like," said Mildred, toasting her pretty feet comfortably before the fire, and looking as wise as Solomon, "I can tell you that. The old man will be like a Yorkshire farmer, only worse, because he will have a strong dash of Manchester mixed with his turnips, and he will be always using horridly old-fashioned words, and he will be very attentive to you, and will probably call you 'ma'am.' And Mrs. Younge will be large and fat and red, like the cook; and Miss Younge will be a mincing, silly schoolgirl, ready to die with laughter at everything Mabel says; and 'Brigham' will be a boor of course."

"What will the county say?" ejaculated poor Lady Caroline, elevating her hands and eyes, perfectly aghast at the pretty picture her daughter had drawn. "Really, Mildred, I shall die of shame."

"That will not do a bit of good," returned Miss Trevanion; "and of course you must be prepared to hear the county say all manner of unpleasant things—that they do not know what Sir George could be thinking of to invite such people to his house, and that the said people are extremely disgusting, and so on."

"But for all that you will be kind and civil to them—will you not, Mildred, my love?" her mother asked again, anxiously watching the girl's proud, beautiful face.

"Oh, yes, I will be civil to them," Miss Trevanion said; and then she kissed her mother and went out of the room.

CHAPTER II.

The eventful Friday at length arrived, and with it the unwelcome Younges. They came by the late train, which enabled them to reach King's Abbott just one hour before the dinner-bell rang, and so gave them sufficient time to dress. Sir George met them warmly, feeling some old, half-forgotten sensations cropping up within his heart, as he grasped between his own hands the hard brown one of his ci-devant school-friend. The old man he now met, however, was widely different from the fair-haired boy and light, active youth he could just barely remember both at Eton and Oxford. Indeed, Mr. Younge, oddly enough, did strangely resemble the fanciful picture drawn of him by Miss Trevanion, being fat, "pussy," jolly, and altogether decidedly after the style of the farming gentry. This might be accounted for by the fact of his having of late years—that is, ever since his retirement from trade—taken lovingly to the culture of mangolds and the breeding of sheep.

But, however right about him, Miss Trevanion's prognostications with regard to the others were entirely wrong. Mrs. Younge, far from being fat, red and cookish, was remarkably slight, fragile and very lady-like in appearance. Her daughter, Miss Rachel, resembled her mother strongly, though lacking her gentle expression and the quiet air of self-possession that sat so pleasantly on her. Indeed, the general impression conveyed to the observant stranger by the first glance from Miss Younge's eyes was that her temper might be better than it appeared to be, or, as Eddie very forcibly, not to say elegantly, expressed it, 'The man who gets her will catch a Tartar, and no mistake.' She was pretty, though, for all that, having good eyes, and altogether refined features, and would pass in a crowd very probably without overmuch pushing.

But in her description of Denzil, Miss Trevanion had been very much at fault indeed. Anyone more unlike a "boor" could not well be imagined. Denzil Younge was a very handsome young man. Tall, fair and distinguished-looking, with just the faintest resemblance to his mother, he might have taken his place with honors in any society in Christendom. He wore neither beard nor whiskers, simply a heavy golden moustache, which covered, but scarcely concealed, the almost feminine sweetness of his mouth. Perhaps his face, on the whole, would have been almost too beautiful for a man, had not a certain expression of firmness and determination in the lower jaw suggested an amount of will lurking beneath his calm exterior which entirely prevented any suspicion of weakness in his character. His smile was in itself perfect, illuminating, as it did, each handsome feature, and lighting up with sudden brightness his kindly large blue eyes. He was sweet-tempered also, more so than most men, though at times he was capable of being very much "put out."

Denzil Younge was about seven-and-twenty at the time, and had not as yet felt the slightest inclination to "commit matrimony," although many were the girls who would have gladly given their life's happiness into his keeping. He could have married almost whom he pleased, with his handsome Saxon face and reputed wealth, and indeed it was an undisputed fact that Lady Julia Horlington, down in this part of the world, would willingly have gone to the kingdom's end with him. In fact, to such an extent did the infatuation of that foolish young heiress reach that "my lord," her father, who was one of the proudest men in England, and "my lady," her mother, who was one of the proudest women, were obliged to promise that, if the young man came to the point, their consent to the union would not be withheld.

But Denzil, having no designs whatever in that aristocratic quarter, beyond a quiet little flirtation now and then in the hunting field, or in retired conservatories, never did come to the point; whereupon Lady Julia, having found, after a few weeks of blank despair, that she was not likely to die of it, like a sensible girl, went up to London, and married the old Marquis of Tenwyn, very much to her parents' and the rest of the world's satisfaction.

But of course all this was supposed to be strictly private, and by no means to be told in Gath, or published in the streets of Askelon, lest the daughters of the Philistines should rejoice.

Miss Trevanion, having made up her mind that there would be plenty of time just before dinner to get through the introductions, stayed in her own room until exactly five minutes to seven o'clock, the usual hour for dining at King's Abbot, when she swept downstairs and into the drawing room in her beautiful graceful fashion, clad in pure white from head to foot, with the exception of a single scarlet rose, fresh from the conservatory, in the middle of her golden hair. And certainly Mildred looked as exquisite a creature that evening, as she walked up the long drawing-room to where her father was standing, as any one could wish to see.

"This is my eldest daughter unmarried," said Sir George, evidently with great pride, taking the girl's hand and presenting her to his guest, who had been gazing at her with open honest admiration ever since her entrance.

"Is it indeed?" the old man answered; and then he met her with both hands extended and, looking kindly at her, declared out loud, for the benefit of the assembled company, "She is the bonniest lass I have seen for many a day."

At this Mabel laughed out loud, merrily, without even an attempt at the concealment of her amusement, to Lady Caroline's intense horror and old Younge's intense delight. He turned to Mabel instantly.

"You like to hear your sister admired?" he said.

And Mabel answered:

"Yes, always when the admiration is sincere—as in your case—because I too think she is the bonniest lass in all the world."

"Right, right!" cried old Younge, approvingly; and those two became friends on the spot, the girl chattering to him pleasantly the greater part of the evening afterward, although the old man's eyes followed Mildred's rather haughty movements with more earnest attention than he bestowed upon those of her more light-hearted sister.

Miss Trevanion, when Mr. Younge had called her a "bonny lass," merely flushed a little and flashed a quick glance toward her mother which said plainly, "There, did I not tell you so—Yorkshire farmer, pure and simple, and all that!" and passed on to be introduced to the other members of the unwelcome family. She could not forget, even for a moment, how intrusive their visit was, and how unpleasant in every sense of the word. She was only three or four years Mabel's senior, but in mind and feeling she might, so to speak, have been her mother. When she remembered how Eddie always required money, and how difficult they found it to send Charles regularly his allowance and still to keep up the old respectable appearance in the county, she almost hated the new-comers for the expenses their coming would entail. What numerous dinner parties and evening parties would have to be given! And probably enough Sir George would consider it necessary to give them a ball—and all for what? A set of country bumpkins, who were of course illiterate and illbred, and had—abominable thought—made their oppressive riches by cotton!

How could "the queen" laugh at that dreadful old man's vulgarity? Miss Trevanion raised her head half an inch higher, and went through her inclinations to the others with a mixture of grace and extreme hauteur that made her appear even more than commonly lovely, and caused Denzil Younge to lose his place in the languid conversation he had been holding with Eddie Trevanion. She had not so much as deigned to raise her eyes when bowing to him, so he had been fully at liberty to make free use of his own, and he decided, without hesitation, that nothing in all the wide earth could be more exquisite than this girl who, he could not fail to see, treated them all with open coldness.

He took her in to dinner presently, but not until soup had been removed did Miss Trevanion think it worth her while to look up and discover what style of man sat beside her. Glancing then suddenly and superciliously at him, she found that he was the very handsomest fellow she had ever seen—well-bred-looking, too, and in appearance at least, just such a one as she had been accustomed to go down to dinner with even in the very best houses. But then had she not frequently heard her father say that the largest amount of good looks was always to be met with in the lower classes? So she considered the Younges, and, therefore, according to that theory, this man's perfect features need not surprise her. Doubtless, when he opened his lips, his breeding would proclaim itself.

He was staring across the table now to where Mabel sat, laughing and conversing merrily with old Younge, and seemed slightly amused with the girl's gayety. Was he going to fall in love with Mab? Very likely, she thought. It would be just the very thing for an aspiring cotton man to do—to go and lose his heart ambitiously to their beautiful "queen."

Then Denzil turned to her and said.

"You were not in town this season, Miss Trevanion?"

"No; mamma did not care to go," she answered, reddening a little at the pious fib, and feeling intensely wrathful, as she came to the hurried conclusion that he had heard all about their straitened circumstances, and had asked the question knowing she could not have gone there had her mother wished it ever so much. This was unjust; but her pride and dislike had brought her to this—that she, the open-minded Mildred, could feel ungenerously toward this stranger, who under the circumstances could by no possibility have learned anything about her father's affairs.

"I do not think you missed much," Denzil went on, pleasantly; "it was the slowest thing imaginable; and the operas were very poor. You are fond of music, of course? I need hardly ask you that."

"I like good music, when I hear it," Miss Trevanion said; "but I would rather be deaf to all sweet sounds than have to listen to the usual run of so-called singers—private singers, I mean."

"One does now and then hear a good private singer, though," Denzil returned. "There were several in town last year."

"Lady Constance Dingwall was greatly spoken of," Mildred said; "I have heard her sing several times."

"So have I, and admire her voice immensely; her pet song this season was Sullivan's 'Looking Back,' and it suited her wonderfully. Lots of fellows raved about her, and old Douglas of the Blues was said to have proposed to her on the strength of it. She refused him, however. Odd man, Douglas; you know him, of course—everybody does. He is slightly crazy, I fancy. By the bye, you have not told me what you think of Lady Constance's singing."

"I would quite as soon listen to a barrel organ, I think," Miss Trevanion answered, ungraciously; "there is just as much expression in one as in the other. She has good notes, I grant you, but she does not know in the very least how to use them!"

Denzil laughed.

"Poor Lady Constance," he said, "well, I am not a judge of music, I confess, but for my part I would go any distance to hear her sing. Her brother has managed about that appointment—I suppose you know?"

"Has he? I am glad of that. No, I have not heard. But what a disagreeable man he is! What a comfort it must be to his friends or relatives, rather—to get him out of the country!"

(To be continued.)

"Telephone, sir." "What is it?" "Your wife wants you home at once." "What's the trouble?" "She has a tight gown, can't stoop, and the drip pan under the refrigerator is running over."—Louisville Courier-Journal.

TIRING, CEASELESS BACK-ACHE CAN BE RUBBED AWAY TO-NIGHT

Relief is Almost Unfailing From Even the First Application.

RUB ON NERVILINE

Cold has a vicious way of finding out aching muscles or weak joints. How often pain settles in the back, causing inflammation and excruciating soreness. Stiffness and aching all over follows.

An application of Nerviline at the start gives immediate relief and prevents worse trouble.

When the pain is very acute, Nerviline has a chance to show its wonderful penetrating and pain-subduing power. It strikes in deeply, and its strike-in-deep quality quickly proves its superiority to feebler remedies. Then this goodness is magnified by its strength, easily five times greater than most liniments.

Surely so powerful and curative a liniment as Nerviline offers perfect security against pain.

Nerviline is the only guaranteed pain remedy sold in Canada. Forty years of success in many countries warrants its manufacturers saying if it does not relieve, get your money back.

No curable pain, not even neuralgia, lumbago, sciatica, or rheumatism can resist the magic power of Nerviline. Try it to-day. Rub it on your tired back, let it ease your sore muscles, let it take the swelling and stiffness out of your joints. It's a marvel—thousands say so that use Nerviline.

The large 50c. family size bottle of Nerviline is more economical than the 25c. trial size. Buy the larger size to-day. Sold by dealers everywhere, or the Catarrhozone Co., Kingston, Canada.

What Memory Is.

The correct way to increase the productivity of the memory is to link every new thing with an understood thought already in hand. Merely to memorize the Bible and thus to be able parrot-like to speak it "by heart" is not memory. Intellectually and emotionally to appreciate and understand one psalm or proverb is memory. To know where to put your finger on the right verse or passage of the Bible on your table is practical and useful recollection. Dictionaries, directories, encyclopedias, indexes and reference books do the mechanical part for you. Reason, association, adaptability and the perception of relationships are better than much Latin and more Greek, however beautiful and instructive these may be in themselves.—Exchange.

Minard's Liniment Relieves Neuralgia

Travels of a Sapphire.

A sapphire of good quality which was cut into a gem weighing one and three-eighths carats was discovered in the gravel along the shore of Lake Okoboji, Dickinson county, Ia., in 1911. It is described as resembling a piece of blue bottle glass worn round and smooth by attrition and is stated to be the cornflower blue variety, and to have a good, velvety lustre. This gem was probably transported to the Lake Okoboji region by ice during the glacial period along with a large variety of other minerals and rocks, and its original home can only be surmised.

Minard's Liniment Cures Burns, Etc.

The Red Shirt of Italy.

The red shirt, destined to become so famous a symbol throughout Europe, was not a first adopted by Garibaldi for any fantastic or spectacular reason. The English Admiral Ingram says that the red shirt had its origin in stern necessity and that its adoption was caused by the need of clothing as economically as possible the legion that Garibaldi had raised for the liberation of Italy. An offer was made by a tradesman to supply at a reduced price a large stock of red woollen shirts. This offer was eagerly closed on. Before many years had passed the red shirt became the symbol not merely of the legion, but of the new spirit working for the liberation of Italy.

AN EXCELLENT REMEDY FOR THE CHILDREN

Mrs. Laura Jackson, Brantford, Ont., writes: "I have found Baby's Own Tablets such an excellent remedy for children that I have no hesitation in recommending them to all mothers." Thousands of mothers say the same thing concerning the Tablets. Once a mother has used them she would use nothing else. They are for sale at all druggists or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Physical Formation of Mexico.

Mexico possesses a curious physical formation. Rising rapidly by a succession of terraces from the low, sandy coasts on the east and west, it culminates in a central plateau running in a northwesterly and southeasterly direction and having an elevation varying from 4,000 to 9,000 feet above the sea. High above this plateau tower the snow capped crests of several volcanoes, most of which are extinct. Ten of them are over 12,000 feet in height, and three look down upon fertile valleys from altitudes of 17,782, 17,356 and 16,060 feet. These are Popocatepetl, Orizaba and Ixtaccihuatl.

Minard's Liniment for sale everywhere

Odors in the Arctic.

There is nothing like polar exploration for increasing one's susceptibility to smells. Dr. Nansen told how, when approaching Franz Josef Land, he knew when he was in the neighborhood of a friend whom he had left there in charge of a base. "I smelled his scented soap long before I saw him, and afterward as we approached his hut I believe I could have given a sort of inventory of everything it contained without entering. The odors of the petroleum, coffee, cheese, tea, etc., reached me quite separately and distinctly."

When Cheese Was Vulgar.

There was a time when cheese was regarded as too vulgar a diet for well-bred ladies. This belief is referred to in Mrs. Gaskell's "Wives and Daughters" and also in "The Visits of Elizabeth," where Mrs. Elinor Glyn makes her heroine write: "I was glad to have a nice piece of cheese. All the time I was with godmamma I was not allowed to, as it isn't considered proper for girls." A correspondent of Notes and Queries for April 21, 1909, writes: "When I was living in Jamaica some years ago a friend of mine who would now if living be about 95 told me that before he left England as a young man it was not the custom for ladies to eat cheese, though he had been in England so lately as 1874, he believed that ladies suffered the same privation at that time and almost refused to believe me when I told him that they did not."—London Chronicle.

Curious Street Names.

The list of curious street names is inexhaustible. Bermondsey possesses a Pickle Herring street. Near Gray's Inn there is to be found a Cold Bath square. Most of the Nightingale lanes and Love lanes are hidden ironically enough in the slums in the east end.

But for really bizarre street names one should go to Brussels. The Short Street of the Long Chariot, the Street of the Red Haired Woman and the Street of Sorrows are remarkable enough to catch the least observant eye. The Street of the One Person is, as one might guess, considerably narrower than Whitehall. But the cream of Brussels street names surely belongs to the Street of the Uncracked Silver Cocoanut. This in the orginal appears as one ponderous thirty-six letter word.—London Chronicle.

Better Than Spanking

Spanking does not cure children of bed-wetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

Children's Pets.

Luther Burbank voices his sentiments in favor of children's pets in his system of "Training the Human Plant." "Every child should have mud pies, grasshoppers, water bugs, tadpoles, frogs, mud turtles, elderberries, wild strawberries, acorns, chestnuts, trees to climb, books to wade in, water lilies, woodchucks, bats, bees, butterflies, various animals to pet, hayfields, pine cones, rocks to roll, sand, snakes, huckleberries and hornets, and any child who has been deprived of these has been deprived of the best part of his education. By being well acquainted with all these they come into the most intimate harmony with nature, whose lessons are, of course, natural and wholesome."

Dynamite.

Dynamite if carefully made and kept will not explode except by shock or a blow; hence a cap or detonator is affixed to a charge just before firing to set it off. Set fire in open air dynamite burns fiercely with a smoky flame, but does not explode unless several sticks are closely piled together or packed in a box. The most common cause of premature explosion of dynamite is separation of its nitroglycerin, slight friction or shock causing this to explode and, in turn, explode the dynamite. Separation of nitroglycerin usually occurs when frozen dynamite is being thawed out; hence so many cases of explosion by careless or ignorant persons who use a perfectly good stove in a course of instruction in how to handle dynamite. The force of a dynamite explosion is usually greatest downward. Thus a stick of dynamite exploded on a rock without being covered will shatter the rock, but will produce little effect in other directions. Like all explosives, dynamite must be inclosed to produce its maximum effects. Dynamite is sometimes prepared in granular form for producing certain explosive effects, but its action is too rapid and intense for use in rifles or cannon.

WRINKLES ARE A CONFESSION

Advancing years are first realized by the change that becomes noticeable in the complexion. If you pay attention to the first, almost imperceptible, lines, how easy it is to avoid the unsightly wrinkles that surely follow. Wrinkles are a confession to Father Time. The skin must be kept firm and smooth by proper attention and treatment.

"USIT" is a skin food and wrinkle chaser. It builds up firm, elastic tissues, removes wrinkles, fills out depressions, prevents dryness of skin caused by excessive winds, and restores to your complexion that fine appearance of freshness and youth.

"USIT" is put up in handsome opal bottles, and until the Drug Stores in Canada are completely stocked we are filling mail orders. Accept no substitute.

Send 25 cents to-day for trial bottle, sufficient for six weeks' use. We pay postage to any address in Canada.

He Knew Their Weakness.

During the reign of Louis XV. of France the light chaise came into fashion, and great ladies of Paris were accustomed to drive in them about the city. But beautiful hands are not always strong ones. Accidents began to occur more and more frequently in the streets. Consequently, says "Das Buch Fur Alle," the king besought the minister of police to do something, since the lives of pedestrians were constantly in danger.

"I will do whatever is in my power," replied the police minister. "Your majesty desires that these accidents cease entirely?"

The king replied, "Certainly."

The next day there appeared a royal ordinance that ordered that in the future ladies under thirty years of age should not drive chaises through the streets of Paris. That seems a mild restriction, but it is said that scarcely a woman from that time on drove her own chaise. The police minister knew that few women would care to advertise the fact that they were over thirty and that the rest would probably be too old to drive anyway.

EAT AN ACTIVE FOOD

To avoid indigestion and constipation eat less of the highly refined fancy cereals and starchy foods. What the stomach, liver and bowels require is an unrefined, active cereal to keep them working right. Dr. Jackson's Roman Meal has more active, stimulating power than any other breakfast cereal. It contains whole berries of wheat, whole berries of rye, deodorized flaxseed and bran. Makes delicious porridge and all baked products.

At all grocers, 10 cents and 25 cents.

Made by Roman Meal Co., Toronto.

RURAL JOYS.

Sing a song of winter time,
Cold and bitter weather;
Meet it with a cheery rhyme
All of us together.

Shut the window, light the lamp,
To the hearth draw nigher;
Throw out all the frost and damp
At the open fire.

Toss a back log on the blaze,
Spread the circle wider,
Talk and talk of other days—
Fetch a jug of cider!

Crack the nut and crack the jest
'Mid the laughter lusty—
Now and then among the rest
One is stale and fusty.

Mother fetch the ginger bread
And the apples yellow;
Even Jimmy must be fed—
Billy's got a fellow!

Sing a song of ice and snow,
Goodness! How we pity
Those that pleasure never know:
People of the city!

—Farming Business.

Minard's Liniment Cures Dandruff.

A SATISFACTORY DIET.

A mixed diet, including sufficient animal foods as fresh milk, eggs, meat and fresh vegetables is by far the most satisfactory diet, as it contains sufficient anti-neuritic and anti-scorbutic substances. The dietary habits of the greater part of the population in this country are such as to prevent the continuous consumption of a diet deficient in vitamines. In recent years, however, certain factors have had a tendency to reduce the vitamine content of the diet of the population at large. Changes in our economic conditions, food production and method of cooking seem to reduce the vitamine content of the diet of a large number of persons to the danger-point. Observations which I have made in connection with studies on the cause of pellagra bear out this assertion. The population of a large portion of the southern states, in which this disease is prevalent to such a serious degree, lives on a diet which is, to say the least, not rich in vitamines. Highly milled cereals, pork fat, in addition to cabbage and turnips, and similar vegetables, form the staple article of the diet. The customary use of baking soda in the preparation of food, furthermore, lowers the vitamine content of the diet. I have been able to demonstrate on animals that corn bread made from cornmeal and milk, with the addition of soda, loses its high initial content of antineuritic substance in the process of baking as a result of the destructive action of the alkali.—Dr. Carl Voegtlin in the Scientific American.

Crawford—The janitor of our flat is going to give some kind of an entertainment. Crabshaw—for your sake, I hope it will be a housewarming.—Judge.

A fast trotting stallion died of in a New York State, a little while during a thunderstorm. He was se years old.

Lalla Rookh, Tom Moore's famous poem, was published 100 years ago. It was written under a curious publishers' agreement whereby he was to receive for an eastern poem 3,000 guineas, success or failure.

Pittsburg held its first "kite day" recently and 600 children flew kites in one of the public parks. A Chinese boy had a kite 70 feet long, in the form of a centipede. The figure of another kite was that of Uncle Sam.

The chief detective of a New York hotel worked hard and earnestly on a stolen watch "case" and finally recovered the missing article. As a reward the owner of the watch, a woman, named her dog after [illegible].—Exchange.

Suffer No Longer From Constipation!

You can immediately relieve and permanently cure yourself with Dr. Hamilton's Pills. One thousand dollars will be paid for any case that isn't corrected within three days. Dr. Hamilton's Pills contain no injurious drugs; they are composed entirely of soothing vegetable extracts that strengthen the stomach and bowels at once. It is absolutely impossible for Dr. Hamilton's Pills to fail curing biliousness, sour stomach, indigestion, headache or constipation. Even one box has brought vigor and renewed health to chronic sufferers, so you owe it to yourself to try Dr. Hamilton's Pills at once; 25c per box at all dealers.

Ambassadorial Indiscretions.

The first rule of an ambassador's office is that he shall abstain from all interference in the affairs of the country in which he is living. A breach of that rule makes him persona non grata. In English diplomacy the best known case is that of Bulwer at Madrid. Bulwer had, by order, transmitted to the Spanish Government in 1848 an impertinent despatch in which the actions of the Spanish Government were strongly criticised. Bulwer received a reply stating among other things: "Your conduct [illegible] of your important [illegible] been reprobated by pu[illegible] England, censured by the British press and condemned in the British Parliament. Her Catholic Majesty's Government cannot defend it, and that of her Britannic Majesty has not done so." Whereupon Bulwer received his passports with peremptory orders to quit the country within forty-eight hours.—Manchester Guardian.

I consider MINARD'S LINIMENT the BEST Liniment in use.

I got my foot badly jammed lately. I bathed it well with MINARD'S LINIMENT, and it was as well as ever next day.

Yours very truly,

T. G. McMULLEN.

A Curious Wedding Present.

Among the Brass river tribes of West Africa when a young couple get married it is the custom for the oldest member of the bride's family to present the bride with a plot of ground six feet long. This is for the grave of her family and herself when they die. The first member of the new family who dies is buried about twenty feet below the ground and the next one almost sixteen feet, and this goes on until all the family die and are buried. The grave holds them all, and this, they think, prevents them from being separated. This gruesome wedding present is the one most valued by the bride, the favorite native saying being, "When all other things are gone this remains."

The one man who always carries out what he undertakes is the undertaker.

Achilles absent, was Achilles still.—Homer.

EUREKA HARNESS OIL

puts new life in your harness. Keeps it from drying up and cracking. Makes it soft, pliable and strong. Contains no animal or vegetable fats to become rancid. It makes harness last longer.

ELLA'S RECOMPENSE

s?" asked Cecil, peremptorily. ", running after her and giving owers, and scraps of German to ate. I don't believe she ever out without meeting him. It good style. It's annoying to me, it is reprehensible in a girl who to earn her own bread."

making it too strong," ell: "I'll not believe the —Ha! Miss Marston is " he said, aloud; "at her ot expect much discre- she is—" he checked him-

goose," put in Mrs. Ver- y, "and she is not so very is more than twenty-two, fighting her way in the who was sixteen or seven- ught to know how to take elf by this time."

e," said Cecil, dryly, "you good example." But Mrs. cared little for tones when s were complimentary.

"I never could understand the rage women have for admiration," she , casting down her eyes. "I d so early, and was so wrapped the dear general, that my life en free from—from—" here she around.

"Will you be so good as to give Miss Marston your brother's message?" said Cecil, "as if by no means interested as to what her life had been free from. "He will be here between three and four."

"It is nearly that now," cried Mrs. Vereker, rising and ringing the bell, which was immediately answered by Augusta.

"Where is Miss Marston?"

"The gracious Fraulein is by Frau Gudsch in the salon below."

"Pray, do not trouble her: I will look in on my way down," cried Cecil, "and I must say good-morning, Mrs. Vereker. I am going to look over the cavalry barracks with an officer I met at the table d'hote."

"Indeed! I dare say there isn't much to s. Will you and my brother come in and have a cup of tea this evening? I think it will do James more good than moping by himself at his hotel."

"I shall be most happy, Mrs. Vereker," and Cecil bowed himself out.

Meanwhile Frau Gudscher sat in a small and extremely untidy room which she termed her Arbeitszimmer; she was busy making up her accounts; from time to time she paused to listen; at length the door opened to admit her kinsman, Von Reichenberg.

"Well, my good cousin, you sent for me?" said he, throwing himself on the sofa beside her as soon as greetings had been exchanged.

"Yes, you are a little late," returned Frau Gudscher, taking up her knitting. "I must hasten my speech; you have not been here since Monday; you are afraid to follow the inclination of your heart. It is well to be prudent, but I have this to tell you, the pretty English maiden may be an excellently-dowered bride. I have held much talk with Sir Browne—he knows the family. They are rich and well-born. The widow she counts for nothing; she admits the addresses of [illegible] colonel, but the yellow gentleman, he is also a cousin, and he is rich—oh, very rich—he will probably leave all his wealth between his sister and Fraulein Marston. It is not sure, but it is likely."

"Potz tausend!" cried the young man, starting up. "This is great news! She is a sweet angel! It is a glimpse of heaven, but I will be prudent; I will do the agreeable, and you you will ascertain her true position. Should fate be unpropitious, why the inexorable rules of our service will compel me to leave the adored one, and break my heart in the solitude of my quarters."

"Quarters are not very solitary," quoth Frau Gudscher, taking up a stitch she had dropped. "Naturally you are safe if the Fraulein has not enough money for the required dower, but she ought to have enough to clear your debts besides, my cousin. Now, remember you must make love to the whole party, especially the yellow ill gentleman."

"What a task you have set me!" cried the baron, laughing: "English women are of much adoration worthy, but Englishmen I love not; they think every man not of their race a swindler. Nevertheless, I will undertake the role you assign me." Here Anna announced that coffee was ready, and Frau Gudscher arose. "Stay thou here awhile; thou come to the salon, when my guests are dispersing, and follow my lead." The young baron nodded, and drew forth his cigar case, while the lady of the house hastened to attend to her duties.

The greater number of Pensionnaires were assembled, they partook of coffee and exchanged gossip as usual. The symposium was nearly over; a Scotch professor, who was improving his holidays, and the much-travelled English woman, Miss Bridges by name, had already retired when Herr Von Reichenberg made his entrance, and had scarce finished leering all around when he was followed by Ella, who held a copy-book, which she deposited on the writing table, a pencil falling from it as she did so. "Ah! good day, my fraulein," cried Von Reichenberg, stooping to pick it up and restoring it with a bow. "Are you going to make a sketch of my frau cousin's coffee party?"

"Oh, no! Frau Gudscher was so very good as to promise me a dictation if they all went away early. So I have brought my book and pencil."

"You are a persevering student, fraulein. Suppose we make an exchange—you teach me French in addition to all you have taught me already," with a significant look, "and I will be your professor in German."

"I dare say you speak French better than I do, Herr Von Reichenberg."

"No, no! I can read it, but speak it no."

"Come, my young friend, go smoke upon the balcony," cried Frau Gudscher, with good-humored authority. "I will speak to you by and by." Von Reichenberg obeyed, and even Miss Browne did not venture to follow him until the room was clear. Then Frau Gudscher cried to Ella. "Now, my fraulein, quick! I will get something to read, and we will have our dictation." She crossed the room to a bookcase and picked out a novel of Dahn's.

"Are you sure I am not taking too much of your time, Frau Gudscher?"

"No, you are not. I have but little to give, and you are welcome to that. I like to encourage industry. Here; here is a bit of conversation that will be best." She sat down suddenly beside the writing table, and began rattling on so fast that Ella was obliged to cry mercy.

Meantime Baron Reichenberg had retired to the balcony, whence came the perfume of tobacco. The dictation went on quietly enough for ten or twelve minutes, when Frau Gudscher suddenly dropped the book with a startled "Ach Gott! I had quite forgotten that I have those American ladies at the Bellevue Hotel to see! My child, I must leave you; but you shall not your lesson lose! Come here, Max; you take the book and read, just half an hour; not too fast, mind you; then you will correct the dear Fraulein's writings."

"Gewiss, certainly," said Reichenberg, who had obeyed his kinswoman's summons instantly. "I will be your professor, gracious Fraulein, and be severe—oh, very severe."

"But, yes, he is a scholar, the dear cousin. I leave you in good hands." And the excellent frau, after shutting and locking sundry drawers in frantic haste, went out calling on Anna and Augusta.

"Oh, I can not think of troubling you," cried Ella, greatly embarrassed by this sudden arrangement: "It is really of no consequence," putting her papers together. "It would be rather tiresome for you, Herr Von Reichenberg—" She stopped.

"I shall be less tired than I was after Konniggratz," returned Reichenberg very gravely, "and a little more successful, I hope."

"Still I have no right to trespass on your time," rejoined Ella, dropping her pencil, which her companion proceeded to search for. "I will forgive your trespasses," he said, handing it to her with a bow, "My Fraulein, you are not afraid of me?" He spoke German, which Ella understood tolerably well. Ella was nettled. "Afraid!" she cried. "Pooh! I am not quite so silly. I only wished to let you go free if you did not care to stay."

"Yes, but I do care to stay. I like very much to be your master— that is the English word, is it not?"

"I prefer professor," returned Ella, a little disturbed by the look which accompanied these words. "Frau Gudscher stopped there," touching a word with her pencil.

Reichenberg read slowly, pausing now and then, so as to give his pupil every advantage. He had drawn his chair to the end of the writing table, sitting very near, and facing Ella; whenever she looked up after one of his pauses she found his eyes fixed upon her, and grew more and more uncomfortable. So she determined to cut the dictation short. "You are the most attentive pupil," cried Von Reichenberg, when she announced that she could not stay any longer. "But your writing might be better; the next time you shall write in ink. I want to make you German, quite German."

He rose as he spoke, and, coming behind her, leaned over the back of her chair.

At that dreadful moment, when his head was in suspicious proximity to her own, the door opposite was suddenly opened and Colonel Cecil stood on the threshold.

Ella was overwhelmed with annoyance. She had been greatly drawn to Cecil in spite of his evident inclination to judge her hardly; she perceived his aversion to Von Reichenberg, and she felt instinctively the impossibility, the unbecomingness, of offering the smallest explanation.

"I beg your pardon," said Cecil, walking to the middle of the room and pausing there with a grim, cast-iron look on his dark face: "I have been despatched by Mr. Lyall to ask if you will drive with him—he will be here almost immediately."

Could this be the man who spoke to her out of his inner thoughts so frankly, almost tenderly, last night? She felt she was judged and condemned—unjustly condemned, for she little dreamed that Mrs. Vereker's foolish, spiteful words had introduced the green-eyed monster to Cecil's mind. She hesitated an instant, and Cecil went on: "If you are engaged, Miss Marston——"

"Oh, no no," she interrupted, "not in the least; I shall be ready, directly. Do you understand, Herr Von Reichenberg? I must go out and drive with Mr. Lyall. I am very much obliged to you for taking Frau Gudscher's place as she was obliged to go away; you will excuse me?"

"Is this a clever ruse?" thought Cecil, but she turned to him with a clear, straight look and a pleasant smile: "Shall I find you here when I come down? I want to give you the handkerchief you were kind enough to wrap around my arm."

"It is not of the least consequence," he replied. "I shall see you this evening."

"Ah! here is the equipage," cried Von Reichenberg, looking from the window. Ella went quickly away and the two men exchanged stiff bows, Cecil descending the stairs to speak a word with Lyall, and the baron stepping on to the balcony to inspect the group below.

When Ella went down dressed for her drive, she only saw Colonel Cecil's back in full retreat, and even that usually inexpressive portion of the human frame seemed to have a colorful and more vivid aspect than ordinary —an air of renunciation and disgust quite perceptible, which gave her much to think about, and kept her more silent than Lyall had ever known her to be before.

* * *

"I am not up to going out this evening," said James Lyall to his friend after dinner some hours later, and I don't fancy you care much for my widowed sister's tea and talk; besides, I want you here. Let us send and say I don't feel equal to the exertion." And Lyall took out his card-case and scribbled a line in pencil on the back of a card—which he directed the waiter to send to Wilhelm Platz—and then proposed that they should take their coffee on a terrace overlooking the river.

The weather was exceptionally fine and warm for October, and the lamps burned quite steadily.

"It's a nice climate and a nice old place," said Lyall, choosing a cigar as the waiter removed the empty cups; "bring a chaise, Kellner," and he puffed for a moment in silence. "I couldn't sit out of doors like this in England; it's so infernally damp."

"The autumns are generally fine there," said Cecil indifferently.

"Yes, they generally are in northern latitudes; like our women, time deals gently with what matures slowly. Look at southern girls; lovely at thirteen, and hags at thirty." No reply.

"What's the matter with you, Cecil? You seem in the dolefuls!"

"Who? Me? No, I am not. I was just thinking. Yes you are quite right, it is a horrid place. Suppose we start away back to London next week."

"Hullo, I am thinking of going back. In short, life is uncertain (my life especially—I am certain there is something wrong with my heart), and I want to make a new will."

"Ah! that's a serious matter. How many have you made?"

"Not so many, I can tell you. I am not going to make any great change as to smaller sums, but I don't mind telling you—as a dead secret, mind, for you have no interest in the concern—that I shall make Ella Marston my residuary legatee."

"Indeed!"

"Yes. She is a thoroughly good girl, and I should like to adopt her. Do you think I am old enough Cecil? I am afraid if a fellow was ninety, with one foot in the grave, Mrs. Grundy's long nose would smell out mischief! I am fifty-two and a broken-down chap."

"Um!—eleven years older than I am," said Cecil reflectively, taking his cigar from his lips, and watching the rings of smoke.

"Forty-one only!" exclaimed Lyall with unflattering candor. "Well, you look a good deal more!"

"I should think you were old enough," continued Cecil, not heeding him; "but isn't there another girl—her sister? Why don't you take both of them to live with you? that would make it all square."

"What! take a rackety young thing of twelve or thirteen into my house, to turn it out of the windows! No thank you! But it's time enough to think of all that. I'll make sure of the will first. That quiet brave child has been made a martyr of by her worthless poltroon of a father. Fancy his letting his wife turn her adrift, or nearly so, at seventeen! and by George, sir, it was enough to make a hardened old hunks like myself pipe his eye, to hear her tell how she got her sister into the same school with her, and was like a mother to her little girl! and she not seeming to know she had done anything out of the common! I'll make her independent in the world, by Jove! Look here, Cecil, you are a safe fellow, and I don't mind telling you that the residue she will inherit will be over thirty thousand pounds."

"Indeed! That is a large fortune—more than enough for a girl's happiness."

"Well, she'll have every penny of it. Now, I am going to ask a favor of you, Cecil," resumed Lyall, after a pause, "I want to appoint two guardians for my little heiress. Dinsdale will do for one—he is an honest, business-like fellow—but I also want a real gentleman, that can understand a young lady. Will you be the other?"

"What! you want me to be Ella's—Miss Marston's—guardian?" exclaimed Cecil in evident perturbation, as he rose and flung the end of his cigar into the river, turning to walk slowly back. "This is a very serious question: I can scarcely answer you on the spur of the moment, my dear fellow," said he; and he paused opposite his friend, holding the top of the chair on which he had been sitting: a dark flush, which Lyall did not notice, mounting on his brown cheek as a vista of toil and difficulty spread out before his mental vision.

"There is nothing to frighten you in it. I hope you'll never be called upon to exercise your authority. I hope to marry my pretty young cousin to some nice fellow before I die; but, as I said, life is uncertain, and I'd like to leave her in your hands; she'd like it herself, too: she seems to take to you; but I fancy she is half-afraid to speak before my little spitfire of a sister. Fancy her treating Ella as an inferior—a councier maid, by Jove!"

But Cecil was thinking and did not heed.

"You see," Lyall went on, "she is singularly without funds or protectors. You are a man of the world—a man of high character. You could keep off fortune-hunters, and be altogether a stay to her." Lyall spoke long and forcibly, still Cecil insisted on a night's reflection before he gave a positive answer.

"One thing I feel I ought to mention," he said, as they parted at the door of Lyall's room; "that big, conceited German fellow ought to be warned off, or choked off. He has set his audacious eyes on your cousin, and she's a little disposed to coquette with him. Oh, innocently enough, but mischief may come of it. Get her away."

"What! the officer that spoke to her in the theatre?"

"The same."

"Ah, ha! that won't do. And the little puss listens to him?"

"I don't say that," returned Cecil, the seriousness of the matter in hand dispersing his small jealousy and rousing his natural sense of justice. "She is only amused; but a daring, unscrupulous foreigner might turn her amusement to his own account."

"By George! We will send him about his business. But it is evident you are the right man to look after her. Good-night, and don't have bad dreams about the responsibility before you."

It was long, however, before Cecil was even on the borders of dreamland. This conversation with Lyall had changed the current of his thoughts, and introduced a new element into his views of the future. Hitherto he had combated, not very successfully, the strong attraction which Ella Marston unconsciously exercised, telling himself that it was rather disgraceful to be so suddenly mastered at his age by a fancy well, rather more than a fancy for a girl whose father he might be—a saucy, self-opinionated young person, who probably considered him an old fogy; but all the while he knew right well, though he never acknowledged it even in the privacy of his own heart, that reason, pride, hesitation, all would go by the board at the first conscious blush, the first timid avoidance of his eyes which confessed dawning reciprocity.

(To be continued.)

SUNDAY SCHOOL LESSON

Lesson XI. March 12, 1916.

Heroes and Martyrs of Faith.—Hebrews 11: 1-12: 2.

Commentary.—I. The nature of faith (11: 1). 1. Now—The subject of faith is introduced in the discussion in the preceding chapter, and the writer stops here to consider the nature and operations of faith. Faith—Trust, unwavering confidence, a conviction that brings certainty. Substance—The original word means basis or foundation. Things hoped for—One cannot truly hope for something unless there is a basis upon which the hope rests, otherwise he is indulging a false hope. What God has said in his word or the conviction that he gives by his Spirit furnishes something definite and positive for the faith to grasp. The submitting, trusting heart believes it. The evidence—The demonstration or proof. A demonstration is equivalent to a certainty. When a proposition in mathematics is demonstrated, it is clearly shown that it cannot be otherwise. Things not seen—"Things not seen" are the realities of God and his universe outside the visible world, which are revealed to our higher intuitions by nature, by divine manifestation, or by the written record. The animal man, the sensualist, never thinks of or truly embraces these truths. The worldly forget them. The atheist denies them. And these are all incapable of that spiritual heroism recorded of the ancient worthies.—Whedon.

II. Examples of faith (11: 2-40; 12: 1). It was because of their faith that the forefathers attained such excellence of character and accomplished such results that their names have come down to us connected with high honors. If they had failed to believe God, their names would have been unknown and unhonored. We know the beginnings of things because we believe what God has said. The faith of the Old Testament worthies led them to do something. Their faith was active. Because they believed God, they obeyed him, and great results followed. Their faith led them to take a course that seemed in many cases unwise and impracticable. They believed that God was able to do what was apparently impossible. The omission of these illustrious examples of faith would have been a loss to us of much of the inspiration which we now receive. What Christian has not been again and again encouraged by the example of Moses, who made a choice seemingly against all reason, because he believed God? So many and so various are the examples of faith given in this chapter that they cover all possible circumstances in life.

32. What shall I more say—The list of the heroes of faith is a long one. To recount the deeds of all the men and women of faith would include practically all of Old Testament history. Gedeon — Gideon, one of the judges of Israel, who delivered his people from the Midianites (Judges 6, 7). Barak—Associated with Deborah he defeated the hosts of Jabin the Canaanite (Judges 4, 5). Samson —The history of this judge is given in Judges 13-16. Jephthae—The heroes of faith, mentioned in this verse, are not given in chronological order. Jephthah subdued the Ammonites and thus brought deliverance to Israel (Judges 11, 12). David—The second king of Israel. Samuel—The last of the judges. 33. Subdued kingdoms—The conquest of Canaan and the victories won by David are alluded to. Wrought righteousness—The decisions of the judges and the work of the prophets are properly included in working righteousness. Obtained promises—While many promises were not fulfilled during the lifetime of the heroes of faith (v. 39), yet they realized the blessed fulfillment of some of them. Stopped the mouths of lions—Samson, David, Daniel and Benaiah may be mentioned here (Judges 14. 5, 6; 1 Sam. 17. 34, 35; Dan. 6. 22; 2 Sam. 23. 20). 34. Quenched the violence of fire—The Hebrew youths (Dan. 3). Escaped the edge of the sword—David, Elijah and Elisha. Made strong—Hezekiah (2 Kings 20. 5), and others. Turned to flight the armies of the aliens—Joshua, the judges and David succeeded in defeating the enemies of Israel. 35. Women received their dead—See 1 Kings 17. 22; 2 Kings 4. 32-36. Were tortured—Literally, broken on the wheel. Better resurrection—They refused to save their lives by denying their faith. They looked forward to an eternal life with God. 36. Bonds and imprisonment — Joseph, Jeremiah and Hanani may be named here.

37. They were stoned—This was the Jewish mode of execution. Zechariah was stoned to death (2 Chron. 24: 20, 21). Sawn asunder—Tradition says that Isaiah thus met his death. In sheepskins and goatskins—There were heroes of faith who were clad in these coarse garments because of their poverty. 38. Of whom the world was not worthy—The world considered that these heroes of faith were not worthy to live, but they were too good for their surroundings. "The Greek would also admit the meaning that they outweighed in value the whole world."—Farrar. 39. These all—Both those whose names are given and those designated by their deeds. Having obtained a good report through faith—"Having had witness borne to them through their faith." R. V. Received not the promise—The complete fulfilment of the promise was not realized while these heroes lived, and will not be realized until the resurrection, but they received specific blessings, as Abraham received the fulfilment of the promise regarding a son. 40. God having promised some better thing for us—The apostle and those whom he addressed were living in the gospel age and were favored with higher privileges than those in any preceding age. They that without us should not be made perfect—Believers before the flood, after the flood, under the law, and since the law, make but one church. The gospel dispensation is the last; and the church cannot be considered complete till the believers under all dispensations are gathered together. As the gospel is the last dispensation, the preceding believers cannot be consummated even in glory till the gospel church arrives in the heaven of heavens.—Clarke.

III. Encouragements to faith (12:1, 2). 1. So great a cloud of witnesses—The number of those who have witnessed to the reality and possibilities of faith, as well as to its rewards, is very great. The Hebrews were exhorted to let this great array of heroes of faith encourage them to steadfastness and success in the Christian life, just as in the race the runners were encouraged to do their best by the presence of a large number of spectators. Weight—Whatever impedes progress, but more exactly, superfluous flesh. In the spiritual race it may include pride and every other hindrance. The sin which doth so easily beset us—The well-circumstanced sin, the sin that clings closely about one, which would make spiritual progress impossible. Run with patience—Endurance characterized the faith of all these heroes and patriarchs and he exhorts us to endure because Christ also endured the cross.—Cam. Bib. Race that is set before us—The course that leads to heaven. 2. Author and finisher of our faith—Jesus, to whom we are indebted for all the good that can come to us. In Him our faith begins and He is the glorious object of it. Joy that was set before Him—The joy of eternal triumph and of sitting at the right hand of God.

Questions.—To whom is this epistle addressed? What is its purpose? How does the apostle describe faith? What notable examples of faith are given in this chapter? What did Gideon accomplish through faith? Who quenched the violence of fire? How is the enumeration of this army of heroes used for our encouragement? What are the conditions necessary to our running the Christian race successfully?

PRACTICAL SURVEY.

Topic.—A scriptural exhortation.

I. Called forth tried witnesses.

II. Portrayed the perfect Example.

I. Called forth tried witnesses. In the closing of chapter ten the apostle spoke of faith as the principle of spiritual life and the spring of patient endurance. He had been a student of the recorded experience of his devout ancestors. He recalled the most glorious names of Jewish history to confirm his brethren in their fidelity to the Lord Jesus Christ. His design was to convince them that in trusting Christ and bearing and enduring all things for him, they were exercising the same principle which made the elders of the Jewish nation the men they were. Those ancient worthies labored under great disadvantage in the extent of their privileges compared with the Christian Hebrews of Paul's day, and yet their confidence in God's promise was vigorous and persistent, valiant and victorious. Each hero mentioned was commended for some distinguished excellence and every one for his faith. Abel "obtained witness"; Enoch received a "testimonial"; Abraham "looked for a city." All were persuaded that there was reality in God's promises and that they would be fulfilled. The first example of faith which the apostle cited was Abel, who lost his life for his faith. In him we see faith as the root of godliness. He was intimately acquainted with God, in constant fellowship with him, full of confidence in him, engaged in service for him and was commended by him. He translated his convictions into actions. His character was extraordinary and his reward was correspondingly extraordinary. In Noah we see faith as the principle of separation from the life and destiny of the ungodly. His purity and piety were conspicuous and commendable by reason of the terrible corruption and violence which were universal in his age. His faith is set before us in a very remarkable course of action. He had simply God's word and his faith rested upon that. Abraham's faith rested on a divine call, on a divine purpose, on divine guidance. He believed that God had a right to his obedience, that God would fulfil his promises however unlikely or even impossible their fulfilment might appear to him. He attentively heard, heartily believed, promptly obeyed. His faith was shown in his emigration, in his lifelong pilgrimage, during protracted childlessness and in the sacrifice of his son. His faith was sorely tried and sublimely triumphant. Jacob believed in God. He was blessed in worldly circumstances, purified and ennobled in his character. Joseph had a grim assurance that a great future awaited his family. His faith rested upon God who had so wonderfully led and richly blessed him. That assurance formed a fitting conclusion to a life of distinguished piety. None of the heroes of faith in this illustrious group was more eminent than Moses. Being himself the only true Hebrew of his time he occupied the unique position of having it within his power to make a life choice. His choice was made intelligently, deliberately and with decision. It was determined by his faith in Christ, in the future of his people, and in the realities of the unseen and eternal world.

II. Portrayed the perfect Example. The Christian Hebrews needed "like precious faith" with the ancient worthies to enable them to discharge the duties and endure the sufferings to which they were called in connection with their Christian discipleship. The apostle probably had in mind the sin of apostacy, the danger to which the Hebrew Christians were exposed, of drifting back into Judaism. He gathered up the practical lessons to be derived from an historical demonstration of the power of faith, and summoned them to the exercise of like faith, making their paramount duty the putting aside of everything external and internal which would tend to failure in the concentration of purpose and singleness of aim. Paul referred to Jesus as their great example, viewed in his humiliation and exultation as the author and finisher of faith. He surpassed all others in faith and obedience. The Hebrew Christians were to be guided and made victorious through him. T. R. A.

Echo of Sound.

An echo is a sound reflected from a distant surface. Sound is produced by waves or pulse of the air and when those waves come in contact with a cliff or wall or other opposing surface they are reflected like light or heat, and the returning waves cause a repetition of the sound. The world echo is of Greek origin. According to ancient mythology, it was the name of a mountain nymph, daughter of the air and the earth. Echo was one of Juno's attendants, but her loquacity displeased Jupiter, so she was deprived of the power of speech by Juno and permitted to answer only when she was spoken to. Afterward Echo fell in love with a beautiful youth named Narcissus and was changed into a stone, which still retained the power of voice. Milton personified her thus:

Sweet Echo, sweetest nymph, that liv'st unseen
Within thy airy shell,
By slow Meander's margent green,
Canst thou not tell me of a gentle pair
That likest thy Narcissus are?

Speaking of poor relations, a cousin once removed may come back again.

VENTILATION AND HEATING

The question, "What is a proper temperature for a living room?" is frequently asked. 70 degrees F. has been accepted for years as the most desirable. This has of late been reduced to 68 degrees and by some to 65 degrees, and in England 60 degrees is generally adopted. With a humidity of not less than 50 parts, a temperature of 66 degrees would no doubt be high enough. However, experiments are being made in New York, Boston and other large cities to determine whether or not the temperature may not be lowered to 65 degrees or even sixty degrees.

It has been amply demonstrated that the chemical composition of the air is of little significance from a health standpoint. We need not worry about the excess of carbonic acid gas or of organic matter in the air, as it is rarely likely to contain sufficient to be particularly injurious. The things we require to concern ourselves most about are: The proper temperature, say 68 degrees; the proper humidity, say 50 degrees, and a sufficient movement or current—in other words, proper atmospheric conditions.

The normal out-door air contains from 65 per cent. to 75 per cent. of moisture, but if you pass this through a hot air furnace, by the time it reaches our living rooms it will not contain more than probably 30 per cent. to 40 per cent. of moisture. The same is, for the most part, true in houses heated by hot water and steam where no provision is made for supplying moisture. The result is that this dried-out air craves moisture, and will take it up from all surrounding bodies, from our skin, from the mucous membrane of our mouth, nose and throat. This is in a large measure responsible for the dry, hacking laryngeal cough so prevalent in winter; for the aggravation—if not the production—of much of our catarrhal conditions; for the irritability, restlessness and sleeplessness from which people suffer in these improperly heated and ventilated houses.

Furthermore, from an economic standpoint, insufficient moisture, or humidity, in our homes is very extravagant, for very dry air requires a higher temperature to produce the same sensation of warmth and comfort than does an atmosphere with a proper percentage of moisture. It has been estimated that from 10 per cent. to 15 per cent. of our fuel is wasted in over-heating rooms, due to the improper amount of humidity. To overcome this dryness, small reservoirs for heating water have been attached to the furnaces, but these are rarely kept full, and when they are, they are not at all adequate. For instance, air at 25 degrees F., which means 7 degrees of frost, even if saturated with moisture, when heated to 70 degrees would require the addition of one-half pint of water to every 1,000 cubic feet to give it a humidity or moisture of 55 degrees, which is practically normal.

Some conception of the amount of moisture required, and how far the air in our homes, schools, factories, etc., falls short of it, can be had from the following description of the precautions taken by a large industry in the United States with a capacity of 150,000 cubic feet, and a day population of 460 persons: The fresh air, which is distributed by a mechanical system, is drawn into the building at the rate of 28,000 cubic feet every minute and has moisture added so as to contain about 50 per cent. of relative humidity. To secure this condition, 675 gallons of water—in the form of steam—are mixed with the air in ten hours, or about one and a half barrels per hour. Certain parts of the building, which had been heated with difficulty before, are now made more comfortable, and in the whole building 3 degrees less heat is required to maintain a comfortable temperature. There has been a noticeable absence of coughs during the winter among the employees.

Various humidifiers (instruments for supplying a proper amount of moisture) have been suggested, of which a very efficient and simple one is the exposing of the air from a register or radiator to moisture by having it passed through a surface of cotton wick, the same material that is used in lamps, only very much wider. One end of this wick is submerged in a reservoir, or vessel, containing water, which is attached to the radiator. This reservoir can be constructed out of galvanized iron or other material and suspended against the posterior surface of the radiator, that is, between the radiator and the wall, and the wick allowed to lie over the top of the radiator. It has been demonstrated that by means of this simple contrivance, the relative humidity of a room can be kept between 60 and seventy degrees F. by evaporating about four and a half quarts per day, and a temperature of 65 degrees so maintained is as comfortable as one of 70 degrees in a dry atmosphere and much less irritating to the mucous membrane.

A very practical illustration of this is the fact that we can sit and read in comfort on our porches or in our gardens in a temperature of from 60 degrees to 65 degrees in a summer evening having a normal humidity, while the same temperature in our homes in the winter, with a dry atmosphere would be very uncomfortable, owing to the more rapid evaporation of moisture from the surface of our bodies in this drier atmosphere.

The necessity, therefore, for provision for a proper degree of moisture in the atmosphere of our living rooms is quite apparent. It must be remembered, however, that excessive humidity which only occurs under certain factory conditions is quite as undesirable and, in some instances, even more enervating than insufficient humidity.

It is rather surprising that heating and ventilation engineers have not placed more stress on the necessity for cooling plants for the summer, as a temperature of over 72 degrees with a relatively high humidity is undesirable from a health standpoint. In some places the plants used for heating have been so constructed that they can also be utilized for cooling purposes in the summer time. We presume that the cost of the installing and operating of cooling plants would make them prohibitive in most cases, but the necessity exists, nevertheless.

"They say George has brain fever." "Fat chance. Can an angle-worm have water on the knee?"—Carnegie Puppet.

Was All Choked Up

Could Hardly Breathe.

BRONCHITIS

Was The Cause; The Cure Was

DR. WOOD'S Norway Pine Syrup.

Mrs. Garnet Banks, North Augusta, Ont., writes: "I caught a dreadful cold, going to town, and about a week after I became all choked up, and could hardly breathe, and could scarcely sleep at night for coughing. I went to the doctor, and he told me that I was getting bronchitis. My husband went to the druggists, and asked them if they had a cough medicine of any kind that they could recommend. The druggist brought out a bottle of Dr. Wood's Norway Pine Syrup. I started using it, and it completely cured me of my cold. I cannot tell you how thankful I was to get rid of that awful nasty cold. I shall always keep a bottle of Dr. Wood's Norway Pine Syrup on hand, and I shall only be too glad to recommend it to all others."

Dr. Wood's Norway Pine Syrup is a remedy that has been on the market for the past twenty-five years, and we can recommend it, without a doubt, as being the best cure for coughs and colds that you can possibly procure.

There are a lot of imitations on the market, so when you go to your druggist or dealer see that you get "Dr. Wood's;" put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

The genuine is manufactured by The T. Milburn Co., Limited, Toronto, Ont.

THE CAUSE OF ASPHYXIA.

Relieve It by Air and Artificial Respiration.

The definition of asphyxia may be given as a condition which supervenes when the function of respiration has been interrupted.

1. Asphyxia may be caused by submersion in a liquid medium, as in drowning.
2. Stopping up the air passages by a foreign body, as in choking.
3. Pressure on the chest, preventing the action of the respiratory muscles.
4. Closure of the air passages, as in suffocation or smothering.
5. External pressure on the air passages, as in strangulation or hanging.
6. Breathing irrespirable gases such as hydrogen, carbonic oxide, sulphurated hydrogen, chlorine, chloroform vapor, etc.

What can be done to save life must be done with rapidity. For some minutes after the respirations have entirely stopped the heart's action continues and as long as the heart beats, recovery from asphyxiation is possible.

The chief treatment is as follows:

1. At once remove the cause of the asphyxia.
2. Give plenty of fresh air and begin artificial respiration so as to quickly bring about a purification of the blood.

In performing artificial respiration avoid hurried and irregular motions.

Asphyxia from choking is caused by bits of food, foreign bodies, etc., accidently passing into the larynx. Send for a physician at once and in the meanwhile try to dislodge the obstruction. If the patient is a child hold it up by the feet and slap it on the back high up between the shoulder blades. If the patient is an adult place him in a recumbent position on one side, and pass the finger or the handle of a tablespoon over the base (back) of the tongue and claw forward with the spoon. If, after the foreign body has been extracted, there are no signs of breathing begin at once artificial respiration and continue it for fully an hour.

If there is asphyxia from blocking of the larynx by swelling (suffocation in children caused by attempting to drink from the spout of a kettle containing hot water) send at once for a doctor and while waiting for him wrap the child in a blanket, apply hot sponges, or flannels (dry or moist) to the mouth; administer in dessert spoonful doses, sand or linseed oil, cod liver oil and also give pieces of ice to suck.

Treatment of asphyxia from Attempted hanging or strangulation is instantly to cut any cords that may be around the neck and also to loosen all tight clothing. Allow a free current of air to pass over the patient's face, dash cold water on his face and chest, and perform artificial respiration—do all of this while waiting for the physician to arrive.

To treat asphyxia from poisonous gases such as charcoal, coal, coke, lime, brick or cement kilns, coal gas, foul air from sewers, cesspools and mines (choke damp), the vapor of chloroform, etc., remove the patient at once from the foul into the fresh air, loosen all tight clothing at the neck, wrists, waist and ankles, commence artificial respiration after drawing the tongue forward and securing it (let some one hold the tip firmly forward), and apply friction and warmth to the body and dash cold water upon the head and face.

Young Bride—I didn't accept him the first time he proposed. Miss Ryval (slightly envious)—I know you didn't, dear. Young Bride—How did you know? Miss Ryval—You weren't there.—London Sketch.

Use MILBURN'S LAXA-LIVER PILLS

FOR A SLUGGISH LIVER.

When the liver becomes sluggish it is an indication that the bowels are not working properly, and if they do not move regularly many complications are liable to set in.

Constipation, sick headache, bilious headache, jaundice, heartburn, water brash, catarrh of the stomach, etc., all come from a disordered liver.

Milburn's Laxa-Liver Pills stimulate the sluggish liver, clean the coated tongue, sweeten the obnoxious breath, clean away all waste and poisonous matter from the system, and prevent as well as cure all complaints arising from a liver which has become inactive.

Mrs. John V. Tanton, Birnam, Ont., writes: "I take great pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad, I would have severe headaches, but after using a couple of vials, I am not bothered with them any more."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

EDITORIAL COMMENT

"Hope springs eternal in the human breast." The seed catalogue proves this beyond a doubt.

+ + +

Beat the mail order house by using the local weekly. It goes into every home the catalog does, and then some more.

+ + +

Enlistment in Canada is now past the 250,000 mark. But let it be remembered that the goal at present set is 500,000.

+ + +

Those who heard Lieutenant Whitehead speak last Saturday will delight in describing him as "the whitehead boy."—Lion's Head News.

+ + +

Anybody about Ottawa who does not happen to be engaged on a Royal Commission might be enlisted for the approaching spring farm campaign.

+ + +

What the Commons should do is move out of the museum and leave the Senators in indisputed possession of their rightful heritage.

+ + +

It is announced that Major-General Sir Sam Hughes is going to the battle front in May. At last we are allowed to know when the war is really going to begin.

+ + +

Lt.-Col. Weir wired recruiting officers last week:— "Work every man to the utmost to complete the Batt. by April 1st. It must be accomplished. The honor of Bruce is at stake."

+ + +

Judge Klein appeared in a different role last Saturday. When on the bench people tried to persuade him, at the recruiting meeting he tried to persuade the people.—Lion's Head News.

+ + +

It has been suggested that the retired farmers go back to the land so that the agricultural development may not be retarded by enlistment. There are a great many retired farmers in Ontario.

+ + +

The Renfrew Hotel Company, which owns a first class hotel in that dry town, has had another successful year. At the annual meeting held on Tuesday, it was shown that the receipts exceeded the operating expenses by $5,000. This showing was made notwithstanding that fewer commercial travellers are touring the provinces than before the war.

+ + +

The pastor of the Port Elgin Baptist Church, at the close of a recruiting meeting in town, arose and said that he had offered his services to the Bruce battalion. If they wanted him as chaplain he would go in that capacity. If not, he would go as a private. A sky pilot that is willing to go as a private would make a mighty good chaplain.—Guelph Mercury.

+ + +

Mr. T. H. Race, who lectured in the Town Hall Sunday night in behalf of the Muskoka Free Hospital, is not only an able speaker but one of the foremost newspaper writers of the province. During the past fifteen years he has visited all parts of the world as Canada's Commissioner to Worlds Fairs. He is one of those travellers who assimilate what they see, and a delightful travellogist.

+ + +

In Huron County where recruiting for the County regiment began two weeks before the 160th Bruce Batt. got started, only 600 men have enlisted and the Batt. now appears to be up against a stone wall so far as securing more men is concerned. It seems strange that the County next door to Bruce, which has excelled all other counties in rapid enlistment, should have such an unfortunate experience. There is no doubt that in refusing to contribute to the expense of recruiting at its last December session, Huron County Council gave the new Battalion a hard knock. An important factor in the Bruce Battalion's success has been the excellent recruiting organization of the Battalion, acting in conjunction with the Citizens Auxiliary. In Huron they are talking of commencing a registration to show which men are needed and which men are free to go. In Bruce such a registration was undertaken at once, has been carried out, and was practically completed several weeks ago.

+ + +

READY TO BEGIN

Lloyd George, according to an interview with him in one of the Italian papers, says that for Great Britain the war is just beginning. "By next spring we shall have, for the first time in the war, more than the enemy. Our superiority in men and materials will be unquestioned." He adds that "for us the war is beginning only now." He scouted the idea of the war resulting in a deadlock. The victory must be real and final. "You must crack the nut before you get at the kernel. It may take a long time, but you must hear the crack."

In an interview published in the New York Times, of last Sunday Premier Borden is reported as saying that the British Empire will not have reached a complete stage of preparedness before June or July next. By June Great Britain will have three million men in the field and another million in reserve, to be called upon when needed. Canada will have 160,000 men in Europe, perhaps a good many more.

It is evident that both Premier Borden and Lloyd George believe that Great Britain will begin the fight in earnest this coming summer. How long it will last nobody is prepared to say, but the hope is expressed that the end will come within the next three years mentioned by Lord Kitchener at the beginning.

LEAP YEAR MINSTREL SHOW

Local Amateur Performance Under I. O. D. E. Auspices Made a Great Hit—Net Proceeds Exceeded a Hundred and Forty Dollars

A regular old-time Minstrel Show was put on at the Opera House Friday night by young people of the town under the auspices of the I. O. D. E. It was a great success in every respect. Practically every seat in the reserved plan was sold before the afternoon of the performance. Every available space was occupied and a tidy sum realized for the Daughters of the Empire patriotic work. Seldom, if ever, has there been a more appreciative audience in the Hall. The numbers were well chosen, splendidly put on, and the fact that the performing minstrels were personally known added to the zest of the entertainment.

The curtain rose on the regulation minstrel scene, with no less than seven coontown characters occupying the ends. The work of the colored brethren was particularly good throughout the evening and kept the audience highly amused. The musical program which was under the capable direction of Mr. E. H. Leeson, was bright and snappy, and carried through without the usual delays. Some new patriotic hits were heard for the first time in Walkerton. Mr. W. H. McBurney took the part of interlocutor like a professional. One of the cleverest pieces was the mouth-organ turn by Pte. Amman, in which he made two steps, Scottisches, waltzes, ragtime, out of the tune of "Nearer My God to Thee." Amman & Wissler's popular jungle piece was also put on, a clog dance by R. Ellig was another good minstrel turn. "The Recapture of Our Guns," a patriotic poem describing that thrilling incident at Langemarck, was splendidly given by Miss Mary Havill. A number of good musical numbers, all of which were greatly enjoyed, included:— Solo, "Mama's Boy," by Mr. James Heffernan; mixed quartett, "A Perfect Day," Misses M. McGregor, M. Robertson, Messrs. Leeson and K. M. Taylor; Miss Mabel Beck, of Harriston, solo, "Somewhere in France"; Mouth Organ Quartett, by members of the 160th Band; solo, Miss Verna Loughleen; "Our Own Canadian Boys,"; cornet solo, Mr. Clarence Robinson; male quartett, Messrs. Leeson, Marsh, Taylor and Schwindt, "Pickaninny Lullaby"; solo, Mr. John Marsh, "British Bull-dog watches at the Door" (Harry Lauder's latest). One of the best musical features was the closing chorus of old-time melodies, including:— "O Lily Dale," "Massa's in the Cold, Cold Ground," "Old Black Joe," "Swanee River," "Keep the Home Fire Burning," (a domestic melody credited to Mr. David Traill), and "Rule Britannia."

The cast consisted of:—

Sopranos, Mrs. Mack and Misses M. Havill, M. Robertson, C. Wettlaufer, R. Schwindt, V. Loughleen, M. O'Malley, R. Clarke and O. Haughan. Altos, Mrs. C. Clarke and Misses L. Wettlaufer, N. Wilson, M. Beck and M. Cook. Tenors, T. Lamb, J. Heffernan, H. Henderson, B. B. Patten, M. J. McNab, H. Oliver, J. Marsh, R. A. Eamer. Bassos, O. S. Schwindt, W. B. Thompson, K. M. Taylor, R. B. Whitehead, F. D. Matchett and Geo. Wilson. End Men, Messrs. S. L. Wisler, J. C. Ammann, Fred Godwin, M. La France, N. A. Walford, Bruce Rogers and R. Ellig. Interlocutor, Mr. W. H. McBurney. Accompanist, Mr. Clayton Tovell, and 160th Orchestra.

Manager K. M. Taylor and Conductor E. H. Leeson were greatly pleased with the way everything went. It was worth all the hard work that the production entailed, to have it put on without a hitch. To the ladies of the Daughters of the Empire, the financial success was most gratifying. About $140 will be netted after paying all expenses. The Ladies Committee who had charge of the business arrangements was composed of: Mrs. H. G. Hunter, Mrs. Player, Mrs. Geo. Walker, Miss Havill, Miss Haughan.

BRUCE COUNTY STOCK SALE

Registered Shorthorns and Holsteins Brought Fair Prices—Big Crowd of Buyers Were on Hand

A large crowd of stock breeders, including a number from a distance, attended the first annual consignment sale of Shorthorn and Holstein cattle, held on the Market Square last Thursday afternoon. The affair was held under the auspices of the Bruce County Pure Bred Stock Association. Prices realized were fair, and the directors were well pleased considering everything, with their first attempt, and are confident that the sale will become one of the most important fixtures of the kind to be held in the province.

The Committee in charge of the sale were:— President, Thos. H. Jasper, Carlsruhe; Vice-Pres., W. A. Tolton, Walkerton; Sec., N. C. McKay, Walkerton. Mr. John Purvis was auctioneer and Mr. G. E. Tolton acted as ringmaster. The directors of the Association are:— Geo. H. Armstrong, Teeswater; Jacob Dippel, Walkerton; Wm. T. Hopper, Paisley; Henry Hossfeld, Walkerton; Jacob Miller, Mildmay; Jas. Moore, Walkerton R. R.; Herbert H. Pletsch, Carlsruhe; Abram Rowand, Walkerton; G. E. Tolton, Walkerton; Jas. L. Tolton, Walkerton; Jas. Thompson, Mildmay.

The sales were as follows:—

No. 1, Diamond Chief Second, red, November 20th, 1912, bred by T. W. Reynolds, Carlsruhe; sold to Yuill & Bowes, Calgary, for $100.

No. 2, Diamond Duke Second, red, little white, January 26, 1915, bred by Thos. W. Reynolds Carlsruhe, sold to James Halliday, of Greenock, for $104.

No. 3, Greenock Chief, dark red, Feb. 12th, 1915, bred by Thos. Austin, Greenock, second owners, James Tolton & Son, Walkerton, sold to Wm. Berry, Walkerton, for $75.

No. 4, Bruce, April 6th, 1915, bred by G. E. Tolton, Walkerton, sold to John Lints, of Midmay, for $75.

No. 5, White Hero, Oct. 28th, 1914, bred by William T. Hopper, Paisley, Ont., sold to Geo. Hossfeld, Walkerton, for $125.

No. 6, Elvira's Choice, June 25, 1915, bred by Thos. H. Jasper, Carlsruhe, sold to Wm. Riley, Walkerton, for $80.

No. 7, Otter Creek Choice, April 16, 1915, bred by Thos. H. Jasper, Carlsruhe, Ont., sold to Geo. Moe, Gorrie, for $117.

HIGH SCHOOL REPORT

The following are the result of examinations held during the month of February. The names are given in order of merit.

Form 1.

HONORS—Leo Yack, A. Johnstone, H. Everett, N. Lay and W. Polfuss, equal.

PASS—P. Garner, A. Reinhardt, D. Kenny, E. Ramsey, F. Myles, F. O'Neill, C. Wilton, W. Brown, M. Bonnyman, I. Wisser, W. Small, J. Coumans, D. Moore, H. Jasper.

BELOW PASS—H. Lewis, M. Wilson, A. Millhausen, S. Taggart, H. Johnston, W. Lettner, J. Michell, D. Cunningham, B. Farewell, G. Henderson, E. McNab, H. Patterson, N. O'Malley, J. Elder, J. Gill.

Form 2.

HONORS—A. McCool, M. Baechler, C. Tovell, E. Coulter, E. Hyslop, A. Weller, M. Forsythe, E. Glave, D. Frost, G. Young.

PASS—Leander Bilger, N. Pinkerton, B. McCool, V. Eidt, O. Pfohl, V. Tovell, E. Lindsay, W. Ramsey, M. Kenny, T. Queen, C. Cargill, M. Leech.

BELOW PASS—G. Lewis, F. Scherrer, E. Bandhauer, L. Batte, N. Wilton, E. Stevens, Lillian Bilger, M. Hyslop, H. Irwin, M. Chisholm, S. Brocklebank, E. Millhausen.

Form 3.

HONORS—I. Everett.

PASS—S. Bush, A. Pinkney, F. Cunningham, M. Coulter, O. Seigner, C. Fortune, W. Wilson, O. Schwindt, G. Rogers, M. Weller.

BELOW PASS—L. Bilger F. Taylor, A. Garland, C. Petteplace, J. Rowland.

Form 4.

HONORS—W. Berhe, W. Tanner.

PASS—M. Green, J. Wells, J. Hickling, C. Thornburn.

BELOW PASS—M. Coumans, K. Foster.

MALCOLM

The Farmers' Club held their regular monthly debate on Monday evening, subject: "Resolved that Women possess more Influence than Men." Messrs. M. A. McCallum, Josiah Dierstien and Wm. Tulloch for the affirmative and Messrs. D. Willoughby, Alex. Rae and Fred Engel for the negative. Judges, John Bierwirth, Hy Ahrens and James Rae. The Judges awarded their decision in favor of the negative, but the ladies claim that the affirmative won the Debate. The Elmwood Glee Club were present and rendered some very enjoyable music. Miss Leslie, elocutionist, from Elmwood, added greatly to the evening's entertainment. Messrs. Schwindt and Dierstien sang a duet. Mr. Herman Monk, the president, filled the chair in his usual style.

Mr. Christian Hoffman, who has sold his farm to Noah Gateman, of 4th con., held his auction sale last week. His stock and implements sold for a good figure. The usual large crowd was present.

Mr. John Tindale is offering his farm for sale or to rent and will have an auction sale soon. It is expected that John Bieswirth and Andrew Milne will probably rent his farm for this summer.

The O'Neill Bros. have sold their 200 acre farm to Chris. Pegelo, who has sold his 100 acre farm to C. J. Liefso.

Wm. Ahrens intends erecting a new house on his farm this summer.

Fred Jacklin, treasurer of Brant township, has moved the large desk and safe from Mrs. Coulter's to his home on 12th concession.

Mr. William Prochnow is doing a large business in chopping grain for the farmers of the neighborhood.

Mr. John Liefso leaves shortly for the West with a car load of settler's effects and horses.

Mr. Fred Ahrens, who has been buying horses for the West, loaded a car at Elmwood last week.

Geo. Lamont has been away assisting in the organisation of Masonic Lodges. He has developed into considerable of an orator.

SOUTH LINE

Charles Lines of Swift Current, Sask. who has been visiting friends on the South Line, where he was a former resident, informs us of his bountiful harvest of 1915 and that he threshed 31,000 bus. of grain. He has his own threshing outfit and 64 horses, and owns 3,900 acres besides renting 3200 acres. Chas. has made good in the 12 years that he has been out west.

MAPLE HILL

The "Girls Aid" held another of their series of dances in aid of the Red Cross Fund, at the home of Mr. Aug. Pletch. It proved, as the rest have proved, a success, having realized $12.50. There was a number present from Walkerton and surrounding country and those present report a most enjoyable time. The girls have made a nice little sum in aid of this great work and though this is not by any means the last, they take this opportunity of thanking all who helped in this work.

SCHOOL REPORT

Jr. IV.—Willie Sickle, Layton Glauser, George Pinkney.

Sr. III.—Pearl Sickle, Craigie Leach, Ruby McNaughton, Perry McNaughton, Wilmer Glauser, Wilfred O'Keefe.

Jr. III.—Allan Burrell, Reuben Harnuck, Mayme Pinkney, Laverne Brocklebank.

Sr. II.—Anna Schilling, Grace Leach.

Jr. II.—Graham Pinkney, Douglas Walker.

Primer—Gertrude Harnuck, Audrey Pinkney, Laureena Schilling.

ELLA M. TEEPLE,
Teacher.

OTTER CREEK

January and February School Report.

Sr. IV—Charlie Polfuss 75, Edward South 70, Jennie Jasper 70, Stanley Wilton 65.

Sr. III—Bertha Polfuss 95, Albert Polfuss 90, Ottilia Polfuss 85, Zenobia Miller 77, Elsie Jasper 61, Evelyn Hossfeld 68, Martha Voigt 40.

Jr. III—Lizzie Polfuss 90, Wilma Koenig 72, Olivia Smith 58, Louise Hossfeld 66.

Sr. II—Lorena Voigt 71, Edward Voigt 73, Arthur Hossfeld 70, Nellie Jasper 60, Wallace Wilton 50, Arthur Prochnow 47.

Sr. I—Alma Krueger, Freddie Polfuss, Martin Polfuss, Katie Hossfeld, Evelyn Weber.

Jr. I—Willie Hossfeld, Orlando Smith, Annie Hossfeld.

Primer—Hilda Hossfeld, Matilda Voigt, Herbie Prochnow.

M. B. Hogg,
Teacher.

RIVERSDALE

SCHOOL REPORT

The following report is based on the examinations held during February. The names are in order of merit. Those marked thus * have been absent at one or more of the examinations. The names of those who did not obtain 60 p.c. on the subject examined, have been omitted.

Jr. IV., Honors—Frank O'Hagan, Helen Deitrich; Pass, Albert Sadlo, Augustine Moore, Marion Petteplace, Jas. Petteplace.

Sr. III., honors—Alvin Racher, Ella Moore, Clement Cascagnette; Pass, Agnes Cassidy.

Jr. III., Pass—Lilyan Hoffman, Eugene O'Hagan, Joseph Cassidy, Morley Petteplace.

Sr. II., Honors—Florence Dietrich, Norman Racher, Josephine Benninger, Melinda O'Hagan; Pass, Norman Hoffman, Thompson Lees, Willie Cassidy*, Murdock McKinnon*.

Jr. II.—Mary Moore, Wilfrid Moore, Robert Racher.

Sr. I.—Ritchie Cascagnette, Bert Dietrich, Florence Mosack.

Jr. I.—Agnes Moore, Willie O'Hagan, Marjorie Cassidy, Thomas Moore, Rena Moore, Catherine Petteplace.

Primary—Sherman Benninger, Jas. Cassidy, Emily Cascagnette, Doris Lees, Jimmie Cascagnette, Marie Mosack. Average attendance for February 40.—JOS. A. DIETRICH, Teacher.

VIOLENT ATTACKS OF DYSPEPSIA

Suffered Tortures Until She Tried "Fruit-a-tives"

ST. JEAN DE MATHA, Jan. 27th, 1914.

"After suffering for a long time with *Dyspepsia*, I have been made well by "Fruit-a-tives." I suffered so much that at last I would not dare to eat for I was afraid of dying. Five years ago, I received samples of "Fruit-a-tives" and after taking them I felt relief. Then I sent for three boxes and I kept improving until I was well. I quickly regained my lost weight—and now I eat, sleep and digest well—in a word, *I am fully recovered*, thanks to 'Fruit-a-tives.'

MRS. CHARBONNEAU.

50c. a box, 6 for $2.50, trial size 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

POETS' CORNER

MEN OF BRUCE

(With apologies to the Simcoe Reformer that printed it for the men of Norfolk)

Men of Bruce, where is the pride
That your fathers bore in the days gone by?
Where is the grit, where is the sand
That made us members of this free land?
Men of Bruce, in your might arise,
And do what your fathers did in days gone by.
Arise in your might—the flag to shield,
Arise, for your country must never yield.
Arise in your power and prove today
That men of Bruce will defend the flag
You must not wait till the German guns
Sound o'er the land and our women run;
You must not delay till like Louvain and Liege,
Our towns are shelled and no streets we see.
Men of Bruce—those who care
For mothers and babes—do your rightful share,
Share in the work that men must do,
Share in the glory that's ours to be soon;
Men of Bruce, arise, arise,
The country calls. Will you answer the cry?
The country calls and calls again,
Men who are men, come rally to the flag;
List to the cry of women and babes
In Belgium and France who were cruelly slain.
Is it naught to you that the Huns should come
And ravish your mothers as they of have done
To others whose homes were leveled with shells?
Who pitched suckling babes into poisonous wells,
Is it naught to you if women are slain
For helping your brothers across the main?
Is it naught to you if the day should dawn
When the flag that we love is pulled down in scorn,
While you sit at home and not help the cause?
Men of Bruce, arise, arise.
Don now the clothes that are worn with pride,
Shoulder the gun that stands for right,
Men of Bruce, arise in your might;
Remember the day is dawning soon
When Hun and Briton must decide who's who.
Men of Bruce, what do you say?
Will you prove yourself men and enlist today,
Or will you let the world and your women folk see
That you are a coward and sit at your ease,
While men who are noble their country defend
And will give their lives for one common end.
Freedom and liberty.
Men of Bruce—answer the call,
Many have gone and many must fall;
But what is death, so long as we
As a nation remain—both brave and free?
Men of Bruce, come rally today,
Your country calls you—come answer your name.

News About Town

Mrs. Thomas Thomson left last week for Eden Grove to attend the funeral of her brother, Mr. Alexander. Her son, Will, is there, he having returned from Western Canada.—Lion's Head News.

Mrs. Bauman, who has been visiting her sister, Mrs. Bott, returned home recently to Morristown. Before her departure the two sisters paid a visit to their brother, Mr. Wm. Obrecht, at Southampton.

Jonathan Conklin, an old resident of Amabel Township, passed away at the House of Refuge on Feb. 28th, in his 83rd year. He had been poorly for about seven months, death being due to senile decay.

In a letter to his parents, Corp. Arthur Taggart, states that he is now with the 9th Batt., and expects to go to France shortly. He had a great time while on a week's leave recently in Scotland, being royally entertained in several beautiful homes.

Walter Schnurr, who has been in the employ of the Mildmay Electric Light Co., for nearly two years, has gone to Southampton to take charge of the lighting plant in that town.

Miss Vera Dippel, of Walkerton, is visiting at Sunnyside the home of her grandmother, Mrs. L. A. Noecker.—Drayton Advocate.

In a letter to Miss Agnes O. Smith, Mrs. R. K. Smith, of Oak Lake, Man., formerly Miss Maggie Smith, of Walkerton, says that the present winter has been the worst in nineteen years in that section, both for snow and cold weather. Nearly all the young men in that section have enlisted, and the farmers are getting desperate over the prospect of no help for the coming year.

+ + +

Death of A Young Wife.

On Friday last there passed away at the home of her parents at Dunkeld, Mrs. J. J. Skalitsky (nee Lizzie Schuler) of Viking, Alta. She was a young woman widely known in the old neighborhood, and there is deep sympathy for the husband, parents, and the little fifteen months old motherless son. Mrs. Skalitsky became a victim of rheumatics while travelling West last November spending the summer here, and since that time her condition became gradually worse. Previous to that time she had undergone operations at the surgery of the famous Mayo Bros., at Minneapolis, Minn., and had enjoyed a measure of good health up to November last. The deceased was born in Oxford county, coming with her parents to Dunkeld thirteen or fourteen years ago. Less than three years ago she was married to Mr. Skalitsky, a former resident of Dunkeld, who has conducted a creamery at Viking, Alta., for a number of years. Besides her husband, little son, and parents, she leaves four brothers and two sisters:— John, of Hardisty, Alta.; Jacob, of Viking, Alta.; William, of Brant; Lincoln, at home; Mrs. Symonds, of Dunkeld; and Miss Emmie, at home. The funeral was held on Sunday afternoon. Rev. Mr. Mosack, pastor of the Walkerton Lutheran Church, conducting service. A large concourse of friends and neighbors followed the remains to their last resting place.

CARD OF THANKS

The Walkerton Branch of the Bruce County War Auxiliary desires to thank the following gentlemen, for their assistance in providing conveyances to carry the officers and men, of the 160th Battalion, to the meeting at Mildmay, and from the station at Hanover:—Alexander George, R. M. Player, George Bros., George Leitner, R. E. Truax & Son, W. J. McNally, John H. Wiles, Karl McKay, John Miehlhausen, Alexander Ernst, Thomas McEntee, P. Dippel, John Ernst, Joseph J. Zettler, Reinholt Weiss.

Our expression of appreciation is given not only on behalf of the War Auxiliary, but also on behalf of the Officers and Men of the 160th Battalion.

Judge Klein, President. Geo. D. Mackay, Secretary.

+ + +

VALUE OF LIGHTNING RODS

Professor W. H. Day, of the Agricultural College at Guelph, in an address at the Mutual Fire Underwriters' Association at Guelph, pointed out that lightning rods must be sufficiently large to carry the stroke of lightning, and must also be durable. An added good point, he said, was pliability that would allow of easy installation. A rod made of copper was what he advised on account of the durability of this metal. In addition to the use of good material, care must be taken, in installing the system, to see that rods are grounded from the eaves of the building, as either metal or wet wooden roofs are very subject to lightning stroke and damage is likely to occur if the current is left to climb to the peak of a building. The speaker showed, by means of figures taken from the records of numerous fire insurance companies, that, if it is profitable for farmers to insure their buildings, it is economical to have these buildings protected by lightning rods.

+ + +

CANADIAN SMALL CITIES

The table below shows the population of a number of small cities of Ontario when the census was taken, and at present with the number of chartered banks in each:—

	Banks.	Census 1911.	Pop'l'n Present
St. Catharines	12	12,484	16,180
Sherbrooke	10	16,405	19,205
St. Thomas	8	14,054	17,029
Windsor	8	17,829	22,992
Prince Albert	9	6,254	15,000
Berlin	8	15,196	19,054
Kingston	8	18,874	21,150
Port Arthur	8	11,220	19,025
Belleville	7	9,876	11,812
Guelph	7	15,175	17,000
Swift Current	7	1,852	6,765
Three Rivers	7	13,091	20,000
Welland	7	5,318	8,000
Brockville	6	9,330	9,641
Galt	6	10,299	13,014
Portage La Prairie	6	5,892	7,000
Stratford	6	12,946	17,004
Sudbury	6	4,150	7,060
Chatham	6	10,770	12,133
Fredericton	5	7,208	8,500
Lindsay	5	6,964	7,672
Barrie	4	6,420	7,038

OUR HEIGHT ABOVE SEA

We received recently from the Commission of Conservation a volume bearing the title "Altitudes in Canada" from which may be learned interesting facts about our elevation along the different lines of railways. In looking over the road between Saugeen Junction and Walkerton we learn that the highest point is at summit 3.2 miles this side of the junction, which is 1,690 feet above the sea level. The following are the elevations given in feet: Saugeen Junction 1669, summit 1690, Priceville Station 1631, Glen 1420, McWilliams 1338, Durham 1126, Allan Park 919, Hanover 906, Maple Hill 901 and Walkerton 805. The elevations given are at the stations and from figures it will be seen that the road from Walkerton to a point three miles this side of Saugeen Junction is all up grade.—Durham Chronicle.

+ + +

MYSTERY IS SOLVED

The origin of the box of explosives found in a G. T. R. car at Wingham about a month ago has at last been traced, and it appears that its being in the car was purely accidental; and there was no ill intention whatever. It appears that the box of explosives was stored at Dawson, Sask., in the same room with furniture belonging to Mr. Anderson, who came to Wingham as a teacher. When the furniture was being shipped the box was put in the car along with it, the party doing the loading evidently thinking that the box belonged to Mr. Anderson. The explosives really belonged to a Mrs. Fleming, who had intended them to be used in blowing up stumps. Just where she expected to find the stumps on the prairie it is hard to say, but there may have been timber on her farm. Officer Phippen, of Wingham, did the tracing up of the box.

BRUCE SETS THE PACE

How a Staff Reporter of the Star Sizes Up the Situation.

Bruce County holds a unique record among the counties of Ontario in the matter of recruiting. Authorized on the 2nd of January, Lt.-Col. Weir has now a strength of nearly 900 from a county that has no city or any great centre of population.

	Population.	Enlisted.
Wiarton	1,200	100
Tara	800	60
Lion's Head	400	30
Hepworth	380	30
Port Elgin	600	25
Southampton	600	30

Paisley has planned a campaign by which it hopes to raise a representative draft.

Col. Weir has been indefatigable in his work. He appointed Lieut. Ernest Pettigrew to conduct a recruiting in the village of Lion's Head and out of a population of 400 he picked 30 men. Capt. Dalzal, at Tara, picked 60 out of 800. The village of Cargill with 20 out of 250 holds the record. It is doubted if any other county can show a record to equal Bruce County. The whole population, farm and town, is enthusiastic over this record. The battalion will be recruited in a few weeks' time.

WALKERTON R. C. LADIES

Entertained the Soldiers of the 160th at Supper in Town Hall on Wednesday Evening. — An Enjoyable Dance Followed.

When the men of the 160th Batt. go overseas they will surely carry with them pleasant memories of the bountiful hospitality of the ladies of Walkerton. Another of the series of banquets which the men have been enjoying, was held at the Town Hall on Wednesday evening last, the ladies of the Walkerton Roman Catholic Church being the hostesses on this occasion. A menu that would tempt an epicure had been prepared, probably the most elaborate banquet that the boys had yet enjoyed. Oysters, meats and salads of every description were served in abundance, and it goes without saying that ample justice was done. The hall was decorated for the occasion with flags and bunting, the flags of the Allies floating across the stage. The speechmaking of the evening established a new precedent. Only a few remarks were expected from the speakers who bore greetings to the boys, interspersed with an occasional funny story and a bit of well merited praise for the ladies. Rev. Father Haller introduced the following speakers:—Lt. Col. Weir, Judge Klein, Major Moffat, Capt. Chadwick, Reeve McNab, Mayor Lippert, Judge Greig, G. S. Schwindt, Rev. D. A. Walker, Rev. H. Perdue, Rev. Fr. Goodrow of Chepstow. Rev. Fr. Cummings was unavoidably absent, having been called to Hamilton owing to the illness of his father. At 7.30 the speechmaking was over and the hall cleared for dancing. A great throng of young people were on hand for this part of the program, the dancing floor being filled to its capacity. Excellent music was provided by the 160th orchestra, Miss Gertrude Oberle acting as accompanist. Everybody enjoyed a throughly good time.

A WINNING FIGHT

Mr. T. H. Race Tells what is Being Accomplished Against the Great White Plague.

"A Winning Fight Against The Great White Plague" was the title of a most interesting address delivered by Mr. T. H. Race, at the Town Hall on Sunday night after church. Mr. Race presented what might be considered dry facts in a way that made his talk not only instructive but entertaining. The purpose of the campaign is to educate the people of Ontario into taking proper precaution against infection and the spread of the disease. The necessity for ventilation in the home was emphasized. The danger to children of milk from tuberculive cattle was dealt with. The speaker told of a single dairy in the city of Edinburgh which had caused more deaths among infants than all other causes for three years. Thanks to the magnificent work initiated in this Province by Messrs. Massey, W. J. Gage and others, the number of cases in proportion to population has been reduced by one-half in Ontario the past fifteen years. If the work continues to receive the same encouragement from the people, Ontario will be rid of tuberculosis in twenty year's time. The lantern, operated by Mr. Harvey Damm, showed a number of interesting views of the Muskoka Sanitorium, Muskoka Free Hospital, the Cottage Hospitals etc. The audience followed Mr. Race's talk with the greatest interest and gave a liberal collection to help the good work.

A FINE EXAMPLE

Of Unselfish Sacrifice is Furnished by Rev. Fr. Cadeaux, the Little French Priest of Cape Croker.

When Judge Klein at the big meeting at Wiarton made an appeal for money to buy instruments for the 160th Regimental Band fund, Father Cadeaux of Cape Croker stepped forward and said all he had was the sum of $5, and he then handed it in for the fund. Next morning a number of his Protestant friends, and who are unknown to him, sent him in cash $15. On that day when Judge Klein made an appeal again at Hepworth, Father Cadeaux who was there as a speaker, came forward and told the meeting of the receipt of the $15, and stated it was more money than he has had at any one time for a long time and said $10 would keep him for a while and then gave another $5 to the Band Fund. He is in charge of the Catholic Indians at Cape Croker and out of a population of about 400 souls, has sixty Indians enlisted. He tore down partitions in his own house and put in a pool table so that his enlisted Indians could use it as club room. He says it is a pity that the white man should be obliged to take a lesson in loyalty from his Indians.

Personal Canvass Begins.

Personal Canvass for recruits for the 160th, by the men of the Regt. and the Bruce War Auxiliary is now under way. All the concessions and sidelines of the County will be visited and every eligible man will receive a personal invitation to join the colors. A general letter was issued by Sec. Geo. D. McKay of the Bruce War Auxiliary on Saturday calling upon farmers and others to volunteer the use of a horse and vehicle for one or more days a week to assist in rural recruiting.

Byron Pink Tomato

FREE

A post card addressed to us as below, with your name and address written on the other side, will cost but one cent. Drop it in the nearest mail box, and it will bring promptly a copy of our illustrated 80-page catalogue for 1916. With it will come also—free—a 15c. packet of

Byron Pink Tomato

A perfectly formed tomato, the Byron Pink is uniform, large, and attractive. The flesh is firm, and the flavor delicious and full-bodied. It is a robust grower and a heavy cropper. It is an ideal tomato for forcing. You are going to buy seeds anyway; then you might just as well send for our catalogue and get this free premium for yourself.

The Catalogue tells about the other valuable premiums which we give with every order.

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so life-like, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

S. W. VOGAN

If the British Fleet Had Not Moved!

(By Archibald Hurd.)

There is no better way of concealing the truth than to use trite phrases which have passed into everyday speech. They are so familiar that they make little impression on the mind; no one pauses to think what they mean. We can trace their atrophying process in religion, natural science and politics. Just now in all the allied countries there is talk of "the command of the sea." Who stops to consider what the words mean? Whoever calculates what the cost in human life and treasure would have been had the Allies not had "command of the seas"? Who, again, ever examines the facts to ascertain exactly why the Allies possess this advantage?

What course, for instance, would the war have taken if the British fleet had stood by, had not intervened in the struggle? The naval situation at the moment when Germany determined to trample on Europe's freedom was not a little remarkable. By means of successive naval acts, Germany had first overtaken Russia, then Italy, and, finaly, France, and she could count on the support of the Austro-Hungarian navy, which under her guidance had greatly expanded until it rivalled that of Italy. The Germans had so completely outdistanced all the other continental powers of Europe in ships of war that, on the outbreak of hostilities, they, with the co-operation of Austria-Hungary, were absolutely assured of the command of the sea, if the British fleet did not move. The two enemies had an enormous preponderence in effective ships of all classes over France and Russia and these ships, every seaman admitted, would be handled with enterprise and skill.

Sea command is still exercised by armored ships and cruisers. In the first line of battle, the dreadnought class, the odds were 21 to 4 at the outbreak of war. In the second, 52 to 27, but of the Russian ships several were shut up in the Baltic. In armored cruisers the strength of France and Russia—the ships being mainly obsolescent—was more apparent on paper than real, and in scouting ships the Central Powers had no mean advantage. Even if Italy had joined the powers of the dual alliance, Germany and Austria-Hungary, with strategical advantages of no mean value, would have possessed a sufficient margain against their opponents.

There would have been no blockade of the North Sea. "What of that?" it may be said. Well, it would have meant that the Germans could, with slight risk, have transported troops to any point on the French coast. The value of superior sea power in amphibious warfare is the element of strategic surprise which it confers on its possessor. A German army might have been secretly concentrated at Hamburg or Emden on a Saturday, and early in the following week might have been landed on some portion of the French coast, taking the French army in the rear or flank. The advantage of the Germans would have laid in the ignorance—unavoidable ignorance—of the French authorities of the spot chosen for disembarkation. The French fleet would have been tied in the Mediterranean by the menace of Austria-Hungary; and the German navy would have had no difficulty, owing not to superior seamanship but to superior numbers, in seizing the command of the North Sea and English Channel. The sea in itself is no defence to a country like France, but a menace in the absence of naval protection, for armies can be moved in these circumstances more easily by water than by land.

Would it have been a matter of no consequence if the Germans had had this power of strategic surprise in their hands? There is good reason to believe that they had laid their plans for the invasion of France from the sea. It is reported that they had transports ready, as well as troops to put in them, on the assumption that the British people, secure in their island, would conclude that the war was none of their business.

But that is not all. The Germans would not only have obtained this overwhelming military advantage, but would have been able to shut off all French overseas commerce. Think what that would have meant! No merchant ships throughout the duration of the war would have been able to enter or leave French ports without running the gauntlet of the enemy's patrols—cruisers, destroyers and submarines.

Nor, again, is that all. France and Russia had no men-of-war of great fighting weight in the outer seas; the Germans were represented by some of their most powerful and swift cruisers. What would have been the fate of the mercantile marine of France? These merchant vessels represented in value many kings' ransoms. About 16,000 sailing ships and 2,000 steamships would have been in danger, together with cargoes. What the fate of many of them would have been may be judged from the exploits of the Emden, Konigsberg, and other enemy cruisers before they were destroyed. Russia's merchant ships would have shared the same misfortune.

For the period of the war—how long would it have lasted? Russia and France would have been, to all intents and purposes, besieged. Neither country would have been able to use the sea for any purpose. That condition would have reacted on their military and economic power. They would have been in a position to bring in no food, raw materials, or ammunitions. The Germans, and not the countries of the Dual Alliance, would have had the run of the neutral markets of the world for munitions, men and money. In the American continent alone there were—and are—about 20,000,000 Germans and Austrians, who could have supplied not only men to reinforce the armies of the Central Powers in Europe, but men to make munitions and other men of great financial and industrial experience—some of them illionaires—to assist Germany in ting gold, raw materials for all oses, and even luxuries. Life be the lines of the German armies ve continued much as under itions. The population of mpire were eager for believed that even Russia and France, on using all the seas to their advantage, drawing from them everything they required.

Were their calculations ill founded? In one particular they were. They assumed with confidence that the British fleet would take no part in the war. They were wrong. That one error of judgment made all the difference; it is more than probable that it cost the Germans the victory they believed in the last days of July, 1914, to be within their grasp. Why? When the war broke out the relative strength of the British navy was almost in the proportion of two to one in comparison with that of Germany. Think what that meant. All the conditions at sea were instantly reversed. German hopes were doomed when they German anticipations as to the use which would be made of the British navy proved unfounded.

Why do the Germans hate the British people more than French or Russians? It is not because of the wealth of England, or her trade, or her colonies, or her shipping, or her armies of 3,000,000 men—it is because the British fleet so decisively turned the scale that from the date of the British ultimatum the £300,000,000, which the enemy had spent on naval expansion, became profitless. Germany realized, as in a flash, that owing to the majesty of the greatest sea power, she could not obtain the rich dividends from her naval expenditure on which she had counted with complete confidence. In those fateful days of July, 1914, German Ministers argued with the diplomatists of England: 'This is not your quarrel; you are not a Continental Power; leave us to settle matters between ourselves on our side of the North Sea and English Channel, and you stand aside and you will be safe—in fact—you will be able to make huge profits out of the war.'

The Germans were, in a sense, right; it was not England's quarrel, as far as material things went, and England was protected by her fleet, which for a thousand years had prevented any invader landing on her shores. But, nevertheless, England threw down the gauge not in defence of her material interests; not in the hope of gaining territory; not in the belief that any indemnity could be extracted which would pay the cost of her warlike operations. She intervened not merely to avenge Belgium and to defend France, but to defend civilization; and she has since had reason to appreciate that, in defending all she holds most dear. But in the early days of the war, when the British fleet was mobilized and took up its war stations, this truth was not realized as it is to-day, because we did not then know the real heart of Germany. With the intervention of the British fleet, Germany's confident assurance of victory was undermined.

The predominant influence on the history of the world has been not the soldier, but the sailor. A Frenchman once said that it was the ships of Nelson which won the battle of Waterloo. England has never possessed a great army; nor has the United States. When the German Emperor read the books of the American seaman, Admiral Mahan, he determined that he must have a great fleet, because from the days of Xerxes and Themistocles navies have decided the fate of empires. It might be said that all the decisive battles of the world have been fought on the seas. That would seem a bold statement, but it is a clear approximation of the truth. Without sea power, land power—that is, soldiers—must be imprisoned, and, in modern economic conditions, may well be reduced to starvation—starvation for want of shells as well as food.

In the present war, the two-to-one British fleet, with the co-operation of the much weaker, but splendidly manned, navies of France, Italy and Russia, wrested victory from Germany because it divorced her from the sea. The great English sailor and statesman, Sir Walter Raleigh, once declared that "whosoever commands the sea commands the trade; whosoever commands the trade of the world commands the riches of the world, and, consequently, the world itself." The German Emperor believed profoundly in that statement as one of the greatest of political and economic truths. Owing to the British fleet, he has learned that the converse is true: Germany commanded nothing but an army which, because it is cut off from the sea, must be defeated. He has seen the ships of his merchant navy, second only in size to England's merchant marine, either destroyed or compelled to fly to neutral ports; he has seen German commerce strangled, representing an enormous loss; he has seen almost all his colonies wrested from him. Since the war began, owing to victorious sea power, Germany has been bleeding to death; she has been able to secure no remedies to relieve her condition. She is like a gourmand shut up in an island prison in sight of profusion of his favorite foods. Germany, with a fleet inferior only to that of England among the navies of the world, is imprisoned by British sea power, while, in southern waters, the naval forces of France and Italy, with the assistance of England, have reduced Austria-Hungary and Turkey to the same condition. The Allies are using the seas—which provide military and economic strength—almost as though they were not confronted by two of the most considerable fleets in the world. They, and not the Germans, as the history of the war has revealed, possess the power to land soldiers when and where they like. They and not the Germans are able to enter the great neutral markets. They and not the Germans can send merchant ships where they will. And of the sea power which is the foundation of the confidence of the Allies in victory, England has contributed just that overwhelming margin of safety which has rendered the fifteen years of German naval expansion, with all its grandiose ambitions, a mere waste of £300,000,000.

DIVORCE COURTS.

(Ottawa Evening Journal)

Why in the world shouldn't Ontario, Quebec or any province have a divorce court? Four provinces, Nova Scotia, New Brunswick, Prince Edward Island and British Columbia, have such courts. Does anybody notice any of these provinces to be the worse?

The man who is clothed in his own righteousness sometimes find it's a misfit

THE TONKA BEAN.

From It We Got the Perfume Known as New Mown Hay.

Grass, freshly cut or otherwise, has had nothing to do with the production of the perfume labeled "New Mown Hay." The source of the essence is really the tonka bean found in the tropical countries of South America, chiefly in the valleys of the Orinoco, Cauca and Cuchivero Rivers in Venezuela and certain sections of Columbia and Brazil.

The tonka bean tree in some cases reaches a height of sixty feet. It has pinnate leaves and large panicles of flowers, which are succeeded by a pod containing a single seed. The odor, which is remarkably strong, resembles that of sweet clover new mown hay, and is due to the presence of cumarin, a crystallizable, volatile, neutral substance, which is soluble in alcohol or ether and somewhat so in boiling water, from which it crystallizes on cooling. The beans are often frosted with crystals of this substance, giving them the appearance of being sugar coated. The collectors in Venezuela and Colombia usually set out for the forests in February, when the fruit begins to ripen. They go up the rivers in canoes or skiffs by the hundreds, stopping wherever the trees are plentiful, and when the fruit begins to fall the pods are gathered and taken to some open space where sunshine is plentiful and there carefully crushed and the beans extracted and then spread out to dry. When thoroughly dried they are loaded into the boats and transported to Ciudad Bolivar or some other convenient port, where they are sold to the exporting merchants. Here they go through the process of crystallization by being steeped in strong rum or alcohol for about twenty-four hours and then again dried.

They lend their fragrance to high grade tobacco, fine toilet soaps, to "brilliantine" and other hair dressings and dyes, to cosmetics, to flavoring extracts used in confections and to many other things that gratify the sense of smell.

MAPS ON GLOBES.

The Spheres, Made of Brown Paper, Are Wonderfully Strong.

Few people could say of what substance globe maps are made and would be astonished to hear that brown paper is the chief material used. A matrix of wood is covered with strips of brown paper which have been well smeared with paste. The paper is laid on the matrix until it is about a sixteenth of an inch thick and the globe looks like a round football. When this paper covering is dry it is cut midway between what will be the two poles, removed from the matrix, and after an axis has been fixed in it the two hemispheres are glued together. Then this sphere of brown paper is coated with a composition plaster, the ingredients of which are a trade secret, and again left to dry.

After being tested to see that it is an exact sphere the meridians are marked on the globe to guide the girls who finish the work. The globe is then fixed in a clamp which holds its axis, and a girl takes the engraved gores, cut ready for use, and pastes them on without overlapping. If the globe is exact the gores should fit so exactly that you cannot see where they are in the completed globe.

When the gores have dried on the globe is colored by a hand process, which is also done by girls, and then polished. The globe is now ready to be mounted on its stand and to have its meridian fitted. Formerly, says the World's Work, when the industry was most flourishing, the metal and wood work connected with the fitting formed separate industries, but to-day the globe maker does the whole work on his own premises.

It might be mentioned that globes could stand on one and not break it. Indeed, you cannot break one without using great violence.

HIS VIEW OF TIPPING.

It Was Not the Mere Money That the Old Waiter Craved.

Tips are said to be an evil of our times, but the man who has to give them makes the statement. That vast number that receives the largest has probably found it no crime. There is much to be said on both sides, but I cannot think that it is a system which should be, indeed, can be abolished, for the giving of a tip is the recognition of personal service. It is the only way one can thank a man who is not, in his present capacity at least, in the class of the one who dispenses the coin. And there is another reason—to argue for the other side—that was most beautifully exemplified in a story which came to me recently.

A friend of mine took into service an indoor man one who had attracted her attention as a most perfect waiter in a hotel. She paid him the same amount that he averaged as a waiter, and she found him as satisfactory in her own home as she had expected him to be. Yet at the end of a few months he begged to return to his more exhausting duties in a great caravansary.

"I don't know as I can make it plain to you, madam," he said to her earnestly, "but it's the tips that I look forward to. Not that they are any more, on the whole, than I get here, but there's always an uncertainty about it. I keep wondering if I am to get a good deal or very little, and it makes the day interesting. It's a kind of an adventure, in a manner of speaking, madam."—Louise Closser Hale in Century.

Origin of Heraldry.

According to the highest authorities, heraldry finds its starting point in the totemism of prehistoric man. In the barbaric custom of painting or carving the totem on oars, the bows and sides of canoes, weapons, pillars in front of houses, etc., and in tattooing it on the various parts of the body we have the real origin of the insignia that are so precious to the upper ten-dom of to-day. It was in the ignorant superstition of the savage that he sprang from a crane or a bear or some other animal that the various "coats of arms of the "big families" of the present time found their inception.

Druggist—Something for a headache? Certainly, will you drink it now? "No, but I'll need it in the morning. I'm entertaining an out-of-town customer to-night whose wife is a prohibitionist."—Life.

The Freedom Of the Seas

The Times correspondent at Washington in Wednesday's issue quotes the New York World as responsible for the statement that the Government of the United States are about to issue a protest asserting that our present policy towards contraband "contravenes the traditional British attitude in regard to the treatment of foodstuffs," and that it "runs counter to the views of the Government as expressed during and after the formulation of the Declaration of London." The New York World goes on to suggest that "as the Order in Council was proclaimed as a retaliation for the German submarine campaign, it ought to be abandoned if Germany is now really prepared to abandon her 'blockade.'" We sincerely hope that this does not represent the real intentions of the American Government, and that no action of theirs will be based upon it, though of course we can well believe that the German diplomats have been moving Heaven and earth to induce the President and the State Department to act as their cat's-paw and to take a line which superficially looks fair and reasonable. 'We,' say the Germans, 'give up the indiscriminate sinking of enemy ships when and where we can and without affording any real protection to the passengers and crews, but in response to that great concession the United States must sternly request and require that Britain shall give up her blockade, or by whatever name she calls her policy towards contraband.'

It is obvious that if the United States falls into this trap, and then tries to support her demand by such elaborate verbal devices as those indicated in the New York World, a position of very great danger and inconvenience may arise, which we are certain would be deeply regretted by the best friends of America here, and also by the most far-seeing and most patriotic of Americans. In our opinion, the best way to prevent the emergence of a condition of things highly dangerous for both nations is to make it clear to America what is the real position of the British people on this vital matter. What America has to consider is not the verbal ineptitudes of our Foreign Office or any other department of State, but the feelings that are stirring and will control the heart and the brain of the nation as a whole. We want, if we can to show the American public what is the true attitude of our people, for in all controversies between two such States as ours the danger on both sides is ignorance and misunderstanding rather than ill-will. We are quite sure that the Washington Government, let alone the American people, are not essentially hostile to us, do not want to injure us at a vital point, and are not deliberately seeking to tie our hands behind us in the final round of our death struggle with Germany. Yet if they are ignorant of our attitude they may drift into, or rather be enticed into, action of that very kind.

If in the course of our plain speaking to America we have to say things which are disagreeable to our own Government and Foreign Office, and which no doubt will be bitterly resented by them, we shall be sorry, but it cannot be helped. This is a case in which there must be the plainest of plain speaking or serious harm will ensue. The first thing that we may ask the American Government to remember is that the British people cannot and will not be entangled in a net of words. That such entanglement will prove easy is, we grant, more than likely. The State Department at Washington is served by men of much quicker wits and abler pens than our Foreign Office, and we shall not be in the least surprised to see an argumentative victory won by the President and Mr. Lansing over the attempts to define such words and phrases as "blockade," "retaliation," and "freedom of the seas." Still more easily will they be able to secure a verbal triumph over the ridiculous attempt of our Government at the beginning of the war to protect their own amour propre by pretending to maintain the Declaration of London, when in reality they were abandoning its chief provisions. To the State Department, engaged in the easy task of knocking verbal sparks out of our Foreign Office, we want, then, to say what is said by a character in one of Stevenson's novels: "You cannot fight me with a word." They may obtain any amount of dialectical successes over our diplomats, but that will make no difference to the determination of the British people, nor will it alter by one iota the facts behind the words. Call it a blockade, a policy of retaliation as regards war zones, the organic development of contraband of war, or what you will, the fact remains that, come what may, we mean to use our sea power to bring Germany to her knees, and shall not allow the accident of the peculiar geographical position of certain of the neutral powers to defeat a policy essential to our existence as a free people. Germany is a besieged nation, and we are the besiegers. That is the long and short of the matter. To imagine that we are going to raise the siege, or maintain it as a bloodstained sham, because of the geographical difficulties of which we have spoken is utterly to misread the character of the British people. They are no more going to surrender to a punctilio of this kind than the Government of the North would have surrendered to it during the Civil War. Any Minister here who was to suggest that we ought to relax our hold upon the neck of Germany because we could not "square" it with some foolish statement made three or four years ago as to the Declaration of London would be literally hurled from office by his indignant fellow-countrymen. No departure from the policy and practice of a siege can or will be tolerated by us.

But while we shall insist upon the maintenance of the siege of Germany, and not allow it to be rendered void by the technical claims of neutrals or by that sinister figment called "the freedom of the seas," invented by the Germans as a lure to American public opinion, we shall of course do nothing which will infringe the substantial and legitimate rights of neutrals. We cannot allow them to feed and supply Germany under the cloak of neutrality. On the other hand, we have no desire to make them suffer any unnecessary hardships because we are at war with Germany. All their just rights will of course be respected, even though we cannot concede that Germany must be supplied with food and articles necessary for the manufacture of munitions as long as there is a neutral label upon them and somebody is willing to swear they are not consigned to German merchants or intended for German consumption. Though, as we have said, we are not going to wrangle over such words and phrases of "blockade," "retaliation," and "freedom of the seas," or once more hold up the Declaration of London to hatred, ridicule, and contempt, and do not intend to allow "the fatal imposture and force of words" to nullify all our sacrifices, a special word may be said in regard to the phrase we may say, indeed, what South said of "verbal magic" in general:

"The generality of Mankind is wholly and absolutely governed by Words and Names; Without, nay, for the most part, even against the knowledge Men have of things . . . . As for the sense and reason of it, that has little or nothing to do here; only let it sound full and round, and chime right to the Humor, which is at present a Gog (Just a big, long, rattling name is said to command even adoration from a Spaniard), and, no doubt, with this powerful, senseless engine, a man shall be able to carry all before him, or to draw all after him, as he pleases. For a plausible, insignificant word, in the mouth of an expert demagogue, is a dangerous and a dreadful weapon."

Just such a word of praise is "the freedom of the seas," though there it is not the expert demagogue, but the expert diplomat who is trying to use the "dangerous and dreadful weapon."

In all seriousness, we would ask our American kinsmen to pause before they allow the phrase "the freedom of the seas" to be used to embroil the English-speaking race. We are at war, not playing a game of cards or polo. We are fighting for our lives, and to save ourselves and the freedom—strange as it may seem in such context—of the small and neutral nations we must maintain the siege of Germany. In sober truth, "freedom of the seas" means, not what it says, but "the freedom of Germany" to pass in blood and fire over Belgium and Serbia and the Northern Provinces of France, and to slay and ravish and burn. The true freedom of the seas it has always been our part to maintain. Who dare assert that we have ever used our naval power to tyrannize over our neighbors or to serve our selfish ends? Others may have talked of the freedom of the seas. We have maintained it. We are maintaining it now. Was it we who sank the Lusitania, or the Arabic, or the Ancona, or did the deeds of shame which have so deeply stirred the American people? Let America look behind the words of the facts and not be bemused by high-sounding phrases, and we have no fear as to her verdict.—London, Eng., Spectator.

Had Dyspepsia.

Says HE NEARLY TURNED UP HIS TOES.

Burdock Blood Bitters CURED HIM.

Mr. H. N. Manderson, Stettler, Alta., writes:—"About twenty-five years ago, in the Province of Quebec, I came very near turning up my toes with dyspepsia. A cousin of mine persuaded me to try Burdock Blood Bitters. In about two weeks I could eat anything, from raw fat pork to unleavened bread. Three bottles did the job, and I have never been troubled with my stomach since. We would say that this is wonderful if you could only see what we sometimes have to live on in this country; bannock, half cooked beans, etc."

Burdock Blood Bitters has been on the market for the past forty years, and cannot be excelled as a medicine for all diseases or disorders of the stomach.

B.B.B. is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

WHEN THE SUN DIES.

Deadly Havoc the Change Will Enact Upon Our Poor Planet.

"If the sun should go out how long would it be before darkness would appear on the earth?" asked a reader.

Eight minutes, eighteen seconds and five hundred sixty-six one-thousandths of a second!

At the end of that brief interval of time the blue curtain of day would disappear as if an almighty hand had snatched it off, and the dome of night, spangled with stars, would instantaneously arch the earth. We would be plunged into darkness so quickly that for a moment nothing would be visible. Then the piercing rays of the stars would begin to affect our eyes, and after that, gradually, our immediate surroundings would dimly emerge from the gloom. There would be starlight, but no moonlight, for the moon shines only with reflected sunlight.

At first the disappearance of the light would be the thing most troublesome to us, but as time went on a chill would begin to creep over the sunless earth, and out of the dark and frozen air, all around the globe, a pallid snow would descend, as the atmospheric moisture condensed. When days and weeks had elapsed the awful cold of outer space would chill the atmosphere down to the earth's surface and animal and vegetable life would alike perish in the endless winter of universal night!

Some sins do bear their privilege on earth.—Shakespeare.

Heart Would Beat Violently. Nerves Seemed to Be Out of Order.

The heart always works in sympathy with the nerves, and unless the heart is working properly the whole nerve system is liable to become unstrung, and the heart itself become affected.

Milburn's Heart and Nerve Pills will build up the unstrung nervous system, and strengthen the weak heart, so that the sufferer will enjoy the very best of health for years to come.

Mrs. John N. Hicks, Huntsville, Ont., writes: "I am sending you my testimony for the benefit I have received from using Milburn's Heart and Nerve Pills. As a nerve and heart builder they have done wonders for me. At times my heart would beat violently, and my nerves seemed to be all out of order, but after using a few boxes of Milburn's Heart and Nerve Pills I feel like recommending them to others that they might receive benefit as I did."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years, and are universally considered to be unrivalled as a medicine for all disorders of the heart or nerves.

Milburn's Heart and Nerve Pills are 50c. per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

RUSSIAN VIEW OF BELGIAN KING

"Just imagine," a clever Russian woman said to me last night, "what the German Emperor would give to be a world hero like King Albert of the Belgians. Just think what different verdicts history will pass upon them. King Albert will be held up to admiration as the ideal sovereign—brave, noble, modest; a true friend of peace, yet, when his country was attacked, a stern warrior, a real leader of his people * * * The Emperor William, on the other hand, what will history say of him?"

"It will say," broke in an impetuous young Russian officer, "that he had Napoleon's ambition without any of Napoleon's genius. That his people were annoyed by his fussy vanity in peace time, while his generals cursed him for a meddler in war. That his word could not be trusted, that honor found no place in his weak character, and that he was guilty of one of the most revolting crimes ever committed when he deliberately invaded and ravaged Belgium, the country which he was pledged not only to respect, but to defend."

The speeches are typical of the state of Russian feeling. They were made at the Imperial theatre, the Comedie Francaise of Petrograd. We had gone there to see a play by the most famous Russian dramatist, Andreef, a play which shows with poignant mastery of effect the pitifulness of Belgium's suffering, but at the same time gives confident assurance that her wounds shall be healed and her soil restored to her, cleansed of the invaders' polluting feet. You may think my friends were under the influence of moving scenes and powerful declamation. No, I assure you. What they said is said every day by Russians of all classes without any emotional stimulus.

It is a fine, hopeful feature of this war that among the Allies none of us are fighting for our own advantage. We are not in it for what we can get out of it. France, certainly, will regain the provinces taken from her in 1871, but only because they want to be French once more. Russia will win her desire to have the Dardanelles kept open, which will give free entrance at all times to the Mediterranean, but only because Turkey insisted on being driven out of Europe. Serbia is fighting for existence, Russia for Serbia's right, to exist as a small nation threatened by Austria. France and Belgium are defending themselves against an unprovoked brutal attack. We are keeping our promise to Belgium, and Japan is keeping her engagement with us.

Compare that record with the aims of Germany and Austria. Germany declares that she hopes for money, territory, and power. She admits that she prepared for war in order to obtain these advantages ("a place in the sun"). It is clear that she declared war because she thought the most favorable moment for obtaining them had come. As for Austria, she is struggling, in her pathetic, dotard fashion, to keep up that tradition of tyranny which left so foul a stain upon the history of the nineteenth century. The motives of these two criminals are selfish and cynical. Never has war been waged for more material sordid ends. It is because our hands are clean, and the hands of all our allies, that we have the world's sympathy on our side.

It is both surprising and cheering to find Russian hearts so warm in their feeling toward Belgium. Russia's interests are all in other directions. Yet nothing arouses people here so vitally as the thought of Belgian wrongs and woes, so vividly as the heroic struggle of the small nation against its over-bearing, bullying big neighbor. At the Imperial opera, and at other theatres, too, it is the custom, at a certain point in the performance, for the orchestra to play the national anthems of all the allied powers. Every one stands up. Each is applauded. The one which is always applauded more loudly than any of the others is "La Brabanconne," the Belgian national song. I heard it repeated as many as three times.

Our "Rule, Britannia," is well received. (They will not play "God Save the King," because they consider it a German tune, although it was composed by Lully, a Frenchman.) The "Marseillaise" stirs audiences, the Serbian hymn charms them. After the Japanese, they clap with friendly fervor, though the music has puzzled their ears. Their own rolling melody they welcome, of course. But it is the Belgian national song which calls forth the deepest and longest demonstration of sentiment.

This play, "King, Justice and Liberty," arouses enthusiasm such as Russians seldom show in the theatre. As a rule, they applaud little; scarcely ever do they interrupt while a piece is in progress. But when an actor representing the King of the Belgians appears on the scene there is an outburst which cannot be checked. At the close of the "tableau" he is called again and again.

It is in the fourth of the six "tableaux" into which the drama is divided that "Count Clermont" appears. The programme explains that this character is meant to stand for King Albert, while the leading figure in the play represents M. Maeterlinck. First M. Andreef shows us the land at peace. Suddenly the alarm-bells sound, the tramp of marching feet is heard, the confused murmur of an outraged people rises in the sunny August air. Then the famous writer, Grellier (Maeterlinck) determines to fight along with his two sons. That is in tableau two. The third is an episode of war, very tragical to me because I saw just such realities in France; the night reddened by a burning town, fugitives huddling together and sobbing on the outskirts, destitute and hopeless, watching the homes where they lived contented and, in their humble way, prosperous, being destroyed with everything they possess.

Next we see Grellier wounded; to him comes the king with prime minister and adjutant. They seek his advice. Should the dikes be opened and a district by the enemy flooded? "Yes," says the greater writer, after an inward struggle. There is besides a tiny incident illustrating King Albert's character in a manner which brings tears into the spectator's eyes. Young Grellier is with his father, wounded also. The king notices him, holds out his hand.

"But, sir," the boy murmurs, "I am only a common soldier."

"What of that?" replied the king, kindly and simply. "I am only a soldier myself."

Fifth tableau: German staff officers at their headquarters. Neat little sketches of Prussian character, not over-satirized. All very pleased with themselves until the news comes the dikes have been pierced. water is coming nearer, nearer, ne Every instant a messenger rushes with worse tidings. At last the of the flood is in their ears. scene closes with a wild sauve peut.

Last comes a short scene, in wh Grellier, now an inspired seer, prophsizes for his country a happy iss out of all her afflictions, and awa goes the audience more resolved tha ever to listen to no talk of peace unt the wrong done to Belgium has bee righted, so far as such devils' wor can be repaired.

Worthy of notice—is it not?—that the aspect of the war which appeals more than any other to the leading Russian dramatist, and to audiences at the leading Russian theatre, should be the suffering of Belgium and the shame of Germany's broken word.

A good omen. A sign of promise for the future. A sign that the European family of nations is drawing more closely together, and following the same ideals and setting the interests of men and women above the tyrannous claims of statecraft based on "Might is Right."—London Mail.

THE GREATEST OF FIELD GUNS

(St. John Telegraph.)

What happens in and about an ordinary German trench when the French 75-millimetre guns are turned upon it is told in a remarkable way by one of the French writers whom the government permitted to see the army in action a few weeks ago. The French seventy-five is now regarded as the greatest field gun in the world. It is capable of twenty-five aimed rounds a minute. It fires either shrapnel shells of sixteen pounds or high explosive shells weighing a little less than twelve pounds. The lighter shell has a muzzle velocity equal to that of the small bore rifle. The bursting charge is melinite.

On the day when the writers were permitted to see the French field guns in action the batteries were getting ready to shell an expanse of German trenches two miles away. The observers were stationed with a captain of artillery, some distance from the batteries, under an old roof, from which position they watched the German trenches through powerful field glasses. The artillery captain gave his orders by telephone. The first shell was fired at 3,500 yards. It went a little too far. The next was at 3,400 yards. It was a little too short. The observers then expected the captain to say 3,450 but he said 3,440. They were astonished to see a battery commander handling fractions of fifty yards in a range two miles. Also, they were a little sceptical. But that shell burst on the parapet of the trench. Then, to their greater surprise, the captain changed to 3,443 yards, and that shell burst in the trench itself. Then he gave the order for rapid firing from the whole group of batteries, and they burst into the much dreaded rafale, or storm of fire. One of the observers who was watching the German trenches through a fine field glass describes what followed:

"At this the din becomes deafening. The thumping behind us merges into a sullen roar; but only for a moment. Suddenly the whole German front for a width of 200 yards is black with bursting melinite. The inferno dominates everything else. The seventy-five's take complete charge of the situation. The rifle fire dies down on both sides and our infantry stands rapt in amazement in the midst of the commotion. The rate of [illegible] for a moment. If anything it increases in intensity. Lumps of shapeless debris, whole sandbags, bits of beams, bit of planking, a rifle, the head and shoulders of a lifeless body, the arms flickering loosely in a way which tell of broken bones. One after another the scrap heap hurtles high in the air as the melinite explodes in the very midst of the German dugouts. The lumps of stuff turn slowly over in the air, lump following lump as a seizes you. Can't you stop the beastly din?"

Then the storm of fire is over, and as the smoke rises they see the result:

"A long shallow depression full of debris where once the trench had been. The Germans were wiped out. Slowly one clay colored lump detaches itself from the rest, and with an infinitely pitiful weariness scrambles to its feet. Blind, half-naked, groping with outstretched arms, it stumbles towards us, and falls flat on its face. All is still."

CARE OF GOOD CLOTHES.

The Finer the Stuff the More Watchful One Should Be.

It is a very common mistake to believe that good materials, whether of cotton, silk or wool, need less care than cheap ones. How often does one complain of the lack of wearing quality in a garment for which a big price has been paid. Yet, most frequently, what has worn out the fabric has not been actual use, but the neglect it has suffered.

One of the principal differences between good and cheap materials is that the better grades are finer spun. This may mean that the fabric is stronger and, in proportion to the uses to which it is put, may wear longer, but it also means that each tiny thread by itself is weaker and more apt to injury. Anything which may attack the threads one by one, therefore, does more harm with fine goods than with coarse.

No matter how careful one may try to be, clothes that one wears gradually get a trifle of the grease from the perspiration of the body. In spite of constant watching clothes will become dusty. This combination of dust and body moisture forms a regular breeding ground for tiny little vegetable growths. These are so small that it takes the most powerful microscope even to see them.

In themselves these bacteria do but little harm, but many of them set free an acid which eats in the fiber of the material. If the individual fiber is coarse the deposit of the acid upon it is not enough to eat all the way through, but if it is sheer or woven of fine threads one by one the threads are eaten through and the texture weakened.

Good clothing, instead of being kept shut away in boxes and drawers, should be constantly aired and shaken. The finer the material the more often should it be looked after. A coarse piece of goods will wear out by using, a fine piece by being laid away.

"Love makes the world go round," quoted the Wise Guy. "Yes," agreed the Simple Mug, "it makes the world go round so fast a lot of us get dizzy."

ARM AND GARDEN

TESTS IN LAMB FEEDING.

Much interest of late is developing in the fattening of lambs on the farm. It has been proved to be profitable to the farmer, and as a result the industry is growing.

Both the Purdue University Agricultural Experiment Station (Lafayette, Indiana), and the University of Nebraska Agricultural Experiment Station (Lincoln, Nebraska), conducted a series of experiments that extended during 1914 and 1915.

For the Purdue University trial choice Western lambs were purchased on the Chicago market, and were fed for 98 days.

Before being started on feed, the lambs were divided into nine equal lots of 25 animals each. All lots were as nearly equal as possible as to weight, quality, condition, thrift, sex and breed. Lambs were fed twice daily at the same hours. Lots 1 to 8, inclusive, were fed in an open shed facing south, upon different rations. Lot 9 was fed in a well ventilated barn.

The following rations were fed:

Lot 1—Shelled corn, seven parts; cottonseed meal, one part, and corn silage.

Lot 2—Shelled corn, two parts; oats, one part by weight; clover hay and corn silage.

Lot 3—Shelled corn and clover hay.

Lot 4—Shelled corn and alfalfa hay.

Lot 5—Shelled corn, seven parts; cottonseed meal, one part; oat straw and corn silage.

Lot 6—Shelled corn, clover hay and corn silage.

Lot 7—Shelled corn, seven parts; cottonseed meal, one part; clover hay and corn silage.

Lot 8—Shelled corn, four parts; cottonseed meal, one part; clover hay and corn silage.

Lot 9—Shelled corn, clover hay and corn silage. (Fed in barn.)

For the University of Nebraska trials the lambs were purchased on the Omaha market. They were of average quality, and weighed 52 pounds. They were divided into five lots of 50 lambs each, and were fed the following rations:

Lot 1—Ground corn, ground alfalfa and corn silage.

Lot 2—Ground corn and ground alfalfa.

Lot 3—Shelled corn and good alfalfa hay.

Lot 4—Shelled corn, good alfalfa hay and corn silage.

Lot 5—Shelled corn and poor alfalfa hay.

RESULTS AT PURDUE.

The feeding of corn silage in addition to hay and corn resulted in more rapid and more economical gains on the lambs. There was a saving of $1.21 on each 100 pounds of gain and an increased profit of 40 cents per head by the use of corn silage.

Corn silage without dry roughage was not as satisfactory as when fed in combination with hay or straw. The lambs were harder to keep on feed and made less rapid gain when no dry roughage was fed. The addition of oat straw greatly improved the ration and proved more economical than the addition of clover hay.

Clover hay was slightly superior to alfalfa hay as roughage for fattening lambs. There was no difference in the quantity of feed eaten by lambs on the two rations, but the rate of gain was more rapid and the cost of grain was less when clover hay, instead of alfalfa, was fed. There was a greater profit when clover hay was fed.

The use of cottonseed meal in a ration of corn, corn silage and clover hay [illegible] economical. The rate of gain was higher, the cost of grain was less and the profit [illegible] increased by the use of the cottonseed meal. The lambs fed a ration of corn, corn silage and clover hay returned a profit of $1.01 per head; those fed corn, seven parts; cottonseed meal, one part; corn silage, and clover hay returned a profit of $1.15 per head, and those fed a ration of corn, four parts; cottonseed meal, one part; corn silage and clover hay returned a profit of $1.32 per head.

The addition of oats to a ration of corn, corn silage and clover hay decreased the rate of gain, increased the cost of gain and decreased the profit per head. Lambs fed corn alone as grain returned a profit of $1.04 per head as compared with 67 cents per head when oats were added to the ration.

Lambs fed in a well ventilated barn ate the same quantity of feed and gained practically the same number of pounds in weight as others fed the same ration in an open shed. The lambs fed in the barn did not develop into as firm-fleshed animals as those fed in the open shed and were not as valuable for selling purposes. There was a difference of 10 cents per hundred pounds in selling value and a difference of ten cents per head in profit in favor of feeding in an open field.

RESULTS AT NEBRASKA.

The ration composed of shell corn and alfalfa hay gave somewhat the best results, although shelled corn, alfalfa hay and corn silage proved to be and alfalfa and feeding the two as a mixture was not profitable. The gains were scarcely as great as where the whole grain and whole hay were fed, and the cost of grinding made the feed considerably more expensive.

The feeding of a poor grade of alfalfa hay, namely, typical first cutting, off-colored hay, with shelled corn, in comparison with the feeding of a good, clean grade of leafy alfalfa with shelled corn, indicated that the former was not nearly as valuable as the latter in producing mutton. In fact, the good hay proved to be twice the value of the poor hay.

The daily amount of feed consumed and the net profit in each lot was as follows:

Lot No. 1—1.49 pounds of ground corn, 0.596 pound of ground alfalfa and 0.725 pound of silage. Net profit 88 cents.

Lot No. 2—1.57 pounds of ground corn and 0.845 pound ground alfalfa. Net profit, 89 cents.

Lot No. 3—1.414 pounds shelled corn and 0.94 pound good alfalfa hay. Net profit, $1.10.

Lot No. 4—1.45 pounds shelled corn, 0.813 pound alfalfa and 0.453 pound silage. Net profit, $1.10.

Lot No. 5—1.472 pounds shelled corn and 0.90 pound poor alfalfa. Net profit, 98 cents.

FARM NEWS AND VIEWS.

That more farmers are keeping their hogs on clover pasture in summer, and in light, clean well-ventilated pens in winter, is given as a reason for the greater prevalence of hog health during the past year. And it is undoubtedly correct.

The practice of selling calves, yearlings and other cattle by weight has become common in the Eastern States, where a few years ago it was the custom of the cattle buyer to visit the farms, inspect the herds and select the stock he wanted at so much per head, basing the price on his own estimates of weight. Under this system the drover took no chances, and the farmer usually lost out in the deal. The only business-like method of selling cattle, sheep or hogs is by actual weight, and the farmer should be on hand to see the weighing done.

The secret of the farmers' success is, "We have learned to feed ourselves."

The man who expects to harvest a full crop will not wait until planting time to plow.

It looks as though the year 1916 will prove another year of exceptionally high prices for cattle.

FINANCIAL SENSE.

Take Care of What You Earn and Then Invest It Wisely.

The greatest financial genius I ever knew and the richest man I ever knew personally once said to me:

"There is no greater financial genius possible than taking care of what you earn, and there is no better or surer way of taking care of your surplus than to invest it in sound securities paying 5 or 6 per cent. And such securities are easy to find any day of any year. So any man may be a financial genius if he will exercise the simplest common sense."

I protested that it would be said of such a man that he was narrow and selfish.

"Nonsense," the financial genius replied. "I have money invested in railroads, in packing houses and in manufacturing enterprises. Could money be invested more usefully? Yet it is as safe as government bonds and pays a better rate of interest. I invest my own money, but a man without financial experience may secure safe investment without difficulty. If a man has a bank account his banker will find safe investments for him. Bankers are men of financial experience, and 99 per cent. of them are intelligent and honorable. There is no excuse for a busy man losing his savings. Many women, when they come into possession of money lose it because they invest it in schemes bankers would not trust, or else the women loan their money to men who could not borrow money at a bank. Everything in life is simple and easy if we would only accept experience and be careful of big and sensational notions. Financial sense is knowing that certain men will promise to do certain things and fail. Therefore when you invest your savings get security. And it is no more trouble to get good security than it is to get bad if you are guided by common sense and experience."

MOTHERS

REMEMBER! The ointment you put on your child's skin gets into the system just as surely as food the child eats. Don't let impure fats and mineral coloring matter (such as many of the cheap ointments contain) get into your child's blood! Zam-Buk is purely herbal. No poisonous coloring. Use it always.

USE ONLY ZAM-BUK FOR CHILDREN'S SORES

NEURASTHENIA THAT FOLLOWS LA GRIPPE

Rest and a Tonic Is the Proper Treatment Distinguished Medical Authority Says.

There is a form of neurasthenia that follows la grippe. Doctors call it "post-grippal" neurasthenia.

One of the foremost medical authorities of New York city in a lecture in the international clinics, said:

"Broadly speaking, every victim of la grippe will suffer from post-grippal neurasthenia also. Lowering of nervous tone, with increased irritability is the most striking effect of the disease, languor of mind and body, disturbed fitful sleep and vague pains in the head and elsewhere. The treatment calls for rest and a tonic."

If you have had la grippe read these symptoms again: "Languor of mind and body, disturbed, fitful sleep, and vague pains in the head and elsewhere." If you have any or all of them it means that you are still suffering from the effects of la grippe and that you will not be well and free from danger of relapse until your blood is built up.

The treatment, says the distinguished physician quoted above, is rest and a tonic. Dr. Williams' Pink Pills, a non-alcoholic tonic, are particularly suited for building up the blood and strengthening the nerves after an attack of grippe. The rich, red blood expels the lingering germs from the system and transforms despondent grippe victims into cheerful, healthy, happy men and women.

If you have had la grippe do not wait for a relapse or for the neurasthenia that so often follows grippe, but get a box of Dr. Williams' Pink Pills now from the nearest drug store and begin the treatment at once.

You can get Dr. Williams' Pink Pills from any medicine dealer or by mail, at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

A GUN'S RANGE.

Main Factors Are Initial Velocity and Angle of Elevation.

The distance a shot can be thrown depends primarily on two things—the velocity with which it leaves the muzzle and the angle of elevation above the horizontal. Other things affect it also, but these two are all important. Of course a light shell will lose its velocity quicker than a heavy one, for it has less stored up energy to overcome the friction of the air. Temperature and the humidity of the air both have their effect. But the two great features are initial velocity and angle of elevation.

Any one who throws a ball knows that it is higher near the centre of its flight than at either end. The farther it is thrown the higher it is at the centre. It was long ago found that any projective to reach a maximum range must be thrown at about forty-five degrees above the horizontal. This applies to a baseball as well as a 1,000 pound shell. If it is thrown higher it falls short in distance, for too much of our effort has been expended in giving it height. If thrown lower gravitation pulls it to the ground before it has covered its maximum distance.

Another thing—the ball or shell falls at a greater angle than that with which it started. If it is thrown at forty-five degrees elevation it will fall with nearer sixty degrees because of the retarding effect of the atmospheric friction. This friction is continually slowing up the projectile and eventually all but stops it. But meantime the action of gravitation is pulling it farther and farther downward from its initial path. The net result is to bring it to earth much sooner than if the second half of its flight were the counterpart (reversed) of the first half.—Sidney Graves Koon, M. E., in Leslie's.

Just a Straight and Simple Story

MISS BLANCHARD TELLS OF DODD'S KIDNEY PILLS.

They Cured Her Kidney Troubles and Other Sufferers Can Learn From Her Experience How They Can Find a Cure.

Paquetville, Gloucester Co., N. B., March 6.—(Special)—Simple and straight to the point is the statement of Miss Justine Blanchard, of this place. She has tried Dodd's Kidney Pills and found them good and she wants everybody to know it. Miss Blanchard says:

"I suffered for a long time with my kidneys. I used Dodd's Kidney Pills and they cured me completely."

One simple statement like this is worth a dozen learned dissertations on Kidney disease. It tells the sufferer from kidney trouble just what he or she wants to know—that a cure can be found in Dodd's Kidney Pills.

For Dodd's Kidney Pills are no cure-all. They are purely and simply a kidney remedy. The reason why they cure Rheumatism, Lumbago, Diabetes, Bright's Disease, Heart Flutterings, Dropsy, Pain in the Back, and other diseases is that all these are either Kidney diseases or caused by disordered kidneys. Dodd's Kidney Pills cure them by curing the kidneys.

CURIOUS CONDENSATIONS.

Amsterdam in 1914 had more than 600,000 population.

British Columbia's annual mineral output is valued at $30,000,000.

About half a ton of whalebone is obtained from one whale, its value being, roughly, $5,000.

Two English physicians are experimenting with a parasite with which they hope to exterminate the flies of their country within a few years.

Chile in 1911 produced 45,000,000 metric tons of copper.

There is one grocery store to every 300 inhabitants of the United States.

Scientists in Germany are trying to find some way to utilize the great amount of fuel contained in 500 square miles of peat beds in Southern Bavaria.

Olives which are dead ripe are delicious, but extreme care is required to preserve them.

Several garages in Southern California wash the cars with water heated by the sun's rays.

Michael McCluskey, an employee of the Baldwin Locomotive Works, of Philadelphia, has two little fingers on each hand, and two little toes on each foot. All the extra digits are perfectly developed.

An electric motor no bigger than a watch is said to produce one horse power.

Fifteen years ago the total annual cost of the British army was only a little more than $35,000,000. The present war is costing Great Britain $15,000,000 a day.

A jitney rolling-chair service is operating between Venice and Ocean City, Cal. The chair is the shape of a back-to-back sofa and holds ten or a dozen passengers.

At least 25 per cent. of the larch timber over large areas in Eastern Oregon has been killed or weakened by mistletoe, and the forest service is taking steps to combat the pest.

Knocking On Wood.

"Knock on wood" is one of the most antique expressions in use to-day instead of being modern slang, according to Professor William F. Blade. The expression dates from a custom in vogue 5,000 years ago, when wood was regarded as the antipathy of evil geniuses. Metals were regarded as tabooed by certain spirits, and if a man handled these metals he immediately touched wood to appease the spirits. Ancient records show that King Solomon's temple was built with wooden tools and implements made of precious metals, for iron was tabooed and would have polluted the temple.—Exchange.

The "Land of Cattle."

Italy may fairly claim to be senior among the nations of Europe, so far as its name is concerned. The peninsula has been "Italia" almost as far back as even legend reaches. According to Mommsen, the "Itali" proper were the inhabitants of the southern part of the country. As to the origin of the name, there is the normal legend of a King Italus, but his name must have been pronounced Vitalus and Vitulus, which means a bull calf, and it is easy to recognize in it an allusion to Italy as the land of cattle.—Spectator.

GILLETT'S LYE

HAS NO EQUAL

It not only softens the water but doubles the cleansing power of soap, and makes everything sanitary and wholesome.

REFUSE SUBSTITUTES.

GILLETT'S LYE

THE POULTRY WORLD

THE PREVENTION OF DISEASE.

Without a good foundation no man would expect to build anything of great value. The health and strength of a flock of poultry depend largely upon its foundation. In breeding or selecting the stock from which to build a flock the greatest care should be taken to start your strain from a line of ancestors which have been physically perfect and free from illness of any kind. Like breeds like, and with strong ancestors there is no difficulty in raising a flock of strong young birds. Filth breeds disease, and the greatest care to avoid filth is necessary even from the time the hen is set or the incubator is started.

If one is buying his foundation stock, whether young birds or old ones, it is wise to be pretty sure there are no germs of disease lurking near and great care should be used in making your selection. If all is clean about the place where the birds you are looking at are kept the chances are that it is a good place to buy; but if there are signs of filth everywhere it is better to be cautious, for where there is filth there is pretty sure to be disease.

Disease germs do not often penetrate the oviduct and a fresh laid egg is usually free from them, though germs may be acquired under a hen in a short time. Eggs rubbed with a dampened cloth dipped in alcohol will be absolutely free from germs, and if then placed under a hen that is free from lice and mites will hatch chicks that are free from disease of any kind, for inherited diseases are rare and can be absolutely avoided by never using for breeding purposes hens that have ever shown signs of sickness.

In the first days of the chicks' life, even if they have been hatched under the perfect condition just described, there are two great dangers—that they will be overfed and that they will become chilled—either of which is likely to prove disastrous. Although overfeeding is not as dangerous as chilling, either is likely to lead quickly to white diarrhoe, and the two conditions combined are likely to result fatally to the entire flock, or at least the greater part of it. But this does not make it necessary to keep them; there is a happy medium both as to feeding and protecting them from cold, which is not difficult to reach if one uses judgment and care.

A little food often, removed before it can become filthy or sour, water so arranged that they cannot get into it and scatter it about, getting it on themselves or the litter; coarse sand or fine grit for the digestive organs, a uniform temperature of 700 degrees or thereabout, and the little fellows have all they need to make them thrive and grow.

It is not the purpose of this article to deal with the feeding of poultry, but it may be said that proper feeding is of the utmost importance. This means that the birds should at all times have a balanced ration suited to their age and condition. With young chickens in particular it is necessary that they have everything they need and nothing more, for they will often eat all they can get whether they need it or not. It is quite important that all food either animal or vegetable, which has soured or become putrid be kept away from them, and indeed from hens at all ages—or disastrous results are quite likely to follow.—H. L. Goodwin in New York Sun.

POULTRY NOTES.

Breeding pens should be mated by this time. Early chicks are the best for the beginner. They are well developed by the time the hot days and nights of summer arrive, and reach maturity at a time when eggs are the highest.

The baby chick trade is starting earlier their year. One will find that each year this line of trade will have an increased output beginners becoming educated along the line that early hatched chicks pay the best.

Buff Orpingtons are becoming more popular every year. Always a fowl of good quality, the many up-to-date breeders have done much to make them popular among poultry keepers. As far their merits have been placed before the public with fairness and it is good enough to make them stand the test as a good all-round fowl that has both utility and quality, as well as being a beautiful fowl to look at.

Indications point to a steady improvement in poultry conditions. The wild-cat schemes of a few years ago are passing away; and a safer and saner poultry industry is bound to be the outcome. It has been helped a great deal by the practical writings of men in the press who know by experience.

There are many methods of feeding poultry with more or less satisfactory results; but the safest method in the long run for both chicks and fowls is the so-called dry-feeding method. Especially is this the method for those beginning in poultry. This is becoming more popular every year as it becomes better understood. It gives results, and saves time and labor.

Failures in poultry are less than some years ago, and would still decrease in numbers if the advice handed out in the press from time to time was heeded. As long as beginners will start in poultry on ideas or "hobbies" of their own that are far from the known essential that go to made success, then failures will come. More is known about poultry today than ever before than formerly, if the proper course is taken.

Fertility has been good this year so far. The mild weather of the past has perhaps had much to do with it, allowing the breeders to go out and exercise on the ground for a greater period than is usual. Plenty of fresh air and exercise are good things toward fertility.

The number of fowls to be placed in the breeding pen for best results depends largely on the breed and age of the fowls. The lighter breeds, such as leghorns, one male to 15 females will usually give results. In the heavier breeds, such as the Orpingtons, Plymouth Rocks, Wyandottes and Rhode Island Reds, one male to eight or ten females, increasing as spring comes on.

CONSTIPATION.

The Best Means to Combat a Very Prevalent Evil.

The most potent remedy for this condition is habit—the habit of fixing upon a regular hour to try to have an evacuation. The bowel can be taught to empty itself at a given time. When the bowel has acquired the habit of expelling its contents at a fixed hour it will not fail to do it. No person, unless suffering from a recognized disease of the intestinal tract or of the nervous system, need suffer from constipation.

The first thing to do to correct constipation is to so arrange one's time as to have a regular hour for going to the closet, and then to keep rigidly to the hour. The majority of people having work to do every day may say, "Oh I never have time to think of taking care of myself." This type of person becomes ill from his lack of attention to himself, and all too frequently pays a heavy price for his neglect of his body's need. The human organism cannot run smoothly if it is poisoned by retained waste products in the digestive tract. No one would willingly taste or eat poisoned food for fear he might die. Indeed, death does occur all too often when people eat or drink anything poisoned. When man is poisoned by fermented and decomposed food products retained in his body he dies by degrees and slowly. Any one can recognize a man who is poisoning himself by this slow process. The stench from the gutters choked up with filth from decomposing vegetables, etc., is familiar to every one, and no one would willingly live in a locality where such unsanitary conditions existed. Yet every day in our own homes we live with people who are suffering from poison more deadly than that contained in the drains of a city. What a sad picture these people make, suffering from toxaemia (this is the name of the poisoned condition, resulting from constipation!

It is imperative that there should be a daily and free evacuation from the bowels if we wish to be in health and present an attractive appearance. Headache, irritability of temper, restlessness, laziness and palpitation of the heart are some of the most frequently recognized symptoms of constipation. A coated tongue, dry lips and a dry feeling in the mouth clearly show that the intestinal canal is inactive. The appearance of the skin is noticeable, too. It is cold and clammy or it may be hot and flushed, or it is sallow and dingy-looking. Pimples disfigure the skin whenever there is constipation. Young girls lose their pink and white loveliness when they suffer from constipation.

Among some of the diseases that result from neglecting to attend to the daily evacuation of the bowels are appendicitis, ulceration in the bowels, hemorrhoids and fevers.

When constipation has been long established it cannot be quickly broken up without the aid of medicines; these are always needed for immediate relief. It should be borne in mind by all persons that constipation can be prevented by habit, and even after it has existed it can be cured by establishing the habit of trying to evacuate the bowel at a fixed hour every day. Probably of all hours during the 24, after breakfast is the most satisfactory time to attend to this feature of the toilet.

Diet plays a part in regulating the activities of the digestive tract. The normal and daily action of the bowels may be affected by the food eaten. Fruits and vegetables (the green and fresh ones) are necessary in the daily dietary, for they increase the activity of the bowels. Water-drinking also is an urgent need; water flushes the intestinal canal, dislodges and dissolves masses of hard waste materials and sweep them downward for evacuation.

Medicine to take for the temporary relief of constipation may be given at bedtime or early in the morning half an hour or so before breakfast. What are known as saline laxatives are the medicines which give the quickest relief, such as a seidlitz powder, the contents of the blue paper dissolved in a scant half glass of cold water; then pour the two glasses of liquid together and drink it all. This dose, taken anytime during the day, relieves a severe headache or sickness in the stomach. The effervescing citrate of magnesium is excellent for the same purpose; so, too, is phosphate of sodium (effervescent). The cheaper salines are plain Rochelle salt, Epsom salt and Glauber's salt. Any one of these three salts can be bought by the pound or less. The dose of each is a heaping teaspoonful in a tumblerful of cold water, taken upon rising in the morning. Of these salts the Rochelle is the most agreeable flavor and the Epsom the least.

As our happiness depends so much upon our good health, it is most important that we take great pains to prevent loss of health. To prevent and cure constipation is taking a big step in preventing deterioration in health.

Treat some people with freezing politeness and they will at once get hot about it.

I had awful sharp pains in the lower part of back and left hip—Could only wal

Rheumatism and Lumbago

Mr. Wm. Parker, 105 Cayuga street, Brantford, Ont., tells in the following letter of his remarkable experience with Dr. Chase's Kidney-Liver Pills:—"My doctor treated me for some time for Sciatica, Rheumatism, Lumbago, but to no purpose, for I had to lay off work. The visiting officer of Sick Benefit called to see me and advised the use of Dr. Chase's Kidney-Liver Pills, stating that he had been cured of the same trouble by their use. I asked the druggist about them and he recommended them highly. Not being satisfied with this, I went back to my doctor, and when he said they were good I began their use. The promptness with which they enlivened the action of the kidneys and bowels was wonderful, and it was not long before I was rid of all my trouble. I had awful, sharp pains in the lower part of my back and left hip, and was so bad that I could only walk by hanging on to a chair or the wall. My wife had to lace my shoes. Only those who have had this ailment can realize the way I suffered. I am writing this letter to let people who have my trouble know of these pills. You are at liberty to use this letter, and if anyone interested will call or write to me I will give every detail."

When you have pains and aches put Dr. Chase's Kidney-Liver Pills to the test. By enlivening the action of liver, kidneys and bowels they cleanse the system of all poisons, and thereby remove the cause of rheumatism, lumbago and other painful diseases.

One pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Dr. A. W. Chase's Kidney-Liver Pills

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free, if you mention this paper.

CURE YOUR BAD COUGH BY BREATHING "CATARRHOZONE"

You may dislike taking medicine, but coughs are best cured without medicine. The modern treatment is "Catarrhozone," it isn't a drug—it's a healing vapor full of pine essences and healing balsams. It spreads over the surfaces that are weak and sore from coughing. Every spot that is congested is healed—irritation is soothed away, phlegm and secretions are cleaned out, and all symptoms of cold and Catarrh are cured. Nothing so quick, so sure, so pleasant as Catarrhozone. Beware of dangerous substitutes meant to deceive you for genuine CATARRHOZONE. All dealers sell Catarrhozone, large size, which lasts two months. Price $1; small size, 50c; sample size, 25c.

BLOCKADING.

Pushalong—this is not her real name but the one her crew gave her—was tramping her beat in a stormy sea, which nearly rolled over her one minute and galloped contemptuously across her decks the next.

She was on what is officially called examination duty—"blockading" is the unofficial name for it. Her business was to patrol a given stretch of water, as a constable does his beat, and see that no vessel slipped by her without giving an account of itself; where it was coming from, whither it was going, what cargo it had on board, and various other matters that many a merchant skipper would much rather keep to himself than tell a King's ship these days.

The funnels of a steamer showed upon the horizon and Pushalong raced off to meet her. Some fifteen minutes' hard steaming brought her alongside the stranger, which proved to be a merchantman flying a neutral flag.

"Lie to, I'm going to board you," signalled Pushalong. Knowing it was useless to object, the vessel obeyed the command. Out swung one of Pushalong's boats, and a search party, headed by an officer, jumped into it. Very soon they were aboard the ship, being met as they clambered over her side by the captain, who showed his papers. The search officer glanced through these. "Agricultural implements for —," he commented. "But I shall have to examine your cargo." "All right," replied the skipper, turning to his crew and ordering them to "Off hatches."

The search party looked through the ship and found her full of agricultural implements, as the manifesto stated. Everything appeared correct. But when the inspection was nearly ended a bluejacket casually tapped a plough handle. It rang suspiciously, so he pulled out his clasp knife and scraped off some of the paint. His eyes opened in surprise and he quickly picked up a ploughshare and scraped that also.

"Look sir," he exclaimed to his officer. "All copper, tons of it," and he waved his hand toward the cargo.

In a moment the officer became alert. More articles were scraped—and with a like result. It was true that the ship carried a cargo of farming implements. There were ploughs, ploughshares, harrows, and various other aids to husbandry. But the whole lot was made of copper, nicely painted over, and to the eye looked just like the real thing. It would have been no trouble to have melted them into ingots had they "got through," but they did not.

"Well, that's a cute trick," ejaculated the officer, who, turning to the skipper of the ship, said, "I'm going to take you into —"

She was a beamy old Dutch trawler. At least, she flew the Dutch flag and her skipper was apparently as jolly an old Dutchman as one could meet. He said he was a Dutchman and appearances corroborated the statement. When the patrol boat went alongside his vessel he welcomed it jovially and pointed to his wells, which were overflowing with fish.

"You seem to have made a good catch," remarked the officer in charge of the boat.

"Ja, ja, a ver' goot catch; would you like some fish for supper?" replied the skipper genially, and forthwith began throwing fish into the boat. He gave liberally, and when the boat pulled away, having found no contraband on the trawler, it carried enough fish to supply half the crew of a Dreadnought.

A few days later the same trawler, with the same hearty, professedly Dutch old seadog in command of her, was overhauled by another patrol vessel. This time only the fore well of the trawler contained fish. Her skipper sought to explain the circumstance by saying that a carrier had taken away part of his catch.

"That may be so," answered the patrol officer, "but I've done a bit of fishing myself and we never went about with one well full and the other empty. I want to see what you have got 'forrard' there. You must move the fish."

Hearing this the cloak of geniality fell from the skipper. He began to bluster, but this availed him nothing. The officer was determined. He had the fish moved, and beneath them found—a string of mines.

A naval reserve officer had overhauled a trawler that was flying a neutral flag without finding anything wrong about her, and was just about to leave when his eye fell upon a big coil of rope lying neatly piled amidships.

"That's a fine hawser you have there," he remarked.

"Yes," answered the captain, who added something about believing in keeping good gear.

"M'm," reflected the officer. "It's a big hawser for a trawler to carry. Cut it," he added, turning to one of his men.

The man did so—out spouted a stream of petrol, and the game was up.

That innocent hawser was really a huge rubber pipe filled with petrol and having hempen strands wound cleverly round it so that it looked just like what it purported to be, but was not. Quite a convenient and unobtrusive way this of replenishing the supplies of a German submarine. Even if a British warship appeared while the work was being done it was quite easy for the submarines to dive quickly while the trawler hauled in her pipe and coiled up her "hawser" nicely so as to arouse no suspicion.—J. J. in London Daily Mail.

To Clean White Kid Shoes.

A lather made of pure white soap and milk is excellent for cleaning white kid shoes. Brush off as much dirt as possible before scrubbing with the lather.

Of course women are wasteful. Just see the way they kiss each other!

Lovely New Spring Coats

Included are many new styles in smart, short belted coats and neat yoked coats. Military styles and longer coats with the wide flaring skirts. They come in beautiful new tweed mixtures, Shepherds checks and cream and striped Polo Cloths. Extra values at $8., $10. & $12.50.

The Newest Neckwear for Ladies.

White frilly collars in fine Organdy, Ninon & Georgette Crepe in Puritan Shawl and Cavalier styles with beautiful Venetian Lace edges, also handsome collar and cuff sets.

You'll find a big variety of the newest things in neckwear and there'll be no difficulty in choosing a collar that will be both becoming and stylish.

New Spring Prints.

English made and dyed-Indigo and Butcher Blues, Lilacs, Greys, Black and White and White with colored spots and stripes, all fast colors. The cloth is splendid weight, firm and pliable.

Per yard 12½c. & 14c.

New Art Pateens

Complete range of new designs and handsome colorings which are especially good for draping and quilt and comforter covers.

Per yard 12½c., 15c., 20c. & 25c.

STEPHAN BROS.

Opening This Week

TOWN AND COUNTRYSIDE

News from the Neighboring Towns and Villages Written for The Telescope by a Staff of Live Correspondents.

(Additional Correspondence on Page 4)

CARGILL

Mr. A. J. Helm of Cranbrook, Ont., spent a few days last week at the home of Mr. G. W. Keeling.

Mr. Elem Keyes left on Monday for Strathroy, where he has secured a position.

Lieut. Lee Young and Pte. Frank Sawyer of the 71st Batt. Galt and Pte. Fred Anderson of Walkerton Sundayed here.

Miss Myrtle Elder left on Monday for a few weeks visit with friends in Woodstock.

Mr. M. L. Ziegler made a business trip to Elora on Monday.

Mrs. Green is spending a few weeks visiting in Toronto and Miss Green is in Fergus.

Mr. Ed. Schnitzler returned home on Friday after spending the past three months at Trout Creek.

Mr. Chas. Hetzler of Lamlash has purchased Mr. Henry Spitzig's house on Queen St. and will become a resident of our burg shortly.

Mr. John Whitehead has moved into the house lately vacated by Henry Bros.

Mr. F. H. Smith spent Sunday in Walkerton.

Mr. Nelson Clark of Weston visited his mother on Thursday.

Mr. Elmer Garland, who has been assistant G. T. R. agent at Paisley for the past four months, has resigned and enlisted as a signaller in the 160th Batt. and left on Monday for London to take his course.

Pte. Herb Hanson of the 160th Batt. Walkerton, spent the week-end with his parents.

Mrs. (Dr.) S. J. Gibson and son, Bob, returned to Govan, Sask., on Tuesday after spending the past two months with her parents, Mr. and Mrs. John Loughleen, Sr.

Mr. James Alexander and son Jim were in the County Town on Friday.

It was with deep regret we received the news on Thursday that Mrs. J. J. Skalitsky of Viking, Alta., had passed away at the home of her parents, Mr. and Mrs. Frank Schuler of Dunkeld. The deceased, whose maiden name was Lizzie Schuler, was well known here and the funeral, which was held on Sunday afternoon to the Walkerton cemetery, was largely attended. We extend our deepest sympathy to the husband and other relatives in this their sad bereavement.

Mrs. Sam Hettrick spent the week-end in Clifford visiting her sister, Miss Annie Bowes.

Mrs. H. N. Brownscombe and son, William, spent the past week with her daughter, Mrs. William Grainger, in Stratford.

Mrs. W. J. Loughleen returned home on Thursday after spending the past three weeks with relatives in Woodstock.

There is rumor of a new butcher shop starting here, at least two of our young men are taking the short course at pig killing but possibly it is the fresh sausage or spareribs that is the attraction.

Mr. Norman Lowes of the C. P. R., Regina, formerly station agent at Pinkerton, was a caller in our village on Thursday.

Mr. G. W. Wells has had the Bell Telephone installed this week.

Tenders are now open for R. R. No. 2 which will be for cons. 8 and 10 Greenock and 6 and 8 Brant.

Mrs. Jos. Stansel Sr. and Mr. and Mrs. Jos. Stansel Jr. of Maymont Sask., formerly of this community, are renewing acquaintances here at present.

Mr. Jas. Eppert of Walkerton was a caller in our burg on Friday.

Mr. N. C. Coutts of Toronto had a very successful sale of cattle here on Saturday. Auctioneer Wes Abell wielded the hammer in his usual capable manner and good prices were realized.

Quite a number from here attended the Minstrel Concert in Walkerton on Friday night and were delighted with the programme.

Two successful euchre parties were held, on Thursday night at Mr. Geo. Colwell's and on Friday night at Mr. Chas. Kyles, and all enjoyed themselves. The burg can boast of some good players.

Mr. J. Kuperschmidt who sold his farm east of the village to Taylor Bros., moved to his new farm near Ambleside on Thursday. Our best wishes go with them in their new home.

Mr. and Mrs. Wm. Routledge and son and Mrs. Thos. Douglas who were attending the funeral of the late Geo. Routledge left yesterday for Burlington en route to their home at Pope, Man. Mrs. Geo. Routledge accompanied them and will spend some months in the Prairie Provinces with her family.

Rev. and Mrs. Fiddes entertained the Eden Grove Epworth League on Thursday evening when games were indulged in and lunch served and all journeyed home after having spent an enjoyable evening.

Mrs. Chas. Kyle spent a few days this week visiting friends in Weston and Toronto.

Mr. Horatio Parker attended the meeting of the Committee of One Hundred in Toronto on Wednesday.

Messrs. McDonald and Krug Sundayed in Chesley.

Mr. J. Marshall of Walkerton is making timber at Mrs. Elders for remodelling the barn.

Pte. Norman Pegelo of 160th Batt. Southampton, visited his parents here on Monday.

Miss Sadie McLean of Lovat spent the past week with her sister, Mrs. Frank Mawhinney.

"The Ladies' Aid of Mohawk Crossroads" will be put on at the Forester's Hall on March 17th.

After reading about a Wisconsin girl sleeping for 110 hours we are left to surmise who washed the dishes for her.

Mrs. A. Disch returned to Walkerton on Tuesday after spending a few days with her parents, Mr. and Mrs. Jos. Kunkel west of the village.

The death occurred at Clifford on Wednesday afternoon, March 8th, of Miss Annie Bowes, teacher. She had been ill about ten days with pneumonia. The funeral will take place from the residence of her sister, Mrs. Sam. Hetrick on Friday afternoon at two o'clock for Douglas Hill Cemetery.

GLAMIS

Mr. McCauley went home to Tara on Monday morning to see his mother who is ill.

Miss Martha Kirktown went to Markdale last week for a short visit with friends there.

Mr. W. J. Passmore of Lafleche, Sask., who has spent the past two months in this locality, returned home this week.

Private Geo. Stewart of Paisley spent a few days with his parents on 14th concession.

Mr. Lorne Carr who signed up for service in the 160 B has been rejected, being physically unfit. Lorne has done his BIT.

The I. O. O. F. dance held here on Friday did not prove a great success owing to small attendance. The proceeds amounted to $30 which goes to Red Cross purposes.

Mr. Will L. Oliver (grandson of Mr. and Mrs. J. C. McIntyre here) who enlisted has secured a commission in the 202nd Batt. in Edmonton

Quarterly services were conducted by Rev. Mr. Baker in the Free Methodist church during this week end, Mr. Baker also delivered a very able address on Foreign Mission Work on Sunday afternoon.

Miss Alberta Kirktown of Paisley High School spent the week-end with her parents.

Private and Miss McGregor of 6th con. Bruce, Sundayed at Mr. J. K. McLennan's.

Mr. Thos. Fullerton took in a number of cattle here on Thursday.

Mrs. Neil McLean, Boundary West, is confined to her bed with a sore limb. Her many friends hope to see her around soon.

Mr. J. E. McCauley, pastor of the Baptist church, will preach special sermons during March. The morning sermons from the Psalms and evening sermons on "Some Animals of the Bible." A cordial invitation is extended to those who care to come and do not attend elsewhere.

Mrs. Alex Kirktown who has been spending the past few months with her mother who is ill, is home for a rest.

Miss Olive Walker of Teeswater, has been the guest of her friends Misses Stewart and Purdy on 14th con.

Miss Annie McDougall of Underwood is waiting on her aunt, Mrs. Neil McLean.

The many friends of Mr. Alex McPhail will be pleased to learn he has joined the colors to fight for his King and Country and is training at Melville, Sask.

On Thursday morning the many friends of Mr. Owen Webb were shocked to learn of his death which occurred on Wednesday night. The deceased had only been ill a week, but owing to advanced years was unable to recover from his illness. Through the departure of Mr. Webb the Baptist church loses a faithful member. The funeral on Friday afternoon to Purdy's cemetery was largely attended showing the esteem in which he was held. To the bereaved wife and family deepest sympathy is extended.

Privates Mac McKinnon, Albert Groves and Edgar McAfee have been off duty in Tiverton to look up recruits in this district. We wish the boys all success.

Mr. and Mrs. J. D. Robertson attended the banquet in Pinkerton on Monday night.

Private Walter McKenzie entered in training in Tiverton on Monday.

Private Clyde McKeeman is home on sick leave suffering from an attack of tonsilitis.

Mr. and Mrs. D. D. McLean have gone to Midland on a short visit before leaving for their home in Fort William.

The Ladies Missionary Society of St. Paul's church met at the home of Mrs Campbell on Wednesday.

Mr. and Mrs. Neil McGillvary of the 12th con., Bruce, visited at Jas. Wrighteon's on Thursday.

SOLWAY

Mr and Mrs. Albert Herzog and little daughter Stella from Gull Lake, Sask., accompanied by Mr. Simon Lambertus visited at the homes of their cousins, Messrs. Wm. and John Lambertus and John Streeder here last week.

Born—To Mr. and Mrs. Tony Kober on Thursday, March 2nd, a daughter.

Mr. John McWhinney moved with his family to their new home near Markdale last week. His many friends here are sorry to see him leave after residing here for the past eleven years. We all join in wishing him every success in his new home.

Mr and Mrs. Alex Knoll gave a party at their home here on Friday evening where quite a number of their friends and neighbors spent an enjoyable time in games and dancing.

Mr. Thos. Coates is on the sick list.

Born—To Mr. and Mrs. Kelswater on March 2nd a daughter.

Miss Minnie Hossfeld left last week for an extended visit to Berlin.

MILDMAY

The death of Mr. Emmerich Heil of the 6th con., took place on Monday. Deceased was 84 years of age and leaves four sons and four daughters.

Mr. and Mrs. Wm. Helwig and daughter, Celeste, made a trip to Toronto last week.

Pte. Robt. McNamara spent Sunday at his home here.

Mr. Clarence Kramer of Toronto is spending a few days at the home of his parents, Mr. and Mrs. Alex Kramer.

Mr. W. F. Wendt, teacher of S. S. no. 6, Carrick, purchased a twin Indian motorcycle last week.

Mr. Roy Schnurr of the Bank of Nova Scotia, Guelph, is spending a week at his home here.

Rev. Mr. Coleman of Victoria University delivered two inspiring sermons in the Mildmay Methodist Church on Sunday last.

The Teeswater Juveniles pulled off a last game here on Friday night with our local team. There was some great playing. The score was Teeswater 2, Mildmay 0.

Miss Grace Yost of Hanover was a Sunday visitor in town.

The return game between Wiarton and Mildmay was played at the rink on Monday night. It was by all means the greatest game of the season and likewise drew the largest crowd. The Wiarton stick handlers played clean hockey, none of them being penalized. "Dad" Ashley did not show up as well as expected, no doubt on account of the smaller sheet of ice. The final score was 12—6 in Mildmay's favor. On the round, Wiarton is now 3 goals ahead, the score in Wiarton being 13—1 in favor of Wiarton.

Mrs. H. Schwalm and Miss Dora Wendt returned to Harriston on Tuesday for the spring millinery season.

NARVA

The Narva Women's Institute will meet at the home of Mrs R. Wilson, Con. 14 Greenock on Wednesday, March, 15th, at 2.30 P. M.

Private Harold Ackert of Kincardine, a member of the Princess Pat has been invalided home with consumption.

Spring Silks, Dress Goods and Wash Goods

Dainty Fresh New Materials Coming Every Day Now.

Pailette Silks in good heavy quality in all the new shades, per Yd. $1.00.

Further particulars at time of sale.

Feb. 23rd, 1916. Thomas Dixon,
Solicitor for said Executors.

NOTICE TO CREDITORS

IN THE MATTER OF THE ESTATE OF CORINNA SINCLAIR late of the Town of Walkerton in the County of Bruce, Spinster.

NOTICE is hereby given that all persons having any claims or demands against the late CORINNA SINCLAIR, who died on or about the Eighteenth day of December A. D. [illegible] at the Town of Walkerton in the County of Bruce, are required to send by post prepaid or to deliver to the undersigned Executor of the estate of Corinna Sinclair, their names and addresses and full particulars in writing of their claims and statements of their accounts and the nature of the securities, if any, held by them. All claims for any personal property or belongings in possession of the said deceased at the time of her death must also be filed within the time limited.

AND TAKE NOTICE that after the [illegible] day of March A. D. 1916, the said executor will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims of which he shall then have had notice, and the said Executor will not be liable for the said assets or any part thereof to any persons of whose claims he shall not then have received notice.

DATED at Chesley this [illegible] day of February A. D. 1916.

C. J. [illegible]
EXECUTOR
Chesley, Ontario.

FOR SALE

The property of the late Joseph B. Taylor, situated on the west side of Yonge Street, south of McGivern St. in the town of Walkerton. On the property there is a brick house with eight rooms with town water, also a barn with stone foundation, accommodation for 3 horses and 4 cattle; water in barn. Poultry house and pig pen. 12 acres of good land, all available for crop, drained; 1 acre in orchard, young bearing trees, apple, plum and cherry. For particular apply to Joseph B. Taylor, R.R. No. 2 Eden Grove or to Geo. D. Mackay, Walkerton.

Notice to Stallion Owners

The inspection of stallions under the Ontario Stallion Enrolment Act, will commence March 23rd, 1916. All applications for enrolment and inspection, accompanied by the proper fee, must be in the Secretary's office, Parliament Buildings, Toronto, by March 13th. In case of applications received after March 13th, inspection will be made only at increased expense to owners. Address all communications to R. W. Wade, Secretary, Ontario Stallion Enrolment Board, Parliament Buildings, Toronto.

Wound Not Serious

Mrs. A. Beechie had a letter this week from her son Pte. Herbert Von Hatten, stating that the gunshot wound in his arm was not so severe as at first thought and he will soon be out of the hospital. The first news of her son being wounded came to Mrs. Beechie over two weeks ago in a post card from a nurse at the Hospital and was reported in the Telescope at the time. A peculiar fact is that official word from Ottawa did not reach here until Tuesday of this week.

+ + +

Bill Beninger Back

Private Bill Beninger, who has been invalided from the Front, arrived home at Clifford on Monday night and was given a big public welcome. His brothers, George and Fred of Walkerton went down for the reception. Pte. Beninger had experiences from which few would survive to tell the tale. He was buried under sand for several hours as the result of a bomb explosion. He was also gassed, and had a shrapnel wound below the knee. It is not probable that he will recover in time to return to the Front.

+ + +

Enjoyable Patriotic Affair.

A unique gathering was held at the home of Mrs. (Dr.) Farewell on Friday evening last in the form of a Patriotic Musical evening. It was a splendid success, the guests all enjoying themselves thoroughly and the neat sum of $34 being realized for patriotic purposes. The presence of the 160th military orchestra had been looked forward to, but the indisposition of an important member and the failure of one of the instruments to arrive in answer to repeated telegrams necessitated the disappointment. In spite of this unavoidable omission, the musical program was excellent. It included:—Piano solos by Miss Florence Rowland and by Miss Schumacher; duets by Mrs. Player and Miss Truax; Miss Truax and Mrs. Hunter; Mr. Leeson and Pte Thompson; songs by Mrs. H. Truax, Mrs. Rock, Lieut. Roy Whitehead, Boisie Farewell; and Miss Helene Farewell, accompanied by Miss G. Oberle on the violin and Miss Schumacher on the piano; Recitations by Miss Havill and Mrs. Rock; Mrs. Player and Miss Truax kindly acted as accompanists. The following ladies assisted in the drawing room and library—Mrs. (Capt.), Geo. Martyn, Mrs. J. Wiser, Mrs. Hunter, Mrs. James Whitehead, and Mrs. (Major) Moffat. The following young ladies assisted Miss Farewell—Misses Emma Nichols Daisy Benton, Leafy Goetz, Madge Sinclair, Norma Rowland. A novel feature of the refreshments was the Ruined Castle of Belgium made in candy by Miss Helene Farewell. Of the sum of $34 realized, ten dollars was handed to Lt.-Col. Weir for the band instrument fund, the remainder going to the Walkerton Chapter, I. O. D. E.

PUBLIC MEETING

A public meeting will be held in the Council Chamber on Monday evening, March 20th, at 7.30 o'clock, to organize for a general canvass of the town in the joint interests of the Patriotic Fund and Red Cross Society. This important matter will require the assistance of a number of willing workers. It is desired that as many as possible attend the meeting.

K. M. Taylor, Sec. Red Cross Soc.
H. M. Lay, Sec. Pat. Fund.

DIED

KOCHER—In Brant, on March 13th, Margaret, infant daughter of Mr. and Mrs. Anthony Kocher, aged 11 days.

Fire Fighters Are Fired

Town Council Names Alex. George as New Fire Chief and Authorizes Him to Organize a New Brigade Along with the Mayor and Fire and Water Committee.

The most important item of business dealt with at Monday night's Council was the report of the Fire and Water Committee, dealing with the Walkerton Fire Brigade. The Committee advised that the present fire brigade be dismissed and that Alex. George be appointed Firechief, and authorized to form a new brigade in co-operation with the Mayor, and Fire and Water Committee. This action of the Council was foreshadowed a couple of months ago when Mayor Lippert gave the members of the brigade a severe dressing down in connection with the Wisler fire, charging misconduct on the part of some of the firemen and severely reprimanding the men for carelessness in not properly looking after the tools and equipment. Again, in connection with the Walker House fire last week, the Mayor stated that he had discovered a ladder belonging to the Dept. leaning up against the building several days after the fire. Of twenty-five firemen only ten were said to have responded to the alarm.

The report of the committee, fathered by Coun. Douglas and McCarter and passed unanimously by the Council, read as follows: (1) That the Walker House fire accounts be held over for the Committee to investigate. (2) In view of the unsatisfactory condition of affairs with the present fire brigade, we recommend that all future services of this brigade as at present constituted be dispensed with, and that they be asked forthwith to account for and return to the Town Hall property in their possession, and that Alex. George be appointed Chief of the Fire Brigade and that he and the Mayor and the Fire and Water Committee be instructed and authorized to take all necessary steps to form a new Fire Brigade for the Town and that the Clerk forward all necessary notices for this purpose.

Organ Rate Reduced

M. G. Dippel, Secretary of the Methodist Trustee Board, wrote pointing out that the water rate for church organs had been nearly doubled last year owing to the scarcity of water. Now that there was a plentiful supply, he asked that the rate be reduced. Council granted the request, reducing the rate from $38 to $25 per year, payable half-yearly.

A request from Major Henderson for rebate on water rates on unoccupied property was granted.

An account from F. M. Dippel for services as nurse at the schools, four weeks, $80 was passed; also an account from Mr. Sieveright for disinfecting materials $75.70.

Grant to 160th

The council decided to grant $300.00 to the 160th Battalion, towards the expense of the rink building for non-coms' school.

Councillor Pletsch and Reeve McNab moved that in view of the reports published re town hall, that a competent architect be engaged to report on matter, and that no public meetings be permitted to be held in the hall until the architect's report be received.—Carried.

No Tobacco License

Coun. McCarter brought in his motion to charge $15 for a license to sell tobacco in the town. Several dealers, he said, were ready to take out licenses. They had as much right to pay a fee for selling tobacco as for selling cigarettes. Mayor Lippert thought the people would soon be paying more for their tobacco if the motion was carried. Coun. Douglas seconded the motion, but none of the other councillors would support it.

West Ward Sewer Wanted

Coun. Russell brought in a motion to instruct an engineer to take the levels and make profiles of Elgin St. sewer near the brewery, and that the laying of the sewer be resolved upon. Mayor Lippert objected to passing the motion without first securing estimates of cost and probable revenue. Coun. Russell said the sewer was badly needed but agreed to withdraw his motion until the next meeting and get the survey made. He assured the Council he was not going to have the matter side-tracked.

Those present were:—Mayor Lippert, Reeve McNab, Couns. Pletsch, McCarter, Russell, Douglas, Arscott. Town Clerk Collins and representatives of the local press.

DEATH OF MRS. HENRY BACON

A very old and familiar figure in the life of Walkerton was removed by the hand of death on Thursday night in the person of Mrs. Ann Bacon, relict of the late Henry Bacon. Mrs. Bacon was one of Walkerton's first settlers and for upwards of fifty years lived in the same house on Durham St. Though practically an invalid for very many years, she enjoyed the companionship of her friends, and scores of friends enjoyed a sociable chat and the well-known hospitality of her home from day to day. She lived to the remarkable age of 93 and though still active in mind, for the last three years or more, her physical forces had been well nigh exhausted and she required the closest constant care at all hours of night and day. That her life was prolonged is no doubt due in a measure to the loving ministrations of her daughter with whom she made her home. The end came unexpectedly. Her daughter, Mrs. Stauffer, had roused her about ten o'clock in the evening to give her some nourishment. She apparently felt as well as usual, but suddenly sank back on her pillow and expired. Mrs. Bacon was born in Grantown, Invernesshire, Scotland, on April 25th, 1823, her maiden name being Ann Dunbar. Her mother was a Grant of the Grant clan, well known in the northern part of Scotland; her father's estate being known as Clachenastane on the banks of the river Spey, a home known for its hospitality, and Mrs. Bacon inherited in a large measure that spirit of hospitality, and although never mingling much in social circles, her door has ever been open to her many friends and her genial disposition combined with her generous hospitality made one feel that they got a truly Highland welcome. Coming to New York about the year 1853 she was married to the late H. Bacon in March 1855 and they together came to Walkerton in March [illegible] and she has resided here ever since.

She is survived by her family of one son, F. D. O. Bacon of Escanaba, Mich., and four daughters, namely:—Mrs. Bastone of Detroit, Mrs. Porter of Paisley, Mrs. Schwegler of Hamilton and Mrs. Stauffer at home, who for years has been her constant attendant; four grand-sons and three grand-daughters and two great grand-children.

She was a lifelong Presbyterian, being a member of the Old Kirk of Scotland and ever since being in Walkerton a member of what is now known as Knox Church.

The funeral was held on Monday afternoon, from her late residence, the service being conducted by Rev. Thos Wilson of Knox church. Two of her favorite pieces were sung, "The 23rd. Psalm" and "Jesus Lover of My Soul," the musical service being led by Mr. E. H. Leeson. The pall-bearers were:—Messrs D. McKechnie, D. McKerracher, R. H. McKay, S. A. Rife, F. Rennie, J. Hilbert.

Many beautiful floral tributes from the family and friends adorned the casket, and from the Walkerton W. C. T. U. of which her daughter is President, a beautiful sheaf of flowers.

Patriotic Lecture

An illustrated lecture of high merit will be given in Knox Church, Walkerton, on Tuesday evening, March 21st. The Rev. Dr. Johnston of Montreal, one of the most eminent divines in Canada, has kindly consented to come to Walkerton to help along the patriotic cause in this district. The subject of the lecture is "The Legends and Romance of the St. Lawrence and the Great Lakes," and will be illustrated by lime light views. Dr. Johnstone is a native of Bruce County and is so well and favorably known, that his name is a guarantee of an exceptionally fine evening's entertainment. The Trustees of the Public Library Board have arranged for this lecture, purely for the purpose of aiding the much needed funds to carry on patriotic work, and will distribute the proceeds accordingly. Owing to the reported unsafe condition of the Opera House, Knox Church has been chosen for the place of meeting. Do not miss hearing such a splendid speaker as Dr. Johnston. Admission 25 cents only.

WALKERTON RECRUITS

BICKLING, H. S., Carlsruhe, 22, born Carrick tp., farmer.

Mr. A. E. Herzog and family, who have been spending the winter in this vicinity, left on Wednesday for their home in Gull Lake, Sask.

In the subscriptions to the Patriotic Fund reported in last week's Telescope, one item should have read: -T. H. Tanner, Patriotic Dance, $13.

Mrs. Shelton, treasurer of the I. O. D. E. acknowledges with thanks the receipt of cheques for $36.00 and $18.50 from the Soldier's Aid Tea Rooms.

Wiarton has furnished nearly 100 recruits.

The Daughters of the Empire obtained 258 pairs of sox, several pounds of wool, and $45.80 in cash through their Socks Shower on Tuesday afternoon.

Miss Chick, who has been spending the winter with relatives here, left yesterday for her home at Dauphin, Man. Mrs. Nanton accompanied her.

Alex. Weber of Carrick, who sold his farm recently, has bought Ed. Kelly's 100 acre farm in Greenock. The deal was put through by Mr. Jas. Whitehead.

Serg't. Mel. Wilson of the 71st. at Galt who has been laid up with La Grippe is spending a few days' sick leave with his parents, Rev. Thos. and Mrs Wilson.

Owing to the Town Hall not being available, the Sunday School room of the church will be used for the English Church ladies' banquet for the soldiers on Friday.

Mr. Charles Stephen has been very ill the past week with pneumonia. He has now passed the critical stage, it is believed, and is reported to be somewhat improved.

Mr. Ivan Armstrong, of Drayton, spent a few days with his cousin, Miss Vera Dippel. Mr. Armstrong is leaving on Saturday for the west where he was formerly located.

Capt Musgrove of Hanover, an officer well-known in Walkerton, has been appointed junior major of the 162nd Batt, of Parry Sound. Capt. Musgrove was recently invalided home from the front.

Master Earl Johnston, a young son of Coun. Wm. Johnston of Brant has been seriously ill with pneumonia and measles, but has now passed the critical stage. All the children of the family are just recovering from the measles.

Mr. C. Patrick opened his new grocery in his former stand, Colborne St., South of the Public Library on Saturday. The building has been thoroughly overhauled, a plate glass front put in, new hard wood floor, and other improvements. Mr. C. Patrick now has a nice bright, up-to-date stand, and he has put in stock of fresh high-class groceries which should make a hit with the buying public.

One of Bruce County's representatives in the big temperance procession at Toronto last week was one of Walkerton's grand old men, Mr. James Warren. The Globe was responsible for the statement that Mr. Warren, who is in his 79th year, was one of the oldest men in the procession. In his home town, Mr. Warren is not considered "aged", being still one of the most active fighters for everything which he considers makes for good citizenship.

A Handsome Contribution

The Walkerton Lutheran Church is not to be outdone by the other congregations of the town in showing its loyalty to the 160th Batt. Although only a small congregation, the members contributed last week the handsome sum of $66 to the Band Fund.

+ + +

A Pitiable Case

A intolerable condition of affairs was discovered by Chief Ferguson on Tuesday at the home of David Allardyce, a farmer living at Johnston's Corners. Mr. Allardyce is helpless with tuberculosis and his wife is apparently in a highly demented condition. The Chief brought the woman to town and placed her in jail. An effort will be made to place the small children in good homes and have the father removed to the Sanitarium.

WILL MOBILIZE AT LONDON

It is Expected That the 160th Battalion Will Leave the County for their Final Training the Latter Part of May.

Preparations are under way at London for the mobilization of no less than thirteen county regiments including the 160th Bruce Battalion. An immense block of land has been acquired outside of the city where the battalions will be properly accommodated for battalion and brigade manoeuvres and rifle and machine gun practice. Walkerton people would like to see the 160th Battalion stay here until they are ready to go to England but the expense that would be entailed to provide the regiment with the proper facilities for mobilizing would, it is understood, put it quite out of the question. A good deal can be said in favor of mobilizing the regiment in the County, and in case a second regiment has to be raised it would no doubt prove a great stimulus to recruiting but it is doubtful whether this consideration will have sufficient weight with the military authorities. It is believed that the 160th will be ordered to report at London about the third week in May.

SOLDIERS ATTEND CHURCH

Men Of The 160th Batt. Parade To Knox Church And Hear Strong Message Delivered By Rev. Mr. Wilson.

The soldiers paraded to Knox Church on Sunday morning. The boys turned out 230 strong and made a fine showing as they marched through the streets headed by the regimental band. They occupied the centre of the auditorium and the building was filled to its capacity.

The sermon preached by Rev. Mr. Wilson was from the text, Matt. 13: 31: "The Kingdom of Heaven is like unto a grain of mustard seed."

The explanation was given that in the days of Christ the mustard seed was the smallest seed sown. It grew rapidly until it was the largest of herbs. Mr. Wilson dealt with the subject ably and thoughtfully, drawing from the parable three main thoughts.

First, it had reference to the growth of the New Testament Church which had been so vividly prophesied by Ezekiel. It grew first from two of John the Baptist's desciples, then Peter, then Philip, then Nathaniel, then three thousand at Pentecost then to Asia, Europe, and Rome. Thus like the mustard seed with a small beginning it shall continue to grow until it shall reach the whole world. Second, it had reference to the growth of the Kingdom of Christ on earth. Mr. Wilson caught the ear of his audience when he drew from Daniel's interpretation of the King's dream an illustration with a military setting. Many to-day are anxious as to the outcome of the Kingdom of Christ on earth. Never fear, God lives. God rules. All is well. "We have Christ's own promise which can never fail". Third, the Universal reign of Him who is head of the church and is King of Kings. He shall have dominion from sea to sea and from the rivers unto the ends of the earth. His name shall endure for ever: His name shall be continued as long as the sun: men shall be blessed in Him: all nations shall call Him blessed.

The musical portion of the service was greatly enjoyed. The choir, under the direction of Mr. Leeson, sang an appropriate anthem, "King of Kings," and Miss Verna Loughleen sang "God Will Take Care of You."

The Mildmay Meeting

A big recruiting meeting was held at Mildmay on Tuesday night. The hall was filled to the doors, a good representation of young men being present. The seven recent recruits from Mildmay occupied seats on the platform. The speakers included:—John Rowland, Bob Rowland, Judge Klein, Father Hallam, Major Henderson. No recruits came forward but it is anticipated that good results will follow.

+ + +

A Military Wedding

An interesting wedding took place in Toronto at St. Pauls parsonage on Monday March 6th, when Pauline Forsythe of Greenock was united in marriage to *Lieut.* Sydney V. Coleman of the Canadian Engineers. The Rev. Canon Cody performed the ceremony and the bride was unattended. The bridal dress was of champagne chiffon taffeta with overdress of Georgette crepe and embroidered net sleeves. The bride wore a corsage bouquet of lilies of the valley and her gift from the groom was a diamond and platinum pendant. Mrs. A. P. Cooking gave a reception at her home, No. 2 Strathcona Ave., after which the happy couple left for Ottawa where a short honeymoon will be spent. On their return the bride will reside with her mother as Lieut. Coleman sails for overseas immediately. Mrs. Coleman will join him in England in the early Spring.

'TWIXT LOVE AND PRIDE

"Is not that a little severe?" asked Denzil. "Poor James has an unfortunate way of not getting on with people, but I put that down more to the wretchedness of his early training than to his natural disposition, which I believe to be good, though warped and injured by his peculiar position when a boy. It was lucky for Lady Constance that the Countess adopted her. May I give you some of these?"

"No, thank you," Mildred answered, and then fell to wondering by what right this cotton merchant's son called Lord James Dingwall by his Christian name—"James." She again recollected that "this sort of person" generally boasted outrageously about any intimacy with the aristocracy. Miss Trevanion's "hearings" upon this subject had been numerous and profound.

"I think Lord James a very unpleasant man," she said, feeling curious to learn how much more Denzil Younge had to say about him.

"Most ladies do," her companion answered, coolly; "but then I do not consider ladies always the best judges. They form their ideas from the outward man generally, which in many cases prevents fairness. Unless the person on trial be a lover or a relative, they seldom do him the justice to look within. You think Dingwall very obnoxious because he has [illegible] air and rough manners, and, yet I have known him to do acts of kindness which most men would have shrunk from performing. In the same way you would consider a fellow down near us the greatest boor you ever met in your life, I dare say, because he has nothing to recommend him but his innate goodness of heart."

"I dare say," responded Miss Trevanion.

"But would you not be civil to a man whom you knew to be beyond expression estimable, if only for the sake of his goodness, no matter how rough a diamond he might be?" asked Denzil Younge, feeling somewhat eager in his argument, and turning slightly, so as more to face his adversary. "Surely you would any woman—most women would, I fancy. One could not fail to appreciate the man I speak of."

"I might appreciate him—at a distance," Miss Trevanion returned, obstinately, "but I would not be civil to him; and I should think him a boor just the same, whether he were a black sheep or a white."

"Oh!" exclaimed Denzil, and stared curiously at her beautiful, now rather bored, face, while stroking his fair moustache thoughtfully.

Was she really as worthless as she declared herself to be? Could those handsome, cold blue eyes and faultless features never soften into tenderness and womanly feeling?

He quite forgot how earnestly he was gazing, until Miss Trevanion raised her eyes and meeting his steady stare, blushed warmly—angrily. He recollected himself then, and the admiration his look must have conveyed, and colored almost as deeply as she had.

"I beg your pardon," he said, quietly; "do not think me rude, but I am strangely forgetful at times, and was just then wondering whether you really meant all you said."

"Do not wonder any longer, then," she retorted, still resenting the expression of his eyes, "as I did perfectly mean what I said. I detest with all my heart boors, and ill-bred people, and parvenues, and want of birth generally."

And then Lady Caroline made the usual mysterious sign and they all rose to leave the room, and Miss Trevanion became conscious that she had made a cruelly rude speech. She would have retracted it the next instant—have glossed it over, and turned it into a compliment, as most women possess the art of doing on occasions like the present; but it was too late now, as everybody had risen and there was a slight bustle and confusion. Denzil himself also had seemed to desire no further words from her, as he had moved to the door and opened it, standing there while they all passed through. Moving by him herself a few moments afterward, she raised her eyes involuntarily to his face, but he was not looking in her direction, being engaged in watching attentively "the queen's" departing figure, and Miss Trevanion saw that he was not in the least disconcerted or put out by her rudeness.

She felt rather guilty, nevertheless, and disinclined for conversation, when she had reached the drawing-room; so she sat down and tried to find excuses for her conduct in the remembrance of that last unwarrantable glance he had bestowed upon her. A man should be taught manners if he did not possess them; and the idea of his turning deliberately to stare at her—Mildred Trevanion—publicly, was more than any woman could endure. So she argued, endeavoring to persuade her conscience—but unsuccessfully—that her uncourteous remark had been justly provoked; and then Mabel came over and sat down beside her.

"I liked your man at dinner very much," she said; "at least what I could see of him."

"He seemed to like you very much, at all events," Mildred returned. "He watched your retreating figure just now as though he had never before had seen a pretty girl or a white-worked grenadine."

"He is awfully handsome," went on Mabel, who always indulged in the strongest terms of speech.

"He is good looking."

"More than that; he is as rich as Croesus, I am told."

"What a good thing for the young woman who gets him!" Miss Trevanion remarked, and smiled down a yawn very happily, indeed.

"Look here, Mildred, you may as well just begin by being civil to him," counseled Mabel, wisely, "because, as he is going to inhabit the same house as yourself for the next six weeks or so, it will be better for you to put up with him quietly. You were looking all through dinner as though you were bored to death—and after all, what good can that do?"

"I rather think that you will have the doing of the civility," observed Miss Trevanion, "as he is evidently greatly struck by your numerous charms."

"I shouldn't mind in the least, if he can talk plenty of nonsense, and look as he looked at dinner," Mabel returned. "There is always something so interesting about a superlatively rich man, don't you think?"

"Not when the rich man owes to cotton."

"Why not? Cotton is a nice, clean thing, I should fancy; and money is money, however procured. I am a thoroughly unbiased person, thank Heaven, and a warm admirer of honest industry."

"You had better marry Mr. Younge, then, and you will be able to admire the fruits of it from this day until your death," Mildred said.

"Not at all a bad idea," returned "the queen." "Thanks for the suggestion. I shall certainly think about it. If I like him sufficiently well on a nearer acquaintance, and if he is good enough to ask me, I will positively go and help him to squander that cotton money."

"Oh, Mabel!" cried Miss Trevanion.

And then Mabel laughed merrily and patted her hand, after which she went across the room, to hold sweet converse with Rachel Younge.

CHAPTER III.

After Mabel had left her Mildred opened a dainty little work basket that lay on the table near her, and, taking out her embroidery, started a pretty pretense of industry. Work, however frivolous, conduces to thought, and so presently Miss Trevanion fell into a train of ideas that lasted her for some time. "If I like him sufficiently well on a nearer acquaintance," Mabel had said, "and if he is good enough to ask me, I will positively go and help him to squander that cotton money." It seemed to Mildred so likely a thing that Denzil Younge should fall in love with her pretty laughing sister, that she dreaded anything approaching reciprocity of feeling on her part. The girl was so sweet and lovable in all her ways that she, Mildred, being very wise in her own conceit at this period of her life, saw endless unpleasantness arising in the future out of this visit, in all which unpleasantness "the queen" and Denzil Younge stood prominent. Mabel, too, in that last thoughtless speech, had shown anything but dislike to the probability of Mr. Younge's falling a victim to her beauty. She had laughed it was true, making a joke of it, but to Miss Trevanion it appeared as though a joke on such a subject was very like an encouragement of it.

She looked across the room now to where Mabel was holding a very exhaustive conversation with Miss Younge. The latter was looking as inane and passive as usual, but Mabel had bent slightly forward on the arm of the velvet chair, and appeared so bright and animated in contrast with her companion that Mildred could do nothing but admire her.

"I am sure I don't know," lisped Miss Younge, languidly.

"Oh, but that is nonsense," said Mabel, eagerly— "one should always have an opinion on every subject, one way or the other. Now I will make you see it in an instant. If—"

Mabel quite glowed under the force of her argument, and her sister watching her calmly decided that she was fit to wed with any duke or marquis of the land. A prince would perhaps be the right person, but then in these degenerate days princes were few and far between, and difficult to wed, besides. But as for that cotton man—

Just then the father of the cotton man made his appearance, followed by the others, and so put an end to Miss Trevanion's withering reflection.

Mabel immediately challenged the old man—whom she seemed to have in a manner adopted—to play a game of besique with her.

"With all the pleasure in life, Miss Mabel," returned he, "but you must promise not to beat me, and to be kinder to me than you were at dinner."

"Oh, there's an insinuation!" cried Mabel. "I scorn to refute it. I will promise you nothing, and certainly I will beat you if I can."

After which mild passage-at-arms they went off to their game, and seated themselves at a distant table in a far corner of the room.

Eddie, of course, as in duty bound, fell into a seat near Rachel, and endeavored with all his might to make himself agreeable to that uninteresting member of society. He was young and good-looking, so perhaps he succeeded; but, as he confided to Mildred next morning, "conversing with pale nonentities is horribly trying work." He went through his work very bravely that evening nevertheless—so bravely that once Rachel was seen to blush, an event heretofore unheard of in the annals of that young damsel.

Sir George stood on the hearth-rug between his wife and Mrs. Younge, dividing his attentions impartially, while conversing fluently and very much to the purpose about the respective merits and demerits of his Southdowns. Sheep were his hobby at present and so he made it a point, when he could not secure a man, to instruct even women upon this his favorite topic.

All the others being provided for, nothing was left to Denzil but a corner of Miss Trevanion's sofa, where she sat embroidering busily, as though her very life depended on the finishing of the task in hand.

A little black, glossy dog lay crouching at her feet.

"Your dog?" asked Denzil; and then Mildred knew he had not taken very deep offence at her last speech.

"Yes," she said, graciously enough, feeling, woman-like, that she owed him something to make up for that late unkindness in the dining room.

"Nice little thing," Denzil remarked, raising the animal to examine its points, which evidently baffled him. "What sort of dog is it? I don't think I ever saw one like it before."

"I don't suppose you ever did," Miss Trevanion answered, laughing in spite of herself; "the fact is, he is a valuable gift to me from my youngest brother, who transplanted him here from a neighboring town, and made me promise to support him until my dying day, so of course I was obliged to make a pet of the creature. I am horribly afraid it is nothing but the commonest cur; and yet I am so fond of it now that I would not exchange it for the most valuable animal that could be offered me."

"What!" said Denzil, softly, stooping to caress the dog; "is it possible that after all you said to me just now, Miss Trevanion, you can actually acknowledge yourself fond of anything so ill-bred?"

Mildred blushed crimson. Was he having his revenge? Well, if so, he was welcome to it.

"You have the best of it," she said, quietly; "although I might perhaps argue that I scarcely included dogs in my list. However, I will not, and I must confess that I could not love my little pet better had he come of the most ancient pedigree. Come here, Boshi."

Whereupon the "little pet," "coming here," jumped up into her lap and lay contentedly perdu amongst the soft folds of her dress, as well he might; while his beautiful mistress continued her occupation over his dusky head. Perhaps she was aware how well the blackness of his coat set off the whiteness of her pretty hands. Certainly Denzil did not fail to remark the striking contrast.

"Do you sing?" he asked, presently.

"No—that is, not worth speaking of," she said; "my voice is painfully insignificant. But a propos of private singers, my sister Mabel has one of the finest voices I ever heard—not powerful, you know, but tender and very touching."

"I should like to hear her," Denzil said, eagerly.

"Well, so you shall, when she has finished her game," Miss Trevanion responded; and they both ceased talking, and looked across the room toward the distant table where "the Queen" was holding high discussion with her ancient opponent.

"Four queens make sixty!" called Mabel, triumphantly, laying the four royal ladies upon the table as she spoke.

"No, no—forty!" protested the old man, persuasively.

"Forty!" repeated "the queen, with withering scorn. "And what, may I ask, do you make the knaves? It is sixty, and you know it as well as I do; and, if you make another attempt to cheat me out of my lawful rights, I will proclaim myself victor, and disgrace you publicly before the whole room." After which appalling threat the game went on again, enlivened by a hearty chuckle from the "Yorkshire farmer." Denzil laughed.

"A very fearsome fray," he said. "What a charming face your sister has!"

"Yes, hasn't she?" Miss Trevanion returned, enthusiastically, forgetting at the moment who the admirer was, but, recollecting herself immediately afterward, she went back to her original coldness.

So he was falling in love with Mabel—that was evident; and, when the duke or the marquis came, what was she to say to him? Somehow or other Miss Trevanion had small faith in her sister's own discrimination in the matter of choosing a husband. The darling was so tender-hearted, she argued with her inward self, that the very fact of having to cause a man pain in the refusing would make her in all probability accept him; in all which arguing she did Miss Mabel Trevanion decided wrong.

Mildred had spoken enthusiastically in her sister's favor, and then regretted it. Where was the use of encouraging dreams in the breast of this young man which could certainly only end in a sad awakening? But she did not see her way to withdraw from her enthusiasm just then, and so held her tongue. She was vexed with herself, however, and could not thread her needle into the bargain—which two things put together were, of course, quite enough to provoke a saint.

Miss Trevanion could not thread her needle, either because she was not sufficiently intent upon the difficult job, her mind being unpleasantly fixed upon other matters, or because she was sitting too far from the light, or because the second occupant of the lounge was watching her vain endeavors too closely; and at last she put the needle down in despair.

"Shall I do it for you?" Denzil asked.

He was smiling—appearing, indeed very much amused at her defeat—and holding out his hand for the offending needle. As he spoke Miss Trevanion looked up and saw the smile, which did not add to her good-humor.

"No, thank you," she said. "I will not work any more to-night. Besides you could not do it. I never yet saw a man that could; so why give you the trouble of trying?"

"It is unjust to condemn me, as incapable without giving me a chance of proving myself otherwise," Denzil protested, laughingly. "No? You will not let me show how superior I am to men in general—in this respect, at all events? Well, then, I must conclude that you are at heart tired of your work, and glad of the excuse to get rid of it."

"Yes, I am tired of it," assented Miss Trevanion, listlessly. "There are times when everything bores me, and I get quite to dislike them."

"And yet, I dare say, there are a few things you never dislike," said Denzil—"Boshi, for instance, and — being a woman—talking."

"In general I detest conversation," returned Miss Trevanion, uncivilly. "So I fear you must consider me very unwomanly in that respect."

"What a pity you did not tell me that before!" murmured Denzil, with such deep commiseration in his tone, as savored very strongly of sarcasm. "Now, I must have spoiled your evening"; and as he finished speaking, he rose, stooped carelessly to pat the little dog that still lay upon her knee, and went over to where Lady Caroline was sitting on a green ottoman.

"I knew I should hate him," said Mildred to herself, and fell to wondering why it was she could not keep her temper with him. However, if he would come and sit next her when she had so plainly shown him at dinner that she would none of him, he deserved all he got and more. Still, she would not let him see she was piqued—which she was by his sudden departure from her side—a seat of honor that most men of her acquaintance would have gone any length to procure; so when the game of besique had come to a close, leaving "the queen" triumphant, she asked her sister very distinctly and sweetly—

"Sing something for us, dear, as Mr. Younge is anxious to hear you."

Mabel said "Is he?" and smiled across the room at the young man who was so anxious to hear her, after which she sat down and sung Gabriel's "Only" very tenderly and expressively.

(To be continued.)

A lawyer is trying to have an all-night waiter restrained from keeping him awake with cries of "Ham and!" or "Draw one!" But his grievance is petty compared with that of thousands kept awake because they have eaten the stuff the waiter brings.—New York Evening Sun.

PAINS QUIT! BACK-SORENESS GOES! TORTUROUS LUMBAGO CURED BY "NERVILINE"

This Wonderful Curative Liniment Has Almost Magical Powers.

You can compare a congestive pain to a little fire. When congestion smoulders, pain comes and goes. Congestion grows into inflammation, but pain, now intense, grows excruciating, and stays, too. There is an absolute antidote of pain—it is Nerviline.

New to you, perhaps, is Nerviline, but known well in many lands as the most penetrating and pain-subduing pain remedy ever discovered. Not oily or ill-smelling, but pleasant—it rubs on. Not temporary action, but permanent in its control of pain.

Not an ache or a pain anywhere that it cannot reach. No soreness or strain that it has not the power to relieve.

Nerviline is the only remedy in the world sold under guarantee—if it does not relieve you, you get your money back. Proof enough that Nerviline is a remedy that will fulfil absolutely every requirement of a pain-reliever, both for internal and external use.

Backache it cures like magic. For rheumatism, sciatica, lumbago, neuralgia, stiffness, sprains or strains, it is the only thing. Large bottle, 50 cents; trial size, 25 cents; at druggists, or The Catarrhozone Co., Kingston, Canada.

The Time to Marry.

Hepsey, the maid of color, had told the mistress she was to be married.

"Well, Hepsey," said the mistress, "I'm sorry to lose you, but I suppose it is all for the best. How long have you known the man?"

"About two weeks, ma'am."

"My! No longer than that! Don't you think you ought to wait and get to know him better?"

"No, ma'am," exclaimed Hepsey. "Ef I knowed him any better I sho' never would marry him."

Pearls as Medicine.

Scotland still produces pearls, found mainly in the fresh water mussel. They could no doubt be found in England if the industry were profitable.

Cleopatra was not the only person who swallowed a dissolved pearl. Until comparatively recently pearls were used medicinally in the west and still appear in the materia medica of China. According to one Chinese authority, a pearl, after being treated with pumice stone and honeycomb, mixed with the gall of a serpent, "might be drawn out to the length of three or four feet. Make it into pills and swallow them—henceforth food will be unnecessary."

The suggestion is not that the patient would be finished off, but that he would live, foodless, forever.—New York Sun.

WRINKLES ARE A CONFESSION

Advancing years are first realized by the change that becomes noticeable in the complexion. If you pay attention to the first, almost imperceptible, lines how easy it is to avoid the unsightly wrinkles that surely follow. Wrinkles are a confession to Father Time. The skin must be kept firm and smooth by proper attention and treatment.

"UNIT" is a skin food and wrinkle chaser. It builds up firm, elastic tissues, removes wrinkles, fills out depressions, prevents dryness of skin caused by excessive winds, and restores to your complexion that fine appearance of freshness and youth.

"UNIT" is put up in handsome opal bottles, and until the Drug Stores in Canada are completely stocked we are filling mail orders. Accept no substitute.

Send 50 cents to-day for trial bottle, sufficient for six weeks' use. We pay postage to any address in Canada.

The Secret of Baldness.

The actual condition of the scalp and of the hair has very much less to do with the health of the latter than is popularly supposed. The bulbs of the roots of the hair go down completely through the skin and into the fatty layer which lies between it and the skull, and the thing that to the expert eye is really significant of the prospect as to progress or cure in a particular case of baldness is not the condition or color or cleanliness of the scalp, but the thickness or thinness of this fatty layer which underlies it. So long as this is present and the scalp is freely movable over the skull there is hope of restoring a reasonable growth of hair, but when this fat has been absorbed and the shiny scalp sticks as closely to the skull as the cover of a baseball the outlook is practically hopeless. This, of course, shows at once the futility of most of the local applications to and manipulations of the scalp, from which it suffers untold torments in those who are or imagine themselves to be becoming bald.

Minard's Liniment Relieves Neuralgia

Irish Language.

The "natural language" of the Irishman is the Gaelic, the old Celtic tongue which is still spoken, to a certain extent in Ireland, Wales, the Highlands of Scotland and northern France, where the remnants of the Celts are still dwelling.

A FINE DEPARTMENT.

"Got a good police department in this town?"

"You bet we have."

"Funny all these burglars that are working seem to be able to get away with it."

"Well, that is queer, but we've got a good department just the same."

"What makes you think so?"

"Burglars may be able to get away, but if the tail light on my car happens to blow out I get pinched before I've gone two blocks."

Mice That Subsist on Scorpions.

Among the queer forms of animal life that inhabit Death Valley is a mouse that has acquired such a taste for scorpions that they form its entire bill of fare. The scorpion carries its formidable armament at the end of its slender, elongated abdomen in the shape of an exceedingly venomous hooked sting. When disturbed it elevates this in the air and goes in search of its disturber. But it is comparatively slow in its motions, while mice are proverbial for their quickness the world over. The mouse learned many generations ago where the scorpion carries its weapon, and when he meets it he leaps at the uplifted abdomen, takes the sting off at a single bite and proceeds to make a meal of his helpless prey. It is supposed to be the only animal that relishes scorpion.

Snowball Showers.

More than one explorer in cold climates has noted the curious phenomenon of a "snowball shower." The balls, it is true, are not very big, the average being about the size of a hen's egg, but they are true snowballs for all that—compressed globes of snow, not little lumps of ice or hail. A fall of the kind occurred in north London in March, 1859, and at the time it was observed that the balls seemed five times as dense and compressed as ordinary snow and in no way to be told from the usual handmade missiles. They had fallen during the night and were strewn many layers thick over a very large area. No cause—except a doubtful electrical one—can be ascribed for the strange phenomenon, and mountaineers are apt to discredit the stories of snowball showers told them by the old guides till suddenly in the midst of an ordinary storm they find themselves assailed as though by myriads of mischievous schoolboys.—London Standard.

GOOD FOR CHILDREN

Mothers! Physicians agree that flavor and the body building elements of grains lie in the dark parts, usually thrown away. So also do the lime salts which your child needs to harden bones and teeth. Children fed upon coarse, dark cereals develop greater [illegible]. Witness the Italians and Scots. Roman soldiers who conquered the world fed upon two pounds of entire grain food a day. Dr. Jackson's Roman Meal is a scientifically balanced ration made from several entire grains. It's delicious, easily prepared in a variety of ways and nourishes better than meat. It's a natural laxative. Most grocers sell it.

Made by Roman Meal Co., Toronto, Canada.

Judge Hard to Please.

A prisoner on his trial, in answer to the charge, pleaded "Not guilty." The jury found the charge proved, and in passing sentence the judge said, "You're not only guilty but ye come here and tell lies, saying ye're not."

The prisoner who followed next for trial was doubtless influenced by this, and supposed it would be well for him to take another course, so he pleaded "Guilty," in an almost self-satisfied voice.

"Oh, ye're guilty, are ye," said the judge, "and come here to brag about it, do ye?"—Tit Bits.

Improve Yourself.

If a man cannot improve himself, how can he improve others? When we see noble men we should think of equaling them. When we see evil characters we should turn our look inward and examined ourselves. Only he who has the most complete sincerity under heaven can transform and inspire others.

Prank of a Lightning Flash.

During a thunderstorm in Deal, England, Minnie Rogers seventeen years old, was walking along one of the small back streets of the town carrying a number of umbrellas, etc., when a vivid flash of lightning, evidently attracted by the steel frame of one of the umbrellas she was holding, ripped open her own umbrella, struck her and threw her violently to the ground. There was only one man in the street at the time, and he assisted her to rise. Strangely enough, when she had gone so she found that all her clothes, umbrella and cap were perfectly dry, whereas before she had been drenched, for the rain poured down in torrents. Her description of her feelings was: "I just felt as though my head had been stung by a wasp there was a stinging noise in my ears, and I seemed to see a bright light, like the sun, shining through my umbrella." With the exception of her hair being slightly singed, she sustained no injury.—Strand Magazine.

Have a Good Complexion! The Flower of Good Health

The true secret of complexion lies in the blood. Keep it rich, pure, nutritious, and, above all, keep the system regular. No aid to complexion compares with Dr. Hamilton's Pills. They tone and enrich the blood, clear the system of waste products, promote good digestion, and, in short, establish sound health, which, after all, is the keynote to all happiness and well-being. Don't delay; the charm of a lovely complexion and all the blessings of health are yours, once you employ this old-time family remedy. All dealers sell Hamilton's Pills in 25c boxes.

The Music of Thunder.

The bass of thunder is considerably lower than the lowest sound produced in an orchestra—below the zero of music, we call it, at which all positive apprehension of musical sound ceases and our senses are merely conscious of a roar. In observing the music of thunder our attention, however, may be most profitably directed to the expression rather than to the noise. The musical diminuendo is more perfectly represented by thunder than by any other form of sound in nature. After the first clapp is over the ear will pursue with pleasure the rolling away and gradual fainting of the peal until at an immeasurable distance it sinks into silence.

Bleeding by Bowshot.

That all diseases can be cured by bleeding is still firmly believed by several savage tribes and especially by the Papuan negroes. When one of their physicians becomes convinced that it is necessary to bleed a patient he goes several feet in front of him, and then, drawing his bow he fits a sharp pointed arrow to it and after careful aim, fires the arrow into the vein which he desires to open. The arrow, it is said, invariably goes straight to the mark, and the thorn or splinter of glass with which it is tipped does the work as successfully as a lance. Moreover, the patients never show the slightest fear, since they are convinced that from the moment the arrows pierce their veins they will begin to recover.

CROSS FRETFUL BABIES

The cross fretful baby is a sickly baby—the well child is always happy and smiling. Mothers if your baby is cross and cries a great deal something is wrong. His little stomach and bowels may be out of border: his teeth troubling him, or he may be bothered with worms. The mother should immediately give him Baby's Own Tablets. They never fail to relieve the baby. Concerning them Mrs. Ronald Hurley, Gilks, N. B., writes: "I know of nothing so good for cross, fretful babies as Baby's Own Tablets and I am pleased to recommend them to other mothers." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Too Bold.

There is a local legend concerning Salisbury cathedral, in England. The cathedral is celebrated for its lofty spire, and the legend is that once upon a time a prisoner found guilty of some capital offence was sentenced to death and had the option given him of being executed in the usual way or of throwing himself from off the cathedral spire. He chose the latter, and, wonderful to say, he escaped death. Some time afterward he wagered he would do it again. He did, but this time his body was dashed to pieces.

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by this method. Write to-day. Address: Mrs. M. Summers, Box 8, Windsor, Ont.

Soup Without a Spoon.

Soup without a spoon seems even harder to negotiate than meat without a fork, and we can sympathize with the complaint recorded in the diary of Felix Platter, a young Swiss, who went to Montpellier in 1552 in order to study medicine. He lodged in the house of his professor, Catelan, one of the greatest doctors of his time, and yet, writes Platter, "we were compelled to eat our stew in the usual French fashion—that is to say, picking the meat out with our fingers and then drinking the broth. In vain we begged our hostess to let us have spoons, but not a single one was to be found in the house, the only implement on the table being a large knife fastened with an iron chain. No one here seems to have ever heard of spoons, which we at home find so useful." Montaigne was astonished when he visited Switzerland in 1580 to find that "at all meals they put on the table as many spoons as there are people present."

True to the Pole.

The needle of the compass does not always point directly north. It is subject to daily and yearly variations as well as those which require centuries to complete. The needle is however, "true to the pole," although it shifts thus every hour in the day. It does so only in obedience to the laws which control its action! Variations which are constantly taking place in the terrestrial magnetism produce corresponding changes in the needle.

May Weddings.

In ancient Rome there was held in May a festival called the Lemuria, or feast of the Lemures, which was a ceremony in honor of the spirits or departed souls. It became with the Romans what we should call "bad form" to have matrimonial feasts at the session of a solemn ritual, being no doubt thought to be an insult to the dead to marry at such a time. From this a number of stories grew of the revenge made by the outraged ghosts upon those who dared to disregard them, and if anything unfortunate happened to a couple [illegible] been married in May it would, of course, have been put down to retribution. So the repugnance to May weddings arose, and its influence has lasted ever since, even to our time.—Exchange.

Minard's Liniment Cures Dandruff.

Smokeless Powder.

Smokeless powder dates back some fifty years, but it was not until about 1886 that it attained its real efficiency and sprang into general use. It must be understood that even the best of this powder is not absolutely smokeless. It is not smoky enough, however, to "do any harm," and as compared with the old powder may be called "smokeless."

The Nebular Hypothesis.

The nebular hypothesis assum that the matter composing our sun and planets once existed as a vast gaseous nebula, spiral in form, havin an inconceivably high temperature and slowly revolving on an a passing through its centre of grav. As the mass cooled by radiating into space a contraction of with accelerated axial rotation wo ensue, in accordance with well-kno dynamic principles. The centrifu force thus rapidly increased wo cause the separation of large mas which would, by mutual attraction their own particles, gradually assum a spherical form and become planets. By a repetition of this process, planet after planet would be thrown off and the central glowing sun would remain.

The man who marries a woman for her money must expect to have it thrown up to him.

You Can't be Neutral on the food question. You have to decide between mere palate-foods that contain no nutriment and foods that repair the bodily waste. Shredded Wheat Biscuit is both a palate food and a muscle builder. You can keep in good health and at the top-notch of physical fitness by eating this delicious, ready-cooked, whole wheat cereal for breakfast, luncheon or any meal.

ELLA'S RECOMPENSE

He had been very strangely disturbed, restless, perhaps what might be termed uncomfortable, since he met Ella Marston in Friedrichstadt. Yet would he have foregone the discomfort if he could? No! a thousand times no! for with it came a delicious sense of vivid life, of fresh interest and sympathy in the world around him—a renewal of youth for which he blessed his involuntary tormentor! The tide of such feelings and impressions rises rapidly. Only at dinner-time he had revolved in his mind the advisability of marriage.

The keen annoyance he had experienced that afternoon at Miss Marston's and Von Reichenberg's hands had fairly opened his eyes to the reality of his own desires. Where could he find a sweeter, a more delightful companion than Ella? and she so sorely needed a friend and protector! Already his petulant jealousy was subsiding under the influence of his better judgment and higher instincts. Now, all things were changed.

As the adopted daughter and heiress of James Lyall, Miss Marston's financial position so far surpassed his own that it became a point of honor not to entangle her in any engagement while she was ignorant of what was in store for her, until she had had an opportunity of seeing something of the world, which would, no doubt, welcome her under her new circumstances with great cordiality; until she had an opportunity of seeing other men besides himself and her Cousin James. No! he must take no advantage of her inexperience!

Once plunged into society, surrounded by young, agreeable men, trained in all the arts of pleasing, what chance would be have—he, a plain, silent, self-contained elderly soldier—with a bright young creature, full to the lips with life?

If he became her guardian he foresaw endless trials and difficulties. The nature of his own feelings would make it almost impossible for him to judge clearly and wisely what would be best for her, in any project of marriage. Nay, the consciousness that any lover of hers must be odious to him, would weaken his power of resistance if she wished what he disapproved, from the distrust of his own motives it would create.

Then if he returned to India, what supervision would he exercise? No; he would place this last fact strongly before Lyall, and ——

A curious reluctance to break away from all connection with his proposed ward checked him even in thought. Why need he look so far ahead? In all probability James Lyall would live to see his young heiress happily settled. "Threatened folk live long." Meanwhile he must act like a man of sense and honor; put all unbecoming youthful nonsense out of his head, and cultivate a kindly, semi-fatherly friendship with the fair girl in whose future he seemed destined to play a part—"a line of conduct," was his concluding reflection, "which will soon settle any chance I might have had."

* * * * * * *

The idea of making a fresh will had taken possession of Lyall, and having exhausted Friedrichstadt, he was restless for want of something to do; so he made up his mind to start for London the day but one after this conversation.

"Have you any commands for England?" he asked, having presented himself in his sister's little salon on the morning which succeeded his confidences to Cecil. "I'm going off to-morrow morning."

"Going to London!" shrieked Mrs. Vereker. "Why, what in the world takes you away so suddenly?"

"There's some business wants looking after in town, and there is nothing to keep me here. You ought to come, too; you have done this place pretty well, haven't you?"

"I dare say I shall have next month, but I am sure I don't know where I shall go. I hate England in winter."

"Well, I am going to look out for some little place in the country, and will settle myself for the rest of my days."

"Oh, you'll never settle, James; and Colonel Cecil—are you going to take him with you?"

"No, he stays behind to see that you two don't get into mischief," returned Lyall, grimly.

"I am sure he is very good," said the widow, with a smile and a toss of the head.

"Now, in return for all your tea-drinkings, accepted and not accepted, Cecil and I are going to give you and Ella Marston a little dinner to-night, if you will honor us, and so forth," said Lyall, more graciously than usual.

"I am sure I shall be very pleased to dine with you; but do not fancy you are obliged to invite Ella. She does not expect it—she—"

"I am not going to leave her out," interrupted Lyall, with much decision.

When Ella returned from some errand on which Mrs. Vereker had despatched her she looked flushed and disturbed.

"Is it warm out?" cried Mrs. Vereker. "You look as if you had been roasted!"

"The sun is strong," replied Ella. She did not think it necessary to mention that she had been joined by Von Reichenberg, who had persisted in accompanying her; and worse still, she had, while thus escorted, met Cecil at the far end of the Berliner Strasse.

The colonel had only raised his hat, and made no attempt to accost her; but he looked portentously grave.

Mrs. Vereker's announcement of the invitation to dinner was cheering, in spite of the balance of regret induced by hearing of James Lyall's intended departure. In him Ella felt she had a steady friend and she was quite cast down at the idea of missing his kindly yellow face.

The dinner was, on the whole, successful. Lyall shone as a host; his sister, as a guest, was gracious; and Colonel Cecil, though somewhat grave and quiet, made himself very agreeable, and was most attentive to Mrs. Vereker.

Ella was conscious of an indefinable change in his manner. He was more gently courteous and less quarrelsome. He did not speak much to her, yet she was conscious that he heard all she said and noticed all she did.

When the ladies rose to return home, Lyall exclaimed: "It is 'good-by' as well as 'good-night,' fairs; I have decided to go early to-morrow to Leichenberg, spend the day there, and travel on to Cologne at night. Cecil will see me on the first stage of the journey, and return next day."

"Perhaps that will be better. Good-by, then, James. Thank you for a pleasant evening! I suppose we'll meet in London?"

Colonel Cecil offered his arm and led her from the room. "Good-by, little girl," said Lyall to Ella. "I shall write to you, and mind you answer me."

"Yes, I will gladly; I shall miss you so much, Cousin James!"

"Shall you? and I shall miss you. There, there's a keepsake for you. It is a porte-monnaie. Look into it when you get home. God bless you! take care of yourself!"

"Oh, Mrs. Vereker," cried Ella, half an hour later, as she was assisting the widow to undress, "Cousin James has given me this beautiful porte-monnaie, and there are two five-pound notes in it!"

"Good gracious! and he has never given me tenpence in his life. I hope you said nothing to him of our—of your own trying conduct the other night. He has some absurd notion that I ought not to travel about without a companion, so wouldn't like you to leave me; and though he is tiresome and provoking, he is my only brother; I ought not to vex him; he has a good deal of money to leave behind him, but he never tells me any of his affairs."

"You may be quite sure, Mrs. Vereker, I should not think of troubling him with our little differences of opinion."

"That's right, Ella, quite right."

CHAPTER VII.

A week had passed since Lyall's return to England, and nothing worthy of note had occurred.

Colonel Cecil was a frequent visitor, kind though grave; but the intimacy which had seemed on the point of springing up between him and Ella appeared in some occult way to stand quite still; an indefinable, subtle change seemed to have passed over him, and though he was less fractious and given to find fault, it was, Ella thought, because he was less interested in her.

She was vexed to find how disturbing this impression was; not even the consciousness that she had ten unexpected pounds in her pocket, nor a long, kind letter from James Lyall describing a very pretty country place he had seen near Canterbury, where he rested on his way to London, sufficed to remove her sense of uneasiness, though her friendly relative expressed a hope that wherever he fixed himself she would visit him.

This, in the gratitude of her heart, she mentioned to Frau Gudscher, and confirmed that worthy woman's impression that the "ill gentleman" would make the charming Fraulein his heir.

Mrs. Vereker was greatly pleased by finding that Cecil remained behind. She wearied Ella with conjectures as to whether he would "speak" or not, and long monologues respecting the impossibility of ever giving the saluted general a successor.

The weather continued bright and beautiful and Frau Gudscher proposed one more "Landparts," or excursion, as winter would soon be upon them, and her guests had not yet seen the "Adlerfelsen," some peculiar rocks at about an hour's distance by rail from the town, respecting which tradition told wonderful tales of a gigantic demon eagle that used to haunt them in distant times.

The idea was favorably received by the Brownes and eagerly caught at by Herr Von Reichenberg, who was going "to hunt," as he termed it, in the woods surrounding an old schloss of his brother's, in the near neighborhood of the rocks.

As these overhung the river, it was proposed to go up by train, and to take the steamer down the river for their return.

The whole of the arrangements were left to Frau Gudscher and the baron, who went to his hunting quarters the day before to see that all things were in readiness.

Ella, for some reason unknown to herself, looked forward to this excursion with great pleasure, and was charmed to find, on waking, a glorious morning.

After an early second breakfast the party got in motion, almost all the inmates of the Pension having joined. Mrs. Vereker shared a carriage with Lady Browne, and drove to the station. Ella walked with the traveled scientific Miss Briggs, and the Scotch professor, and Frau Gudscher went on in front to secure tickets for all.

Arrived at the terminus the first figure that caught Ella's eye was the baron's, the next Mrs. Vereker, chattering, smiling and tossing her head in conversation with Colonel Cecil and Miss Browne.

"I did not expect to find you here, Herr Von Reichenberg," said Ella; "I thought you were away at the schloss."

"Ach so! Did you not imagine I should be here to travel with you? I would not miss that. I may remain at the schloss to-night, but that depends—"

Here Frau Gudscher came flying back from the booking-office.

"Cut—my childs—quick, quick, or we shall miss the train, and that will finish all."

"I thought you would be late," said Cecil, with a slight frown; "why did you not come with Mrs. Vereker."

"Because she told me there was no room, and that I must walk with Frau Gudscher."

"Come, gracious Fraulein," exclaimed the baron "let me secure a seat for you."

Ella, seeing Mrs. Vereker and the Brownes had taken their places, and fearing it would be her lot to remain with the German division of the party, gave a glance of entreaty to Cecil, which said unmistakably, Don't forsake me! and hurried on after Frau Gudscher, finding to her satisfaction that there was a spare seat opposite to her own. But a minute, two passed, and he did not come; then the doors were banged to, a shrill whistle sounded and they were off.

"Ach Gott! is the colonel, then, left behind," cried Frau Gudscher.

"Nein," replied the baron, withdrawing his head from the window his large form darkened "he has gone in the carriage with Mrs Vereker. Do you suppose he would leave the charming lady?"

He did not add that he had heard the wild screams of Miss Browne and Mrs. Vereker in chorus, "Oh, my portfolio! my paint box!"

"Go bring her her things, Colonel Cecil! they are on the seat by the door!"

Cecil had only time to snatch up these precious articles when the train began to move, and he had no choice but to jump into Mrs. Vereker's apartment. He was not a lively companion during the transit.

Ignorant of this passage, Ella felt unreasonably vexed at herself for begging him with her eyes to stay by her, and piqued with him for disregarding the expression which she felt he understood. Of course Colonel Cecil was quite right to secure the companionship of Miss Browne and Mrs. Vereker if he preferred it, only she had not hitherto thought he did; really she must not be rude to Herr Von Reichenberg, who was uniformly kind and attentive. Still she was somewhat silent, and the journey seemed rather long till they reached the little station where they alighted.

Here a ferry-boat carried passengers across the grand, smoothly flowing river, which rolled between undulating banks covered with woods and fields, orchards and cottages on one side, and great towering cliffs standing straight up from the water's edge on the other.

Opposite the railway station, a small lane ran through the pine forest which stretched inland, and opened a few yards of level ground between the mighty cliffs. Here was a rugged wooden pier projecting from the broken margin of the river, beyond which a strip of mossy grass intervened between it and a low, primitive thatched Gasthaus, which offered beer to the thirsty before they began the ascent of the rocks. From this a rough wall, to the summit of the precipitous Adlerfelsen. In front of this edifice stood some mules, descrying which Frau Gudscher, in shrill accents, called aloud to the company to observe and acknowledge the fact, the thoughtful care, the general love-worthiness, of her dear excellent cousin! Had he not done well to order these good beasts to be ready for the ladies, who would thus arrive fresh and well at the summit, and be able to see the many beauties which awaited them?

"There are only four steeds for six ladies," said Sir John Browne, putting his field glass to his eyes.

"What matter? some can ride in turns. Then returning it will be quite easy and delightful. The steamer touches here at 6 o'clock, and we can walk down leisurely to meet it in the cool, observed Frau Gudscher.

"These Cliffs are very fine," said Cecil, disentangling himself from the group and addressing Ella, while Frau Gudscher, with Von Reichenberg as her aide-de-camp, went on to secure the whole space of the ferry-boat.

"Oh, yes!" cried Ella, fully restored to her joyous spirits. "Is it not lovely here? Look at the wooded banks and beautiful grassy margin. I should like to live at old Gasthaus for a summer with Kitty. How delighted she would be!"

"It wouldn't be bad for a few weeks, if it were clean, and one could get anything to eat," returned Cecil, looking with sympathizing admiration at her bright, expressive face.

"An Englishman! always think first of eating," said Ella.

"Perhaps food may occupy our thoughts, but when it comes to deeds, your German friends leave us nowhere," retorted Cecil, quickly. "Come, they are waiting for us. Where is your cloak or your wraps, I will carry them."

"Oh, thank you! I gave mine to the baron."

"Ah, I suppose you had a lively journey and a good lesson in German!"

"Yes, very good; and Herr Von Reichenberg told me all about the places we passed. It is so interesting."

Colonel Cecil made no reply. She was even more of a coquette than he thought, first inviting him as plainly as eyes could speak, to come to her, and then transferring her interest to that conceited vaporing ass of a German. Ah, first impressions are often the truest; these independent, daring young ladies are not to be trusted; they are too ready to follow the whim of the moment, without respecting the opinion of those older and wiser than themselves. Still, she should not entangle herself with that brute of a fortune-hunter, if he could prevent it.

"Here, Cecil, sit beside Mrs. Vereker. You'll trim the boat better," cried Sir John, who was not fond of being afloat. "Herr von Reichenberg, you are no trifling weight; you'd better keep by Miss Marston. Go ahead, old Charon."

"It is thy opportunity; use it," whispered Frau Gudscher to her cousin. He gave her an almost imperceptible nod, and, stepping forward, took one of the long oars to assist the ferryman; standing up to row, and displaying his fine figure, he flattered himself to the best advantage.

Under this pleasant impression he proceeded to make himself most agreeable; he talked away in his fragmentary English to Mrs. Vereker, Miss Briggs, and Miss Browne—the latter replying fluently in German; he sung snatches of drinking-songs, chaffed the ferryman, and bought plums from an old basket-woman, who seemed quite delighted with the noble Herr's condescension.

Cecil listened with ever-increasing disgust. "What an ass the fellow is making of himself!" thought the somber-looking colonel. It must, however, be confessed that this opinion was not shared by the rest of the party, to whom Von Reichenberg seemed a pleasant entertaining, unaffected young man, who really kept them alive.

The crossing accomplished, they disembarked under the shadow of the lofty rocks, which was acceptable enough, for the sun was strong, albeit far into October, and the glare on the water too powerful.

"When does the last steamer pass?" asked Mrs. Vereker. Ella translated the question.

"About half-seven," replied the ferryman. "The Gnadige Frau may trust me. I will put out the flag to show there are passengers, and have my boat ready."

"Come, my Fraulein," cried Von Reichenberg as he handed Ella from the boat and walked on beside her, carrying her rain-cloak over his arm, and leaving Colonel Cecil, who followed, to look after Mrs. Vereker. "Your steed waits you," he continued, directing his steps to the best-looking of the animals standing before the little inn.

(To be continued.)

SUNDAY SCHOOL LESSON

Lesson XII. March 19, 1916.

Philip and the Ethiopian—Acts 8: 26-40.

Commentary.—I. Philip sent on a mission (v. 26) 26. The angel of the Lord—"An angel of the Lord."—R. V. A messenger sent by the Lord for a specific purpose. Spake unto Philip—The manner of the declaration of the message is not described, but it was unmistakably clear. The angel may have come in a vision to him, in the same way that Paul was called to go into Macedonia (Acts 16: 9) Arise—Philip's work in Samaria was finished and another field was ready for him. Go toward the south—There was a road leading from Samaria to Gaza. It led southward and, leaving Jerusalem to the east, intersected the road from Jerusalem to Gaza, one of the cities of ancient Philistia. Desert—The road led through an uninhabited region, hence it was called a desert way. Philip's call was definite as to where he should go, but there seemed to be no information as to what work he should do. "Let him obey and he will find what the desert can afford." In the desert he was soon to find rich fruitage in the salvation of a soul-hungry foreigner, "a man of Ethiopia."

II. Philip preaching Christ (vs. 27-35.) 27. He arose and went—From the record here given we conclude that his response to the call was immediate. The call was accurately timed that Philip might meet the man to whom he was sent. A man of Ethiopia—Ethiopia is a country of Africa lying south of Egypt. An eunuch of great authority—A high official. Candace—An official title rather than a personal name. It was the name given to a succession of queens of Meroe, a region a thousand miles up the Nile from the Mediterranean. Who had the charge of all her treasure—He was a trusted officer. Come to Jerusalem for to worship—The Ethiopian had embraced the Jewish religion and, although a proselyte from paganism, he went to Jerusalem to attend one of the great religious feasts. 28. Read Esaias the prophet—Esaias is the Greek form of the name Isaiah. Traveling was necessarily slow and tedious, and no more agreeable and profitable manner of passing the time could be suggested than reading the scriptures. 29. The Spirit said unto Philip—God's messenger had directed Philip to go southward from Samaria to the desert road leading from Jerusalem to Gaza and he had obeyed, now the Holy Spirit gave him an explicit command and whose sake he approached the man for whose sake he made this journey. God was working here by his providence and by his Spirit in bringing Philip and the Ethiopian together. Join thyself to this chariot—No doubt this royal treasurer had a numerous retinue, and a single traveler on a desert road would be doing what was natural in attaching himself to a train of people who were journeying in the same direction. Philip would therefore be able to approach and hear what was read without being deemed an intruder.—Cam. Bib.

30. Heard him read—Orientals are accustomed to read aloud even when reading for their own benefit alone. Understand thou what thou readest—The Spirit must have prompted Philip to begin his mission to the Ethiopian in this way. Philip wished to preach Christ to him, and this was a most favorable opportunity, for he was reading a prophecy about Christ. 31. How can I—The scribes and other teachers of the law made it their business to explain the scriptures, putting upon them their own interpretation or that of the elders, and the Ethiopian expressed his need of instruction. He desired Philip—As Philip co-operated with God, the divine plan worked perfectly. Here were the preacher, the listener and the text. 32. The place of the scripture—The Ethiopian read from Isa. 53: 7, 8, and probably from the Septuagint version, a Greek translation of the scriptures, which was made in Egypt in B. C. 285. He was led—The reference is to Christ. Some of the Jews interpreted this as applying to the Messiah, and others to the congregation of Israel. 33. His judgment was taken away—Justice was denied Jesus at his trial. Declare his generation—Who shall describe or explain the crime against Christ by the men of his time?

34. Of himself, or of some other man—This question shows the darkness of the Ethiopian's mind and his desire to know the meaning of the prophecy. The Jews had a tradition that Isaiah was sawn asunder, and the Ethiopian thought he might be speaking of himself. 35. Then Philip opened his mouth—The form of expression indicates that Philip realized the importance of the occasion and would speak impressively the message that God gave him for his listener, the man who would carry the gospel to far-away Ethiopia. Began at the same scripture—The passage from Isaiah that the Ethiopian was reading. Preached unto him Jesus—In explaining the passage Philip made it clear that Jesus was the one spoken of by the prophet. The sermon is not recorded, but Philip was well qualified from his Christian experience, his knowledge of the gospel and the baptism of the Holy Ghost to preach Jesus to the Ethiopian.

III. The Ethiopian converted (vs. 36-40). 36. Came unto a certain water—On the road towards Gaza is a fine stream of water. What doth hinder me to be baptized—Philip had preached to the Ethiopian that Jesus was the fulfilment of the prophecy and he had also declared to him the conditions of entrance into the body of believers, and the listener was desirous of becoming identified with the followers of Christ. 37. Believest with all thine heart—Intellectual faith is not sufficient to constitute one a true believer; there must also be heart trust. I believe that Jesus Christ is the Son of God—For the Ethiopian to believe with all his heart that Jesus Christ was the Son of God was to accept Him as his personal Saviour, as well as the Saviour of the world. This verse is not found in the best ancient manuscripts and is omitted from the Revised Version. 38. Went down both into the water—The Ethiopian had professed his faith in Christ and was a proper candidate for Christian baptism. He baptized him—By being baptized the Ethiopian declared that he was a follower of Jesus.

39. The Spirit of the Lord caught away Philip—This marvelous removal of Philip would confirm the eunuch and his companions in their faith. They would recognize that he who had been sent unto them was a man of God.—Farrar. Went on his way rejoicing—The Ethiopian had every reason to rejoice. A new light, a new life and a new joy had come to him. He was a converted man. 40. Philip was found at Azotus—He next appeared at Azotus, the ancient Ashdod of the Philistines. It was eighteen miles north of Gaza. Preached in all the cities—Philip preached the gospel in the region along the Mediterranean as far north as Caesarea, which stood in the northern part of the plain of Sharon.

Questions.—Who spoke to Philip? Where was Philip told to go? Where was Gaza? What position did the Ethiopian fill? Where had he been? Where was he now going? What did the Spirit say to Philip? What question did Philip ask the eunuch? What was his reply? What did he desire of Philip? Where was the Ethiopian reading? Why did the eunuch desire to be baptized? What became of Philip? Why did the Ethiopian rejoice? Where did Philip preach after leaving the Ethiopian?

PRACTICAL SURVEY.

Topic.—Christ Revealed.

I. Through a faithful ministry.

II. To an awakened Bible student.

I. Through a faithful ministry. The meeting of Philip and the Ethiopian was not the result of mere accident or chance. The Ethiopian traveller was led on by Providence. The evangelist was called out by an angelic message. They were unknown to each other, yet both in their way followed divine guidance. The Ethiopian was one of those men, among the heathen, who had been awakened to spiritual anxiety by the ever-working Spirit of God, one who had come to see that his own personal relations with God were matters of extreme importance. Philip was engaged in successful work in Samaria. He was divinely summoned to abandon it and go to the desert. To have doubted the divine wisdom would have been to lose the opportunity of meeting the man for whose conversion he was the divinely appointed instrument. Philip was prepared for emergencies by experience and study. He was in full fellowship with the divine Spirit, prompt to receive divine influences. He was obedient and self-denying, ready to go wherever sent, ready to exchange a large field for a small one. He was aggressive, eager to render service to whom he was sent. He was broad in his views, recognizing the privilege of Gentiles as well as Jews to be saved. The prompt obedience with which Philip followed the guidance of the Spirit, the apostolic courage with which he laid hold of his work, the evangelical wisdom with which he unfolded the scriptures, the prompt recognition of faith in his convert, the Christian humility which he exhibited after the convert was gained, all show him to have been a true minister of the gospel. Philip had learned that all true spiritual power came through submission to the divine will. He was selected to be the first who should preach to the heathen and win a foreign convert. His faith accounted for his obedience and success.

II. To an awakened Bible student. The Ethiopian advanced from a season of profound meditation on the word of God to hear a gospel sermon. Philip was divinely guided to meet him on his return from the holy city, when he was hopelessly puzzled with his reading. In all Hebrew scripture no passage could have been more pleasing to Philip as a text for his preaching. It was one of the most significant of the Old Testament. Philip recognized the preparation God had made in the mind of the Ethiopian for his truth. His mind was opened to spiritual instruction. To the Ethiopian it seemed almost impossible to put together the idea of Christ as a sufferer and the promise that he should be a glorious King triumphing over the world. Only facts could solve the problem. Philip's words penetrated to the inmost depths of his soul. He could harmonize the prophecy with the facts, a prophecy most comprehensive in its range, most minute and singular in its details and which, in all its particulars, was fulfilled alone in Jesus of Nazareth. Bold, direct, persuasive, faithful preaching on the foundation of the written word, adapted to the conviction of his hearer, was productive of great results. The Old Testament did its work. Gospel truths were fulfilments of the Old Testament prophecies. With open soul the Ethiopian listened and the truth dawned on him. Christ the Messiah, the Saviour of mankind, was revealed unto him. A state of doubt and inquiry gave place to knowledge, faith, decision and open dedication. Loneliness was changed into Christian companionship. The apparently incidental meeting proved to be of divine ordering. Life's perspective was changed. The same Spirit, who sent Philip, continued with the Ethiopian after the messenger's departure. The genuine seeker after truth, devout and earnest, candid and honest, unprejudiced and believing found soul satisfaction in a personal Saviour and expected immediate results. His scriptural teaching revealed Christ. His practical application led to personal faith in Christ and union with the church. Philip had taken a long journey in quest of one convert. It proved to be a most fruitful day's service. The first fruit of the Gentile church was the recognized disciple of Jesus, the exultant Ethiopian witness to gospel truth. He was the first fruits of the prophecy, "Ethiopia shall soon stretch out her hands unto God," also "The desert shall blossom as the rose."—T. R. A.

Napoleon's "Nine Lives."

The surrender of Napoleon to the captain of the Bellerophon, when that event became known in England, was disbelieved by many, for at least eight times previously he had been reported dead, says the Westminster Gazette. The list of his deaths published in a contemporary journal is interesting. He lost the first of his nine lives in a battle on the Dnieper, where he received "five mortal wounds and expired as he gave his sword to Prince Kutusoff." Later he was twice drowned, once "while crossing the Mosque" and again in Moscow, "where he lost his way and fell into a reservoir." During the retreat from Moscow he was suffocated in his tent and a few days later buried 5,000 fathoms deep in a fall of snow. Finally he reached Paris, where his exasperated subjects immediately lynched him. These were some of the many fables concerning Napoleon which found their way into the newspapers a century ago.

"I found a $10 bill this morning." "That shows you are lucky. Have a gift for finding things." "My gift stuck by me too long. Next I found the owner."—Louisville Courier-Journal.

KIND BURGLAR WELL REPAID

"A house in the country that I had got into by a convenient cellar window and that I came out of by the front door," said the retired burglar, "have proved to be very disappointing.

"I had imagined from the nicely kept lawn and the general appearance of things outside that it must be the home of people of means, but in the whole of upstairs I had not found, of things that I could carry away, enough to pay me for my night's work.

"Then, as I came down from the second story into the front hall I cast my light around there, to see if there was anything there worth while. There wasn't, but on a little tray on a table in the hall I saw three letters addressed and stamped ready for mailing, and I thought I would take those letters and mail them.

"That was just a foolish whim, but then I did a downright foolish thing, something that I had never done before and that I never did again—I wrote a note and left it on the little tray from which I took the letters:

"'I have taken the letters. I am going right past the postoffice and I can mail them just as well as not.

JIMMY.'

"Well, I did mail those letters, and then I never thought of them again till about a year and a half afterward when I saw this advertisement in a newspaper:

"'Jimmy—Thanks for mailing those letters. We want to communicate with you. Write to us where you found us. B. S. O.'

"Now that was something of a jolt, wasn't it? Of course, that foolish note that I left was a clue and now they were following me up, and what should I do about it? Should I communicate?

"All I could do was to trust my hunch, and I trusted it. I wrote, giving a fictitious name, and giving my address as the postoffice. Of course, it would have been the easiest thing in the world for them to have a man watching the office here for me when I called for the letter, but I liked the house and I thought I should like the people that lived in it, and I took a chance.

"In two days I got the letter, and when I opened it there dropped out of it a $1000 bill. Do you fully grasp that? A $1000 bill, and this is what they wrote me:

"'One of those letters that you mailed us was to an uncle who lived in a town not a hundred miles from ours. I don't know whether you noticed the address on the letter or not. A nice old man he was, not an eccentric, nor a hermit, but just an old bach, who lived by himself and went his own way. He did not seek friends, and so far as we know we were his only living relatives; but though he lived so near we had not seen him nor heard from him in a dozen years.

"'Then one day, the day before the night that you called, it struck us that we would write to Uncle William; and just out of a feeling of friendliness and good cheer we sat down that day and wrote him that letter; the letter that you mailed.

"'And what difference did it make, I hear you saying, who mailed the letter? Well, I will tell you.

"'In the ordinary course of things that letter would not have been mailed by us until some of went down to the centre in the afternoon; and mailed then it would never have reached him; for on the afternoon of that very day our uncle moved from the old town in which he had lived so long, and left no address behind him. But mailed when it was, by you, it did reach him. He never answered it himself; but a year later we received a letter from a lawyer in the town to which he had moved saying that our uncle had died in that town and had left us $200,000.

"'He had accumulated $205,000. He had made a will giving $200,000 of this to a hospital that had caught his fancy and $5,000 to us, his relatives, if still living." But later, clearly after receiving our letter, which he would never have got but for you, he had changed his will, giving $5,000 to the hospital and $200,000 to us; and now, after some six months of legal formalities we have got the money.

"'So you see your mailing that letter made all the difference in the world to us; it brought us a fortune.

"'We still live in the same house, but now we have more things than when you were here. In fact we have some things now that usually we do not keep in the house, but in a box in the bank at the centre; but if you will come over and see us again and will let us know when you are coming, we will leave around the house enough to make this visit profitable; we feel that we are still much in debt to you.'

"But I never went back. Whatever they got out of it I felt as if, just for carrying the letter to the post office, a thousand dollars was all that was really coming to me."—New York Sun.

BLIND READ BY SOUND.

University Professor's "Phonopticon" Will be a Great Aid.

By the invention of an electrical "eye," through the medium of which sound waves may be developed from printed letters, a means has apparently been discovered for enabling the blind to read. A professor at the University of Iowa has built an apparatus which literally reads print. It is called a phonopticon, and in the course of experiments has shown itself capable of pronouncing various letters of the alphabet, as well as figures and other characters, by sounding different combinations of musical notes. By learning the particular sounds representative of each letter, a person unable to see is made able to read. It is even considered likely that the apparatus may ultimately be developed so that an impression of a painting or a photograph may be conveyed to those deprived of sight.

The "eye," when in use, is moved along a line of text to be read. It is by means of this that other mechanism which develops and carries the sound waves to the ears of the user, is actuated. Crystalline selenium, a peculiar element that is sensitive to light and a conductor of electricity, is the all-important part of the artificial optic. It has the effect which light has upon this substance that renders it valuable for this purpose. The conductivity of the crystal varies according to the intensity of its illumination, since the resistance of the material is reduced by exposure to luminous rays.

Three separated crystals are placed above an aperture in the reading device and so connected as to form arms of a wheatstone bridge, which in brief is a device for measuring electrical resistance. When the "eye" is passed over blank paper the instrument is neutral. A bright band of light from an outside source moves with the "eye" illuminating each letter in turn. As the black outline of part of a character is reached its image is thrown through a lens upon one of the crystals. This shadow reduces the illuminated area of the crystal, increasing its resistance. In turn this unbalances the current and deflects a part of it into one of a series of three branch circuits. In each of these is an interrupter which produces a current of definite frequency. These impulses are converted into sound waves of a specific pitch by a resonator provided in each receiver.

In this way, it may be seen, each part of a printed letter, as the upper, lower, and middle sections, acts upon a certain crystal and through it upon a separate interrupter and resonator. The frequency given the currents by the interrupters is governed by the number of segments of the latter and their respective speeds in revolving. The entrance of the successive parts of a letter into the illuminated area is instantly announced by a change in the pitch of the note.

In this particular instrument three telephone receivers are used. The number corresponds to the number of crystals employed, which it is possible to vary from one to four. In order to enable the use of more than two receivers, a pair is incorporated in one holder. These instruments replace the galvanometer of the Wheatstone bridge.

At its present state of development the apparatus weighs approximately 35 pounds and the electrical "eye" two pounds. These weights are greater than will be required in a finished machine. The "eye" itself, which for convenience needs to be lightened considerably, can be made very compact and not more than a small fraction of a pound in weight.

The apparatus was recently tried out at a California institution for the blind and also at a convention of those engaged in promoting the welfare of blind persons. After a number of subjects had acquainted themselves with the different combinations of sounds peculiar to individual letters, they are able to distinguish letters and words more or less rapidly. Some of these tones are given in sequence, the letter "V," for instance, being rendered something like G, E, C, E, G, in the key of C major. The notes of "characters having upright lines such as "L," "I," and "E" are rendered simultaneously, since the upper, middle and lower portions act upon the selenium members at the same time.

It is the purpose of the inventor to perfect the machine so that it will be practical for use in any home where it may be needed. It is considered that it will be of value to persons with weak eyes whose businesses necessitate voluminous reading, and that it may also enable many blind persons to become self-supporting.—Popular Mechanics.

Assiniboia.

The name of Assiniboia was formerly at different times applied to two districts in Canada, but now belongs properly to none. The first was the district formed in 1835 by the Hudson's Bay company, having in it Fort Garry, at the junction of the Red and Assiniboine rivers, in Rupert's Land. It ceased to exist when Ruperts Land was transferred to Canada in 1870. The second regions, known until restrained, and will require god buying cently as Assiniboia, was a district of the Northwest territories, given definite existence by an act of the Dominion Parliament in 1875. It extended from the western boundary of Manitoba to the line of 111 degrees west and from the parallel of 49 degrees north to 52 degrees north. Saskatchewan lay to the north of the district, and in 1905 the two were united, with slightly different boundaries under the name of Saskatchewan.

A COLD

Settled On Her Lungs

Causing Great Pain.

THE CURE WAS

DR. WOOD'S

Norway Pine Syrup.

Miss D. M. Pickering, St. Catharines, Ont., writes: "Having derived great benefit from Dr. Wood's Norway Pine Syrup, I thought I would write and tell you of my experience. When I first came out from England I contracted a severe cold, owing to the change of climate. It settled on my lungs, and caused me a great deal of pain. I tried every remedy I could think of, but got no relief. My father, who had heard a great deal about the good qualities of Dr. Wood's Norway Pine Syrup, advised me to try it. I did so, and I am pleased to say, found immediate relief. I only took one bottle and it cured me completely. My mother had a severe cold also, and Dr. Wood's Norway Pine Syrup cured her, so we never fail to keep a bottle of it in the house."

See that none of those so-called "pine syrups" are handed out to you when you go to your druggist or dealer and ask for "Dr. Wood's." It is put up in a yellow wrapper; three pine trees the trade mark; price, 25c and 50c.

HALF THE ILLS OF LIFE

Are Caused By CONSTIPATION.

When the bowels become constipated the stomach gets out of order, the liver does not work properly, and then follows the violent sick headaches, the sourness of the stomach, belching of wind, heart-burn, water brash, biliousness, and a general feeling that you do not care to do anything.

Keep your bowels regular by using Milburn's Laxa-Liver Pills. They will clear away all the effete matter which collects in the system and make you think that "life is worth living."

Mr. B. W. Watson, St. John, N.B., writes: "I have been troubled with constipation, for the last three years, and during that time have tried several remedies, all of which failed to help me. A friend recommended Milburn's Laxa-Liver Pills, and after using three or four vials, I felt like a new man. I am now still taking them, and am positively sure that I am on the road to recovery. I strongly recommend Milburn's Laxa-Liver Pills."

Milburn's Laxa-Liver Pills vial, 5 vials for $1.00, at or dealers, of price by The T. Toronto

PROVINCIAL PROHIBITION

There is said to be a strong probability of the government giving the Province prohibition as a war time measure without taking a vote on the question until after the war. This would meet with the entire approbation of most people and it is doubtful if even the license holders would raise much of an objection. This would prove a solution of the difficulty about the soldiers' Votes and would save the expense and energy of a contest in these trying times. As a matter of fact, what is the necessity for a vote on prohibition in the Province of Ontario? Everybody knows that the great majority of the electors want prohibition. That fact has been amply proved by various referenda in the past. And if further evidence were needed, we have it in the way in which the people of the Province have backed up the campaign of the Citizens Committee of One Hundred. However if a vote must be taken, let it be taken after the war. Such a vote would, we believe, only serve to emphasize the verdict which the people have already given on the Liquor question.

EDITORIAL COMMENT

Bruce boasts of beating Huron in recruiting. What about it boys?—Goderich Signal.

+ + +

The recent by-elections in British Columbia would indicate that the Pacific Province will soon join Manitoba as a recruit for the Liberal column and so make a solid west for that party.

+ + +

"Vim," one of the best informed contributors to the Farmer's Sun, says:— "The present price of potatoes is out of all proportion to their food value. Starch is their principal constituent, which is found in better combination in bread. But we have formed the taste for potatoes and no dinner seems satisfactory without them. The cause of the present high prices is not altogether scarcity. There are plenty of potatoes both East and West, but weather conditions prevent free shipments. Prices are sure to fall with the advent of spring weather, and farmers who are holding back supplies will lose money."

+ + +

The Toronto Star expresses the opinion that the Government ought to give Ontario prohibition forthwith without waiting for a referendum. There is no doubt about public opinion, says the Star. The question has been submitted to the people three times and every time there has been a large majority for prohibition. In the last case the vote was nearly two to one. For years past there have been votes on local prohibition, with the result that 576 out of 851 municipalities in Ontario are now dry. The petitions circulated within the last few months have been signed by nearly eighty per cent. of the voters of Ontario. Do we need any further proof of the feeling and desires of the people of Ontario?

The Lucknow Sentinel has decided to advance its subscription rate to $1.50 per annum, beginning on July 1st, 1916. The editor says:— With everything that goes to the making of a newspaper, and almost every necessity of life practically double in cost what they were when the one dollar per year rate was established, it was impossible that the country newspaper should remain at the old figure. Men will not continue in a business which does not give average returns, and with the country weekly it has become a matter of go up in price or go out of business. To those who think this unreasonable we would say that it is no more unreasonable than that eggs which used to sell at from 8 to 14c per dozen should now be from 30 to 40c per dozen, or that hogs, which used to sell at 3½ to 6c per pound should now be 8 to 10c per pound, etc. It is needless to multiply examples.

+ + +

The Bowmanville Statesman, recently discussing the subject of rural schools, says: "The chief trouble now, as we have before stated, is that after a few terms away from home at high school the lure of the town and city gets the grip on the country boys and girls, and they cannot settle down contentedly on the farm again. They get into the way of wearing good clothes and always been dressed up. Many young fellows would rather wear a white or other laundried shirt and polished shoes and work in stores and offices at six to ten dollars a week and call it salary than put on a suit of blue jeans and work on a farm for the same amount and call it wages. If the subject of agriculture were taught in a practical way in the rural schools, and the boys and girls continue to attend school at home, as they did forty and fifty years ago, till they receive a real good practical examination adequate for the ordinary pursuits of life, the farm youth would not crowd the city streets as they are doing."

+ + +

Liberal enthusiasm for Hydro power and Hydro radials was shown in the debate on the resolution of Thomas Marshall, Liberal member for Lincoln, asking the Federal Government not to interfere with provincial rights by granting of charters to electric roads merely provincial in their scope. This resolution was aimed against the application at Ottawa by the C. N. R. for the renewal of charters for railways which would interfere with the proposed Hydro radials in the Niagara district. The Government accepted the principle of Mr. Marshall's resolution and by an amendment of their own drafting forwarded a memorial to the Ottawa Government. In addition to Mr. Marshall, Mr. Rowell, Mr. Carter, Mr. Munro, Mr. Clarke and other members of the Opposition urged the necessity of extending and developing the Hydro system, especially in Eastern Ontario.

Letters from Our Boys at the Front

Genial Gus. Jenkins Has Recovered from Cerebro Spinal Menengitis—Harry Wade Urges Boys at Home to Come Along—Lieut. Taylor, Hand Grenade Instructor, describes Bomb Throwing Art.

GUS IS GETTING BETTER

That Pte. Gus Jenkins is recovering from the attack of spinal meningitis was the good news contained in a letter received by Earl Forsythe from Gus himself, which we are privileged to reproduce herewith:—

281 St. Ann's Road,
South Tottenham,
London, Eng.,
17 Feb. 1916.

My dear Earl:

Thanks so much for your letter of the first of January, which reached me (in the hospital at Aldershot) on the 17th of January and I am afraid I have been an awful time answering it, but I have been awful sick, in fact very very near death twice, and have been in hospital here since 10th December and don't expect to leave here until about first week in March. Have had "Cerebro Spinal-Meningitis" some times known as "Spotted Fever" and I consider myself lucky to be living at all to-day. I am enclosing a small photo of a group of patients in this ward (also the doctors and nurses) in which you will have no difficulty in finding me I think. How are you? Still enjoying life I hope. And young Barney Seberrer, Tommy Reichenbach, "Nancy" Irwin and all of them, how are they? Give them all my love will you? And tell them if they feel like dropping me a card I will most certainly answer it. You can give them my address as per this letter heading. Remember me very kindly to the McCarters and O'Malley's also to Bob Gibson and Fred Benninger will you? I am getting on fine now and hope to continue so to do. Tell Frank Kidd that I should love to have a "Telescope" once in a while, will you? Well good-bye for now, scatter my love around. Lots of love etc. to yourself.

Your affectionate pal,
Gus.

FROM SERGT. HARRY WADE

Dear Editor:—

I have just returned from 10 days' leave in England. Had a splendid time. Leaving the firing line by bus at 3.30 a.m., left France 4.30 a.m. by steamer, arriving in England at 2.00 p.m. the same day. That is going some. Returning to firing line left England 11.15 a.m. arriving in France 2.00 p.m., taking train 6.30 p.m., back to the trenches 4.00 a.m., the following morning. Found the boys in good health. Fritz is sniping a little at night and putting up star shells but he can't put the wind up us. I don't think the war will last any longer than two more years. The Germans are licked now, but they're just hanging on like the old Ross Government did. Major Fraser is in a dressing station about five miles from here. He is certainly doing good work. Many a man owes his life to the Major. I have had a year in the trenches now and to tell the truth, I have had my share of it, but I wouldn't like to be walking around in plain clothes. Any young man who is fit for service is called a slacker. I joined in August, 1914. I am the oldest Walkerton boy at the Front and also the senior of the Walkerton born, having joined No. 5 Co., 32nd Batt., under Major Henderson. I think the Major will admit he made a soldier out of me and I think that if the Major had his youth he would be in the firing with us. I have great faith in Col. Weir and I sure he will prove a hero. I only wish I were home or could come home to help him. There should be no trouble raising two Battalions in Bruce. Once you would see the trains leaving the Union Station on the Bruce Old Boys' Excursion. I am one who would pay my own way back to Toronto, but I am wanted here.

Then I would be leaving a good job, all kinds of food and tobacco to smoke, good clothes to wear. No time lost through bad weather. Lots of fresh air and plenty of walking. I remain,

Yours truly,
H. WADE, Co. Sergt.-Maj.,
No. 11530, 4th Batt.,
Canadians, France.
Belgium, February 20th, 1916.

P. S.—Hoping the Bruce Old Boys' Excursion this year will be to France or Belgium.—H. W.

THROWING HAND GRENADES

The following letter, written by Lieut. Herbert H. Taylor, brother of Mr. K. M. Taylor, of Walkerton, will be read with interest. Lieut. Taylor has visited his brother here and has many acquaintances in the town. Before the war he was superintendent for an insurance company in Western Canada. He was recently appointed brigade instructor and supervisor in hand grenades at Bramshott Camp, and no doubt some of the Walkerton boys of the 34th, have come under his instruction in this department. His description of the hand-grenade art is most interesting and instructive.

The weather has been much finer lately. My third class in grenade handling and throwing ended in a great enthusiasm and excitement, as we put on an "attack scheme" on a line of up-to-date trenches, and I had about 200 men detailed from the battalions in addition to the class to work with, and we had catapults and West Spring guns placed in the trenches throwing "live" grenades previous to the scheme, showing the spectators how they work.

The West Spring gun throws a live grenade (a salmon tin filled with dry primers of gun cotton and having a detonator with time fuse in it) three hundred yards or more. You light the fuse and pull a lever and the bomb goes flying through the air and bursts in four seconds or so.

Then the attacking party formed up barb wire cutters, in front of them, a line of riflemen with fixed bayonets, and behind a number of sections of grenadiers and carriers, each under an officer, and behind is a line of sandbag carriers and tool carriers, (picks, shovels, etc.) I fired a rocket in the air of a "Very" pistol and the wire cutters started creeping towards the wire entanglements on their stomachs, and when they got there they lay on their backs and cut and hacked at the wire around and above them. Up to the time they reach forty yards from the trenches the fellows defending these, throw "hair brushes" and other live grenades at them. They can only throw 25 yards and when I blow a whistle they cease. Then they hustled to the rear through the communicating trenches and the attacking force threw grenades in the first line trenches and then all charged. As soon as they got in, the riflemen immediately started firing blanks over the rear of the trench, called the "Paradox" and the grenadier sections started working to right and left throwing bombs into dugouts, and the boys ahead began to increase the frontage captured. Then the sandbag men and tool carriers came up and started turning the "Paradox" into a "Parapet," that is reversing the trenches, (as an enemy when reinforced would immediately start to make a counter attack on hearing a line had been taken.) Then certain sandbag men went to right and left and when the grenadiers had forced their way as far as possible, they built a barricade of wire across each end, and a few yards back one of sandbags, mounting a machine gun in the latter, hoisted a khaki and red flag on the parapet to show the extent won.

LETTER FROM BELGIUM.

The following interesting letter was received by License Inspector Joseph M. White from his nephew, Private W. H. Fenton, a Bruce County boy from Tara, who enlisted with the 18th Batt. and is now on the firing line in Belgium. Private Fenton is head carpenter of the 18th Batt. A cousin, Major Nelson of Southampton, was recently wounded and is now in England. Pte. Fenton writes:—

Belgium, Feb. 3rd 1916.

Dear Uncle:

Received your most welcome letter dated Jan. 18th, this evening. It was the quickest mail yet from Canada as three weeks is the average time. I will answer to-night as we are on the reserve for six days and not much to do. Well, things are going on very quiet on our front just now. A little shelling back and forward is going on nearly all the time but probably this affair will not last long as something more interesting will start before long. Our trenches here are in very good shape just now as the mud is drying up a little. It has been very wet for some time yet very mild weather for this season of the year, no snow or frost yet. I can't give you very much news about what is going on as our mail is all censored. The Bruce boys of our Battalion are all well so far. for myself, I have spent about eight weeks in the hospital with rheumatism but am back with the boys again. I had a good treatment so feel as good as ever. We are looked after in very good shape as well as could be expected under the circumstances. We have no doubt some hardships which no one can describe, yet we are in good heart and have all kinds of fun, a great experience for any man who will be man enough to come over here and fight for freedom. When one gets in the firing line he gets a feeling of determination as we know that Britain and her Allies will win in this Colossal struggle and will feel we stand between personal freedom and militarism. We still have the spirit "What we have we'll hold" and have taught our enemies that the Canadians are no mean fighters and that our devotion to our King, to our Country and to those we love is something that is deeper rooted in Canadians than in any other people in the world. I received the Tara papers to-night so am interested in the Bruce Battalion. Well, Uncle, I think I will close for this time. I hope all are well with you. Was pleased to know Russell had enlisted, he will never be sorry for his experience. I might say Squee Huck and Bert Cartwright are with us in this hut and they are well.

Your nephew,
W. H. Fenton.

"BOBBIE" ROWLAND HOME

Walkerton Boy Who Fought as a Private in the Princess Pats Home to Take a Commission in the 160 Bruce Regiment—Bob Gets a Magnificent Public Welcome

Never did Walkerton give a more hearty or spontaneous welcome to any citizen than to Private "Bob" Rowland of the Princess Pats, who arrived home Thursday night from the Front after spending nearly a year on the firing line in France. It was a desperately bad night, easily the stormiest of the whole winter. A perfect blizzard swept the open roadway along which two hundred and thirty soldiers and a great crowd of citizens journeyed a mile and a quarter to the G. T. R. station to meet the night train. As Bob stepped off the train, accompanied by his father, Mr. John Rowland, who had gone as far as Toronto to meet him, the first glimpse showed that Bob was in fine fettle after his year of soldiering, a little stouter if anything, and beaming with pleasure to see the old friends and the old town once again. After a round of greetings, a procession was formed consisting of the Mayor and Town Council, prominent citizens, and officials, Officers of the 160th Regt. and others in carriages, the 160th Band, headed by torch-bearers, next the soldiers of the local Company and non-coms. school in command of Lieut. Whitehead, and a large crowd of citizens. At the Town Hall steps where a further crowd had gathered, the procession halted, and there in the open air, His Worship Mayor Lippert on behalf of the Corporation and Citizens of Walkerton extended a very hearty welcome to the popular young Walkertonian. The Mayor thought his home-coming should stir up things for the 160th in the old town and that no doubt "Bobbie" would be able to start something among any fellows he used to play football with who had not yet enlisted. He also read a formal address of welcome on behalf of the Corporation.

Lt. Col. Weir expressed great pleasure on behalf of the officers, non-coms. and men of the 160th Batt., at Bob Rowland's return from the firing line to take a place as an officer in the Battalion. The Col. stated that early in January the Bruce War Auxiliary had sent the suggestion to the Minister of Militia that a limited number of young Canadians in the ranks in France who had had experience in trench-fighting be permitted to return to Canada to take positions as officers in order that the newly-forming regiments might have the benefit of their experience. A short time afterwards he noticed that Sir Sam Hughes had actually adopted this policy. After consulting Major Moffat, and without consulting the parents concerned, he then made application to the Militia Department for the return of four young men of Bruce, including Private Bob Rowland. In the case of one young man permission was refused. In all three other cases he hoped that the young men would be permitted to return.

Speaking on behalf of the Bruce War Auxiliary, Judge Klein said the occasion should be the proudest one yet in the history of the town, since for the first time, a Walkerton boy, born and raised in the town, came back from the firing line. The town should be proud of "Bobbie" and of his father and mother. They were the kind of parents that made the best stock in this country. If Bruce had more parents like them, this county would soon be raising a third and a fourth regiment for Overseas Service.

Bob replied in a few brief but appropriate words. It was fine to be back and see all his old friends. He had left a fine regiment but he hoped to go overseas with one of the best lots of fellows who had ever crossed the Atlantic. If everybody would pitch in they would soon fill up the ranks.

With a rousing "three cheers and a tiger for Bobbie Rowland", in which soldiers and citizens enthusiastically united, a memorable reception was brought to a conclusion. It was not only a whole-souled welcome to a popular Walkerton boy, but an expression of the appreciation which all Walkertonians feel of the action of her native sons who go to the Front to fight the battles of freedom and justice in defence of those things which they conscientiously believe to be the things worth living for and if needs be, worth dying for.

Private "Bob" Rowland enlisted for Overseas Service in the University Co., Kingston, being attached to the 38th. After the decimation of the heroic Princess Pats at Festubert, Bob was one of those who offered to step in and help fill up the gap in the ranks of that famous regiment. Although he had been only two months in training his services were accepted, and with two hundred and fifty others he was despatched hurriedly to France. The second day in France he was in the trenches and he has been at the Front ever since, until the summons came to return and take a commission in the 160th Regiment. Pte. Rowland saw steady fighting with the Princess Pats, and a good many of the fellows who went over with him, have gone down in the casualties. The explosion of a German mine under their trenches took a heavy toll and the every day fighting has got a lot of the boys. Fortunately Bob came through without a scratch. Bob naturally feels that Walkerton is the best spot on the map and it feels great to be home again. But he is eager to get to work again and hopes soon to land back on the firing line with the boys from Bruce.

BRANT COUNCIL

Brant Council meeting, March 6th, 1916.—The municipal council of the township of Brant met at the Tp. Hall, on Monday, the 6th day of March, 1916. Members all present, minutes of last Council Meeting read and declared correct.

Gregg—Rowand: That this Council do now go into a Committee of the Whole with the Reeve in the chair for the purpose of appointing Pathmasters, Poundkeepers, Fenceviewers, Sheep Valuators and Engineers to operate road graders.—Carried.

Weir—Rowand: That the following named persons be appointed Pathmasters, Poundkeepers, Fenceviewers, Sheep Valuators and Engineers, to operate the road graders and that the Clerk prepare a bylaw confirming the appointments.

List A.—Pathmasters.

Alex. McLennan, Frank Wilhelm, Jas. Clancy, Herb Moffatt, John Clancy, Wm. Atkinson, Wm. Dalgarno, D. Johnston, Horatio Parker, Weiss Napper, John Brown, Duncan Stewart, Gemmill Hood, Mark Scott, W. A. Tolton, Bruce Burnham, T. McNeill, W. J. Richardson, John Bilger, Alex. Streoder, Hugh Traynor, John Tanner, Harvey Chrisgen, Frank Geisler, J. Zettler, W. J. McNally, Thos. H. Wilson, J. C. Leach, Wm. Blake, Anthony Ernest, Henry Kunkel, Anthony Sutter, Wm. Morgan, Walter Rowand, S. J. Little, Adam Gowanlock, T. Scales, Jacob Seip, Wm. Chesney, J. L. Hutton, Robt. Brockelbank, John Schloff, Fred Frook, Fred Meuersmidt, Robt. Curtis, Robt. Murray, Frank Lang, Wm. Morton, Geo. Craig, Wm. Rody, John Ahrens, Herb Napper, Herb Thompson, John Lambertus, Jas. A. Rae, John Kutz, Henry Ahrens, John Wilken, Jas. Smith, Thos. Kerry, John Kerry, Wm. C. Liepe, Jos. Monk, C. Sacks, Josiah Dieration, Mike Driscoll, Jos. Belbeck, Wm. Frook, Geo. Fiddes, Herman Monk, Frank Fisher, Dave Willoughby, Geo. Spong, Thos. Pryor, Wm. Ryan, Hugh Ferguson, Jas. H. Cannon, D. W. Jacklin, Thos. Calder, Wm. Blohm, John Fraser, Wm. Smart, Jos. Reilly, Jas. Garner.

List B.—Pound Keepers

Fred Gluitz, Duncan Smith, John Rapp, Wm. Dickenson, Robt. Long, H. J. Ernest, Louis Lambertus, Peter Tuscher, John Whitehead, J. C. Richardson, John Burrell, Wm. Abell, Wm. Craig, Henry Logie, Jas. Garland, R. Murray, Martin Hanmore, Fred Tries, Wm. Lambertus, John Monk, Jas. Watson, Wm. Alexander, Chris Pegelo, Elt Michlhausen, Alex. Gallenger, W. T. Hopper, Jas. Rae, Martin Monk.

List C.—Fenceviewers.

J. T. Tolton, Hugh Traynor, J. Metcalf, Norman Brockelbank, C. Glauser, Abram Rowand, J. D. Little, Israell Abell, Henry Logie, Jas. Crawford, J. Hanmore Jr., Henry Ahrens, Ben Standell, Jacob Schwindt, John Muschl, Geo. Friddes, Jas. Maxwell Jr., W. H. McLean, Aaron Jacklin, Hugh Ferguson.

List D.—Sheep Valuators

Geo. Birrs, all that portion of the township west of the Saugeen River.

Thos. H. Wilson, all that portion of the township south of and including the 6th con., east of the Saugeen River.

Jos. Monk, all that portion of the township north of, but not including the 7th Con. east of the Saugeen river.

List E.—Engineers for Road Graders

Harry Threndyle, Southern Division, Chris. Pegelo; Northern Division.

Rowand—Weir: That the Council do now adjourn from Committee and transact general business.—Carried.

Johnston—Gregg: That Bylaw No. 84, A.D. 1916, a bylaw appointing Pathmasters, Poundkeepers, Fenceviewers, Sheep Valuators, Engineers, for road graders, be now read the usual number of times and passed signed and sealed.—Carried.

Weir—Rowand: That Lots 18 and 19, Con. 4, be changed from road division No. 44 to road division No. 45 and that this change be confirmed by Bylaw.—Carried.

Gregg—Johnston: That A. Weir and W. A. Rowand be appointed a committee to investigate as to road allowance on 6th sideroad, between Cons. 7 and 8, and report at next meeting of Council.—Carried.

Rowand—Weir: That a grant of $10 be made on behalf of the Richardson family indigent, Cargill, cheque to be issued to Rev. Homer.—Carried.

Weir—Rowand: That a grant of $10 each be made to the Elmwood and Cargill public libraries.—Carried.

Rowand—Johnston: That the Auditors' report of the late Treasurer's accounts be accepted.—Carried.

Rowand—Gregg: That the Reeve and Clerk issue orders on the Treasurer for all accounts passed at this meeting of Council.—Carried.

Viz. as follows:—

TOOK THE ADVICE OF HIS FRIEND

Stomach Trouble and Rheumatism Relieved By "Fruit-a-tives"

MR. L. LABRIE

504 Champlain St., Montreal.

"I have been restored to health by taking 'Fruit-a-tives'. For two years, I was a miserable sufferer *from Rheumatism and Stomach Trouble.* I became very weak, had frequent dizzy spells and when I took food, felt wretched and sleepy. I suffered from Rheumatism dreadfully, *with pains in my back and joints and my hands swollen.*

A friend advised me to try 'Fruit-a-tives' and from the outset, they did me good. After I had started the second box, I felt I was getting well and I persevered in the treatment. I can truthfully say that 'Fruit-a-tives' is the only medicine that helped me.

LOUIS LABRIE.

"FRUIT-A-TIVES" is the famous *medicine made from fruit juices.*

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

POETS' CORNER

MARCH

Oh! March, wild March: Why bluster and blow?
I'm calling the wild flowers, under the snow;
All winter they'ved reamed of the wonderful spring.
All joyous with songs that the mating birds sing.
So with noisy bluster and many a shout
I scatter their fancies and dreamings about,
A dream falls here, and a fancy drifts there,
Like butterflies wafted away on the air:
On wings of gladness they float far away—
To return with a beautiful, radiant day.
Then soft as a sigh they drop their bright dreams,
In a magic of wonder, on hillside and streams.
I roar and I bluster, I shriek and I blow,
I whirl 'round the frost-king and toss up the snow,
'Wake all the earth from its winter's repose,
And fondly I kiss the sweet heart of the rose.
Then on with a bound I bluster away—
As April, fair April, trips over the way.

News About Town

Ballot now.

53 recruits now at Tiverton.

Send the Telescope the names of your visitors.

The government thermometer at Schmidt's fruit farm registered 3 below early Saturday morning.

Brian McCord had two fingers badly jammed recently from a curling stone falling on them at the rink.

At their next meeting Carrick Tp. Council will be asked to furnish watches for each recruit from the township.

Mr. Adam Becker took possession of the fruit-farm near the G. T. R. station which he purchased from Mr. J. E. McGregor.

Tom Sinclair, son of Mrs. Donald Sinclair of this town, is giving up his studies at the Medical facility of Toronto University preparatory to enlisting for overseas service.

The town of St. Marys raised $7,500 for the Patriotic Fund in one day and $7,000 the second. The Town Council will also contribute $4,000, bringing the total up to over $18,000.

A recruiting officer reports that he solicited a man 21 years of age, who resides a few miles from Ripley, to join the colors. The man said he heard that there was a war on, but wanted to know who was fighting?—Ripley Express.

Capt. Clark of the 160th Battalion Walkerton, was a guest at the military ball in the Town Hall on Friday evening. A collection was taken up amounting to over $12.00 which will be sent as a donation to the 160th Batt. band, Walkerton.—Lion's Head News.

Duncan Bell, a well known farmer and stock raiser living near Turners Station, heard his Country's Call last week and decided to give up a good thing financially to work for King George in the ranks of the 160th at $1.10 a day. Pte. Bell says that considering the crisis the nation is facing at present he does not consider his financial sacrifice worth mentioning and that he is only doing his simple duty.

+ + +

A Fighting Scot

Tom McGregor of East Bruce is a farmer who is giving up a good thing to enlist in the 160th. He has hired two boys under the enlisting age to run his 150 acre farm while he is away fighting for his Country.

+ + +

Gus Looks Fine

In a letter received by Earl Forsythe from his friend Pte. Gus Jenkins, Gus enclosed a snapshot showing a group of patients and nurses at the military hospital. The photo shows Jenkins to be apparently in good shape after his critical illness with cerebro-meningitis. His Walkerton friends are mighty glad to hear that the genial Gus is coming around O. K.

+ + +

Former Walkerton Pastor

Rev. J. M. Warner, formerly pastor of Walkerton Baptist Church, has resigned the pastorate of first Baptist Church, Woodstock, to enlist in the 168th Batt. for overseas Service. He is now at London taking a course to qualify for a captaincy. The reverend gentleman was heartily commended for his action by his Congregation, who passed strong resolutions expressing high appreciation of his pastorate and admiration of his devotion to duty in joining the colors. He will continue his pulpit work while in training.

EGGS NOW "CASES FREE"

Owing to the loss of a great number of egg cases from year to year, the produce dealers have, during the past twelve months, been advocating non returnable cases and at the Annual Meeting of the Canadian Produce Association in Belleville, on February 8th last, a resolution was passed confirming the adoption of non returnable cases to go into effect March 1st, 1916, the cost of the case to be included in the price of the eggs.

It is expected that by having the cases supplied by the shipper, there will be an improvement in the quality of the eggs. From a sanitary standpoint, it has another advantage, as it means the eggs will, in most instances, be shipped in new cases and fillers thus doing away with a lot of old cases which have been the cause of musty and inferior eggs.

Mr. Magnus Brillinger, who was connected with the missionary dept. of the Methodist church in West China as secretary for several years, has been forced owing to ill health to seek a change of climate and arrived recently in San Francisco. Mr. Brillinger has taken the position of secretary of a Casket Company at Los Angeles. It is expected that he will revisit the old home during the coming summer.

+ + +

Souvenir From Battlefield

Mr. Timothy Hanley of Chepstowe received last week an interesting war souvenir from his son Pte Wm. Hanley now on the firing line. It is the nose of an immense howitzer shell which was picked up in "No Man's Land" between the British and French trenches at night. The cone is of solid brass, and weighs about two and a half pounds.

+ + +

A Late Spring.

Irl Hicks says:— We hold that a late Easter betokens a late spring: or if not a spring of continued cold, look for a late spell of cold, blighting winds and weather that will destroy for the most part all the results of warm and budding and blooming and growing weather that may go before it. As intimated for the full Moon period, central on March the 19th, the Easter perturbations may possibly fall this year at that time, but we advise our readers not to take too much risk with plants

+ + +

Taking Oath of Allegiance.

Judge Klein's announcement that in future he would refuse to probate wills of those who had not taken the oath of allegiance to the British Empire, has caused a lot of consternation in this section. There are a great many Germans living in Carrick who have neglected this formality, and the Judge's announcement has resulted in a big rush to the Crown Attorney's Office to sign the necessary documents. Every man in Carrick, who has not taken out citizen's papers, should have the matter attended to at once in order to be restored to the privileges of Canadian citizenship.—Mildmay Gazette.

Capt. Clark came up on Friday with the pay cheques. The boys were glad to see him, anyway. He stayed to the ball and is as good at tripping the light fantastic as he is at everything else. The boys are in love with him and want him to lead the Peninsular end of the Battalion.—Lion's Head News.

The troubles of the country editor are multitudinous, but in spite of all, he maintains a cheerful spirit. Witness the following item clipped from the Bruce Peninsular News, published at Lion's Head:—Mr. Post, the "Father of the News" is setting our type again. A couple of good articles from his pen also appear this week. Harry Oswell having enlisted and Andrew McKay having moved to a grocery counter we got onto the crank ourselves this morning and tried to get rid of la grippe that put us to bed on Sunday. The News "must be printed on Wednesday."

+ + +

A Willing Worker.

An outstanding figure in Bruce county in the present war crisis is His Honor, Judge Klein, says the Port Elgin Times. Although not a young man, Judge Klein has found time, even amidst his arduous duties as senior judge of Bruce, to assume and carry on vigorously the work of recruiting, and as president of the Bruce War Auxiliary is responsible in a great measure for the rapid formation of the 160th Battalion. In two months' time 900 men were in the battalion. The judge is better known now. He has traversed the entire county in connection with his judicial calling, but he is traversing the county in a greater cause, and the thousands who have heard him in his appeal for men have been enlightened and interested. Judge Klein uses his experience of long residence in this county to good advantage in showing the great burdens the pioneers of Bruce undertook in road-building, and settlement duties. In a splendid and convincing manner he compares the hardships to make a county to the task we are asked to assume to save the country for Canadians. Yes, the judge is a true patriot: a man who is willing to work and to pay. Bruce county is proud of him.

Removing To Galt

Walkerton is to lose an old and estimable citizen shortly in the removal of Mr. Henry Clark, who purposes making his home at Galt, where his son has been located for a number of years. This is a step which Mr. Clark has been contemplating ever since the death of his beloved partner in life in January. Mr. Clark has been active in the Presbyterian Church in which he is a member of the Board of Managers and in the Masonic Order. He is a Past District Deputy Grand Master and one of the leading spirits in the work of Saugeen Lodge, No 197, A. F. and A. M.

+ + +

An Important Decision

A case of some importance to Municipal Corporations was decided by the Court of Appeal in Toronto lately on an appeal from the judgment of the County Court Judge of Huron. The Court of Appeal held "that the statutory duty imposed upon municipal corporations required them to make roads reasonably safe for the purpose of travel, and so safe from any additional danger incident to the use of it by motor vehicles, and that in considering the question whether the road was reasonably safe account must be taken of the fact that horses do shy at motor vehicles, and the Court held a road was not reasonably safe for public travel where there was, close to the travelled way, a ditch 4 feet 7 inches deep with little slope to its sides into which, in the case of a horse shying, there would be danger of a horse or vehicle being overturned." The township in the case referred to was held liable under such circumstances.

Appearances are rarely so deceptive as in the case of Corp. Frank Holdsworth of the 160th Batt. He is probably the heaviest man in the regiment and yet he is as light as a feather on his feet and as supple as the proverbial eel. The Corporal is gymnastics instructor of the non-coms, school here and puts the boys through some pretty strenuous exercises for an hour every morning. Corp. Holdsworth holds a first class certificate for gymnastics. He has served in Ireland, Egypt, India and South Africa with the Imperial forces.

JUDGE KLEIN'S SERVICE

(Port Elgin Times.)

It came to our notice the other day that some person had started in a Bruce Co. town, a deliberate attempt to malign His Honor Judge Klein, by starting the report that the Judge was being paid by the recruiting committee for the splendid services he is rendering in the hour of need. The Times communicated with Judge Klein, and the lie should be nailed at once. It is absolutely false. Not only is the judge giving his services but is also paying his own travelling expenses, as most of the other speakers are also doing. And what is more, Judge Klein absolutely refuses to accept anything that will in any way relieve him in the work he is doing. It may not be generally known what the medal shows that Judge Klein wears. It was presented to him by the government of Her Majesty Queen Victoria, and has engraved on it. "To Paymaster and Honorary Major A. B. Klein, 32nd Regiment, for long service in the Colonial Auxiliary forces." Judge Klein holds the rank of honorary major, and is entitled to wear the khaki uniform of a major. It is regrettable, indeed, that there are people who will start such despicable stories against an honorable and upright

Town and Countryside

Additional Correspondence on Page 8.

OTTER CREEK

(Intended for last week.)

Mr. and Mrs. Hershaw from the North West are visiting at Mr. Joseph Lambertus.

It is reported that Mr. William Pollon and Mr. Adam Siegmiller purchased new Dodge cars.

We do not know whether the weather Monday was something out of season or not. It snowed all day, then in the evening there was a thunder storm, then the next morning a snow storm. What is the sign when the moles are crawling around on the snow?

Quite a number from here attended the surprise party at Mr. Edwin Lindesmit's on Thursday night.

Mr. and Mrs. George Pfohl are at present moving to their farm at Maple Hill.

Pte. William Fenton was visiting at Mr. John Hogg's on Sunday last.

GLAMIS

About 30 young people of the Baptist Church met at the home of Mr. Thos. McGregor, 6th Con., Bruce, recently, and presented him with the following address and presentation:—

Mr. Thos. McGregor.

Dear Friend and Brother:—

We, the young people of Glamis Baptist Church and congregation, have gathered here at your home this evening to bid farewell to another of our number. We are sorry to lose one more friend and fellow worker but are proud of each who gives himself to fight our nation's powerful foe and to stem the tide of evil that threatens mankind. We know that the step you have taken in enlisting for military service will mean hardships, danger, and sacrifice. But we are confident that you have the manliness to endure the hardships, the courage to face the dangers, the strength to make the sacrifice.

Accept this wrist watch and know that it is accompanied with the sincere good wishes. May you be protected in your service of your King and Country. May you soon return to be among us once more.

HUGH J. McARTHUR,
GEORGE PERCY,
HECTOR McLEAN.

Glamis, Feb. 28th. 1916.

Mr. McCauley read the address and John Currie made the presentation. Private McGregor made a short reply, thanking all for the gift and good wishes. The rest of the evening was spent in games and music. All left the home of Mr. and Miss McGregor with reports of a real good time.

Teacher.

EAST BRUCE

Recruiting officers are busy in and around this district and have good results. Those who have enlisted lately are: Rob. White, Richard Mills, Jas. McGillivray, Bert Mewhinney, Tom McGregor and Jas. McKay who did not pass the doctor's examination.

A number from around here took in the ball at Glamis in aid of the Red Cross Fund and report a good time.

Pte. B. Mewhinney has been visiting friends in Owen Sound before starting training.

We are sorry to report that Mr. Neil McLean is sick at present but hope he may soon be able to be around again.

Mr. Jas. McKinnon left on Tuesday for Weyburn, Sask., where he may take up land if he likes the country.

Mr. John McGillivray returned home after attending the funeral of his sister in West Superior.

Mr. Jas. Johnston left last week for Carstairs, Alta.

The friends and neighbors of Mr. and Mrs. Wm. McAngus gathered at the home of Mr. R. Teeple on Friday evening, March 3rd, and presented them with a nice leather covered chair a piece. After the presentation, a number of the neighbors were called upon and all expressed the high esteem in which the family is held in this community. Mr. McAngus replied with much feeling and thanked the neighbors for their kindness and good wishes. A tasty lunch was served by the ladies and the rest of the evening was spent in games and dancing. Mr. McAngus is moving to the McArthur farms, Town Line.

Much interest is being taken in the condition of Hugh McArthur who was shot in the head in Toronto. Mr. McArthur is an old resident of this district having lived on the town line, and it is well known that no pro-German can lick him or very few any way. Hugh is the right type of Scotchman who says the Germans will never win and although too old to enlist, will fight for the honor of his country here and people realize that he would go if he could.

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so life-like, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

Students are admitted any time. Young women should begin making preparation at once to fill the places of the office men who have enlisted. Write for particulars and circular.

C.A. Fleming, Principal G.D. Fleming, Secretary

WHEN CANADA HELD THE HUN AT YPRES

(Detroit Free Press.)

The News has the following sent by a staff correspondent in London.

"In the first place, perhaps you've heard that the Sixth Battery, now known at the front as the Twelfth, is Canada's pet artillery. It's old—I don't know how many years old—and it was famous before it ever went to war."

So said Gunner Jennings, invalided home from the front, when seen yesterday.

"The battery has a good military reputation. It was efficient. Those who are dead died beside their guns, and those who are left are either broken in health or are still feeding those guns over in Flanders. There isn't a man from the major down who wouldn't give up his arm or his legs, or his eyes or his life to save those steel babies of ours from the enemy.

"Our major was—and still is—Wood Leonard. When the Lord made Major Leonard He made him out of the same stuff as he made Joshua and the fighting kings of Israel. I don't know what he was before he went to the war, but I know that from the time he put on the King's clothes he made it his one business in life to be a soldier from his spurs up to the brass buttons on the peak of his cap.

"The other officers were Capt. McEwen, of London, now in a hospital in England; Lieut. McGaun, of Toronto; Lieut. Taggart, of Montreal; and Lieut. Herbert Scandrett. Scandrett was given the Military Cross for gallantry at the battle of Ypres.

"Our battery consisted of four guns and eight ammunition wagons. Our guns were what is known in Canada as the 3.3 size. This means they throw an 18-pound shell a little more than three inches through the diameter. Not very big guns, I suppose, in comparison to some over there, but big enough to have been made the objective of many an enemy charge. Big enough, too, to be known as the guns that barked their way through an iron ring at Ypres! Our guns carried 6,200 yards, or something less than four miles."

FIRST TASTE OF BATTLE.

After describing the arrival at the front, preliminary activities and the inability of the enemy to locate them, Gunner Jennings said:

"We got our first taste of battle on a big scale when we moved to Neuve Chapelle. We entrenched in a position that was thick with artillery. The batteries were placed about every twenty yards apart. I don't know how much artillery was massed here to keep the German reinforcements from relieving the men in the trenches, but we must have had a good many guns there.

"We went into this position as fast as the horses could drag up, and we fired at 'gun fire.' 'Gun fire' means that you fire just as fast as you can load, fire, reload and fire. We were there four days and four nights. We couldn't see the battle that was being fought in front of us. We couldn't see the trenches we demolished, or the whole groups of men for which we got the range from the observation officer, and killed with one or two shells. We couldn't see the bayonet charges, the mine explosions, the bomb attacks, the big sweeping offensives or the counter-offensives that, they say, surged back and forth on the field in front of us.

"The aeroplanes flew back and forth over us, snooping us out and sending back the signal approximating our range. The shells came and killed other men in other batteries, shattered the guns, smashed the wagons to kindling wood, and slaughtered the hard-working, eager, faithful horses.

"But our battery was skilfully officered. We lost neither a man nor a horse nor a wagon during that four days' and four nights' fighting."

THE FIGHT AT YPRES.

Gunner Williams then took the story from the mouth of Gunner Jennings and told of the second battle of Ypres:

"We rattled into our position on April 22. In our billets we lived in a town that was set on a hill, and by the sights in the valley below us we knew long before the actual word reached us that something was up.

"It was night, and the roads were slashed criss-cross by shell holes. The fugitives were pouring in a great, unending stream through to the rear.

"We stopped for nothing, as we tore to the firing line. Our horses seemed to scent what was up, and they dragged us in and out of the shell holes, past the lumbering ambulances, past the crying, wounded, bleeding fugitives, as though they knew that they must get to that red flare which pierced the black of the night way over in front of us.

RUSHED INTO ACTION.

"From everywhere our troops were coming—lines and lines of infantry aroused from sleep by the news that the line had been broken, guns clattered through the dark at breakneck speed, mounted officers galloping to join their commands, ammunition wagons creaking and straining under the load of shells.

"Down that black crowded road we went with nothing to guide us except the blazing shells and the red glow in front. It was dawn when we unlimbered for 'gun fire'—the fire that doesn't stop while there is a man left to load and fire, load and fire, load and fire, and another to ring up the shells. We concealed our position as well as we could in that furious hurry, but they found us, and we had to go back for a while.

"Then back into that zone of fire we swept. We had not time to conceal ourselves. All day and all night we served those guns. Canning, a bombardier, got the gas that was driven by the wind from the infantry miles in front of us, sickened and fell in what seemed to us like a fit. It got so bad that Major Wood Leonard gave the order to jump for cover.

"The shells were raining down on us, but the boys leaped to the guns to get them out.

We got the horses hitched to one of the guns, and dragged it out, but down the men before us. They came the shells came so fast that if we tried it with the other we would have been annihilated.

"We rushed for a ditch nearby. We stayed there an hour.

"Hell was still breaking over our head, when the major shouted, 'Now, boys, to the guns.'

"We went forward in the teeth of that fire and man-handled two more guns out of that position.

"We placed our guns in a new position several hundreds yards to the rear, and then went forward to man-handle the one remaining gun to the new place. Here we worked the pieces at 'gun fire' for several hours. We were in the open, having no time to dig a pit or conceal ourselves in any way.

STOPPED ONCOMING ENEMY.

"It was here that the Germans broke through long enough to give us the hottest half hour of our lives. The infantry in front of us had given way, and we were face to face with the Germans. They got within 200 yards of us, and started an enveloping movement that would have had us surrounded if it had succeeded. But our shrapnel was too much for them.

"When it seemed as though we were being cut off we banked the guns in a half circle, and let them have shrapnel at point blank as fast as we could soak the shells into the four pieces. Our fire spread in the shape of a fan and it mowed forward in solid formation, and when the first shell fell the next kept right on coming. They were brave enough, but no one could stand that concentrated point blank fire, and they fell back.

"When they retired we got the guns into a new position so that we could enfilade them.

"We stayed on the job hours after that, but the big work was over. We were no longer fighting for our lives. We were punishing the retreating Germans. The offensive movement that started with the gas attacks, and would have swept everything before it if the Canadian troops hurled into the breach had not stood firm, was definitely checked.

THE FIGHTING TURK

There is no doubt a good deal of anxiety in England about the fate of British-Indian soldiers who fall into the hands of the Turks in the Mesopotamian campaign. On the authority of a British officer who speaks from a grave in Mesopotamia, there is not much hazard in predicting that the prisoners whom the Turks take in battle will find their captors humane and even sympathetic. In the Atlantic Monthly recently, Mr. Lewis R. Freeman, an English journalist, who knows his Palestine and Arabia by contact with their people, tells the story of the fight for the Garden of Eden as it was told him by his correspondent F——, one of those remarkable British officers who identify themselves so closely with the East by years of exile that they speak the dialects, make strange and useful friends, and by disguising themselves can pass for natives. Persia and Mesopotamia were F——'s field of observation.

If any Englishman knew the Turkish soldier well it was this intelligence officer whose name has recently appeared in the list of Indian "expedition's dead. In more than one letter written from the British trenches he testified to the chivalry and humanity of the Turkish soldiers, and in no partial spirit for his political activities in Mesopotamia before the war had made him a marked man. "The Turks," he once wrote, "are perfectly frank in saying that they will send me 'on the long pilgrimage' if ever a chance offers." In the campaign for which F——, as an ambitious officer, had longed, he discovered that the Turk had no programme of frightfulness.

At Shaiba some British-Indians, out of touch with their officers, tried to rush a Turkish outpost, and all were shot down. When several Tommies volunteered to bring in one soldier who was seen to move a hand there was the same result; but when the Turks understood that a wounded man was creeping up to rescue the sole survivor of the first party they stopped firing altogether, nor did they discharge a single cartridge at four soldiers who rushed from the British lines to help the wounded hero painfully dragging his inert comrade along.

Later the invaders captured a Turkish position in a ravine, and found "hung carefully in a thick walled crypt, well beyond all danger from our rifle fire, three goatskins of clear, cold water, while scrawled on the wall in both French and Turkish, was the direction, 'For the Wounded.'" The British-Indians, as the Turks probably knew, had been out of water for hours under a blazing sun

F—— gave other instances of Turkish forbearance and humanity. One had its humorous side. While a British-Indian contingent was under fire in a garden at Ezra's Tomb a couple of hives were knocked off a wall, and the bees, issuing in clouds, stung the infidels in every exposed place, and would have driven them from the position if a "little pink-cheeked, barefooted angel of a Jewish girl, evidently the 'shepherd of the bees,'" had not run out from somewhere set up the fallen hives and herded the enraged bees into them. The "Unspeakable" Turks saw the enemy running about helter skelter before the stinging insects, but suspended their fire lest a stray bullet might hit the "shepherd of the bees." We think that the gallant F——, now gone over to the majority, proved that the Turkish soldiers are not always as black as they have been painted. It is difficult to think of the butchers of the Armenians as having any redeeming qualities. Brutalized by racial hate and bigotry, the Turk is a repulsive figure. But in battle with a civilized foe he can display military virtues of a high order.—New York Sun.

Ribbon of the Garter.

The dark blue ribbon now worn by the Nights of the Garter was changed to its present shade from one much lighter in tone in the year 1622. The pictures of Charles I. by Vandyke always show the lighter shade.—London Mail.

The five o'clock tea veil is the newest and smartest thing. Here it is shown in black, the foundation being a hexagon mesh. A scroll figure and lace edge affords a smart design. The straw and satin turban with its dashing wing trimming is an especially smart type of hat for this style of veil.

Things You Ought To Know

A suspension bridge in Bavaria has but one tower, the cables at the other end being anchored in a high rock bluff.

The effect of seasoning wood is to bring into the same space 10 per cent more fibres than when the wood was green.

The streets in more than 250 towns in France and the portions of Algeria that it governs are lighted exclusively with acetylene.

More than forty varieties of rice are cultivated in Siam, one of which ripens in seventy days from planting and others in six months.

Examination by European scientists of well-preserved mummies has shown that tuberculosis of the spine and malaria were common diseases in Egypt fifteen centuries ago.

There are more than 2,000 knots in an average willow plume.

The area of Canada's forests is more than double all of Europe's.

A method by which all liquors can be solidified into tablet form has been invented by a French chemist.

Cigars are regularly exported from the Philippines to ten countries.

The Belgians are said to be the greatest potato consumers, outranking even the Irish in that respect.

The magnolia is said to have been named after Magnol de Montpellier.

New Zealand apple growers find a ready market for their produce in South America.

The diamond industry is believed to have suffered more than any other as a result of the European war.

Flowers will turn to the light of the electric lamp just as they do to the sun.

The Atlas moth, a species found in China, has wings which measure almost twelve inches when fully spread.

American farmers are all blown up about the fact that 25,000,000 pounds of dynamite was used for agricultural purposes in this country last year.

Recent experiments in England have shown that paper pulp of a good quality can be made from sudd, the inexhaustible vegetable product of the White Nile.

During the Mexican War the United States soldiers sang a song of the period which started "Green Grow the Grasses, Oh." So the greasers called them gringoes.

At the age of 18 David is said to have written his first psalm, Shelley wrote "Queen Mab," and Mendelssohn composed his music for "A Midsummer Night's Dream."

Without resort to computation a new nautical instrument, to be mounted over a ship's compass, enables the direction of objects at sea and their distances away to be determined.

Experiments in New York in mounting incandescent lamps on railroad crossing signs have enabled the signs to be read more than a mile, and their distinctive form noted much farther.

Estimates of the expense of bringing a 2,000-ton freight train, traveling at a rate of twenty-five miles an hour, to a full stop, and then regaining the same speed, were recently made by a southern railway. The expense was 61 cents.

A collection of 10,960 bottles, containing specimens of the ocean bottom obtained by vessels of the United States coast ad geodetic survey of the Atlantic, Gulf and Pacific coasts, has recently been transferred to the Smithsonian Institution.

Golden ornaments found in Egypt Egypt in the royal tomb of King Menes and supposed to be the oldest objects of worked metal in the world, date back 6,000 years, and include bits of gold, a bead, a button and also a piece of extremely fine copper wire.

Scientists differ greatly as to the earth's age estimates varying from 20,000,000 to 150,000,000 years. One of the first estimates was that of John Phillips, who in 1860 based on a study of stratified rock his assertion that the figure lay somewhere between 38,000,000 and 96,000,000 years."

There are still three survivors of the original Mormon band to find its way into the valley of the Great Salt Lake in 1847. One is Lorenzo Sobieski Young, who belonged to the third "ten" of the original company, to which Brigham Young also belonged. His first home was a wagon box lifted from its truck and supported by posts.

UNCERTAIN.

(Harper's Weekly)

"Have you purchased you new car yet, Mrs. Noorich?" asked the visitor.

"No, Mr. Smithers, I ain't. I can't make up my mind whether to get a gasoline car or a limousine car. Maybe you can tell me—does limousine smell as bad as gasoline?" inquired the lady.

IT WAS A TOUGH STEAK.

But the Restaurant Man Easily Fixed It When the Kick Came.

It happened in a down-town restaurant. A well dressed—as he always must be to make a good story—young man ordered a steak. The waitress, rather pretty—which qualification she must possess in writing a story of this kind—filled the order, and the young man started in to devour the feast which had been set before him.

The young man had no sooner started in on the steak than he discovered that he had a kick coming, and as the restaurant proprietor passed he stopped him, saying: "I can't eat this steak, entirely too tough. I wish you would see that I get better meat when I come in here."

"Too bad. That steak looks all right. But let me get you another." And the aforesaid proprietor took the steak, the silverware which had been served with it and departed. He soon returned with a steak that looked exactly like the first one. The young man picked up his knife and started at the second order. "Fine!" he said as his knife cut it apart without the least effort. The customer was pleased beyond words, and that he enjoyed the steak was evident, for he left only the plate.

As the reporter passed out he met the proprietor again, and this is what was said:

"That steak was all right, but the girl made a mistake in not giving him a sharper knife. All I did was to put the same steak on another plate and bring him a sharper knife. You have no idea what a difference a sharp knife makes with a steak from a beef of questionable age."

HAMS OF WESTPHALIA.

Processes by Which They Are Cured and Flavored.

The famous Westphalian hams, which are eaten without cooking, and cured by an elaborate process that has been worked out patiently and skillfully by generations of expert workmen.

After being rubbed thoroughly with a solution in which there are 100 pounds of salt to one pound of saltpeter, the hams are placed on cement floors, or in vats, and thickly strewn with salt. They lie under salt for two weeks and then pass to a vat that contains a 22 per cent. solution of brine. They remain in that solution for eighteen days. Each day they are shifted in the vat; the hams on the bottom are brought to the top, and vice versa.

At the end of the eighteen days the hams are packed, one upon another, in a cool, dry cellar, where they remain for four weeks, in order to ripen—that is to take on color and become tender. Then the salt is washed off with a stiff brush dipped in lukewarm water, and the hams are put to soak for twelve hours in fresh water. After that they are ready for the smokehouse.

The smokehouses are two or three stories high with holes bored in the flooring. The fires are kindled on the ground floor, and the meat is hung on the second and third floors. The fires are made entirely of beech wood, but the workmen constantly throw juniper berries and juniper twigs on the embers. The fire burns brightly. It is checked with beech wood sawdust whenever it burns too briskly.

The smoking continues for about eight days. Under the ancient curing methods, however, the hams were often kept in the smoke room for six weeks, and it is by this latter method that the best hams are still made by the country folk of Westphalia.

The Attorney in England.

The use of the word attorney denotes a belated mind. Since Nov. 1, 1875, attorneys have ceased to exist, the title merged by law into that of solicitor of the supreme court of judicature, says a writer in the London Mail. The name had long been used as a term of abuse. Johnson observed of an acquaintance that "he did not care to speak ill of any man behind his back, but he believed the gentleman was an attorney."

Archbishop Trench in 1859 noted that the word attorney was going out of favor and that the lower branch of the legal profession preferred to be called solicitors. [illegible] when the judicature act of 1873 [illegible] fore parliament a clause was lodged abolishing the obnoxious title. But with our delightful conservatism we still [illegible] "attorney general."

"What this country needs is a [illegible] er understanding of political [illegible] omy," said the reformer. "Right [illegible] counts for more in [illegible]," snorted the grass[illegible]

Chats With the Doctor

BY A PHYSICIAN

"PAGET'S DISEASE."

Like many, or most, medical expressions the name is vague; and, speaking precisely, there is no malady known to science which can claim the title. The late Sir James Paget wrote on various irritative or ulcerous conditions of the nipple; which, as he pointed out, were apt ultimately to cause cancer of the mamma. But there are a considerable number of such conditions; and not one can be said to appropriate entirely to itself the denomination of "Paget's disease."

Ulceration of the nipple may proceed from various causes, some of which reside in the blood, and the system generally. Others are local, such as pressure or friction by a tight or ill-fitting corset, or digital manipulation. The most typical condition is when the organ resembles a strawberry. You see it covered by minute red granulations, which bleed at the slightest touch. This sort of ulcer is very difficult to heal. There is no pain.

The best local application as a rule is a little lint soaked in glycerine and borax, and changed twice a day. No water should be allowed to touch the part—or any ulcer anywhere else. Some superficial ulcerations will yield to zinc ointment, thickly spread on lint, and applied twice a day.

But the point to be noted most by the patient who suffers in this way—and fortunately the condition is rare—is that the malady is a signal of great danger in the end, though not immediate. After several years you find the grave disease above indicated establish itself as a tumor somewhere in the deeper tissues. There is always a "sword of Damocles" thus suspended over their heads, and if the trouble does not yield quickly to the local measures of treatment suggested above, their best plan would be to have the whole offending structure surgically removed—either by the surgeon's knife or by a powerful escharotic.

FATAL PARALYSIS.

A form of paralysis which looks very serious, but isn't, is facial palsy. The muscles on one side of the face become paralysed. Your mouth is drawn to one side, your tongue is protruded is pushed in the same direction. You laugh on one side of your face only. There all expression is wanting; the eyelids apart and motionless. You look a sorry object. All this is due to paralysis of the motor facial nerve—one of the seventh cerebral pair, in medical parlance—which supplies the muscles of the face on each side separately. It is only a tiny nerve, of no great size, or functional importance to life. Very likely only cold has caused the trouble. You have sat in a draught, playing on the cheek affected. You will soon get well—unless the condition is associated with paralysis elsewhere. It is not serious, though I hardly think it would have come on had you not been in some measure run down.

If possible, you should at once get change of air to the seaside, and there should bathe the affected side several times a day with sea-water as hot as can be borne. Failing this trip, you may use ordinary salt and water, taking as much exercise out of doors as possible every day. Also you may take some of the strychnine tonic I have so often to recommend—it is really the only tonic worthy of the name. You ask your chemist to make you up a mixture containing five drops of liquor strychnine for a dose; and you take this twice a day after meals for a fortnight or three weeks.

CATALEPSY.

This is a very remarkable and mysterious nerve condition which no one can precisely understand or explain. It occurs only in highly nervous temperaments, and usually there is a family history of other nerve troubles in relatives—such as insanity, chorea or epilepsy.

There is a complete suspension of thought, sensibility, and voluntary motion, usually coming on suddenly, as with an epileptic fit. The patient does not fall, however, as in that condition; but the peculiarity is that the limbs remain suspended in whatever posture, however irksome and otherwise impossible, they happen to be at the moment. You have your arm extended at right angles to the shoulder. Ordinarily you can hold it so only for a few minutes; now it remains indefinitely for hours. Your leg is stretched out forwards or backwards. There it remains, until the fit is over.

Catalepsy may be induced artificially by mesmerism or hypnotism, which at one time were fashionable, but now are not often heard of. The hypnotic trance, in short, is simply a state of artificial catalepsy. Some years ago I saw a young girl publicly hypnotized at a French fair, and brought out of the trance at short intervals. It was strange to witness the uncomfortable attitudes in which her limbs were placed before the gaping crowd, and how they remained in exactly that position, without effort, until the spell had been removed by the hypnotizer—who would doubtless have been soon burned as a sorceress in the days of old.

ECSTASY.

Here you have another strange state betraying a disordered condition of the nerve-centres, but hardly explicable in terms of modern science. The patient is lost to all external impressions, and is entirely absorbed in some imaginary idea or object. Sometimes the muscles are relaxed, sometimes rigid: but never so to the extent of complete stasis as in catalepsy. The person often speaks very earnestly or sings. Many of the Italian improvisatori are wrapt in ecstasy throughout their whole performance. Examples of ecstasy are numerous in the lives of persons who have surrendered themselves very deeply to religious impressions, or who have developed religious mania. Whenever there is a great religious revival, making powerful appeals to emotion, and paralysing the ordinary intellectual faculties, you see examples of the condition in individuals of ill-balanced mind.

SOMNAMBULISM.

There is a third remarkable phenomenon differing from the preceding in that a rather large number of people are, I believe, affected by it in childhood, or at some other period of their lives. Usually no bad results accrue; the somnambulists' faculties strangely steer them clear of possible danger ahead. But you may take it that there is always material derangement of the nerve-centres.

TREATMENT.

Whenever any of these morbid phenomena occur, it is important to treat as quickly as possible, by eradicating the cause. If worry and trouble, lose no time in getting complete change of air and scene.

Should there be intestinal worms—a fruitful source of almost any nervous disorder you can mention—they should be sought out and dispatched in the modes recently pointed out in this column.

Daily gymnastic exercises and a regular habit of life in all particulars need hardly be suggested as eminently conducive of a normal mental balance; with the establishment of which these troubles would vanish.

Some of the most fascinating hats are developed entirely in georgette crepe, especially in the odd light shades. The color of the hat illustrated is a very odd shade of blue with band of grosgrain ribbon, the crown toped with a cluster of rich moss roses.

SCIENTIFIC NOTES.

By means of a ray from the searchlight vessels in the Atlantic have communicated with those in the Pacific across the isthmus of Panama.

The ice-breaking ferryboat Prince Edward Island, plying on the Straits of Northumberland, Canada, has palatial accommodations for passengers. It is the first boat of the kind to be equipped thus.

Aided by a favorable wind, which blew persistently for several days, the cotton boll weevil in Georgia made an advance of 100 miles in a few weeks, whereas its progress under normal conditions has been 60 miles in a year.

A piece of gymnastic apparatus has been devised to exercise and strengthen fingers for piano playing.

A big girder recently shipped from Steelton, Pa., to Chicago required four flat cars to carry it.

The prune crop is allowed to become dead ripe on the trees and is gathered by hand after it has fallen to the ground. By means of a new piece of mechanism worked on the principle of a carpet sweeper they are gathered much more rapidly and economically.

Take down the electric signs in Atlantic City, N. J., and the municipality will have to spend $25,000 a year more than at present to make up for the lost illumination.

Automobile output of the United States for 1914 was 200,000 cars.

Electrical railways of the United States represent a valuation of $739,000,000.

All the parks, gardens and available open spaces of Vienna are to be laid out as vegetable gardens.

Professor B. B. Boltwood, of Yale, has set the duration of radium's activity at about 1650 years.

The average speed of the phonograph record under the needle is 1.82 miles per hour.

It is estimated that the annual loss to agriculture in the U. S. from the depredations of insects and rodents alone is $1,000,000,000—about $1 a month for every man, woman and child in the United States.

A mail and express auto traversing the wilds of Colorado has a bandit-proof cage in the rear for valuables.

Canopus, the giant of the stellar system is, according to a recent calculation, 49,000 times as bright as the sun. It is 131 times as large as the sun in diameter, 18,000 times in surface and 2,120,000 times in volume. Its distance from us, according to the same estimate, is 489 light years.

The crop of cereals grown in the Northern Hemisphere in 1915 exceeds the average crop of the past five years by more than 73,000,000,000 pounds.

German scientists are said to have found substitutes for nearly all the commodities in demand, the supply of which has been cut off by the war. According to a recent consular report, German manufacturers have found a way of making willow-herb take the place of jute and hemp, which grows profusely in that country, and in the United States. In Germany encouragement is now being given to the cultivation of this plant, which has been heretofore regarded as a weed.

When the Back Becomes Lame

IT IS A SIGN OF KIDNEY TROUBLE

Doan's Kidney Pills cure the aching back by curing the aching kidneys beneath—for it is really the kidneys aching and not the back.

Doan's Kidney Pills are a special kidney and bladder medicine for the cure of all kidney troubles.

Mrs. Louisa Gersham, 683 Manning Ave., Toronto, Ont., writes: "I take great pleasure in writing you, stating the benefit I have received by using Doan's Kidney Pills. About three years ago I was terribly afflicted with lame back, and was so bad I could not even sweep the floor. I was advised to try your pills, and before I had used one box there was a great improvement, and my back was much better. However, I kept on taking them until my back was completely cured. I highly recommend 'Doan's' for lame back."

Doan's Kidney Pills are the original pill for the kidneys. See that our trade mark the "Maple Leaf" appears on the wrapper.

Doan's Kidney Pills are 50c. per box, 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

PALPITATION OF THE HEART.

Sudden fright or emotion may cause a momentary arrest of the heart's action, or some excitement or apprehension may set up a rapid action of the heart thereby causing palpitation.

Palpitation, again, is often the result of digestive disorders arising from the stomach, or may be the result of over indulgence of tobacco or alcoholic drinks.

The only way to regulate this serious heart trouble is to use Milburn's Heart and Nerve Pills.

Mrs. J. S. Nicholls, Listowel, Ont., writes: "I was weak and run down, my heart would palpitate and I would take weak and dizzy spells. A friend advised me to try Milburn's Heart and Nerve Pills, so I started at once to use them, and found that I felt much stronger. I cannot praise your medicine too highly, for it has done me a world of good."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25; at all dealers, or mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

SEA POWER OF BRITAIN

References appear from time to time in foreign telegrams of pro[illegible] to transfer interned German [illegible] ships to neutral flags, says [illegible] in a recent article. [illegible] measure occupied Germans in the [illegible] ited States in the early days of [illegible] war. The movement on the other [illegible] of the Atlantic was quashed, for [illegible] time, at least, with the capture of [illegible] Dacia by the French navy, and subsequent condemnation. Now [illegible] are again current; they come [illegible] Spain, Sweden and other neutral co[illegible] tries. The Allies, unless they [illegible] prepared to neutralize their sea-pow[illegible] which is their main reliance, will [illegible] ly refuse to recognize any trans[illegible] Once a German ship, a German [illegible] she must remain during the course [illegible] this war, and it may become a [illegible] question whether the Allies should re[illegible] cognize a change of flag even after the conclusion of peace, except on well-defined conditions.

Since the first shock produced by the bold initiative of the British fleet there has been a tendency to hold sea-power cheap and to barter away its influence. It may be doubtful whether the British Foreign Office does not in some measure come under condemnation, and certainly the average Englishman has underestimated the almost unlimited powers which reside in the navy. Their exercise is subject to only one reservation—the utmost consideration, compatible with military requirements, must be shown to neutrals, particularly as we entered this war in defence of a small State's neutrality.

But apart from that consideration there is practically nothing that the British Navy cannot do in time, and there is no part of the world in which its influence cannot be exerted. Let us banish such views as were expressed the other day, when a friend remarked. "It seems to me that the navy has done its job, and little more is required of it than to wait until peace comes; of course, in the meantime maintaining the blockade of Germany." It is probably nearer the truth to say that the work of the navy has only just begun, provided that our own Government and the Governments of the States fighting by our side know how to utilize the immense maritime resources of the Allies.

The history of the Dutch Republic furnishes an illustration of what sea power can effect. At the close of the sixteenth century Holland was the world-Power, and she was also the world's carrier. The commercial and colonial power of the Dutch was extracted by them from the sea. They were making wonderful progress north east, south and west, when two events occurred. In the first place, Dutchmen themselves began to quarrel on politics and became divided into two camps—one Home Rule and the other Unionist (and the former were in the ascendant)—with the result that, instead of policy being directed by one man with clear ideas, it was in the hands of disputations and self-seeking politicians. Politics ruined the Dutch Empire, and, in particular, took the edge off the Dutch sea-power.

While things were in a condition of muddle and confusion a storm came to the head. The first indication of its coming was a trifling incident. According to Commander Charles Robinson, the act of the Dutch, who had freed themselves from the oppression of Spain and supplanted the "Portuguese in the east, in raising the price of pepper in 1599, led to the formation of the 'Company of the Merchants of London trading in the East Indies." Twenty-four years later by the massacre of Amboyna, the Dutch drove the British company from the Eastern Archipelago to the Indian continent. The Dutch also acted arbitrarily in the Baltic, and, later on, were not very pleasant to the Commonwealth.

The first measure of retaliation adopted by the Commonwealth for the protection of British interests was not the landing of an army in Holland but the passing of an Act of 1651 directing that no goods or commodities grown, produced, or manufactured in Asia, Africa, or America should be imported into England or Ireland, or any of the English plantations, except in ships belonging to English subjects. It was also laid down that the trade between this country and other European countries should be conducted either in British bottoms or in the vessels flying the flag of the country in which the commodities originated.

What is the moral to be drawn from this triumph of sea power? Again the North Sea is the main theatre. Everyone is more or less familiar with what the navy is doing to-day, and has done during the past sixteen or eighteen months. It has taken from Germany practically all her colonies; it has strangled the enemy's oversea trade; and, as the German wireless admitted this week, there are "no more German ships upon the seas." It rests with the Allies to decide when German ships shall again take the seas, and it does not by any means follow that that freedom will come with the signature of peace, for without British, French, Russian and Italian ports to call at—not to mention those of Japan—German vessels could not be run at a profit.

FARM VALUES IN YEAR 1915

Dominion Census Bulletin Gives the Averages

On Land, Labor and Live Stock Held.

A bulletin just issued by the Dominion Census and Statistics office summarizes the results of reports made by crop-reporting correspondents respecting the values of farm land, of farm help, and of farm live stock, in the year 1915.

VALUES OF FARM LAND.

For the whole of Canada the average value of farm land held for agricultural purposes, whether improved or unimproved, and including the value of dwelling houses, farms, stables and other farm buildings, is returned as $36.90 per acre. Last year the average value was returned as $38.41. By provinces the averages per acre range from $22.48 in New Brunswick to about $125 in British Columbia, the values for the other Provinces being as follows: Prince Edward Island, $37.64; Nova Scotia, $23; Quebec, $51.36; Ontario, $52.49; Manitoba, $30.30; Saskatchewan, $24.20 and Alberta, $23.15. In British Columbia the higher average is due to orcharding and fruit growing.

WAGES OF FARM HELP.

[illegible] wages paid for farm labor in [illegible] to a lower point than in any [illegible]ar. The causes of this de[illegible]ase were the small crops of 1914, [illegible] the gathering of which fewer hands [illegible] required, the release of other [illegible]rers on the outbreak of the war, [illegible] the increased cost of board. In [illegible], owing to the abundant harvest [illegible] the effects of recruiting for the [illegible]y, there was some reaction, and [illegible] average wages paid were more [illegible]an in 1914 if not quite equal to those [illegible]d in 1910, the date of the previous [illegible]quiry. For the Dominion the aver[illegible] wages per month during the sum[illegible]er, including board, were $37.10 for [illegible]ale and $20.20 for female help, as [illegible]mpared with $35.55 and $18.81 last [illegible]ar. For the year, including board, the average wages were $241 for males and $200 for females, as compared with $233.30 and $159.55 in 1914. The average value of board per month works out to $14.57 for males and $11.46 for females, the corresponding figures of 1914 being $14.27 and $11.25. Average wages per month were lowest in Prince Edward Island, viz., $26.27 for males and $14.59 for females; in Nova Scotia the averages were $32.95 and $16.85; in New Brunswick $33.73 and $16.11; in Quebec $33.08 and $16.44; in Ontario $31.09 and $17.12; in Manitoba $45.18 and $27.29; in Saskatchewan $42.22 and $23.81; in Alberta $44.02 and $24.25, and in British Columbia $49.37 and $31.21.

VALUES OF LIVE STOCK.

The value of horses is somewhat [illegible]ess than that of last year, but the prices of cattle show an increase, especially for milch cows. Swine are appreciably dearer except in Nova Scotia and New Brunswick, where they are about the same as last year. Sheep, too, have risen in price, and there is a notable increase in the value of wool, the average for Canada being 28 cents per lb. for unwashed and 38 cents per lb. for washed wool, as compared with 19 and 26 cents respectively in 1914. The average values for Canada are as follows: Horses $123 as against $128 in 1914; milch cows $61 as against [illegible] other cattle $44 against $42; sheep $8 as against $7, and swine $15 as against $12. Approximately the total value of farm animals in Canada at the end of December may be estimated at $780,667,000, compared with $725,530,000 in 1914, the values for each description being as follows: Horses $370,378,000 as against $371,430,000 in 1914; milch cows $164,224,000 as against $153,633,000; other cattle $151,477,000 as against $143,498,000; sheep $16,225,000 as against $14,551,000, and swine $43,362,000 as against $42,418,000.

New Storage Battery.

A storage battery involving a number of new features and built on the lines of the No. 6 dry battery, which is universally used for general purposes, has been brought out by a German firm. They are exactly the size and shape of the dry battery referred to, and are designed to take the places of these for a great many purposes. It is claimed for the new storage battery that it holds its charge longer and can be recharged indefinitely for much less than the cost of a carbon dry battery. It has 40 per cent. higher working voltage, greater amperage, greater watt-hour output and five times more working capacity. The capacity increases with use and attains a value of 0.5 ampere for 40 hours, one ampere for 18 hours, two amperes for eight hours and three amperes for five hours. The average voltage of discharge is two volts. While at present made only in the size of the No. 6 dry cell, the new battery will later be made in various sizes for all purposes.

If our good intentions were all realized, the devil would have to invent a new paving system.

RHEUMATISM A MYSTERY

Unless Rooted Out of the System it Grows Worse and Worse.

Some diseases give immunity from another attack, but rheumatism works just the other way. Every attack of rheumatism invites another. Worse than that, it reduces the body's power so that each attack is worse than the one before. If any disease needs curing early it is rheumatism, but there are few diseases physicians find more difficult to treat successfully. Wet weather does not cause rheumatism, as was once thought, though weather conditions may start the aches and pains. Rheumatism is now known to be dependent upon the blood condition, and medical authorities agree that the blood becomes thin with alarming rapidity as rheumatism develops. Maintaining the quality of the blood is, therefore, a reasonable way of preventing and curing rheumatism. That it works out in fact is shown by the beneficial results which follow a fair use of Dr. Williams' Pink Pills. These pills actually make new, rich blood, which drives out the rheumatic poison, and while the blood is kept in this condition there is no danger of the trouble returning. Mr. W. T. Pell, Palermo, Ont., says: "I was attacked with a trouble which was ultimately pronounced rheumatism. Often I was barely able to crawl into bed, and seldom able to do a full day's work. In this condition I doctored for a year, absolutely getting no better. Then I consulted another doctor, whose chief consolation was that unless I could get rid of the trouble I would be a cripple for life. He prescribed dieting, and I doctored with him for at least six months, but instead of getting relief I became weaker and less able to get around. Then I decided to try a doctor in Toronto, and was under his treatment for about four months with no better results. I gave up the doctors and tried other remedies, which were equally futile. Then one day our storekeeper sent me a box of Dr. Williams' Pink Pills, saying that if they did not help me I need not pay for them. I took them and then got some more and found they were helping me. I probably used $10.00 worth before I felt fully cured, but they did cure me and were cheap as compared with the other treatments which did not help me. The cure was made several years ago, and I have not had a twinge of rheumatism since. To-day I am well and strong, and I believe I owe it all to Dr. Williams' Pink Pills."

You can get these pills through any medicine dealer or by mail, post paid, at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

POTATO GROWERS

Are Advised to Save an Extra Supply for Seed.

Late blight and potato rot caused considerable damage last season to the potato, or particularly throughout the eastern section of the continent of America. In many instances, the loss amounted to 25 per cent. of the total crop, and more in certain localities. In consequence, farmers were induced to part with their potatoes more readily this winter, owing to the high prices paid for this commodity for domestic use. This, it is probable, will result in the scarcity of superior seed, since the general practice is for farmers to use for that purpose the remainder of their potatoes in storage towards spring. Seeing that the crop was much diseased at the commencement of the season, and considerably affected by storage rots, and with all or most marketable potatoes sold for table use, the quality on hand for seed purposes will be very inferior when the time for planting comes.

We would, therefore, urge farmers to immediately reserve for seed purposes the quantity, and a little more, to make allowance for further losses through rot, required for seed purposes. These should be hand-selected tubers, sound, and free from any sign of rot or decay, of uniform size, and pure in variety. Tubers slightly larger than a hen's egg are most economic for seed purposes. They should be kept until planting time in a dark, well-ventilated and cool place of storage, spread out in a layer not more than three potatoes deep.

Inquiries which are reaching us, not only from many sections of the Dominion, but also from the United States, indicate that the above caution is justified. There can be little doubt that farmers who have a good quantity of sound seed potatoes on hand will obtain a high price for them, when others begin to realize the scarcity of such seed. Consult Circular No. 8 for prevention of late blight and treatment of seed tubers to prevent disease, published by the Dominion Botanist, Experimental Farm, Ottawa, and obtainable from the publications Branch, Department of Agriculture, Ottawa. Specific inquiries relating to disease questions addressed to the Dominion Botanist, Central Experimental Farm, Ottawa, will receive prompt attention.

Many a man is cast in the shade because he stands in his own light.

The Housekeeper

A bit of vaseline will remove mildew or stains from any kind of leather.

To make perfect tea, remember — good tea, boiling water and a hot teapot.

To clean an iron sink, rub with kerosene.

Flour the cake pan after you have greased it, to keep the cake from sticking.

If a frock becomes spotted with rain press it under a damp cloth. The process is long and tedious, but the rain spots will disappear. Press always until the damp cloth is dry, then wet and move to another place.

Smooth out and keep all the tissue paper that comes into the house. Tissue paper can be used to great advantage in padding out sleeves and bodices of all sorts. It does wonders in keeping away wrinkles.

New stockings should always be washed before being worn.

Vinegar and honey mixed in equal parts is a great relief for a cough.

Nutmegs will grate more satisfactorily if started from the bottom end.

Medicine stains can be removed from linen with strong ammonia.

An empty baking powder can makes an excellent nut chopper.

When the top of the stove is red hot, the oven is not hot.

To drive away mice, scatter gum camphor around their haunts.

Soak clothes that are badly stained by perspiration in strong salt water before washing and stains will come out easily.

Bulldozing the Bull.

A few years ago I took the short course at our college of agriculture, and, besides learning how to judge calves and so forth, I learned the university yell. During the following summer our neighbor's bull bothered us at time by breaking through the fence and coming up from the pasture with our cows. Finding this breachy bull in the lane one night, my brother, who also knows something about college yells, and I each took a pitchfork and started after him.

The bull took to his heels and ran until he came to a good sized elm tree. Here he wheeled and started pawing up the earth and bellowing and otherwise showing an inclination to fight. To keep up our own courage we started giving the college yell. The bull gave one startled look and then made for home the straightest and swiftest way. It took him through two barbed wire fences, but they did not hinder him any. He did not trouble us again.

The moral of this is: When you go to college learn all you can, for you never can tell what you may have use for.—Country Gentleman.

IF SUBJECT TO COLDS HERE IS GOOD ADVICE

Don't load your stomachs with cough syrups. Send healing medication through the nostrils—send it into the passages that are subject to colds and catarrh. Easy to do this with Catarrhozone which cures a cold in ten minutes. Even to the lungs goes the healing vapor of Catarrhozone—all through the bronchial tubes, nostrils and air passages—everywhere a trace of disease remains will Catarrhozone follow. You'll not have colds, nor will you suffer from sniffles, bronchitis or throat trouble if Catarrhozone is used. Get it to-day, but beware of dangerous substitutes meant to deceive you for genuine Catarrhozone, large size, two months' treatment, costs $1; small size, 50c; sample size, 25c.

ANTIQUES

The mirror has claims to antiquity perhaps as remote as any other article of utility of every day need. With an introduction into history coeval with that of the Mosaic law there is no need for further research to establish these claims. Those thirty-four century old commodities, of polished brass, "the looking-glasses of the women assembling" (Exodus xxxviii.: 8) were apparently as essential to the furnishing of the tabernacle of the congregation" in the days of Moses as they are to-day, and have been throughout the ages, in the equipment of the home.

Suggested by nature and brought under control with the first advance of the arts of civilization, the mirror has not only been a most useful commodity in everyday life, but has proved a material aid to the artificer and craftsmen of all ages and all over the world.

Perpetuity of the mirror was secure in nature's own resources, its placid waters and its shining gems, but man's inventiveness removed what limitations there were to its conveniences and gave in polished metals and glittering glass tangible mediums of beauty and utility, and thus was nature's first mirror, the surface of some silent pool, framed in its circlet of waxen lily-buds and blooms, and verdant foliage superseded, and thus was accomplished the first surrender of nature to art.

Mirrors of polished metal seem to have filled out requirements throughout early ages, but history has revealed the frequent use of precious stones and glassy substances of natural or artificial formation.

In very remote times emeralds served the purpose, and the early Egyptians adapted the glassy volcanic product, obsidian, to same use. The early Chinese, too, had a way of converting pebbles into mirrors.

Early in the fourth century B. C., "mirrors of glittering glass" were carried in state processions, according to the chronicles of the Singhalese kings."

Two centuries later Archimedes succeeded in "harnessing the sun" with his "burning mirror," an implement of war said to have been used with devastating effect upon the machines and military engines of the Roman general, Marcellus, when the siege of Syracuse was in operation. The power of these mirrors was disputed for a long time, but Buffon proved it by experiment.

A message from Rome, dated April 1st, 1913, reported the discovery in the harbor of Syracuse, of what is believed to be "the burning mirror of Archimedes."

The whole trouble is that we won't let God help us.—George McDonald.

Are Worth Their Weight in Gold

WHAT MRS. BROWN SAYS OF DODD'S KIDNEY PILLS.

New Brunswick Lady Feels It Her Duty to Tell Women That Dodd's Kidney Pills Are the Best Remedy She Ever Used.

Miscou Harbor, Gloucester Co., N. B., March 13.—(Special)—"I think Dodd's Kidney Pills are worth their weight in gold." This is the statement of Mrs. James Brown, well known and highly respected here.

"I think it would be ungrateful on my part if I did not tell what a blessing Dodd's Kidney Pills have been to me," Mrs. Brown continued. "I was in bed three weeks with headache and sore back. Then I began to use Dodd's Kidney Pills and I found them the best remedy I have ever used."

Mrs. Brown is just one of the many women in New Brunswick who are telling of pains relieved and health restored by the great Canadian kidney remedy. Dodd's Kidney Pills are suffering women's best friend, because they act directly on the kidneys. They tone up the kidneys and put them in condition to do their full work of straining all the impurities out of the blood. Nine-tenths of women's troubles come from diseased or disordered kidneys. There is abundant evidence on every hand that Dodd's Kidney Pills cure all Kidney troubles.

THE POULTRY WORLD

KEEPING THE FLOCK HEALTHY.

Plenty of fresh water at all times is essential to health. So are grit, shell and beef scraps. Fine charcoal in the dry mash is a great health preserver, and the hens like it and will use it in the proper quantity if given the opportunity. It should not be given the little chicks before they are four weeks old, but after that a little will be good for them. If the young chick are given milk it should be fresh and should be so fed that they cannot get into it or scatter it about, for dampness from milk is as bad as from water, and must be avoided.

There are no vacations on the one man poultry plant. All the many necessary steps must be taken every day or some sort of disease or parasite, which is just as bad, will appear. The roosts must be frequently washed with a good disinfectant; kerosene is as good as anything. The deep litter must be stirred up every day and removed as often as it shows the slightest signs of filth or dampness, and new litter thrown in its place.

The litter question is of more than ordinary importance, for it is necessary that the hens be kept active, especially in winter, when they are kept in close confinement. The grain should be buried deep in the clean litter so that they will have to dig for it, and dig deep. The hens will get fat and lazy and will not lay unless they have to work for their food. In no other way can they be induced to exercise. Without this incentive sometimes they will stand still and freeze rather than move about.

A good many poultry houses are built on entirely wrong principles, notwithstanding the enlightenment resulting from the extensive investigations of recent years. Every poultry house should face nearly south as circumstances will permit, and should never face the west or the north. This is particularly true in cold climates. The importance of sunlight and fresh air cannot be overestimated, nor can the danger from draughts which produce colds and eventually croup, and must be avoided at all cost.

It is essential that the houses be so situated that they will get the early morning sun in every nook and corner, which means they must have large windows and many of them, and these should remain open at all times except in extreme weather. With no openings on the north or west, however, houses can be so arranged that windows may be left open even in blustering weather without any draughts reaching the hens.

The best way to ventilate a house has been demonstrated to be by the use of muslin curtains instead of windows, and this may be modified in very cold climates by using part curtains and part windows. The curtains may be closed in extreme weather and there will still be plenty of air. If windows are all closed, however, even in zero weather, the result will be unhealthy conditions; the breath of the birds will congeal, forming thick coatings of frost on the walls and ceiling, from which moisture will quickly form, and sickness in the flock will be the very quick result.

With closed glass windows extremes of temperature are reached in the twenty-four hours of the day, which are bad. Because of the frost and dampness on the walls the greatest degree of cold will be reached during the night, and in the daytime the sun shining through the glass will produce a far greater degree of warmth than would be the case with either an open window or a curtain. This is often the cause of serious trouble and sometimes fatal epidemics of contagious diseases result from the continuation of such conditions.

With careful attention to such details there need be no serious sickness in any flock of well bred poultry.

There are many remedies offered for the cure of the various poultry diseases, but if proper conditions are maintained there will be very little need for them. The axe can be applied to the sick bird as soon as a malignant disease is discovered, for unless it is a show specimen which has taken many awards, or has rare winning qualities, the affected bird is not worth the trouble and risk of trying to cure it. Kill it at once before it has a chance to spread its trouble to the entire flock, burn the carcass, then cleanse the entire section of the plant that the sick bird has recently visited, and the trouble will be ended.

In case of severe epidemic, which need never occur if sanitary conditions are maintained, it will be necessary to disinfect the buildings and all the implements very thoroughly and seed down the ground used for the poultry plant, transforming it again into fresh, clean soil, or the disease may be expected to crop out at some future time. Should lice or mites appear they may be disposed of by the use of a simple disinfectant, without serious injury to the birds; but this will be a job, and it is a job that should not be delayed.

NOTES.

Standard bred poultry should be good breds and scrubs may give results. Any fowl, no matter what kind, will respond to up-to-date methods; but the standard enough for any poultry keeper. Cross bred fowl, with years of breeding behind it, should be good enough for any one to make improvements on.

Due to early demand, the day-old chick hatcheries have placed a large number of eggs in the incubators to meet this demand, which will become larger each year, due to the widespread publicity in the press advocating early hatches for the beginner who has proper brooder equipment.

The beginner should understand that while early chicks are profitable, a good brooder, with proper house room, must be obtained to gain the best results. Many good brooders are now on the market, but they must be placed in quarters to give the best protection to both the hover and the chicks, with proper ventilation.

With poultry and eggs held firm throughout the winter, the average poultry keeper who used up-to-date methods has placed a fair balance on the right side of the ledger.

Economy in every move in poultry keeping is good practice, but it is false economy to purchase very cheap foods that cannot give good results, or cheap eggs, stock or chicks. Be willing to pay a fair price and obtain results.

Badly Mixed.

Hugh had been left with his grandparents when his mother was called away by the illness of her father. A few days after she left [illegible] the little fellow said, "Grandmother, I wish I was where mother is." His grandmother said, "Why, just think: if you were there you would be missing school, in which you are [illegible]." "But don't you know it is a great deal worse to miss your mother than [illegible]?"—Exchange.

Gun, Howitzer And Mortar

There is no sharp and distinct understanding on the part of the average person as to the difference or distinction between the field gun, the siege gun, the howitzer and the mortar. The precise line of distinction or mark of distinction between these classes of weapons might be difficult even for an ordnance technician to define. It is certainly difficult for a layman to tell just where the gun ends and the howitzer begins, or where the howitzer ends and the mortar begins.

Considered in a broad and general way, the special purpose of the gun was and is to destroy other guns in match or in position, to destroy troops in the open and to batter down objects behind which troops find shelter. The projectile of the gun by high powder pressure was given a high velocity and a relatively flat trajectory, which means that the shot passing from the gun to the target did not rise high above the earth or above a line joining gun and target. To withstand the powder pressure required for this work the gun was heavy in relation to the weight of the projectile. From the fact that the shot traveled in a path relatively of slight curve, its slope of fall or its angle of fall was not steep. It would go through a stone wall, or perhaps smash it, or would go deep into a dirt embankment, but it was not easy to put a shot inside a narrow deep trench, or to plant a shot so close behind an embankment as to kill men sheltered there.

The shot from the gun was good at penetration, but ineffective in searching the rear of cover. To accomplish that purpose another style of gun was devised. The pressure per square inch of powder chamber was decreased, the angle of elevation of the gun was increased, the angle of departure of the shot was greatly increased and the shot after reaching the summit of its path fell so steeply that if the range were known and the practice good the shot would land in a trench or fall so close behind an embankment or parapet that men would find no shelter there.

This being possible by a reduction of powder pressure per square inch of chamber surface and consequent reduction in the speed of the projectile, it was found that the weight of the gun in relation to the weight of the projectile could be diminished, thus increasing its mobility or the facility with which it could be moved from place to place.

It was found that the barrel of this gun could be very much shortened, thus effecting a saving in weight. But in making the change in this gun instead of absolutely decreasing its weight the gunmakers enlarged its bore and increased the size of its projectile, thus increasing its efficiency. This type of gun, though not in the narrow and technical sense a "gun," is ordnance and an element of artillery and was given the specific name "howitzer."

The mortar was a gun that could give a higher angle of fire and a more plunging fire than a howitzer. It was a very short piece of ordnance, fired from a platform and held down by ropes. Forts and mortar boats used it for getting a high angle of fire and a more plunging fire with larger shell than could be had using a howitzer. The range used to be obtained by varying the power charge. At this day mortars weighing at least four tons, fitted with an elevating device and range scale and with recoil and counter recoil or recuperator devices, are hauled around on wheels, set down on a platform also carried on wheels, and producing vertical fire with a high explosive shell weighing 250 pounds with or without a delay action fuse.

The field gun for the purpose of firing over ridges, getting at troops on the reverse slope of ridges or across hills, giving to shrapnel the proper slope of fall for effective distribution and keeping the load light on the horses has veered away from the gun as developed in ship and fortress artillery and in the direction of the howitzer-like properties. Field guns have had their trails split that the breech may be further depressed, thus giving them a higher angle of fire designed for use against air craft, and in effecting a useful compromise between power and mobility the trajectory of shots from this gun is high and the slope of fall quite steep.

Guns of high power—high powder pressure, high velocity and long range—have been built to give vertical fire or nearly vertical elevation against aeroplanes or dirigibles.

So, as announced, it is not an easy question to decide just where gun, howitzer and mortar divide.

WHAT A MAN READS.

It is a Big Factor in Determining His Course of Life.

A certain low form of aquatic animal life anchors itself to a rock and feeds on whatever the current brings. The average man feeds his mind in much the same way. He falls into line for current amusements. He reads only current literature. He listens to what happens to go by. He makes but little systematic attempt to shut out the unfit or to put himself in line for the fit.

The result is a defective grade of human life that rarely elevates society and often degrades it. If a man would make the most of himself, and that is manifestly the supreme purpose for which he was put into the world, it is worth his while to do his daily work where unclean things, mental and physical, are not made common.

It makes a good deal of difference in the worth of a man to-day as to whether his reading last night was "Hamlet" and "Isaiah" or "The Other Man's Wife," whether he went to the art institute or the burlesque show.

An ancient teacher of well-balanced mind gave this direction to his disciples as to the topics to be selected for deliberate thought:

"Finally, my brethren, whatsoever things are true, whatsoever things are honorable, whatsoever thing are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report, if there be any virtue and if there be any praise, think on these things."

To think of these things one must see and hear these things. To see and hear these things one must make an effort to do so.

Don't bank too strongly on a man's size. Many a big man shrinks from his duty and many a small man rises to the occasion.

TAUGHT BY THE KING.

A Lesson Given by Frederick William III. to His Steward.

King Frederick William III. of Prussia was a man of few words. Whatever he had to say was always brief and to the point, as the following anecdote from a foreign journal shows:

The King, who was accustomed to interest himself in all the details of court management, ordered his steward to take special pains to see that all the carriages were amply supplied with food and drink whenever they left for a journey of a day or so, but it sometimes happened that the steward despatched the drivers without any food, giving them a coin, perhaps, to buy what they wanted. That usually meant that the driver went hungry, as he did not have much opportunity to leave his horses and dine at a restaurant.

At length the King became aware of his steward's failure to carry out his orders and awaited the next opportunity to bring the fact to his attention. He had not long to wait. That night the King stopped his coachman as he entered the courtyard and upon inquiry found that the man had had nothing to eat since breakfast. He held out a dollar in his hand that the steward had given him to buy food with. Without a word the King took the dollar.

He went into the castle and summoned the steward. That worthy appeared immediately and made a profound bow, but as he raised himself up he was surprised to feel a coin placed against his mouth.

"Eat it!" ordered the King.

"But, your majesty, I——"

"Eat it!" the King again roared.

"Why, your majesty, I can't eat it!"

"Oh, you can't! But you expected the coachman to! Well, in the future just remember that that people eat food, not money. Do you understand?"

The steward understood. In the future the King's coachmen were amply supplied with provisions whenever they went upon a journey.

Wild Buffalo Increasing.

Government authorities of Alberta have made as reliable a census as possible of the wild buffalo of the Province, and announce that the number is not less than 400, probably nearer 500. The greater portion of these range in Northern Alberta, and the remainder in the Mackenzie district. Hunting, of course, is prohibited. The Royal Northwest mounted police have the animals under their protection, and any infraction of the law protecting them is severely punished.

An analyst of character finds that blondes are the more prominent in the world's affairs. Possibly this may inspire ambitious brunettes to become blondes for a while.—Kansas City Journal.

MAGIC BAKING POWDER
CONTAINS NO ALUM.
The only well known medium priced baking powder made in Canada that does not contain alum and which has all its ingredients plainly stated on the label.
E.W. GILLETT COMPANY LIMITED
WINNIPEG TORONTO, ONT. MONTREAL

Avoid caustic and acid preparations that discolor and damage aluminum. Keep your utensils bright as new by using
Old Dutch

Chorea or St.Vitus Dance

Mrs. Geo. Chisholm, R.R. No. 1, Grafton, Ont., writes: "I have used Dr. Chase's Nerve Food for my little girl for what the doctors pronounced Chorea, a disease of the nerves. I consulted our family doctor, and he gave her a liquid medicine, but do what we would, we could not get her to swallow it. A neighbor advised the use of Dr. Chase's Nerve Food, and, being in pill form, she took it without any trouble. She was seven years old, and got pale and run down. The muscles of the face were affected, and she became a pitiful sight. She seemed to improve right along under this treatment, and was entirely cured by using six boxes. She is nine years old now, and you cannot find a larger, healthier-looking child for her age. I shall always be grateful for what Dr. Chase's Nerve Food has done for us, and I can recommend it to all nervous people. You are at liberty to use this statement, so that others may benefit."

In children nervous exhaustion frequently takes the form of rickets, St. Vitus' dance or fits. In less advanced stages there are nervousness, excitability and irritability.

All such conditions indicate the need of Dr. Chase's Nerve Food to enrich the blood and nourish the starved and depleted nerve cells. Being natural and gentle in action, and at the same time powerful in its restorative and reconstructive influence, this food cure is admirably suited as a treatment for weak, puny, nervous girls and boys. It makes them strong, hearty and robust, and enables them to develop into healthy and useful men and women.

50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Dr. Chase's Nerve Food

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free, if you mention this paper.

Lovely New Spring Coats

Included are many new styles in smart, short belted coats and neat yoked coats, Military styles and longer coats with the wide flaring skirts. They come in beautiful new tweed mixtures, Shepherds checks and cream and striped Polo Cloths. Extra values at $8., $10. & $12.50.

The Newest Neckwear for Ladies.

White frilly collars in fine Organdy, Ninon & Georgette Crepe in Puritan Shawl and Cavalier styles, with beautiful Venetian Lace edges, also handsome collar and cuff sets.

You'll find a big variety of the newest things in neckwear and there'll be no difficulty in choosing a collar that will be both becoming and stylish.

New Spring Prints.

English made and dyed-Indigo and Butcher Blues, Lilacs, Grays, Black and White and White with colored spots and stripes, all fast colors. The cloth is splendid weight, firm and pliable.

Per yard 12½c & 14c.

New Art Sateens

Complete range of new designs and handsome colorings which are especially good for draping and quilt and comforter covers.

TOWN AND COUNTRYSIDE

News from the Neighboring Towns and Villages Written for The Telescope by a Staff of Live Correspondents.

(Additional Correspondence on Page 4)

GLAMIS

Mrs. F. Beaton and family returned to their home in Toronto last week.

Miss Lexy Fraser is home from Paisley preparing to leave shortly for the West.

Mr. W. J. Graham has been confined to his bed the past week with a heavy cold.

Miss Bella Stanley is home from Kincardine on a visit.

Miss Lizzie Ferris of Toronto, who has been home for a few weeks with a sore hand, returned to Toronto this week.

Rev. Mr. Ruth conducted Preparatory Services in the Presbyterian Church, Pinkerton, on Saturday afternoon.

Mr. Terrance McLennan is another of our young men to enlist. He will enter in training at Tiverton this week.

Rev. Mr. Baker returned to Spring Arbor, Mich., last week. Rev. and Mrs. De Mille are continuing the services in P. M. church.

Miss Abby Symons has returned from Philadelphia where she has spent a few months with her sister, Mrs. V. S. Ford.

Miss Margaret Campbell returned to her duties at Harriston this week.

Mr. Sydney Johnston, who was engaged with Mr. Mac McKinnon for the past few months, is engaged with Mr. Robt Keyes, 12th con., for the spring and summer work.

During the past week we have had the real thing—winter. Our faithful mail-carrier, Mr. Groves, was unable to make his trips to the station on Wednesday and Friday.

Mrs. D. M. Finlayson spent the week-end with her husband in Port Elgin.

CARGILL

Mrs. Wm. Mathews spent a few days in Toronto last week. Master Milner Matheson returned with her and will spend some time here.

Route Agent R. H. Jones of Can. Express Co., Toronto called on the local office last week.

Mr. R. A. Fowlie spent a few days in Toronto last week and during his absence Mr. Livingston of Hanover Branch acted as manager.

D. D. G. M. W. J. Loughleen of Huron District A.F. and A.M. paid an official visit to Walkerton on Tuesday evening and Port Elgin to-night. Tomorrow evening 17th he visits Paisley.

Mr. and Mrs. Wm. Jordon entertained a number of their friends to a euchre party on Wednesday evening of last week.

Messrs Fred Hoph and Jos. Lambertus were in the county town on Wednesday.

Mr. James Douglas, of Hepworth, attended the funeral of his niece Miss Annie Bowes on Friday.

Geo. Baxter's sale which was billed on March 8th, had to be postponed until 10th on account of storm.

Mrs. Wm. and Norman Jordan spent the week end in Guelph.

The funeral of the late Miss Annie Bowes was held on Friday afternoon from the residence of her sister, Mrs. S. Hettrick, to the Presbyterian Church where a very appropiate sermon was delivered by Rev. R. Gale, and for interment to Douglas cemetery followed by a concourse of friends and neighbors. Miss Bowes was born near Pinkerton and leaves two brothers and three sisters, namely: Mrs. S. Hettrick, Cargill; Mrs. W. Durm, Dorchester Centre, Mass.; Mrs. R. C. Hall, Little Rock, Ark.; Messrs. John Bowes of Govan, Sask. and Jas. Bowes of Chatsworth who was present at the funeral.

Lieut. W. A. King spent Sunday in Berlin.

Mr. Wm. and Miss Annie Crawford of Walkerton were guests at the Methodist Parsonage last Sunday.

Mr. and Mrs. Welsford and Miss Marie and Mr. James Martin were the guests of Rev. and Mrs. Fiddes at the Parsonage on Monday evening.

Tomorrow being St. Patrick's Day, we hope to see a good display of the shamrock. Nothing's too good for Paddy's Land. Its a wonder if some of the Scotch caps don't be seen.

Don't forget the play in the C. O. F. Hall tomorrow evening and see the Cargill fair-ladies. On looking over the programme it will be noticed none of them have enlisted, only for over the matrimonial sea.'

Services in the Methodist Church next Sunday evening at 7 p.m Subject "The Speechless Guest."

Misses O'Connell and Sweeney were in Walkerton on Saturday and Mr. F. L. Martin was in Paisley.

Mrs. Alex. Thompson visited in Galt over the week-end with her husband, Pte. Thompson of 71st Battalion, who is in the hospital at present.

Mr. Henry Lataque was in Palmerston on Saturday.

Mr. E. F. Dietrich, who has been in the moulding shop of the Dom. Wells Supply Co., left on Saturday for Harrison where he has secured a position with Harrison Stores Co.

Mrs. Frank Mawhinney spent Sunday with friends in Paisley.

Among the Sunday visitors we noticed Harold Loughleen of Drayton, Roy Sparling of the G. T. R. Goderich and Pte. Elmer Garland of London

Mrs. Henry Splitzig jr. left on Monday for Toronto to spend a few days with her sister, Mrs. Pender.

Mr. and Mrs. T. P. Hood were in Paisley on Monday.

Miss Loretta Mahoney returned to Walkerton on Monday after spending the past week with her parents here.

MAPLE HILL

Mr. Dan McNaughton is doing chores for Mr. Wm. Ellis who has been on the sick list.

The Brant Farmers Club held their regular monthly meeting Tuesday evening at the home of Mr. J. Dippel. The meeting was very well attended. A very stirring address was given by Mr. Albert Wahn on "The Road to Success."

Miss Ella M. Teeple spent Sunday at her home in Bruce.

Miss Marguerite Gowanlock who has been laid up with la grippe is getting better.

Some of the mechanical experts of these parts met their match last Friday in Adam Gowanlock's gasoline engine. Despite the fact that they turned the engine by hand till it was red hot, it refused to go. After the engine had conquered the boys hands down, it started itself and has never refused to go since.

Miss Jean T. Hamilton spent Sunday at her home in Paisley.

MILDMAY

Mr. Uppertshauser who lived on a farm just west of the village, has moved his family to their new home near Milverton. This gentleman, who was an honest and obliging milkman, was fined some time ago for selling milk with too much water in it. We are glad to learn that most of the fine was returned to him as he was in no way to blame.

Mr. E. R. Schwalm, who has been working in a munition factory in Toronto, the past month, visited friends here last week. Mr. Schwalm left for his home at Pickham, Sask., on Friday last.

Mr. George Beahler left for Kincardine last Wednesday to work as upholsterer in a furniture factory.

Messrs. Ed. Wittich, Chas. Pletsch and Fred Weller were visitors in Toronto the past week.

Rev. Mr. Hudson of Victoria University occupied the pulpit of the Methodist church on Sunday.

Mr. B. D. Patten of Walkerton was a Sunday visitor in Mildmay.

A party of our young people went out snow-shoeing on Monday night to spend the evening at a friendly farm house north of the village.

Mr. and Mrs. Lorne Schnurr returned on Thursday to their home at Whitla, Alberta, after spending the winter in our midst.

The latest recruits from Mildmay are Ptes. Earle Harper and August Helmbecker.

A St. Patrick's carnival is to be held in the local rink on the 17th. A good list of prizes are offered. This will be the last carnival of the season.

Mr. Clarence Kraemer returned to Toronto on Tuesday.

The death of John O. Miller of Buffalo occurred on Thursday last, the funeral being held in Buffalo on Sunday, March 12th. Mr. Miller was well known here having been a resident of Mildmay seven years ago.

The death of Miss Annie R. Bowes, teacher of S. S. 11, Carrick, occurred last Wednesday. The funeral was held in Pinkerton on Friday.

OTTER CREEK

Rev. John D. Fenner of Niagara Falls visited his parents, Mr. and Mrs. John Fenner for a couple of days this week

Mr. and Mrs. Wm. Klein of Mildmay visited at Mr. John Bell's on Sunday.

Miss Alma Damm of Ayton visited friends in this neighborhood this week.

Mr. and Mrs. George Piohl of the 12th. moved to Mr. Piohl's farm near Maple Hill last week.

WESTFORD

Mr. James Murray and Mr. Arch. Campbell visited friends in Walkerton on Sunday.

Mr. and Mrs. John Wall and some friends spent an afternoon at Mr. Wm. Walls last week.

Mr. Simon Donovan arrived home from Colorado on Saturday and intends starting farming on the old homestead Con. 10 Kinloss.

Miss Annie Murray of Chepstow is visiting her cousin Miss Bessie Murray here.

Mr. Rosco McGlynn and his brother Lio of Belmore spent Sunday with their cousin Mr. John McGlynn.

Mr. and Mrs. Fred Haldenby entertained a number of their friends and neighbours on Friday evening and all had a good time.

PINKERTON

Mr. Neil Thompson spent Thursday in Walkerton.

Mr. Geo. Chick visited at Walkerton over Sunday.

Messrs Thomas Birrell and John Moffat attended the temperance demonstration in Toronto last week.

Another of our boys have enlisted in the person of Mr. Walter Birrell who recently signed up at Toronto.

Preparatory services were held in the Presbyterian Church here on Saturday last when seven new members were added to the roll. Rev. Mr. Reith of Glamis conducted the service.

GREENOCK

Regardless of the storm last Monday night, a load from here took in the party at Mr. Charlie Waechter's and report a large time. Each said the storm was awful but 'twas worth it all.

Mr. and Mrs. Martin were at Formosa on Wednesday night last week and coming home they got storm-stayed when about half way home. They called in to Mr. J. J. Waechter's and waited till daylight.

Mr. and Mrs. Charlie Waechter of Formosa spent Sunday at Greenock.

On account of the storm and bad roads last week we had to do without mail for a couple of days but that will soon be over for another season.

Jake Schulter was in town on Monday for a load of coal for H. S. Hawthorne.

Silver Wedding Anniversary

Last Thursday was the Silver Wedding anniversary of a highly esteemed Walkerton couple. It was on March 9th, 1891, that the ceremony was performed at the home of Mr. McKinnon, Greenock, by Rev. Mr. Scratch, which united his daughter in the bonds of matrimony to Mr. Thos. Cunningham. That they may enjoy many more happy returns of their anniversary is the wish of their very many friends.

FIVE CEN

Penslar Cod Liver Extract

WHEN a tonic is necessary to restore strength and build up vitality in the spring, there is one that we can recommend to you with full confidence. But don't let it's name—Penslar Palatable Cod Liver Extract—suggest to you that it is anything like Cod Liver Oil. It is not, except in the good it does. It is so pleasant to the taste that you would hardly suspect it of being a medicine but it's true tonic and strengthening effect soon convince you that it is. Young and middle-aged persons, children and grand-parents, all are benefited by it. Get a bottle to-day.

Soldiers Entertained

On Friday evening the Presbyterian members of the 160th Batt. stationed here were the guests of the Knox Church Bible Class, at which there was a good turnout. After a short program of music and recitations, Mr. H. M. Lay gave an interesting talk on the Yukon, illustrated with some lantern slides from photographs he had taken. Refreshments were served afterwards and everybody enjoyed a good sociable time.

Death of Mrs Crawford

The death of an old and highly respected resident of Walkerton, Mrs. John Crawford, took place at Grand Rapids, Mich., on Monday. She had been in poor health for upwards of a year, having been ill in the hospital here for some time before going to make her home with her daughter at Grand Rapids last June. She leaves to mourn a family of four sons and one daughter: Mary (Mrs. John Lippert) of Grand Rapids, Mich., George of Rose City, Mich., Edward of Cargill, John of Walkerton and James of Brant. The remains were brought home to Walkerton for interment on Wednesday. Funeral service was conducted by Rev. D. A. Walker B. A. of the Methodist Church of which the deceased was a faithful, life-long member.

ENLISTED AT WALKERTON

THOMAS RINEHART, Walkerton, age 27, born at Walkerton, cabinet-maker.

MICHAEL SIEGFREID, Walkerton, age 25, born at Mildmay, machinist.

COURTNEY KNEPFLAR, Walkerton, age 18, born at Wingham, factory hand.

WILLIAM YOUNG, Chepstow, age 24, born at Chepstow, farmer.

FRANK WAECHTER, Walkerton, age 21, born in Formosa, butcher.

160th Bruce Battalion Roll Call of The Men

Now 1070 Strong

In Three Months' Time the Bruce Battalion Has Been Recruited to Almost Full Strength—A Fine Strapping Lot of Bruce's Best Youth of Which Any County Might Be Proud.

Three months ago the 160th Bruce Batt. existed only as an idea. The proposition to raise a whole battalion for Overseas Service out of a County which had been thoroughly drained of its young men by Western Immigration, and by enlistment in the first and second Canadian Contingents, was regarded by a good many people as a preposterous scheme. They said it could never be done. That Lt.-Col. Weir, who had been asked by the Militia Dept. to raise a Bruce Battalion, had a man's job on his hands, nobody doubted. The Col showed characteristic good judgment when he decided to get all the leading citizens of the County on the job and behind the scheme along with him. He got the regiment off to a good start by pledging the citizenship of Bruce at a public meeting to help him to the drop of the hat. A few days before the County Council did its bit by backing up the Regiment with recruiting funds.

Compared with the experience of many other Counties, the history of recruiting in Bruce would read like a fairy tale. In spite of the discouraging situation which the new Battalion faced, Col. Weir's unit has broken all records for recruiting among the County Battalions. To-day, in three months' time, the 160th is well over a thousand strong, and another two weeks will, it is expected, see the Battalion completed numerically in every department. In accomplishing all this, it must be said, that the Col. has had not only the backing of the energetic Citizens' Auxiliary, but able support and assistance of his second in command, Major A. McLean Moffat, and an enthusiastic staff of officers, who have not spared themselves in the work. And back of it all has been the citizenship of good old Bruce which has risen to the occasion in a way which must make every son of the County proud. Not only that, but she has given of the best of her sons, and the result is that Col. Weir will take from the County a fine, strapping, manly body of men of which any commanding officer might well be proud.

+ + +

'TWIXT LOVE AND PRIDE

"My dear Frances," said her ladyship; "he has been here only a week or so, and is it a necessity that he must lose his heart in that space of time? He shoots all day with Eddie, and sees Mildred at dinner-time, and talks to Mabel for half an hour before bedtime—and that is the extent of his love-making. So, you see, the field is quite open to you." And then she thought of that conversation with her husband in the bedroom some nights before, and felt that her speech was slightly jesuitical.

"I see," Miss Sylverton rejoined, turning her clear violet eyes first on Lady Caroline and then on Mildred; "he talks to Mabel, which means that Mildred will not look at him, in spite of his unlimited thousands. Well, I thank heaven I was not born with aristocratic tendencies; and I think Mabel is right. Is he handsome?"

"Very," answered Lady Caroline, seeing that Mildred would not open her lips on the subject.

"Rich, handsome and young in every sense of the word," cried Frances, gayly—"why, what more is wanting? With your permission, Lady Caroline, and without Mabel's, I shall certainly marry this young man"; and then the door opened, and Eddie came into the room.

"Frank!" he exclaimed, with undisguised delight; "my dear fellow, is it indeed you? I never anticipated such a happy surprise when I came here to hunt up my pipe. Why, what has brought you home so soon? Is it indeed your very self in the flesh?"

"Rather," said Miss Sylverton. "It came to this, you see, that as usual, I couldn't the old boy's line of con, and so I bolted, quite as much to his relief as my own."

"I can readily believe that," put in Eddie, innocently.

"Besides, the country down there was stupid, and I was getting bored to death," went on Frances.

"Can't you say out boldly and honestly that you couldn't do without me?" said Eddie, mischievously, and Miss Sylverton instantly rose to the combat.

"You shall have your ears soundly boxed for that piece of unwarrantable impertinence," she declared, and laid down her little silver-mounted riding-whip preparatory to commencing operations.

Having chased Eddie successfully into a corner presently, Miss Sylverton laid her pretty hands about his ears with great rapidity until he had cried peccavi several times, when she desisted, and they both looked up to see Denzil Younge standing in the doorway, laughing heartily at the whole encounter. He looked so extremely handsome, and the entire scene was so out of keeping with all propriety, that for once in her life Miss Sylverton blushed crimson.

"You there—and you never came to my rescue!" said Eddie, when he had recovered his breath, looking reproachfully at Denzil as he spoke. "Well, I would not have believed it of you. However, the longer we live the more we learn, and I suppose it is the way of the world. Miss Sylverton—Mr. Younge."

"Oh, Mr. Younge, indeed I did not know you were there," Miss Sylverton murmured, demurely, looking as if she could not hurt a fly to save her life; "and, beside, Eddie and I are such old friends." Here she made the discovery that she was excusing her conduct to a strange young man—a thing Miss Sylvester had never before been guilty of.

"Well, wonders will never cease. I declare she is actually ashamed of herself!" exclaimed Eddie, who was enjoying her unwonted confusion immensely. "I verily believe she is blushing."

"No, I am not," returned Miss Sylverton, promptly, quite ready now for a war of words—"far from it."

"If that is how you treat your friends," broke in Denzil, "I should like very much to put my name upon your list, Miss Sylverton."

"Would you?" she said, coquettishly. "Are you not frightened? Well if you behave prettily, and make up your mind to endure a good deal of ill-treatment, I dare say I shall be able to make room for you. But I must have time to judge of you first."

"Thanks; and for how long am I to be put on my trial? Don't make it too long," pleaded Denzil, in his lazy musical voice. For the life of him he never could refrain from softening his tone when addressing a pretty woman.

"For just one week," answered Frances. "I could understand Machiavelli himself in a week, so next Friday you may come to me for my decision."

In the meantime, Miss Trevanion, I hope you will put in a good word for me," Denzil said, turning to where Mildred was standing.

"Certainly. I will even put in two for you on this occasion—it is such an important one," Miss Trevanion returned, smiling on him her sweet, cold smile, which somehow ever had the effect of sending the blood throbbing back into his hea then

descend the steps that led to the garden, called from the window on "Mabel," "Mab," "Queen," "Queenie" alternately, until a faint sound from some distant corner conveyed the intelligence that Mabel had heard and was answering his summons. She came in a few minutes later with Rachel Younge, and seeing Frances, dropped all her flowers upon the floor.

"Frances," she exclaimed, and ran forward and kissed her friend with honest, undisguised delight; after which Miss Younge was introduced, and made the faintest, stiffest little inclination, in return for Frances' careless, graceful bow.

"She is unbearable," Miss Sylverton assured herself upon the spot, and then told Mabel all about her unexpected return. "And now that I have succeeded so fortunately," she added, "in getting out of the lion's clutches without suffering any very severe damage, I think the country ought to celebrate my escape by some public rejoicing. Don't you think so, Mildred? And don't you think, also, that it is high time old Dick Bohun gave us a ball?

"It does seem a long time since last he gave one," Miss Trevanion answered, assentingly.

"A dreadful time," declared Frances," who was in the habit of adorning her conversation with innumerable notes of admiration, mingled with startling adjectives—"so long a time that I have quite forgotten what I wore at the last. I say, Eddie, have you finished the ruination of that desk? Because, if so, I should like you to get a horse and ride over with me to the Grange, where we will find old Dick, and make him give us a dance before next week is ended. What do you say to my plan?"

"I am willing," Eddie said, laconically, and left the room to order his horse.

"I vote that we all go," exclaimed Mabel. "Why not order the pony-phaeton, and accompany them? It is a charming drive."

"Charming—and so is your idea," Mildred said; "only I don't think I will go, Mab, my dear."

"Oh, why not, Mildred, when there will be plenty of room?" cried Mabel. "You and Mr. Younge can sit in front and Rachel and I behind. Do come, my dearest."

"Not to-day, thank you," Miss Trevanion returned, blushing faintly.

"'An' if she won't, she won't,'" quoted Mabel. "Mr. Younge, I have failed, so I leave you to try the power of your persuasions while we go and dress—I dare say you will be more successful. Come Rachel"—and then she and Miss Younge went out of the room.

Mildred prepared to follow.

"Miss Trevanion, I wish you would come with us," Denzil said, softly, eagerly, as he held the door open for her. "The drive will not be the same thing without you. Will you come?"

"It is very good of you to wish it," she answered, bestowing upon him, for the second time that morning, her beautiful, indifferent smile, "but I do not think I will—thanks."

"Why not?" he asked, impatiently, still standing before her, and gazing almost angrily down into her calm, unutterably lovely face. "Why not? Tell me."

Miss Trevanion raised her eyes and looked full at him.

"I suppose it must be because I do not care to do so," she answered, coldly, almost innocently, with an intonation that cut him to the quick; and then he stepped aside and she passed through.

As the last of her dress disappeared through an opposite door the young man turned away, clinched his hands and muttered to himself—

"What a fool I am—what a fool—to wait all my life up to this, only to fall in love with a woman who scarcely cares to remember my existence!"

With this self-congratulatory address, he strode down the steps and into the pony-carriage, in which shortly afterward he drove his sister and "the queen" to the Grange.

All things considered, the poor ponies would have preferred any other driver that day, and the girls a more lively companion; but che sara, sara, and so all parties had to put up with Denzil. Once applying the whip rather too sharply to the well-cared-for back of Gill, the far-off pony, she thought proper to make a bolt of it for half a mile or so, and persuaded Jack to accompany her, until a steep hill and Denzil's firm hand had once more reduced them to a kindly frame of mind. During this rather trying half mile, Miss Younge, as loudly as she well could, had taken particular pains to express her consternation at and her disapproval of her brother's mode of driving, until Denzil, provoked beyond bounds by more than one cause that day, turned and advised her, in no very tender terms, to restrain her excitement: after which Rachel set her thin lips tightly together and determined to have her revenge as speedily as possible; so when the Grange had been reached, and they all stood round the phaeton, aiting for Eddie's knock at the door answered, she said, sweetly: is the matter with you to ll, dear? You are a little out you not?"

asked Denzil. "I don't people are at times, I sup you ask?"

ing, dearest"—if pos ore sweetly still—"I s: and, by the bye, wers failed to bring with us, did they

" thought Frances tly, as she saw face contract and t all she said was: l you come here and e has done to my stir oy grows more intolerably y day. What—is there noth y the matter with it? Well, der, then, what makes it feel so er?" and then the door was opened, and Denzil helping her from her saddle, they all went into the house.

Here they spent a long half-hour with the master of the Grange—a half-hour that worked wonders, as Frances obtained her request and a ball was promised within a fortnight to celebrate her delivery from Uncle Car —"strictly on the condi ick Bohun, "that you rling, Miss

Frank;" and she having promised the desired slow dance willingly enough, they all turned once more homeward.

Frances Sylverton discovered two things during her ride that morning. One was, that the chestnut thoroughbred she rode that day went easier in its stride than the little grey mare, her more constant companion; the other, that Denzil Younge was, without doubt, very desperately in love with beautiful Miss Trevanion.

CHAPTER V.

When the Deverills made their appearance at King's Abbott on Monday evening, just ten minutes before the dinner-bell rang, they brought in their train, uninvited, a cousin of their own, a certain Lord Lyndon, who had most unexpectedly arrived at their place that morning.

"I knew you would make him welcome, my dear," the Honorable Mrs. Deverill whispered to her old friend, Lady Caroline, as they seated themselves on the soft cushions of a lounge, "and really we did not know in the least what to do with him."

After which little introduction the young lord was made welcome and civilly entreated forthwith. He was a middle-sized young man of from 26 to 30, rather stout than otherwise, with nondescript features, and hair slightly inclined toward the "celestial rosy." His mouth, too, was an inch, more or less, too large for his face, and his eyes might have been a degree bluer, but, for all that, they had a pleasant, genial expression lurking in their light depths, while his smile alone would have redeemed an uglier man.

He was a general favorite with most of his acquaintances, and a particular one with his cousins, the Deverills, who looked upon him fondly enough in the light of a brotherly relation, time having convinced them that their chances were not of that order that would change his position from friend to husband The elder Miss Deverill was a tall girl, gawkily inclined, possessed of a very pronounced nose, a talent for listening, and a bright, clever expression, while her sister was particularly ugly. There were no two opinions on the latter point, either in Cliston or elsewhere; and indeed charity embodied would have found it difficult to indicate one passable feature in the younger Miss Deverill's face.

Miss Trevanion, in a demi-toilet of black and gold, scarcely improved Miss Jane's homely appearance this evening, as, with her calm, self-possessed manner, she sailed down the long drawing-room to receive her parents' guests.

Then she was introduced to Lord Lyndon, and executed a little half-bow for his especial benefit, which had the effect of reducing that amiable young nobleman to a hopeless state of imbecility for the ensuing five minutes. After that time had elapsed he gradually recovered his wonted composure, and, summoning back his departed pluck, took to staring at Miss Trevanion every alternate five seconds, with such unmistakable admiration in his eyes as caused Denzil Younge, in the background, to mutter curses, not loud, but deep.

Miss Trevanion was smiling very sweetly at the new arrival—far more sweetly than she had ever smiled at him—Denzil; and he—the new-comer—was evidently enjoying to the full the commonplace conversation he was holding with her.

Seeing this, Denzil fairly gnashed his teeth with excess of jealousy, and consigned this harmless young lord to all sorts of dreadful places, while telling Miss Sylverton, with his tenderest smile, how dear to his heart was a crimson rose in masses of fair brown hair.

Not that he deceived in the very faintest degree that astute young woman.

"Who was it told me you preferred 'great wealth of golden hair?'" she rejoined, mischievously, while she laughed good-naturedly enough, albeit slightly mockingly, as Denzil colored and flashed a glance at her, half-earnest, half-reproachful, from his beautiful dark-blue eyes.

"Never mind," she whispered, laying her hand with a gentle pressure on his arm as he took her in to dinner—"never mind; I am your friend, you know—so trust me."

Whereupon Denzil returned the pressure very gratefully indeed; after which these two felt that they had sworn a bond of mutual good-fellowship.

All through dinner Lyndon devoted himself exclusively to Miss Trevanion, while she—from what motive was a mystery—came out from her habitual coldness, and laughed, and sparkled, and dazzled her companion, until Denzil—watching from the other end of the table—felt his heart ache oppressively and a dull sense of the emptiness of things in general creep over him.

Perhaps, had she vouchsafed him even one gracious glance, even one smile, not at him, but in his direction, it would have somewhat dulled the pain; but her eyes sedulously avoided that side of the room, while she coquetted with and charmed her new admirer with an assiduity that made Frances Sylverton fairly wonder.

Once only, before she left the apartment, did Denzil meet her glance, and then but for an instant, as he held the door open for the ladies to pass through. Mildred, who happened to be last, having caught her light dress in a slightly projecting corner of the wainscoting, he stooped to release her, and as he rose again their eyes met.

In hers lay nothing but mute, cold thanks; while in his—whatever it was she saw in his, it caused Miss Trevanion to bow hurriedly and move away down the long hall, after the others, with quickened, petulant steps.

"Mildred, darling, how pale you look!" Lady Caroline said, anxiously, as she joined the ladies in the drawing-room. "Are you cold, child, or ill? Come over here to the fire and warm yourself. These sudden chills are very dangerous."

But Miss Trevanion would neither acknowledge to cold or go near the pleasant, inviting blaze, choosing rather to wander away vaguely toward a distant, heavily curtained window, where she hid herself from the watchful, reading eyes of Rachel Younge.

Outside the window, ran a balcony, gleaming marble-white in the brilliant moonshine. It looked so soft, so sweet, so lonely, that Mildred, whose cheeks had changed from palest white to warmest crimson, felt a sudden intense longing to pass out and bathe her flushed face in the cool pure light.

(To be continued.)

The State of Ohio is to establish a postal system for the service to the various State Department entirely separate from that of the National Government. In the State House will be placed a central postoffice, which will handle all the mail sent from one department to another.

WHEN LONG BREATHS HURT YOUR SIDE RUB SORENESS AWAY WITH "NERVILINE"

Prompt Action Often Prevents Pleurisy or Pneumonia.

Do long breaths hurt you? Try it and see. If you notice a wheeze or a catch in your side, then be sure trouble exists.

Proper action consists in a vigorous rubbing of the back, chest and sore side with "Nerviline." This wonderful liniment sinks into the tissues where the pain is seated—gives instant relief. That catch disappears, all sense of soreness goes, and you then know that Nerviline has probably saved you from pleurisy.

Just try Nerviline for chest tightness, coughs, aches and soreness—it's a wonderful liniment, and when kept in the home saves the family from lots of ills and suffering. A large bottle on hand makes the doctor's bill mighty small, and can be depended on as a reliable and mighty prompt cure for rheumatism, sciatica, lumbago, pleurisy, stiff neck, sore muscles and enlarged joints.

Get the large 50c family-size bottle; it is far more economical than the 25c trial size. Sold by dealers everywhere, or direct from the Catarrhozone Co., Kingston, Canada.

ANTIQUES

Among the antiques coveted by the connoisseur and collector Irish glass has long held a foremost place, and as its production practically ceased about eighty years ago any genuine example may now be legitimately classed as antique.

Within the last twenty years a number of reproductions have appeared upon the market—honestly described as such in most cases—and these have had a tendency to increase interest in what was once one of Ireland's most important industries. In some cases, however, the lack of knowledge of the technique of Irish glass making and decorating has resulted in a production far from the genuine in matter of color, form or treatment, but as these are irregularities easily detected by those who know, little importance is attached to the circumstance. The color is the error most difficult to avoid, the form and decorative features being easily capable of remedy.

For at least one thousand years glass making in different forms has occupied the attention of the artist and artisan in Ireland. Legend and tradition suggest a far more remote antiquity than this, but there are few examples to prove the suggestion.

The reproductions mentioned have relation of course to the commercial products of the last two centuries, and which are invariably now designated "Waterford." Through the eighteenth and well into the nineteenth centuries the glass industry flourished in Ireland, and Dublin, Cork, Belfast, Londonderry, Dundalk and Waterford contended for the supremacy eventually conceded to the last named city.

Cut glass formed the largest part of the output at each of these centres, but Cork had almost a monopoly of the engraved and gilden ranges of decoration.

Examples of engraved and of gilded glass of Irish manufacture are much more rare than the "cut" patterns, and are eagerly sought for by the collector.

Glass beads, ornaments, and that used for ecclesiastical purposes claim the more remote periods of origin. The churches of Ireland held their treasures of glass in their superbly decorated windows. In the fourteenth century we hear of these beautiful windows, and fragments still remain of a wonderful example once in an ancient church at Kilkenny. It is recorded that seven hundred pounds was vainly offered by Cardinal Rinicclni for the glorious east window of this church, and had the offer been accepted the treasure may have escaped the vandal who later wrecked the sacred building, broke up the windows and carried away the almost priceless glass.

The earliest productions seem to have been chiefly in the form of ornaments, used separately, or in combination with the precious metals. The glass mosaics in the Cross of Cong, and in the Lismore Crozier are examples of this, the later displaying remarkably skilful workmanship, though when it was made, about the beginning of the twelfth century, the industry was well advanced in Ireland, the ninth and tenth centuries having examples assigned to them.

BABY'S OWN TABLETS GOOD AS GUARANTEED

Mrs. L. Isbell, Kingston, Ont., writes: "I am using Baby's Own Tablets and find them as good as advertised. They are certainly a wonderful remedy for little ones." Mrs. Isbell's testimony is like that of thousands of other mothers. Once a mother has used Baby's Own Tablets she will use nothing else for her little ones. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

AND THEN PROFOUND THOUGHT

(Life.)

She—You shouldn't squeeze my hand when going out of the theatre. When I squeezed back I meant you to stop.

He—Me? I—why, I, I—didn't touch your hand.

◆◆◆

They had just become engaged. "Love makes the world go round," he exclaimed. "Yes, but do you think it will bring father around?" asked the practical maiden.

How to Slay a Grudge.

"I forgave you once, and I won't forgive you again." This is what we heard one brother say to another who had unwittingly broken his chisel for the second time. He would not listen to an explanation. "You shall not use another of my tools," he continued. The next day he wanted to borrow a book from that brother. But before he asked for it he remembered he had said he would not lend his tools any more. He said to himself: "Well, I don't care if I did. He owes me something for breaking the tool, so I will just ask for the book." And he did. "Certainly you can have it and keep it as long as you want it," replied the brother without one bit of grudge in his heart. The effect was good, for the very next day he asked his brother to go with him into the tool room, and there he said "You can use any of them if you wish, only please be careful not to break them." The grudge had disappeared.—Christian Herald.

Why the Wise Are Early Risers.

It is a curious fact in psychology that nobody can stay at the same mental and physical level for twenty-four hours together. In the morning you are more matter of fact, for instance, than later in the day. It is in the morning that the best brainwork is done, too—brainwork of the sort that requires industry and clear thinking. And it is about 11 in the morning that your body reaches its highest point of energy. It other words you are stronger, though almost imperceptibly, at 11 in the morning than at 3 in the afternoon. You reach that highest point twice in the day, for about 5 in the afternoon and muscular energy has risen again. But from 5 onward it declines steadily all through the evening and on till between 2 and 3 a.m.—New York Press.

DO NOT STIR IT

Try a package of Dr. Jackson's Roman Meal. It contains 25 per cent. flaxseed and 10 per cent. bran, both wonderful foods. The flaxseed is rendered absolutely odorless and tasteless by electrically depriving its linseed oil of oxygen and changing it into a resin. If porridge is made without stirring, it positively has no hint of flaxseed. If stirred while boiling the resin again takes up oxygen from the atmosphere and is changed back into linseed oil, tainting the porridge. Do not stir and Roman Meal Porridge is the most delicious nut brown breakfast known. It's very nourishing and prevents indigestion and constipation. Most grocers sell it.

Made by Roman Meal Co., Toronto, Canada.

Thunder at Sea.

The Astronomical Society of France has again taken up the discussion which has been before it on several previous occasions, and that is the statement that thunder is never heard at sea. The statement was originally attributed to Baron von Humboldt, and it has been frequently questioned, but those who insist that they have heard thunder at sea have also stated that the peals were not so loud as on land. A large number of seamen have been found to agree with the scientist, although it is suggested that the other noises prevailing on shipboard during a storm may be the reason why the thunder often passes unnoticed.

Caught a Tartar.

Bishop Thornton when in Ballarat was walking one fine Sunday morning with his favorite dog, a very intelligent retriever. The dog was performing all sorts of tricks—jumping over his master's stick, retrieving it from the water, and so on.

The bishop was aware of the wide eyed interest of a small boy who, with his nurse, was walking on the shore of the lake. The bishop recognized in him the son of a neighbor with whom he was on the best of terms, although the neighbor was a leading light of Nonconformity in the city.

To amuse this boy the bishop put the dog through the whole category of his tricks and then said, "Now, isn't that a nice dog and wouldn't you like to have one like him?" To which the small boy replied sternly, "Sir, I think you forget what day this is."—London Citizen.

Chronic Skin Disorders Now Overcome Quickly

There is no hope of getting rid of disfiguring skin blemishes until the blood is purged of every trace of unclean matter.

Wonderful results follow the use of Dr. Hamilton's Pills which provide the blood with the elements it needs to become rich and red.

Quickly indeed the blood is brought to normal strength is filled with nutrition, is given power to drive out of the system the humors that cause rashes, pimples, pasty complexion and kindred ills. Don't complain. Get Hamilton's Pills to-day; they go to work at once and give prompt results. Mild, efficient, safe for men and women or children. Get a 25 cent box to-day from any dealer.

GOOD BOOKS.

When Personally Owned They Gather a Wealth of Association.

Cultivated men and women have always good books among their most valued possessions, and one cannot believe that this taste can be sacrificed without definite loss to our civilization.

The spoken word can never supplant the written word, and in fact the present tendency is all toward substituting print by speech. Nor can reading in public places take the place of reading one's own books in the quiet of one's home. Books that are owned wait patiently on the reader's leisure, and to have just the book one wants when one wants it must remain one of the supreme luxuries of cultivated life.

Books, too, when personally owned, writes Earl Barnes in the Atlantic gather around themselves a wealth of personal associations. The very binding, paper and title page recall the conditions under which the book came into our possession. As we open its pages we remember the last time we read it, the place and circumstances and the people with whom we discussed it. Books have personality, and they must always remain the warm friends of their possessors.

Better Than Spanking

Spanking does not cure children of bedwetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

Jaggery Sugar.

Though a Tmail poem enumerates 800 ways in which the Palmya palm may be used, one of its most interesting used is the production of a sugar called jaggery. This is the result of boiling down the fresh juice and is one of the chief sugars of South India. Four or five quarts per tree per day is the yield for four or five months. Once in every three years the sap drawing process is omitted, as otherwise the tree would die. The tree begins to yield at fifteen years and continues for about fifty years. The female tree yields about twice as much sap as the male. Three quarts of this sap make one pound of sugar or jaggery, which is the chief sugar used by the poor classes of India.—Argonaut.

Keep Minard's Liniment in the house

New Lines of Art.

The redheaded and dissatisfied boarder was a large man with a large appetite. After dinner he went out into the narrow yard, shook both his fists at the silvery moon, hurled several imprecations toward the congress of the stars and burst forth into a picturesque and voluminous flood of abuse which was devoted entirely to the landlady. One of the other boarders who had been at the house a long time, thereby accumulating a pallid look and a palate with corns on it, drew near timidly and ventured to ask what the special kick was.

"What's the matter?" echoed the large man. "That old dame's the first woman I ever knew who could literally paint food on a plate."—Popular Magazine.

Ask for Minard's and take no other.

Another Pull.

The Kaiser has a habit of gently tugging at his left ear when anything bothers him.

One day some years ago when he was on a visit to England he was handed a telegram. The contents of the message apparently displeased him, for he immediately began tugging at his ear.

The Prince of Wales, then a boy, watched the performance with considerable interest.

"Uncle," he said at length, "why are you pulling your ear?"

"Because I'm annoyed, I suppose," replied the Kaiser.

"And when you're very annoyed," persisted the young prince, "what do you do then?"

"Then I pull somebody else's," announced his majesty viciously.—London Tatler.

CANADIAN WOODS ONLY

Not very long ago Lord Shaughnessy announced that so far as possible Canadian woods only would be used in connection with the construction and interior finish of all Canadian Pacific buildings, railway cars, etc., an announcement which was hailed with great satisfaction by the lumber interests of the Dominion. That such a programme was possible was known to the forestry experts who have applied to the various Canadian Government exhibits in Europe and the United States magnificent samples of hardwoods with beautiful grains and attractive finish. It would seem that these woods are not being exploited sufficiently, but, no doubt, now that it is known there will be a good demand for it, manufacturers will give the matter greater consideration.

ELLA'S RECOMPENSE

had better hold my arm, Miss n," exclaimed Cecil, drawing r. At that moment a deep gruff came from the darkness—"Guten !" It sounded close to them, t they could not hear a footfall the speaker.

started violently and clung to Cecil, who involuntarily laid and upon hers.

"Oh, these Germans are good, quiet people," said Ella with a gasp, trying to master her nervous terror. "I should not like to meet that first man you helped me to escape, here."

"That first man!" repeated Cecil, laughing, while he instantly obeyed her slight motion to disengage her hand. "Do you mean to say the distinguished baron is the second."

"Oh, no! still I cannot say how grateful I am to you for coming to seek me."

"You owe me no gratitude," returned Cecil in a low tone. "I could not have gone without you!" and unconsciously, perhaps, he pressed her arm to his side. Then, after a few moments' silence, he exclaimed "Courage! there is a glimmer of light through the trees; we are nearly clear of Erebus, and almost at the end of our walk; but I need not tell you to be courageous—you are a brave girl, Miss Marston; you can master your own fears—that's the best kind of bravery."

"I assure you I am rather ashamed of my own nervousness this evening. I feel so absurdly tired and—" She stopped abruptly, with a suspicious quiver in her voice.

"Thank God, we are nearly out of this," thought Cecil, "or I should forget my good resolutions;" then aloud: "Here we are, all right, out of the wood; there is a light in the window of the ferry-house."

Reaching the cart-road which led into the forest, from which the path to the Adlersfelsen branched off, and which was comparatively light, Ella let go her companion's arm and pressed forward with renewed spirit.

"You need not hurry; we have ample time," said Cecil. "I remember now a train arrives from this side of the country in Friedrichstadt at ten-thirty. It must be by that we shall travel; it can not be due before eight-fifteen here. Oh! that's splendid!"

They had advanced to the mouth of the ravine, and suddenly came in sight of the broad smooth river, its swift silent tide flowing like rippled silver under a perfectly clear deep blue sky, wherein the moon, nearly at the full, sailed majestically; its tender lovely light bathing the side upon which the pedestrians stood in a flood of mild radiance, touching every tree, and stone, and tangled brake, with inexpressible transforming beauty, while the opposite shore lay in soft transparent shadow.

"It is unspeakably lovely!" murmured Ella, pausing to gaze at the scene, while tears rose to her eyes. "Can this be the same world that we shall struggle and hurt each other in to-morrow? and crave for fine clothes and the uppermost rooms at feasts? this lovely spiritualized earth, which seems so much too good for us!" she exclaimed as if to herself.

"I am afraid we are terribly dependent upon the medium through which we view things," said Cecil; "let us hope there is good everywhere, if we could only get the light that will display it. Ha! the lamp has been put out in the Gasthaus! We must catch the good people before they go to bed."

He went on as he spoke and knocked at the door, which was already closed.

"We want to cross the ferry," said Ella, who came up as the landlord had opened to Cecil's repeated demand.

"The boatman has gone to his house for the night and fastened up the ferryboat; but he lives not far, a few paces further up the river, and has a little skiff by him. I dare say he will launch it for the Fraulein."

"Oh, thanks, my good sir. Shall we then follow the shore?"

"Ja, ja! it is the only other Hauschen here. Gute Nacht, mein Fraulein, gute nacht, mein Herr," and the door was shut.

"We must go to the ferryman's house," explained Ella. "I hope he won't refuse to take us across," and they walked on by the enchanted river.

"No, he must not refuse! You seem to be tolerably at home in German, Miss Marston."

"I have not done as well as I hoped to do. You would be surprised if you knew how little time I have to myself; still, what I have learned will be of great use to me in finding an engagement—all teachers are expected to know German now."

"She little thinks what her future life will be," thought Cecil as they walked on, chiefly in silence, till they reached the ferryman's cottage. Him they found quite amenable to reason in the shape of thalers, so he went to launch his small boat which lay among the stones at the river-side. "We shall cross quicker in this," he said, "and the stream is strong tonight—there must have been much rain among the mountains."

"The air is crisp," said Cecil: "you must wrap your cloak round you," and he placed it on her shoulders. In another moment the old man called to them he was ready. There was no pier or jetty, only some large damp fragments of rock, the furthermost of which was lapped by the rushing water.

Cecil got first into the boat and held out both hands to assist Ella, who, poising herself on a bare smooth stone suddenly felt her foot slip, and being muffled in her cloak, was powerless to help herself, so fell forward.

With a startled exclamation Cecil caught and lifted her into the boat, holding her for a few unnecessary seconds closely clasped against his breast.

"You are not hurt?" he inquired eagerly.

"No, no; not at all," she murmured, feeling strangely faint and overcome. Cecil placed her on the seat and drew her cloak carefully around her, sitting close, very close by her side. "You are over-tired," he said, as their boatman pulled into the stream "I wish you were safe at your journey's end."

"I shall be all right to-morrow," she almost whispered. Ella was not frightened at this trifling accident; but when Cecil pressed her to him, when she felt the strong beating of his heart against his bosom, and heard the tone of anxious solicitude in his voice, a sudden light flashed upon her—an instantaneous revelation that she was more to him than a mere acquaintance, and that she herself, through all the coming years that might lie before her, would long unspeakably to be held once more in the eager firm clasp of his arms.

She was infinitely distressed and shocked at herself. It was a dreadfully unmaidenly idea; she must uproot it if she tore her heart in the effort. But there it was, thrilling through her with keen sweet pain.

As they floated out into the broad space of molten silver which lay between them and the opposite bank, both were still and silent—perhaps each was conscious of the other's feelings.

Ella was the first to recover speech. She leaned back against the gunwale, but finding Cecil's arm was resting there and so formed a cushion, she gradually drew herself upright again.

"I suppose," she said, and her voice sounded a little constrained to herself. "I suppose you have lovely nights in India."

"Very beautiful, but different—warmer, richer, less heavenly pure—wanting," he added dreamily, "all the ingredients of this exquisite night!" and Ella thought he sighed. What did he mean? Could she be one of the ingredients. Ah! she must not think of such folly! What was she, an obscure, insignificant waif, that a man of Colonel Cecil's position, and age, and experience, should give her a second thought? He was good-natured and well-bred, and would never amuse himself, as Mrs. Vereker suggested, at her expense; but she must not let herself be so weak and vain as to be misled by his kindness, even though his heart had throbbed so fast and strong when he had held her to him. She was of importance to herself: she had Kitty to live for and to work for: she must be wise and strong, as became a self-constituted mother. Calmed by the thought, she raised her head to look at the great cliffs all bathed in the moonbeams on the side they had left, and as the cold clear light fell on her face, Cecil was struck with its expression; he could hardly have described it; but he felt that there was something noble in its sweetness. Very few words passed between them, though the passage was somewhat long, till they reached the little pier beside the railway station. Cecil fully satisfied their Charon, who soon pulled out into the stream on his return voyage. Ella still lingered, gazing with fond admiration on the beautiful river.

"Yes, it is hard to tear one's self away," said Cecil, answering her unspoken thought. "But for my part, I think I shall see this scene whenever I choose, till—ah, till I cease to see," this he murmured as if to himself. "Come, Miss Marston," he said, "you had better rest in the station till the train arrives—you have been long enough on your feet." Ella silently obeyed.

A long half-hour ensued, during which Cecil exerted himself to talk of India, of his travels in Cashmere, then much more inaccessible and less known than it is now. His companion assisted him by her intelligent questions and attention. He admired her complete freedom from the smallest tinge of coquettish uneasiness, her brave endurance of fatigue and emotion; for that she had been deeply moved by some cause he felt rather than surmised. Yes, a real earnest woman, with a purpose in her life and a gallant reluctance to give any one unnecessary trouble, was more deserving of a man's love and respect than a helpless doll, whose airs of graceful dependence, however flattering to masculine vanity, do not develop the highest tone of feeling in her admirers.

At last the train steamed into the station. It was very full, and Cecil, to his annoyance, was obliged to place himself and his charge in a carriage with two ladies and a stout gentleman. The remainder of the journey was performed in almost total silence on Ella's side. She was dreadfully tired and exhausted. She removed her hat and leaned her head on the cushioned side of the compartment in which she sat, her pretty, wavy hair looking more golden than ever against the dark covering. Her attitude, expressive of utter weariness, was unconsciously graceful, but despondent. Colonel Cecil did not address a word to her during the short journey. He sat with folded arms, intensely still, and apparently lost in thought. But on Ella's lightest movement he was on the alert, to raise or lower the window, to put on her cloak, to relieve her of her hat. Though she kept her eyes shut, she felt that he watched her unceasingly, that she was wrapped about with his care.

Were there women in the world whose whole lives passed thus fenced with tender thoughtfulness, with sleepless love? Well, it was accident that suggested such ideas, and such a state of existence was not for her.

Arrived at Friedrichstadt Cecil put his companion into a droschky.

"It is nearly all over," he exclaimed as he took his seat beside her, and then he felt vexed for his unguarded words. "I must not forget, though, in my own enjoyment of our trip, that it has been trying to you."

Ella did not answer immediately; then she said—"If it would not be too troublesome, would you mind coming in with me and speaking to Mrs. Vereker? I am so tired and—and stupid, I am afraid if she scolds to-night I may cry, and Mrs. Vereker is not exactly—" She paused.

"I will come," returned Cecil shortly.

Mrs. Vereker had retired to the dignified solitude of her own sitting-room, in a state of irritation and indignation against the world in general and Colonel Cecil in particular. As to Ella, the iniquity, the shamelessness of that girl was beyond endurance. She would give her the full benefit of her (Mrs. Vereker's) opinion as soon as she returned, if she returned! Then a saving thought presented itself—perhaps Cecil only gave himself all that trouble because Ella was her cousin and protege—it might be so—and if——"

"Here is the Fraulein!" cried the smiling hausmadchen, throwing open the door, and enter Ella, closely followed by Cecil.

"Well, upon my word," said Mrs. Vereker, "this is a pretty hour for you to come back, Miss Ella! Pray what have you done with your friend the baron?" There was assumed playfulness, as well as an angry quiver in her tone. "The baron we left behind," said Cecil. "It was his thoughtless imprudence that caused Miss Marston to miss the party. I felt I was carrying out your wishes in going in search of her, and I trust I have now relieved your anxiety by handing her over safe and sound. I am afraid you are very tired, Mrs. Vereker! You ought to go to bed and rest."

"Yes, indeed! I have been cruelly anxious," said Mrs. Vereker, with a slight sob, and putting her handkerchief to her eyes; "I am a poor, weak creature and feel being left alone so much."

"No doubt. It is a pity that you should ever be alone," returned Cecil, ready to say any thing that would appease her. "Now, I fear I must leave you, Miss Marston has been horribly annoyed by the whole affair. She had not idea Von Reichenberg would lead her so far, and we have both been very uneasy about you!" said this reckless inventor. "You must let me call early to-morrow to inquire for you."

"Oh, yes! pray do!" said Mrs. Vereker; "I want to consult you about my movements now James is away. I haven't a creature to speak to."

"Most happy to counsel you to the best of my ability. Till to-morrow, then, good-bye." He turned short round, and placing himself between Mrs. Vereker and Ella, took her hand, and poured a grave inquiring look in to her eyes. "Till to-morrow," he repeated, and left the room quickly.

"I don't wonder at your not having a word to say for yourself, you heedless, impudent girl!" exclaimed Mrs. Vereker, who had been considerably mollified by Cecil's judicious remarks. "What would have become of you if Colonel Cecil, for my sake, had not given himself the trouble of going in search for you? disgracing me before every one with such—such unladylike conduct."

"You ought to blame Frau Gudacher, not me," said Ella wearily. "I had no idea Herr Von Reichenberg intended taking me by a different way. He said she would wait for me, and—but I am too tired and vexed to talk. Mrs. Vereker, I will go and ask Anna for a cup of tea in my room."

"Do that if you like. But I am very much displeased and warn you, Ella Marston, I intend returning very shortly to England after which you must not count upon staying with me."

"I don't expect it. I, too, have other plans. Good-night, Mrs. Vereker, I really can not keep up any longer."

And Ella, safe in her own room, had the relief of a "good cry," while she went over in imagination that afternoon's adventures. Finally, in the midst of some heroic and extremely sensible resolutions as to her future conduct, she fell asleep.

CHAPTER IX.

Rest and daylight brought strength and clearer thoughts.

Ella lived over again the events of yesterday while she dressed, taking herself severely to task for being so deeply moved by circumstances so simple, so easily explicable, and accusing herself of unreasonable exaggeration, even while she thrilled at certain recollections.

Then the idea of meeting Colonel Cecil that very day would intrude itself, creating mixed dread and delight. She would be very composed and friendly, she resolved to meet him with unembarrassed frankness, if she could. Ah, how much was involved in that "if!"

Midday brought her help in the shape of a long kind letter from Miss Griffin, containing good news of Kitty, who was looking well, and working better than she had ever done before.

Mrs. Vereker, though a little snappish and impatient, was on the whole in a better temper than Ella expected. She breakfasted in her own room, and made an elaborate toilet afterward. Ella thought she should never succeed in arranging her hair satisfactorily. When this was at length accomplished, and the sitting-room set in picturesque order, Mrs. Vereker discovered that she wanted sundry commissions performed. "I don't feel equal to going out this morning, Ella," she said, with a sigh. "You upset me dreadfully last night, so you must get me some gray wool, and Miss Braddon's new novel, if it is out in Tauchnitz, and a cake. What do you call it?—'Stollen'—it is very nice with a glass of wine. Take my bag, and, Ella, if you like to spend an hour in the gallery, as we shall be going soon, you can; it is a good opportunity."

"Very well, Mrs. Vereker," returned Ella, smiling, and quite understanding that she was to be dispensed with. "Then you think of returning to England soon?"

"Oh! yes; the week after next, perhaps. I will see Frau Gudacher, and settle about it to-day."

Ella sallied forth, and went to execute her employer's commands. She was well pleased to return to England, to escape the friction of Mrs. Vereker's irritating frivolity, to feel once more the bracing influence of regular occupation, of real work, which would soon disperse her illusions and restore her to common sense. Still, she caught herself glancing around in the vague hope—was it hope, or fear?—of meeting Colonel Cecil. She knew Mrs. Vereker had sent her out because she expected a visit from her former adorer; but sooner or later an encounter with him was inevitable, for the present it was her business to stay away as long as she could.

She therefore made her purchases, and proceeded to the gallery, where she wandered or sat musing for a couple of hours, till she had barely time to reach Wilhelm Platz before dinner hour. In fact, she could only remove her hat and cloak and join Mrs. Vereker as she went into the dining-room. They did not speak, and Ella could not quite make out the expression of her face, which showed chiefly bewilderment.

Directly after the midday meal was over, Mrs. Vereker rose in haste, exclaiming, "Come, Ella, I want you," and led the way rapidly to her own room. "Well!" she exclaimed, as soon as the door was closed, "wonders will never cease. Colonel Cecil has gone off to London!"

"Indeed," said Ella, beginning to set forth the contents of her bag and keeping her back to the window.

(To be continued.)

Luck has an unpleas favoring those who d it.

SUNDAY SCHOOL LESSON

LESSON I. April 2, 1916.

Conversion of Saul.—Acts 9: 1-31.

COMMENTARY.—I. Saul, the persecutor (vs. 1, 2). 1. and Saul—"But Saul." R.V. The work of Philip in spreading the gospel has just been considered, and now in contrast to him Saul is introduced in his efforts to destroy the followers of Jesus. Saul, mentioned in Acts 7: 58 and 8: 1, is the Hebrew name of this persecutor and Paul the Roman name. He was of high Jewish birth, a Roman citizen, educated, and was zealous for the religion of his fathers. Breathing out threatenings and slaughter—In his very soul he hated the cause of Christ and was determined to stamp out Christianity. His zeal was blind and wicked, and he considered that imprisonment and death were the proper forms of punishment for those who would follow Jesus. The high priest—The one in whom would reside the highest authority in religious matters. It may have been Caiphas, who was high priest at the time of Christ's condemnation, yet the date of Saul's conversion is not definitely known and hence we cannot determine with certainty who was the high priest. 2. Desired. Asked. Letters—Papers giving Saul authority to arrest the disciples of Jesus. Damascus—This was an important city on the great route of commerce between Egypt and the rich regions of the western parts of Asia. It was a very ancient city and was the capital of Syria in Old Testament times. It lies one hundred and forty miles north of Jerusalem. It is probable that many Christians who were driven from Jerusalem by the persecutions that arose against the church, fled thither. Synagogues—A certain amount of authority was possessed by the synagogues and the officials could hand over to Saul any Christians who might be found that they might be bound and taken to Jerusalem for trial before the Sanhedrin. Men or women—Women had a large place in the Christian community and Saul considered them as dangerous to the Jewish system as the men. Christianity could never be stamped out, he reasoned, if women were spared hence his determination to arrest them also.

II. Saul under conviction (vs. 3-9). 3. A light from heaven—This was a supernatural light; it was the radiance of the divine glory that was seen at the transfiguration. The time was noon (Acts 22: 6; 26: 13), and the light was "above the brightness of the sun," even in that land where the noonday sun shines with intensity. 4. Fell to the earth—Overcome by this divine manifestation. Saul's companions also were overcome (Acts 26: 14). Heard a voice—The others heard a voice, but did not distinguish the words. The message was to Saul, hence it was made clear to him. Saul, Saul—The name is repeated for the sake of making the message impressive. This same repetition occurs in the other accounts of Saul's conversion (Acts 22, 26). Why persecutest thou me—Saul's settled policy was to prosecute the followers of Jesus and he was then near Damascus to hunt them out and drag them away to Jerusalem. In putting the question in this form Jesus showed Saul that the injury done to his disciples was done to himself. 5. Who art thou, Lord—Saul is sensible of the divine nature of the vision, and shows this by his address.—Cam. Bib. He did not recognize who the questioner was, but he addressed him as a superior, even as divine. I am Jesus whom thou persecutest—The glorious Being declared himself to be Jesus, and the name Jesus had been fiercely hated by Saul. He identified himself with his scattered and hunted followers. To kick against the pricks—The figure is that of an unruly ox being urged forward by the goad, but resisting and kicking back at it. The clause and the first part of the next verse are omitted from the Revised Version, since many manuscripts do not have them. 6. Trembling and astonished—At the vision and at the words he heard. Lord—Saul now knew who had spoken to him and he addressed him by his title. What wilt thou have me to do—This was the honest inquiry of the convicted Saul. He wished to know the will of the Lord that he might do it. Go into the city—Of Damascus. It shall be told thee—Jesus had given Saul a vision of himself and he would have him assisted by one of those whom he had intended to drag to prison.

7. Stood speechless—They had arisen from the ground, but had not recovered from their amazement. Hearing a voice—They were not able to understand the words, although they heard the sound of the voice. Seeing no man—Saul alone had a view of Jesus. 8. Saw no man—The vision had made Saul blind. Even when he opened his eyes, there was no sight. Led him by the hand—The condition of Saul as he entered Damascus was very different from that when he left Jerusalem. He had lost his ferocity and had become a humble seeker after Jesus. 9. Three days without sight—The Lord evidently took away Saul's physical sight that he might be led to consider his spiritual condition and get a view of the work of Christ in man's redemption. Neither did eat nor drink—His chief concern was for his soul. When men are brought under deep conviction, they think little of their physical needs.

III. Saul, a changed man (vs. 10-19). 10. Ananias—All we know of this man is what is given in this account and in Acts 22. 12, 13. He lived in Damascus and was "a devout man according to the law, having a good report of all the Jews which dwelt there." In a vision—The Lord had given Saul a vision to reveal to him what he should do, and He gave Ananias a vision to make clear to him his duty toward Saul. 11. Street which is called Straight—There is still a broad straight street two miles long extending east and west through Damascus, which is probably the one in which Saul spent three days in the house of Judas. Tarsus—Saul's native city, near the northeast extremity of the Mediterranean Sea. Behold, he prayeth—A marvellous thing had taken place. 13. 14. Ananias was slow to grasp the situation and argued that he had heard of Saul's disposition and purpose, but the Lord made it plain that Saul would do a great work in carrying the gospel to the Gentiles. 17. Brother—Ananias used an affectionate address. Hath sent me. The et Saul by the way had as a human agent in the restoration of his sight and in the gift of the Holy Spirit. Sight—Physical sight. Be filled with the Holy Ghost—This was to work the change in Saul's nature that would make him a true follower of Jesus and an able minister of the gospel. 18. As ... scales—Whether or not literal scales fell from Saul's eyes, the restoration of his sight was immediate. Was baptized—The plain inference was immediate and the strong inference is that Ananias, even though he was not one of the twelve, baptized Saul. 19. Received meat—His appetite returned and he received strength from the food taken.

IV. Saul preaching Christ (vs. 20-31). Saul had started for Damascus to persecute Christians, but he began without delay to preach the Messiahship of Jesus. The people were amazed that Saul, whom they knew as an opposer of the new religion, should preach the faith that once he tried to destroy. So successfully did he preach Jesus as the Christ, that the Jewish leaders raised a storm of opposition against him and would have killed him, but he escaped by being let down over the wall in a basket by night. He probably spent three years in Arabia (Gal. 1. 18) before going up to Jerusalem. The disciples there were loath to receive him as a disciple until Barnabas vouched for him. He thenceforward was accepted as an apostle of the Lord Jesus.

Questions.—Who was Saul? How did he persecute the disciples? Who gave him authority? How far was Damascus. Who stopped Saul on his journey? What question was asked? What reply was given? What was he told to do? How were those affected who journeyed with him? What caused Saul's blindness? Who was Ananias?

PRACTICAL SURVEY.

Topic.—Conversion.

I. Submission to authority.

I. Consecration to service.

I. Submission to authority. Saul acted upon his convictions. What he thought to be right he did swiftly and earnestly. The great change that was wrought about in his convictions came through a vision of Jesus glorified. Jesus saw Saul's journey, knew his purpose and recognized his character. He knew he labored as an open, active, determined and cruel enemy to his cause. He knew he was a man of strong intellect, strong impulses and invincible conscientiousness. He knew he had the approbation of the ecclesiastical authorities. He knew that Saul regarded him as a mere man, a bad man unfaithful to his ancestral religion, and as an impostor pretending to be the Messiah. He knew that such thinking caused Saul to believe it was his duty to persecute the followers of such a supposed impostor and to arrest the progress of the new religion. He knew the scrupulous fidelity to the voice of conscience marked all his career. Saul was moving with the whole force of his strong and ardent nature in active persecution when a voice from heaven told him that in those suffering Christians he was persecuting the World's Redeemer. Christ's authority to direct Saul's course was supreme. The repetition of his name combined sharp condemnation and tender pity. Saul was astonished at the magnitude of his own sins and at the forbearance and compassion of his saviour. A clear knowledge was conveyed to him by his own sense of sight and hearing, that Jesus Christ of Nazareth was risen, and glorified. His previous convictions were thus refuted and the truth of the mission of Jesus was thus proved. There was no mistake, no deception, no delusion. In a moment Saul owned his rightful Master. He yielded the stronghold of his own belief. Christ revealed changed a furious persecutor into a humble penitent. That moment of revelation marked the crisis in Saul's life. It caused an entire change in his views of Christ, an entire change in his life-work. Christ became at once the supreme object of his worship, his love and his zeal. Nothing but the most decisive evidence could have effected such a change in such a man at such a time. His understanding was convinced, his will subdued and his soul saved. Henceforth Jesus Christ was his Lord, his Guide, his teacher, his Master and his almighty Saviour. Henceforth his life, body and soul and all his powers, his whole capacity for doing and suffering were Christ's wholly. The days of darkness were days of wrestling prayer when the foundations of the new life were laid deep. Self-surrender to Christ took the place of consuming zeal for the law.

II. Consecration to service. Saul had to wait some time before his life sphere was pointed out to him. Blindness and fasting served to give the astonished and humbled man an opportunity for quietness that he might carry out to a conclusion the conflict which began on hearing the voice of him whom he had called the Nazarene impostor. Compunction for ingratitude, hostility and hatred found expression in deep, earnest pleading, accents of prayer. Transformation from an uncompromising antagonist into a devoted and powerful champion took place. It seemed perilous to Ananias to visit a persecutor with the message of the gospel. He saw in Saul only an enemy and persecutor, Jesus saw in him "a chosen vessel." He found him willing and ready upon correction to embrace and propagate the Christian religion. He saw in him the man for the times in which he lived. The sphere of Saul's labors was to embrace all classes and ranks of men. The divine voice quelled the hesitation of Ananias. The falling of the scales from Saul's eyes was but a symbol of the spiritual enlightenment which Ananias was permitted to bring to his benighted soul. On the Sabbath day, in the synagogue, in the presence of all, Saul made public confession of Jesus as the Messiah. Upon the fact that he had personally seen his risen master, Saul rested his claim to the privilege of apostleship. The evidence was confirmed by Ananias and accepted as conclusive by the church. His powerful preaching aroused the animosity of the Jews. His arrival at Jerusalem created as much doubt among the Christians as it had done at Damascus. The affectionate Barnabas, the son of consolation, performed the office of friendship in his behalf and vouchsafed his sincerity. The old enmity and distrust were forgotten.

ALL THE HARNESS.

(Good Stories)

While his wife was away Pat was doing the shopping. Now he stood in the butcher's shop puzzled as to what joint to have for Sunday dinner.

"Why not try a saddle of mutton," suggested the purveyor of meat. Pat shook his head.

"A saddle!" he replied. "Why not a bridle? Then [illegible] of getting a [illegible]

DOAN'S KIDNEY PILLS

Relieve The Kidneys and Bladder Like Ordinary Medicines Do The Bowels.

When the kidneys get out of order the back is sure to become affected, and dull pains, sharp pains, quick twinges all point to the fact that the kidneys need attention.

Plasters and liniments will not cure the kidneys, for they cannot get to the seat of the trouble, but Doan's Kidney Pills do, and cure the kidneys quickly and permanently.

Mrs. Lizzie Melanson, Hampton, N.S. writes: "I am sending this to the testimonial, telling you what a wonderful cure Doan's Kidney Pills made for me. For years I had suffered with my kidneys I could hardly do my housework. I used several kinds of pills, but none of them seemed to be doing me any good. At last I was advised to try a box of Doan's Kidney Pills. When I had taken the first box I found relief. I have used five boxes, and to-day I feel like a new woman. I cannot recommend them too highly."

Doan's Kidney Pills are 50c. per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

THE JOY OF WORK

(Rochester Post Express.)

Overhead on the street the other day was the sour remark of a young man that he was then going to his prison for eight hours, meaning that his work day had begun. Yet the speaker was well fed, well clothed and in apparent excellent health. His work was honorable and remunerative and though requiring manual dexterity was less monotonous than many other occupations, and gave opportunity for mental alertness and growth. His prison, as he called it, was a warm well-lighted room where others also were employed and his work was useful in the world.

Probably there was something of flippancy and bravado in his remark and he would be in consternation if his "prison" were closed against him and he had to seek some other way of maintaining his family and himself in comfort. Still the words would never have been uttered by a thoughtful person who had the least idea what life was for or anything approaching a true conception of his relation as a unit to society as a whole. The spirit evidenced was that of a grouch who nursed a grudge against the world because he had to work at all.

That is the wrong viewpoint from which to look at life. The man in health who has the task for which his capacities fit him and who is not overtaxed thereby should go forward with interest and pleasure to work of each new day, happy that he can work, he should seek the pleasure always to be found in doing well the task in hand. He should enjoy his work, and if he fails to do so the reason lies in him. There is always some monotony in the work of a specialist, and a weariness of the particular muscles or brain cells employed makes rest welcome at the end of the day. Work is not play or there would not be that growth and discipline in it is essential to the development of character and the unfoldment of human powers. Minds which have begun to see things clearly know that work is the most desirable activity of mankind, and it ought to be joyous and can be made so.

Of course there are square pegs in round holes, men who find one task wearing who would find another pleasant; but the way to find that ideal vocation is to do well the task at hand. For most men, however, the work for which they are best fitted is that into which they have drifted along the line of least resistance. We are all of us probably less warranted than it may sometimes seem in supposing that we could do another's work better than our own or should be happier in doing it. We see the attractive superfices of other people's lives and not the burdens which they bear, the stresses they endure, the cares they hide. It is also true too often that disease or depleted vital powers makes work of any kind a drag. But many of those who have helped to do the world's significant work have fought through life against these handicaps finding more satisfaction in their work than in anything else. It has been often noted also that men who are busiest at their stated duties and most faithful in performing them have most time for work outside their daily routine and accomplish more than men who have all their days to employ as they see fit.

The point in mind, however, is that it is a privilege and a blessing to be able to work and that men who cannot find joy in their reasonable tasks could not find joy in anything. It is our mental attitude towards things which determine their status and makes them what they are for us. It is the idea which we accept and the spirit in which it is accepted which makes us what we are. The master-craftsman, or the man who aspires to be one, always finds pleasure in his work.

Elephant Skin.

Elephant skin is beautiful and durable, but it is very hard to get. The price of a live elephant is large, and a leather manufacturer who promised to provide a number of elephant skin bags at short order would find himself facing a big problem. Almost all elephants, after they die, fall into the hands of leather manufacturers, or else they are stuffed and out in museums.

Heart Was So Weak Could Not Go Up Stairs Without Help.

When the heart becomes weak and does not do its work properly the nerves become unstrung and the whole system seems to go "all to pieces."

When this happens you need a tonic to build up both the heart and nerves, and Milburn's Heart and Nerve Pills will accomplish this for you, providing you do not let your case run too long and allow it to become chronic.

Mrs. Evangeliste Leverdure, Fort Coulonge, Que., writes: "Last summer my heart and nerves were so bad I could not sleep at night, and my heart was so weak I could not go up stairs without help. My doctor said he could do no more for me as my heart was completely done. A cousin of mine came in one day and told me that Milburn's Heart and Nerve Pills cured her completely. I immediately gave her 50 cents to bring me a box, and since that day there is a box always on my sideboard. I am now well, and my heart and nerves are than when I was a little school advise anyone with heart troubl them.

SCIENCE NOTES

It is said that a humming bird, when stripped of its feathers, is no larger than a bumble bee.

Experiments in Italy [illegible] indicate that [illegible] in vineyards kill [illegible] loxera in grape vines.

The Government of Bra gun work on extensive syst ervoirs to enable the resid northeastern states to ge long, dry seasons, which occur.

The railway system of Japan is practically a Government monopoly, only 2635 miles of railway being privately owned on March 31, 1915, the latest date for which statistics are available, out of a total mileage of 5,944.

The New Yorker who has had an old grand piano transformed into a spacious writing desk may properly be expected to keep his foot on the soft pedal if he finds it urgent to compose letters of the sort that so often get in to court when that contraption is not firmly pressed.

Rock Springs, Wyo.; North Platte, Neb., and Fremont, Cal., all comparatively small places, are to build hotels valued respectively at $100,000, $140,000 and $200,000, the reason being that they are convenient stopping points on the great new transcontinental motor route, the Lincoln highway.

In Mexico and parts of Colorado there grows a "soap plant," the roots of which on being placed in water form suds that are suitable for washing.

There now rests in the Paris museum the grapeshot ball which struck Napoleon before Ratisbon, April 23, 1809. The bullet, which caused but a trifling flesh wound, was picked up by an officer and treasured by him and his descendants, until one finally gave it to the institution, where it is now on view. That was the great Bonaparte's only wound.

The largest cotton producing county in the United States, Ellis County, Texas, yielded 145,714 bales last year. This is more than six times the amount produced in the whole State of Virginia and more than was raised in either Missouri or Florida.

The Italian Government, which several years ago bought most of the telephone systems of that country, has extended until 1923 the time which some smaller companies may operate independently.

Pride of Race

(Ashley Carr, in London Daily Express.)

The train stopped, and in stepped the Man with a Conscience. He was a foe would not relish as an opponent nearing forty, probably; a man whom a foe would not relish as an opponent in a bayonet fight. His weather-beaten face and torn uniform clearly indicated a long spell in the trenches. A large "Canada" in white letters in a red setting adorned each shoulder. The King's and Queen's ribbons, frayed and dirty, hung limply on his left breast. His rifle, carefully wrapped in canvas he placed on the cushion.

"This is not the first argument you've been in, then!" I exclaimed, nodding at the tattered war ribbons.

"No; I'm an old Strathcona's Horse Man," he answered, with a touch of pride.

So this was his second journey from Canada to fight in Britain's cause. I was curious to learn if it was merely love of adventure or sense of duty that had impelled him to take up arms. I hesitated to ask the question, but we were scudding across country and he, my first Canadian, might get out at the next stop.

"You like fighting?" I inquired, tentatively. A long pull on the pipe. "Fighting itself—yes," he replied, slowly. "But the waits between scraps get monotonous. Taken altogether, I'd rather be back in civil life."

"Why did you enlist before? Didn't you think Great Britain was strong enough to beat the Boers?"

"Well, it was after Colenso—the windup of the Black Week—and I and a few more of the boys had it doped out to us that we ought to make a sure thing of it for old Johnnie Bull. So I threw up the job—one hundred and twenty bucks a month—and scrambled into khaki. I guess we came in useful after all. Those Boers were as slippery as a tubful of eels, but we Canadians had a trick or two up our sleeves, too. I was glad when that squabble was over. Too much night marching. But we were all glad we'd had a hand in it. It's our empire as much as your's, and it's up to all of us to keep it together."

"And now you're on your second campaign?" I asked. "No, my third," he said. "Third!" I exclaimed.

"Yep: when I got back Canada wasn't big enough to hold me for long. Heard tall yarns about the placer gold down in the Yaqui district, old Mexico. Gets itchy feet and beats it down there to get my share. Gets nicely fixed up with my rockers, sluices, and all the rest of the junk, when somebody takes a notion to chase old man Diaz out of the country and set up some other fellow in his place.

"I didn't know what the trouble was about until a Yank told me just how the fun had started. After he got through explaining, it seemed to me as though Diaz had been trying to give the rebels a dirty deal. It wasn't my quarrel exactly, but as I figured on staying in the country, I felt a kind of personal interest in the argument. So I down tools, hunts up one of the rebel leaders, and books up with his bunch. Believe me, that was some outfit; no uniform, no bugle calls, no saluting. Just a regular hash of humanity—Yanks, English, Irish, Scotch, Germans, French; in fact, most everything from an

◆ ◆ ◆

Both in Australia and in New Zealand they are ahead of us as to recruiting methods. Both colonies have had a government registration of men of military age, and also have governmental supervision of the work of securing men for overseas. In Canada we have neither. The members of the Dominion Government are content to make a promise of half a million men, or any other number which may happen to strike their fancy, and then leave the fulfillment of their promise to chance. The result is seen in a most unequal distribution of enlistments over the different parts of the country, and in thousands of shirkers who are shirking behind the patriotic sacrifices of men who are needed at home. It is against this obvious unfairness that a general outcry has arisen, to which the Ottawa government cannot afford to longer turn a deaf ear.—Brantford Expositor.

SIGNALLER LOUIS DIPPEL

Writes a Spicy Letter Home Giving An Insight Into the Soldiers Daily Life in Flanders—Letter From Private Fred Jewell.

Mr. and Mrs. M. G. Dippel received the following racy letter from their son Louis Dippel, who is on Signalling duty in the trenches. Telescope readers will find many interesting sidelights on life at the Front.

French Station Dug Out
Feb. 17th 1916

Dear Folks at Home,—

As you will have already surmised this is written in one of our signalling stations. We have three stations and now with our little duty (rooster) we know exactly where we are supposed to be and when. Now for instance after four p. m. to-day I am off till 6 p. m. to-morrow barring accidents such as line breaking etc. when if the regular linesmen are not present, you had better make yourself scarce as like satan our officers find work for idle hands to do. (I didn't know if satan should have a capital so notice the non-committal "s"). We can keep a fire going here all night providing some one of us rustles around and scares up some wood from some old ruin. Incidentally wood is getting to be about as scarce around here as my letters home and probably these two facts may be in one way dependent on each other, also most of these old ruins are registered targets of the enemy and in procuring fuel for your evening comfort you take a chance on Fritz considering whether you are worth a shell or not. However as we have a little stove we generally endeavour to keep it warm especially at tea and breakfast times, perforce we cannot have a fire during the day as smoke curling up suggests a cozy abode and as Fritz is famous for his busting up of happy homes we save our little mansion the trouble of stopping some of Krupp's renowned products.

There is plenty of opportunity but limited scope for any one versed in the culinary line or in other words an aspiring chef. My moments in the kitchen with you have not been entirely lost as you may guess from the the fact that breakfast (our big meal in this st'n) has always been cooked by me. Now don't jump at conclusions and report that I am some cook as there are an awful bunch of lazy men in the army especially noticeable amongst the signallers who probably use tact and their praise of the meal may conceal the fact that it is much easier looking on until the table is spread. The said table being a bag over your lap. By this time you will be wondering just what this Quick Lunch dishes up. But to keep up your interest or curiosity I will side-step your supposed interrogation and say that that largely depends on what stuff the cook gives you when you appear about 8 p. m. the day before going on duty with the cleanest sand bag you can muster and ask or demand or otherwise let that dignity disguised as the cook wise to the fact that you want 24 hours rations for three men. Being the senior in our little trio this duty is generally performed by me. But again what he gives you depends on. What he has. What humor he is in. How well you stand in his favour and just here I done think that if we were wrecked on a desert island that we would live in the same dug out. However the other [illegible] in our trio are no better, not so [illegible] by ill luck [illegible]

Of course it largely depends also on how good a provider you are in procuring stuff from the kitchen in addition to what he gives you. This can be done by the light of the silvery moon and twinkling stars, or I prefer absconding the sweet stuff while he is attending the fire or reading a paper which, if you are wise, you will bring him about this time. So last night our issue was:—1 loaf bread (very little butter,) some tea and sugar (mixed,) 1 can jam, some hard tack, ½ pound cheese, and some bully-beef. With only one meal to go, on the shelf in front of me rests one-third loaf bread, tea and sugar mixed, also 1 pound of tea and sugar each, not mixed, 1 tin jam, 1 pound cheese, some butter, salt, etc, eight tins of corned beef, some coffee from your parcel, and a tin of marconi ration. This is a sort of canned stew and is great heated up. Incidentally secured when the cooks were dreaming of home sweet home, or snoring to the tune of "Old Black Joe." Pardon me, I am doing the cooks an injustice. They also gave us six pieces of bacon, which are ate (pronounced et.) Can you remember your little boy back home refusing anything but lean bacon? Well yesterday I asked the cook for fat pieces. The reason why is just over the page. In my cooking report this morning, as I was on from 4 to 8 a. m., at 7 o'clock I roused one of the two and gave him the option of the phone or the stove. He took the phone. Soon fire was going fine for cooking (had been going all night.) First put on coffee in cold water as we have room for only one tin on fire, it is all heated at once. Next the bacon was fried and put on top to keep warm with coffee. Next toast was made and here's the idea—toast next dipped in hot bacon grease. We had toast and jam, etc. Your jelly was particularly fine and the dust that partook thereof pronounced it great and something like their mothers used to make.

I am still carrying around that watch in my pocket and don't know whether to send it home or to Folkestone to get fixed or to London (yes, no!) but to get fixed.

I got the Christian Guardian, etc., but not a town paper for quite a while. I also amongst a couple of others heard from Drayton yesterday, but their church and Institute parcels likely have gone the same way as the Walkerton ones of which I have seen nothing, eaten less, heard more and expected soon, but have not yet given up hope and if they finally do materialise, will be all the more welcome.

About five hundred yards down the road from where we are is a farmhouse where you can buy eggs, coffee and bread, the same being dished out to you by the prettiest girl I have seen in this country, and a Belgian at that. But have no fear for me as all the English she knows is about bread, butter eggs, coffee, etc., which subjects lead not to the nuptial altar.

I hope it soon dries up and keeps dry as I imagine that fighting will be a lot "nicer" in the summer, even if it goes faster.

It seems funny, doesn't it, that my weapon for this war is a telephone which is liable to go out of order at any moment. But in spite of all fortune tellers who try to fulfil prophecies out of the Bible, I don't think that the 13th chapter of Revelations has anything to do with this war or the Kaiser and 666, although these sixes always were a good hand to hold and there even was a play written about a pair of sixes.

So I have rambled on and scribbled about eleven pages, of sense and nonsense, chiefly nonsense, and now to while away the time during the day, I will play a little solitare, possibly write another letter, but about all I seem to be able to write is one at a time as unless you feel like writing, and obey the impulse, your letter tastes flatter than potatoes without salt, which we get occasionally. I mean the potatoes occasionally. And they always without the finished product of Lot's wife, when she looked around to see if anyone was looking at her Easter hat. However, I am now forced to close for want of paper, and anyway I have run out of ink.

Yours,
Louis.

LETTER FROM FRED JEWELL

Mrs. Jewell heard on Monday from her son, Private Fred Jewell, who is with the 18th Batt. C. E. F. in Flanders. Fred writes:—

How are you, Mother? I am well and hope you are the same. Simon Small is well too. How are all the folks getting along? It is pretty cold and wet out here but we are having a pretty good time. I haven't heard from you for some time. The mud is over your shoe-tops. I will be glad when I get home to see my old friends again. War is hell. I have been out here a month now. I got out here the 6th of Feb. I have been in "No Man's-Land" already. When I get through here I will be able to do anything. Will be home after the War.

160th Overseas (Bruce) Battalion, C. E. F.

LIEUT.-COL. A. WEIR,
COMMANDING OFFICER.

The return of empty egg crates has been stopped, taking effect March 1st, 1916. It is expected that by having the cases supplied by the shipper, there will be an improvement in the quality of the eggs. From a sanitary standpoint, it has another advantage, as it means the eggs will, in most instances be shipped in new cases and fillers thus doing away with a lot of old cases which have been the cause of musty and inferior eggs.

Farmers who have been wondering where the solution of the problem of obtaining adequate help in the near future is to be found, may take comfort from the following order, just issued, which will enable their boys to show their patriotism and help at home when that help is wanted. "Furlough for a period not exceeding one month may be granted to the men of the Canadian Expeditionary Force for the purpose of enabling them to take part in seeding, plowing, etc. They may be provided with return transportation to and from any locality not exceeding a distance of three hundred miles from the station where they are under training. Pay and allowances withheld during the period of furlough will be paid on the return of the man to the headquarters of his unit."

The present price of potatoes is out of all proportion to their food value. Starch is their principal constituent, which is found in better combination in bread. But we have formed a taste for potatoes and no dinner seems sat- [illegible] The cause of [illegible] altoge- [illegible] of po- [illegible]

Walkerton March 11th. 1916.

FOR SALE

The property of the late Joseph B. Taylor, situated on the west side of Yonge Street, south of McGivern St. in the town of Walkerton. On the property there is a brick house with eight rooms with town water, also a barn with stone foundation, accommodation for 8 horses and 4 cattle: water in barn. Poultry house and pig pen 12 acres of good land, all available for crop, drained; ½ acre in orchard, young bearing trees, apple, plum and cherry. For particular apply to Joseph B. Taylor, R.R. No. 2, Eden Grove or to Geo. D. Mckay, Walkerton.

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so lifelike, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

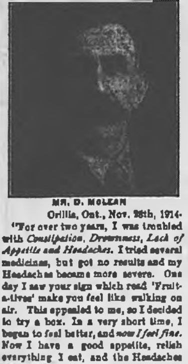
WILL WE EVER WALK ON AIR?

Train Of Thought Inspired By a Letter About "Fruit-a-tives"



MR. D. McLEAN

Orillia, Ont., Nov. 28th, 1914.

"For over two years, I was troubled with *Constipation, Drowsiness, Lack of Appetite and Headaches*. I tried several medicines, but got no results and my Headaches became more severe. One day I saw your sign which read 'Fruit-a-tives' make you feel like walking on air. This appealed to me, so I decided to try a box. In a very short time, I began to feel better, and *now I feel fine*. Now I have a good appetite, relish everything I eat, and the Headaches are gone entirely. I cannot say too much for 'Fruit-a-tives', and *recommend this pleasant fruit medicine* to all my friends". DAN McLEAN.

"FRUIT-A-TIVES" is daily proving its priceless value in relieving cases of Stomach, Liver and Kidney Trouble—General Weakness, and Skin Diseases.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

POETS' CORNER

THE BOYS OF THE 71ST.

In the mouth of September our battalion began
To recruit for men of the very best clan.
It was not very long when a big cloud burst,
And in rolled four hundred for the Seventy-first.
We learned the discipline and we learned the drill,
We learned to shoot, and to shoot to kill,
We're afraid of nothing and never will hide
From any old Hun on the other side.
As soon as the bugle at dawn is heard,
A first call! A second call! But never a third
Did our boys want for they knew it was time
That they all should be up and standing in line.
In the month of November we were divided in four,
And when we departed we all gave a roar,
It was Woodstock, Stratford, Chatham and Galt
Where the boys were quartered, and they found no fault.
But now we are up to a thousand or more,
And we all will be back in one body once more;
When we all get together and once more we meet,
You will find the Seventy-first hard to beat.
Our time is near for to go overseas,
And the boys of the Seventy-first no doubt will be pleased.
And when they get there you can trust them all
They will fight so they'll not let the old flag fall.

—Composed by a soldier in the hospital at London of C Company, 71st Battalion.

News About Town

H. G. Hunter has been appointed Treasurer of the Masonic Lodge, succeeding Mr. Henry Clark who is removing to Galt.

Major Osborne, who is inspector for this divisional district, says that nowhere are the men in the battalions of such fine physique as in the 160th.

Lieutenant Roy Whitehead, of Walkerton, was a week-end visitor with Capt. Veitch. At the evening service Mr. Whitehead sang very acceptably, "Crossing the Bar."—Pt. Elgin Times.

Mr. William Gillis, Tobermory, was in town last week. W. Gillis was formerly a merchant of the Tub. and Reeve of St. Edmunds, and has enlisted. He is not altogether a spring chicken, but wants to get into it all the same.—Wiarton Echo.

Rev. R. W. James preached a recruiting sermon here last Sunday evening. There were 23 men present of whom 20 had enlisted, 2 were under age and one was a business man of forty-two with a young family. We think this establishes a record.—Lions Head News.

The following happened in a Lions Head store last week:

Customer—"A package of Old Chum, please."

Soldier standing by—"Don't sell it to him, he's not eighteen."

Customer—"Yes, I am."

Soldier—"Well, why don't you enlist, then?"

Mr. Anthony Schultheis, youngest son of Mr. and Mrs. Jos. Schultheis, of this village, is the latest recruit of the 160th battalion. Tony has an exceptionally fine physique, and looks every inch a soldier in khaki. He has the advantage over most of his fellows in the matter of experience, for he already carries a bullet in his system, the result of an accident while out shooting about twelve years ago.—Mildmay Gazette.

✦ ✦ ✦

Busy Walkerton.

Local freight shipments indicate stirring business in Walkerton these days. C. P. R. business in February exceeded the corresponding month of last year by over six hundred dollars. March promises to be bigger still.

✦ ✦ ✦

Death of Joseph Schneider

Joseph Schneider, who was a resident of Walkerton for many years, passed away in the hospital at Peterboro on Wednesday of last week from cancer. Mr. Schneider's wife died here in June last and since that time he has been living at Peterboro. One son is Chief of Police at Rochester, N. Y., and another son is on the police force there. A married daughter resides at Pittsburg. The funeral took place on Saturday from Myles' undertaking parlors, interment being made in Walkerton cemetary.

✦ ✦ ✦

A Popular Rendezvous

The most popular spot in the town so far as the soldiers is concerned is the Soldiers Club rooms opened last month by the Walkerton Chapter, I. O. D. E. The ladies' effort to provide a place where the boys of the 160th could find a bit of wholesome recreation has been crowned with success. While off duty the boys throng the Club rooms which are usually filled to their capacity at night. Good reading, writing tables, games, piano and gramaphone provide ample means for the men of the 160th to pass a pleasant spare hour.

Our Boys of the 71st Here on Last Visit

The gallant Walkerton boys of C Company, 71st Batt. came up from Galt Wednesday morning to pay a last visit to their homes here before leaving for Overseas. They were met at the Grand Trunk station by the Mayor, the soldiers of the 160th Batt. headed by the bugle band, and a large number of citizens. The boys were in the pink of condition after their hard course of training and keen to get to the Front. The same evening a banquet was tendered in their honor at the Soldiers Aid Tea Rooms by the Town of Walkerton. Mayor Lippert occupied the chair and there were a few short speeches. "The King" and "The 71st" and "The 160th" were toasted. The speakers included Lt.-Col. Weir, Major Moffat, Rev. T. Wilson, who has a son in the 71st, and Coun. Robt. Russell, who was two sons in that Battalion; Capt. O. E. Klein, Sergt. Mel. Wilson, Judge Klein, D. Robertson K. C., Father Cummings, H. M. Lay, Lieut. Bob Rowland. The speeches reflected the pride which the people of Walkerton feel for their boys in the 71st and carried the best wishes of everybody for best success and a safe return. The good recruiting work of the 160th which is winning the Bruce Batt. a province-wide reputation was also referred to. Sergt. Mel. Wilson reminded the Company that the two fieldkitchens of the 71st Batt. were both donated by the people of this community, one being given by Walkerton, and the other by Brant Township, and splendid field kitchens they are. The dainty supper which was served by the young ladies of the Soldiers Aid included oyster patties, fruit salads, cake, and otherdelicacies. Everybody pronounced it great and appreciation was expressed for the splendid work which the Soldiers Aid organisation is doing.

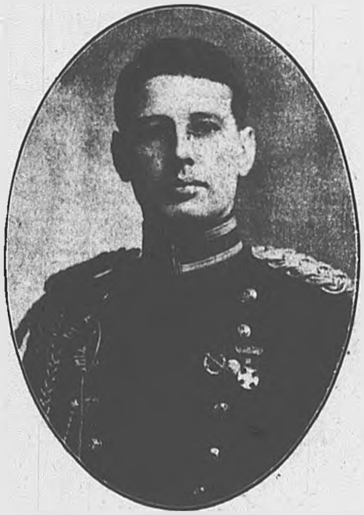
On Friday morning it seemed as if the whole town was at the station at 7a. m. to see the soldiers off. The men of the 160th again marched up to the station in command of Capt. Whitehead and Lieut. Rowland, headed by the bugle band. The boys lightheartedly cheered their comrades on the incoming train returning from further up the line but no cheer went up from the big crowd of citizens as with mingled feelings of pride and sadness they watched the train pull out bearing its precious load of Walkerton's young manhood bound for the battle-fields of Europe to give their lives if need be in a great and righteous cause.

The names of the Walkerton soldiers in "C" Company, 71st Batt. are: Sergeant Melville Wilson, Sergeant William Wolfe, and Privates, Ted. Wilhelm, Alvin Wilton, Chester Cunningham, John Jackson, Wilfred McKay, Edward Kidd, Bert Etherton, Roy Oberle, William Krueger, George Jackson, George Lynch, Fred Moore, Everett Truax, Leith Russell and Elmer Neilly.

Five other Walkerton soldiers are with the 71st at Woodstock:—Geo. Cunningham, Lon Anderson, Jack Burke, Walter Yaeck, Wilfeld Yaeck.

A letter from one of the boys since his return to Galt states that the Battalion expects to leave for Overseas this week without fail.

160th Overseas (Bruce) Battalion, C. E. F.



MAJOR A. McLEAN MOFFAT
SECOND IN COMMAND.

AN ENJOYABLE EVENING

Walkerton Audience Hears Travel Talk By Eminent Bruce Old Boy.

A large audience enjoyed a treat at Knox Church on Tuesday evening of last week, when Rev. Dr. Johnston of Montreal, a distinguished son of Bruce an illustrated lecture on "The Legends and Romance of the St. Lawrence and the Great Lakes.,, With that fluency and skillful word-painting for which the Doctor is so well known, he gave his hearers a delightful trip as he conducted them from the upper reaches of Lake Superior through the Sault locks to the magic isle of Mackinac with its historic memories. Some of the beauty spots of Georgian Bay were also visited. The charm of the Thousand Islands of the St. Lawrence were well portrayed by many excellent photographs thrown on the screen. Montreal and Quebec, with their magnificent churches, the beautiful St. Lawrence Valley, the home of the habitants, scenes rich in legend and romance were visited. The Doctor's talk was not only highly educative but most entertaining and his audience experienced not a dull moment. The affair was given under the auspices of the Public Library Board with the object of helping along Patriotic Work and a neat sum was realized after paying a few expenses. It might be mentioned here that the Doctor is most active in Patriotic work and was recently made a Lieutenant-Colonel by the Minister of Militia for his valued services in encouraging recruiting in the City of Montreal. The Doctor enjoys nothing better than a visit to the Old County of Bruce. Every summer he gets away from the city for a spell and enjoys a vacation amid the scenes of his boyhood days at Kincardine.

A SUDDEN DEATH

Mrs. Robt. Routledge Succumbed To Pneumonia while Visiting Her Daughter at Crandell, Man.

Bereavement came with shocking suddenness to the family of Mrs. Robt. Routledge of Brant on Wednesday last. Mrs. Routledge, who had been enjoying fairly good health, started out two weeks ago on a visit to members of her family in the West. On Tuesday night of last week, word was received that she had arrived safely at the home of her daughter at Crandell, Man., and was feeling well except for being a little travel-tired. The following day the disquieting news was received by wire that she was ill with pneumonia and a second telegram the same day conveyed the sad intelligence of her death. She had been in the West only five days. Mrs. Routledge, whose maiden name was Anne Elizabeth Vaux, was born near Burlington, Ont., 70 years ago. She, with her late husband, Mr. Robert Routledge, whose death occurred on the 4th of last month, were among the early settlers of Brant Tp. and were honored and esteemed for their fine personal qualities throughout the countryside. Devoted above all things to her family and home, her memory will be lovingly cherished by her large family, now scattered as so many of the old families are, throughout the length and breadth of the continent. Her sons and daughters are:—Mrs. Thos. Douglas of Crandell, Man.; Wm. Routledge of Lenore, Man.; Henry Routledge of Unity, Sask.; Rev. Robt. Routledge of El Oristo, Cuba; Mrs. R. W. Garland of Malta, Montana; Mrs. T. H. Williams of Gladstone, Man.; John Routledge of Brant; Dr. James Routledge of Unity, Sask.; Mrs. Walter Bradley of Brandon, Man.

CARRICK COUNCIL

Mildmay, March 20, 1916

Carrick Council met this day pursuant to adjournment. All the members present. The Reeve in the chair. The minutes of last meeting were read and adopted.

Finance Report

The following accounts were referred to the Finance Committee and disposed of as follows:—

Municipal World, assess. paper..	$ 2.65
Robertson & McNab, legal ad'c.	2.15
Red Cross Soc., sup. soldiers...	59.00
For Elec. Light Co., 15 lights, Nov. 1 to Jan. 31	28.78
Mildmay Gazette, 1100 ass. schedules 100 Auditor's report..	22.00
L. Holzs, 79 loads gravel......	4.74
S. F. Herringer, part sal. ass'or.	70.00
Hunstein & Knechtel, wood for town hall	2.50
A. Schmidt, half cord wood to John Kraemer, indigent	1.50
M. Filsinger, Insp. ½ day R&B	3.75
L. Doering, 1 meeting	2.50
J. Montag, 1 meeting	2.50
A. Lewis, 1 meeting	2.50
C. Wagner, 1 meeting	2.50

Montag—Lewis—That D. W. Clubine be appointed Road Commissioner for the village of Mildmay for the current year.—Carried.

Wagner—Montag—That the sum of $100 be granted to the Red Cross Society, the expenses of the supper to the soldiers of the 160th Battalion on Feb. 22nd, having been paid by that Society.—Carried.

Petition of B. Ruland and 59 others was presented, praying Council to pass a by-law making it prohibitory for all stock running at large on the Carrick highway, excepting cattle, the owners of which had procured a license allowing the said animals to run on said highways. The petition was ordered to be filed.

Montag—Wagner—That the Reeve be directed to have the railing at McConkey's hill repaired as soon as possible.—Carried.

The 160th Battalion asked for the use of the town hall for drilling purposes. The request was granted on condition that the Battalion pays for wood and lights required.

Wagner—Montag—That the Reeve, Dep. Reeve and A. W. Lewis be a committee to look after constructing concrete sidewalks in Mildmay and cement tile.

By-laws Nos. 7, 8, 9, 10 and 11 were read a first time.

Lewis—Doering—That bylaws 7, 8, 9, 10 and 11 be now read a second and third time and finally passed.—Carried.

Dr. J. A. Wilson addressed the Council, urging that wrist watches be purchased for each person enlisting from Carrick, as these articles are a necessary part of a soldier's equipment.

Wagner—Lewis—That Messrs. M. Filsinger and L. Doering be a committee to look into this matter and report at the next meeting.—Carried.

Lewis—Wagner—That this Council do now adjourn to meet again on Monday, the 22nd day of May next, as a Court of Revision, and for the transaction of general business.—Carried.

The pathmasters appointed for 1916 are as follows:— George Kieffer, John Coyle, Henry L. Weber, J. Moyer sr., Matt. Weiler, Chas. Waechter, Anth. Fedy, Gregor Rich, Peter Hakney, A. J. Darling; George Schneider, Amand Schnurr, Gregor Straus, Bern. Moyer, Jos. Albrecht, Arnold Durrer, Louis Kuntz, Frank Kraemer, Dominic Fischer, Jacob Becker, Herbert Lerch, Geo. Eickmeier, Jos. C. Thomson, John Lints, Gordon McIntosh, Hy. D. Kaufman, Jas. A. Hutchison, John Duffy, A. St. Marie, Jos. Lorentz, J. Vogan, Geo. Harper, E. J. Peltier, J. Gross, Albert Rehkopf, David Braun, Simon Huber, Philip Schumacher, J. Borth, J. H. Thompson, P. F. Diemert, And. Rahn, John Reinhart sr., John Vollick, Frank Dalima, Simon Goetz, Rudy Kaufman, Ezra Reuber, Dennis Culliton, Albert Lewis, Jos. Kueneman, Ignatz Huber, Ezra Schmidt, Hy. Stroeder, Peter Kunkel, Wm. Reuber, Conrad Hill, J. Juergens, Anthony Weber, Geo. Reynolds, Wm. Polfuss, John Tegler, T. H. Hickling, Chas. Todta, Con. Diebol, C. Kreuger, J. W. South, John Hogg, Philip Weber, Fred Russwurm, Jos. Hoffarth, Ed. K. Lippert, John Rice, Jos. Hotten.

The poundkeepers for 1916 are as follows:— Anthony Opperman, Henry Halter, Geo. Kuenemann, Louis W. Schaus, Peter Hakney, Geo. Eckenswiller, Bernard Walter and Fred Klages.

The fenceviewers appointed for 1916 are as follows:— John M. Fischer, J. Hoffarth, Leop. Kramer, John Bieman, Andrew Schmidt, Moses Bilger, John Inglis, John W. Helwig and William Polfuss.

The Farmer's Advocate suggests: If you have a friend in the city, write to him and invite him out to help with the farm work during his vacation.

✦ ✦ ✦

"Sock" It To 'Em!

Wiarton is asking Lions Head to knit socks for their soldiers because so many of them came from this district and north. As Lions Head has 50 recruits to knit for and the ladies have already presented 66 pairs of socks, we think that a place the size of Wiarton should esteem it a privilege to knit for their own detachment. Our advice is "Cut out your lady euchre parties and get down to your knitting." If Lions Head had all the recruits of the three northern townships we would have more than Wiarton and we wouldn't ask Wiarton to do the knitting either.—Lions Head News.

The high quality of Puri [illegible] comes from
First—The selected wh[illegible] we use.
Second—This whea[illegible] to a rigid standard under the clos[illegible] supervision of miller and chemist.

THE POULTRY WORLD

UCCESSFUL CHICK REARING.

] one is to be successful in the ving of chicks artificially, and I it this discussion to the methods ployed in artificial rearing, as this he type most often used on our sent-day poultry farms, it must be ne in mind that good stock must e been the producers of the eggs n which the chicks were hatched, fully selected matings must have n parent to the eggs, constant at- tion must have been given the eggs ore and during incubation, and h forethought and preparation se factors are all very important t have been made for the recep- of the chicks from the incubators, getting chicks that will make the nomical growth desired during the ing season. The foundation must good, if the building is to progress. cks from weak stock, poorly se- d matings, carelessly operated bators are not equipped, to begin with the strong vitality and ing that is so essential to constant growth from the are placed in the they reach maturity in

of rearing must be to itions such as will us- cks normally and steadily the season, with no set- ted periods to cut down mar the health of the

THE BROOD

that step in rearing chicks is as soon as the chicks are re- d from the incubators and placed brooders.

supply of heat is of utmost im- nce. Baby chicks placed under a directly from the incubator not suffer a chilling, due either reless handling or to low tem- ure underneath the hover. The erature beneath the hover should around 95 to 100 degrees for the day or two. Then it should be ually dropped until at the end of first week the chicks are perfectly fortable, with a temperature of 92 or 94 beneath the hover; at of the second week to a tem- of approximately 88, and at of the third week to 85, and gradually lowered, until there should be little ficial heat, unless the cli- demand it. This lly lowering the de- heat furnished baby "hardening off" of of the prime the chicks for growth out on not like, and changes in under such legs and mortal- too hot, and weak- heat. beneath the day for a few they do not come of their own Teach them to know where the source of heat is, so that they will return to it when cold. This is a critical period in the life of the chick.

RIGHT FOOD IS IMPORTANT.

Not only is temperature a limiting factor in successfully starting baby chicks, but the feed given and the methods of feeding are important as well. Nature includes the yolk of the egg within the body of the chick the last thing before it comes from the shell, this being a provision for the baby chick during the first two or three days out of the shell. This yolk is the food material, which must be used up and absorbed before other food is given. A lack of this knowledge has been responsible for the early mortality of many thousands of chicks. Do not feed anything except fine grit and water during the first day out of the incubator. The chicks will pick at the shining particles of grit and thus take into their bodies the substitute teeth, which will be ready to work on the first food taken through the mouth. After the second day begin to feed small amount of fine cracked chick grain, either some good commercial mixture or equal parts of fine cracked corn, fine cracked wheat and fine pinhead oats. Feed every two hours in small amounts, just what the chicks will pick up in a few minutes. Keep the little fellows hungry. Avoid overfeeding, as this will cause digestive trouble.

At the end of the first week place a small pan of wheat bran before them in which there is some fine ground bone. This is essential for the proper development of their skeletons. If at all possible [illegible] sour skimmed milk before the chicks every day from the second day to the day of their maturity, especially during the first eight or ten weeks. There is no food, in the mind of the writer, that is as important as this in the feeding of growing chicks. It is easily digested, appetizing, and the lactic acid in it undoubtedly has a beneficial effect upon the digestive system. This can be fed in water fountains, which should be thoroughly cleaned each morning.

After the second or third week the wheat bran can be changed to a mash containing wheat, bran middlings, cornmeal, ground oats, bone meal and meat scrap. Use one part of each, ex- [illegible] the bran, which can be five parts. Avoid the excessive use of meat scrap in very young chicks. The milk is better. The infertile eggs from the incubator, boiled hard and ground up, should be used in chick feeding. One egg to fifty chicks each day is sufficient. This feeding should be supplemented with fine cut sprouted oats as a form of succulence.

SANITATION NEEDS ATTENTION.

Careful attention must be given to the sanitation of the hover and brooder run. Bacillary white diarrhoea and other diseases are spread through dirty, contaminated runs. Between each brood the hovers and runs should be thoroughly cleaned and swept, then disinfected with a five per cent solution of some good coal-tar disinfectant. A new supply of about one inch of sand should be placed on the floor and covered with a little chaff or chopped alfalfa, especially under the hover.

Get the chicks out on the ground outside the house as soon as possible. Turn the early spring chicks out into the yards during the middle of pleasant days. Keep the youngsters busy and occupied, and the danger from toe-picking will be decreased. Hardy, strong, vigorous chicks will respond quickly to careful management. The weak vitality chicks will be the first to die, but in the average flock the mortality during the first 10 or 12 weeks should not exceed 10 to 12 per cent.

ON THE RANGE.

At the close of the twelfth week chicks are ready to put out on the ranges. This age will differ with different types of brooding, different breeds to a certain extent, and different types of farm management, but the end of the twelfth week is the average time at which chicks are sufficiently hardened off to safely go out onto the ranges and into the colony houses, the greater part of which will have no sources of artificial heat. Of course, due account must be made for the season and climatic changes. There are several important factors that will affect intimately the growth and development of the chicks that have been carefully handled under the brooders and are transferred to the ranges.

The first factor is that of room. The colony houses should not be overcrowded, either, but there is less danger of overcrowding the ranges than the houses. Birds need unlimited supply of air to breathe during the night. Every colony house should be well ventilated. All at least six or eight inches perch room for each bird. Weak, emaciated birds on summer ranges are often the result of pushing them up too close together at night.

Keep the colony houses clean. At the beginning of the season go over all the houses, disinfecting them with a 5 per cent solution of some good coal-tar disinfectant, and furnishing new litter, preferably wood shavings. Paint the perches and cracks and crevices about the house with pure kerosene to kill red mites, one of the common enemies of growing chicks. Keep the houses in good condition throughout the summer. Inspect them at least every two weeks. Avoid dampness in the houses, for in such houses breed the germs of chickenpox and roup. Keep the ranges clean as well. Do not allow stagnant pools of water to accumulate on the ranges over which poultry roam. Keep the surface soil fresh, preferably by growing some green crop, such as oats, wheat, alfalfa or grass. Go over the ranges often during the hottest days in order to find any possible sources of ptomaine poisoning, such as semi-decayed carcasses of birds that have died in the woods. Constant watchfulness is required of any man that intends to raise chicks economically and have healthy birds at the end of the season.

The other most important factor which aids range growth is the feeding. If possible, keep sour skim milk before them in fountains, which are placed in shady spots. Always keep plenty of fresh water on the ranges. Growing birds demand a great deal of water, and it is cheap. Keep a growing mash before them in hoppers, either big protected range hoppers or in small hoppers in the colony houses. A good mash is made up of four parts wheat bran, two parts each of ground corn, wheat middlings, ground oats and one part each of bone meal and meat scrap. Give morning and evening grain ration and equal parts of cracked corn and wheat.

Throughout the period of development remember that the chicks are building the frames of their bodies at a tremendous rate, and that they require protein, such as is supplied by bran and wheat and meat scraps particularly, and ash, such as is supplied by the bone meal. Surround the growing birds with conditions that will bring out and develop the normal rate of growth, without any stunted days or backward spells. The successful rearing of chicks of all kinds, those to be egg producers primarily, or those of the heavier types, is a combination of good stock, careful incubation, rational and well-managed brooding, and the supplying of natural environments during the summer.

SNEEZING COLDS, BAD COUGHS IRRITABLE THROAT ALL CURED

Just think of it, a cold cured in ten minutes—that's what happens when you use "Catarrhozone." You inhale its soothing balsams and out goes the cold—sniffles are cured—headache is cured—symptoms of catarrh and grippe disappear at once. It's the healing pine essences and powerful antiseptics in Catarrhozone that enable it to act so quickly. In disease of the nose, for irritable throat, bronchitis, coughs and catarrh it's a marvel. Safe even for children. Beware of dangerous substitutes offered under misleading names and meant to deceive you for genuine Catarrhozone which is sold everywhere large size containing two months' treatment costs $1; small size, 50c; trial size 25c.

TOOK PHOTO OF A GHOST

Yorkshire Vicar Produces Negative as His Proof.

Was Invisible to Him, but Wife Saw Phantom.

London Cable. — A claim to have photographed a ghost was made by Rev. Charles Tweedale, vicar of Weston, Yorkshire, in an affidavit made before the Commissioner of Oaths and supported by Mrs. Tweedale and his son. Rev. Mr. Tweedale, who a few years ago attracted attention by his reports of psychical phenomena at the Weston vicarage, told a correspondent of the Yorkshire Post that on December 20 last his wife, son and himself were at lunch at 1.30 in the afternoon, when suddenly his wife cried out that she saw an apparition of a man with a full head of hair and beard standing at the other side of the table, to the left hand of their son. Mrs. Tweedale directed attention to the figure, but neither he nor his son could distinguish it. Crying out hastily to his wife to keep it there, although on reflection he admits he does not know how Mrs. Tweedale could have compelled the figure to remain, he rushed off into an adjoining room and picked up his camera. Fortunately this was loaded with quarter plate slides, and without a moment's delay he returned to the morning room where they were lunching. He then placed the camera on the window sill and focussed it on some distance between the camera and the position where his wife still said she saw the figure. He gave an exposure of 25 seconds.

Mrs. Tweedale described the man as a little man, and said the top of his head appeared to be about on a level with her son's shoulder. Mrs. Tweedale and the boy continued sitting at the table during the time the plate was being exposed. The resulting negative appears to have corroborated Mrs. Tweedale's vision. Mr. Tweedale explained that he personally developed the plate shortly afterwards and it had not left his possession in the meantime. The negative, which was shown a reporter by the vicar, is of quarter-plate size, and reproduces the corner of the morning room. In the foreground is the dining table, the white cloth on which reflects the light into a corner. Sitting at the table is Mrs. Tweedale's son, and opposite him, towards the edge of the plate, there is the shadowy but distinct impression of the head and shoulders of a little old man with abundant hair and flowing beard. The figure, which appears to be in semi-recumbent position, almost hides that part of the piano which lies behind it, and this, in Mr. Tweedale's view, conclusively proves the apparition had definite objectivity although invisible to the normal vision of himself and his son.

In response to a suggestion that the camera may have played a trick upon him, the vicar states he had carefully examined the conditions as they were. At the time the camera was in perfect order, and the plate was taken from a new box of quarter-plates, and had not been previously exposed. No person of similar appearance ever has been photographed by him, and none of the family recognized the figure disclosed on the negative. His wife clairvoyantly saw the figure which she described, and upon a sensitive plate being exposed a figure was disclosed, and was recognized by Mrs. Tweedale as being like the man she saw.

A man certainly makes allowances for his wife's faults when he pays her alimony.

Nova Scotia Man Has Good News

FINDS IN DODD'S KIDNEY PILLS A CURE FOR HIS RHEUMATISM.

States Out of His Own Experience That Dodd's Kidney Pills Are a Sure Relief From Pain.

Greenfield, Queen's Co., N. S., March 27.—(Special.)—"To anyone who suffers from rheumatism I say: 'Take Dodd's Kidney Pills.' They will be sure to give you a release from pain." This is the message of Cornelius Hirtle, a well known farmer living near here. Mr. Hirtle suffered from rheumatism for four years and found a cure in Dodd's Kidney Pills.

"I was in bad shape for four years," Mr. Hirtle says in giving his experience, "My back and hips troubled me so much that I was not able to do much without suffering. I also had stiffness in the joints, my muscles cramped and I felt heavy and sleepy after meals. I had a bitter taste in my mouth, especially in the morning. My appetite was fitful and I was often dizzy.

"I suffered from shortness of breath, I was often dizzy and I was depressed and low spirited.

"I took six boxes of Dodd's Kidney Pills and they did me so much good that I am recommending them to all my friends. They are better than any doctor."

Every one of Mr. Hirtle's symptoms was a symptom of kidney disease. That's why Dodd's Kidney Pills cured him.

Portrait of a Business Man.

I found him dimmed by his mahogany,
A little figure in a lustrous chair,
Who talked with pudgy hands upon his knee.
('Twas in the spring and April's shining hair
Fell from the casement to the glinting floor!)
But he sat droning there
Of stocks and profits * * * and beyond his door—
Glory to man and all his works!
I heard the steady painful bustling
Of Jared Whipple's clerks;
A weary languorous rustling,
As to pent souls who beat their wings, and died
Day after day, with the light of the warmth outside!

"Business is picking up; say that for me.
The world is getting on——"
"To what?" I said.
He blinked his eyes and waged his smooth round head.
"Why, sir, to fortune and prosperity!"

Beyond his door young eyes were turning dim,
And April loosed her hair * * *
and laughed at him!
—New York Sun.

The Appian Way.

The famous Appian way was constructed by digging two parallel trenches, three feet in depth, at the bottom of which were placed two layers of flat stones in mortar, upon which a layer of cobblestones was placed, also laid in mortar. Then came a course of pebbles in concrete, over which were placed large, flat blocks of smooth lava, well joined together, forming an even, uniform surface. It was primarily a military road, and extended from Rome to Brundusium, a distance of 350 miles. So perfect was the construction of this celebrated road that it still exists in places as good as ever, notwithstanding it was made more than twenty centuries ago.

KILL THE WEEDS

Co-operative Experiments in Eradication for 1916.

During the past four years the Ontario Agricultural and Experimental Union have carried on co-operative experiments in the eradication of weeds. Some fifty-eight farmers have taken part in these experiments and some very interesting and valuable results have been obtained. The weeds experimented with were Perennial Sow Thistle, Twitch Grass, Bladder Campion, Wild Mustard and Ox-eye Daisy. The results obtained may be summarized as follows:

1. That good cultivation, followed by rape sown in drills, provides a means of eradicating both Perennial Sow Thistle and Twitch Grass.
2. That rape is a more satisfactory crop to use in the destruction of Twitch Grass than buckwheat.
3. That rape gives much better results in the eradication of Twitch Grass and Perennial Sow Thistle when sown in drills and cultivated than it does when sown broadcast.
4. That thorough, deep cultivation, in fall and spring, followed by a well-cared for hoed crop, will destroy Bladder Campion.
5. That mustard may be prevented from seeding in oats, wheat and barley by spraying with a twenty per cent. solution of iron sulphate without any serious injury to the standing crop or to the fresh seedings of clover.

Those who took part in these experiments profited by the experience in nearly every instance they cleaned the field experimented upon, demonstrated to their own satisfaction the effectiveness of the method tried, and at the same time the results furnished practical information to others.

These co-operative experiments in weed eradication will be continued this year (1916), and it is hoped that a large number of men will take part in them in order that sufficient information may be gathered to warrant definite statements being made in regard to the best methods of controlling these pernicious weeds. The experiments for 1916 are as follows:

1. The use of rape in the destruction of Perennial Sow Thistle.
2. A system of intensive cropping and cultivation, using winter rye followed by turnips, rape or buckwheat, for eradicating Perennial Sow Thistle.
3. The use of rape in the destruction of Twitch Grass.
4. A method of cultivation and cropping for the destruction of Twitch Grass.
5. A method for the eradication of Bladder Campion or Cow Bell.
6. Spraying with iron sulphate to destroy mustard in cereal crops.
7. A method of cultivation and cropping for the destruction of Ox-eye Daisy.

Those who are troubled with any of these bad weeds are invited to write to the Director of Co-operative Experiments in Weed Eradication, Ontario Agricultural College, Guelph, Ont. He will be glad to furnish full information concerning these experiments and to supply application blanks for the same. All experimenters will be supplied with full and detailed instruction for carrying out the experiments selected, and with blank forms on which to report the results of the same. All interested in clean farming are asked to co-operate in this work. Address all communications to J. E. Howitt, Ontario Agricultural College, Guelph.

NERVOUS DISEASES IN THE SPRING

Cured by Toning the Blood and Strengthening the Nerves.

It is the opinion of our best medical authorities, after long observation, that nervous diseases are more common and more serious in the spring than at any other time of the year. Vital changes in the system, after long winter months, may cause much more trouble than the familiar spring weakness and weariness from which most people suffer as the result of indoor life, in poorly ventilated and often overheated buildings. Official records prove that in April and May neuralgia, St. Vitus' dance, epilepsy and other forms of nerve troubles are at their worst, and that then, more than any other time, a blood-making, nerve-restoring tonic is needed.

The antiquated custom of taking purgatives in the spring is useless, for the system really needs strengthening, while purgatives only gallop through the bowels, leaving them weaker. Dr. Williams' Pink Pills are the best medicine, for they actually make the new, rich, red blood that feeds the starved nerves, and thus cure the many forms of nervous disorders. They cure also such other forms of spring troubles as headaches, poor appetite, weakness in the limbs, as well as remove unsightly pimples and eruptions. In fact they unfailingly bring new health and strength to weak, tired and depressed men, women and children.

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams Medicine Co., Brockville, Ont.

The Housekeeper

A home remedy for biliousness is lemon juice and soda. Squeeze the juice of a small lemon into half a glass of cold water, then stir in as much bicarbonate of soda as can be held on the point of a penknife and drink effervescing.

Never allow opened fruit or vegetables to stand in a tin can. Turn them out into an earthen dish.

A baked lemon is splendid for hoarseness. The lemon is baked like an apple, then the juice or syrup squeezed over old-fashioned lump sugar and eaten.

When gas in the range is discouragingly low, a long handled corn-popper will be found useful for cooking meat in the furnace.

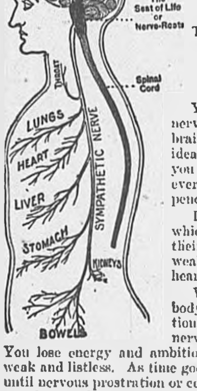
In decorating a child's birthday cake place marshmallows on top and stick a tiny candle in each. This does away with candle holders.

Nickel trimmings on a range can be kept bright by rubbing with whiting wet with ammonia, then polished with a soft cloth.

When putting muslin curtains on brass rods, first cover the end of the rod with the finger of an old kid glove, then there will be no danger of tearing the finest fabric.

Cheese can be kept moist a long time if wrapped in a cloth, slightly dampened in vinegar.

To clean Morocco leather, sponge it over with warm, soapy water, to remove all dust and dirt, and then rub over with a piece of clean cloth dipped in white of egg



The Internal Nerves

The Nerves Which Drive the Machinery of the Body—the Heart, the Lungs, the Digestive Organs.

You prick your finger and know that it is the nerves which carry the painful sensation to the brain. You move your hand, and realize that the idea of movement started in your mind. But did you ever think that every beat of your heart and every breath of air taken into your lungs is dependent on a constant supply of nerve force?

It is the internal or sympathetic nerves which drive the machinery of the body, and from their derangement or exhausted condition arises weakness of the stomach, feeble action of the heart, or inactivity of liver and bowels.

When nerve force fails every organ of the body becomes more or less deranged. Indigestion, sleeplessness, headaches, irritability and nervousness are some of the first indications. You lose energy and ambition, find your work a drudgery, and grow weak and listless. As time goes on you become more and more helpless, until nervous prostration or collapse bring you to the sick bed, and long months are often necessary for the restoration of the exhausted nervous system.

Even in this extreme condition Dr. Chase's Nerve Food will usually cure if its use is persisted in, but how much wiser it is to heed the warning in the early stages and keep the nerve force at high-water mark.

No restorative has ever proven its worth in so many thousands of cases as has Dr. Chase's Nerve Food. What it has done for others it will do for you under similar conditions. By forming new, rich blood it nourishes the starved and depleted nerves back to health and vigor, and thereby overcomes the cause of weakness and diseases of the nerves.

50c a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto.

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free, if you mention this paper.

FARM AND GARDEN

GARDENING REMINDERS.

Now that spring will soon be here, the farmer is planning his garden. There are some things that are overlooked, and some not generally known, even with those who all their lives have farmed.

As gentle reminders might be mentioned:

Plow the soil deeply.

Garden soil should be mixed fully a foot in depth.

Begin early—plow deep—manure heavily. It is not likely the soil will be gotten too rich.

Send in the order to the seedsman. Avoid the rush that comes later on, and avoid the disappointment of finding that certain varieties are "all sold out."

Start the hot bed.

Remember that poor seed is dear at any price, and that good seed is of first importance. Order from a reliable seed house. Their advertisements are now in.

Even in ordinary seasons an early garden is a very desirable thing to have.

Sow the seeds of all hardy vegetables as soon as the ground is in good working order.

The garden spot should be the warmest, sunniest spots possible, especially for the first early sowings. For best results, the garden should be unobstructed by vines, bushes or fences.

It is better to buy seed from a reliable seed house than to run the risk of buying seed left over from last year, as is often the case in patronizing the country store.

The barnyard manure for the garden should be well rotted if it is desired to cultivate it into the early soil in the spring. But if coarse, green manure has to be used, it should be scattered broadcast during the winter, and rake up or mulch part of it before plants are set in spring. This, of course, applies to ground that has been plowed the past fall.

Coarse, strawy manure is not recommended for garden fertilizer. But if one is unable to secure well-decayed compost, such as is most desired for this purpose, then a generous application of fresh stable manure should be given at this time. If at the time this fertilizer is applied the ground is not frozen, or is in a condition for doing so, it would no doubt be better that it should be ployed or spaded under; but even if this is not done, the storms of winter, in combination with the action of the frost, will prepare it for giving results when planting time has come.

The value of a garden depends upon how it is managed. To derive the most from it the plot should be made to produce both early and late crops, and at no time should there be a vacant spot unless too late in the season to grow another crop before frost.

In the case of most vegetables and garden fruits it does not pay any man in these days to attempt to grow his own seed. He may save a few cents in the cost of seed, but he is almost sure to lose ten times as much in a decreased crop. The producing of seed has become a science, and only specialists are likely to do the work in a manner that will insure us the seed in proper condition. Plants of the same kind cross so easily and even at long distances from each other that the amateur is sure to leave open some door for disaster. Amateur selected seeds are many times the cause of varieties "running out." It no more pays for every man to raise his own vegetable seeds than it does for every man to try to make his own boots.

The finer the soil the better the vegetables, both in quantity and quality. Working the surface soil over after every rain retains the moisture. Vegetables delight in having a warm, deep, rich and mellow soil, and will pay generously for the privilege.

The soil of the garden should be well underdrained, thoroughly trenched or sub-soiled, and enriched by a judicious application of fertilizing material. Sunshine being a very essential element, a southern exposure is preferable. If this can be had, and a deep loam, somewhat sandy, rich in humus and with good drainage, there will be an ideal location.

FARM NEWS AND VIEWS.

We would hear less complaint of alfalfa winter-killing each year if the newly-sown fields were mulched early in winter with fine manure.

It looks as though the wool growers of this country are to enjoy quite a large period of prosperity, as the prices of both wool and mutton show a profit to the grower.

A single leaf of an apple tree has 100,000 pores. Through each one of these pores water is continually passing off into the surrounding atmosphere.

Hickories, buckeyes and black walnut trees grow in a strong, rich soil. Such soils are very hard to work, but when they are brought under cultivation they show great fertility.

W. B. Lenham, horticulturist of the extension department of the A. and M. College, says the turnip louse may be controlled by spraying with a mixture of one pound of laundry soap dissolved in seven gallons of hot water. This spray must actually touch the insect to be effective, and as they are on the bottom of the leaf it is necessary to use a crook on the spray nozzle. These crooks may be obtained from dealers. Do the spraying carefully and repeat as often as necessary.

A stock farm is always considered better collateral in financial centres than a farm where crops only are grown. This shows that live stock are safer than raising crops alone; that animals represent greater value than crops; that farmers who raise live stock are in better financial standing. We need more stock farms and more stock farmers.

One ton (2,000 pounds) burned lime or burned oyster shells contains about 2,000 pounds pure lime. One ton (2,000 pounds) raw ground limestone or oyster shells contains about 1,120 pounds pure lime. One ton (2,000 pounds) hydrated lime contains about 1,514 pounds pure lime.

The present potash shortage has created many questions in the minds of our thoughtful producers. The following suggestions are made by the Agronomy Department of the New Jersey State College: Timothy sod—150 pounds nitrate of soda, 150 pounds acid phosphate. This should be applied early in the spring. Corn—200 pounds acid phosphate, 100 pounds nitrate of soda, 50 pounds ammonium sulphate. If stable manure is applied, leave out the ammonium sulphate.

One Nurse's Sufferings

Nurse Florence Clifton, who was shot through the lungs during the retreat from Serbia, was among a party of thirty-three British nurses and doctors who arrived in Zurich recently. They were chiefly members of the Second British Farmers' Ambulance, so called because they were organized and sent to Servia with the contributions to the Servian Relief Fund subscribed by British farmers.

There were four men in the party, the chief, Dr. Parsons, the secretary, Mr. Gray, and two orderlies; the other twenty-nine were young women, who, despite all the hardships they had undergone, were bright of eye and cheek and plainly overjoyed at the good English welcome they received. Some of their blouses were made from men's Crimean shirts, others were cut out from blankets, and so were some of the skirts, while their boots were patched with leather from their handbags—leather having given out completely in Serbia.

Nurse Clifton, telling the story of their departure, said: "On October 26 news came that the enemy was advancing on our town, and the Serbians, having decided to retire, ordered us to leave with them. The only way to follow them was by walking. We tramped eighteen miles the first day and slept that night in the open fields. The Servians then gave us two ox-wagons, under which, after that, our party slept at night on straw.

"On the second day I was walking alone when shots were fired close ahead. Mr. Stone, one of our party, advised us women to get under the carts. I was doing so when I got a bullet that passed through both of my lungs and my left arm. I fell down, thinking my end had come. Our doctors were on ahead, but a Servian doctor had me carried back two miles on a stretcher to a field hospital. Next morning eight Serbian soldiers carried me on a stretcher to Rashka. Here we found Dr. May, who, in the absence of Mme. Stobart, who was nursing on the Bulgarian frontier, had become head of our unit. At Rashka a bomb from an aeroplane fell on the hospital in which I was placed, and killed a patient in the room next to where I lay.

"I was then taken on a stretcher, and afterwards in a motor car, to Possevitz, where I added pneumonia to my other troubles, but we had to go on, and I was taken in an ox wagon to Mitrovitza. There was a blizzard during most of this stage, and on the next day there was an air raid over Mitrovitza and a battle just outside the town, which Sister Bambridge watched from the windows. The Austrians entered at two o'clock in the morning.

"When I was fit to be moved I asked to go to Lady Paget's hospital at Uskub. The Bulgarians refused to allow me to be taken to Mitrovitza. On December 24 we started with a convoy of wounded for Belgrade, going along the Austrian line of march. The whole country was devastated. A few women and children could [illegible] here and there— the only sign of life. The Servian dead and countless [illegible] often were lying unburied. We learned from the Austrians that the Germans on entering a town—and they took care to be first in wherever possible—pilfered everything.

"Christmas-day was spent in a roadside hut, where our host was an Austrian doctor, who was very nice. We reached Rashka a day late, and here, too, the Austrians were very kind. But at the next stage, Ouabka, we were treated horribly. The Austrian soldiers tossed me about on the stretcher as if I were a great joke, and the officers looked on and laughed. Thence, on the way to Kraljevo, we slept on the ground. Here we lost our luggage, which was taken out of the cart in the night, and we were left without a change of clothing.

"At Stalac we met Germans for the first time. They also were kind, and gave us coffee and bread and cheese. But at two in the morning, when changing trains, we ran against a brute of a German doctor, who ordered us out of our carriage because he wanted it for an officer. We managed to creep into another carriage without his seeing us.

"When we reached Belgrade the two lady doctors were sent to the police and Sister Bambridge and I went to the hospital. The two doctors were thrown into prison with thieves and disreputable characters, and then sent off to Hungary, without our knowing in the least what had happened to them. In this state of suspense we remained two days, when Dr. McMillan was allowed to come to see us and bring us some money. I was kindly treated in the hospital at Belgrade, and the five weeks I spent there was the making of me. Then Sister Bambridge and I were sent to Vienna, where the American Consul General was most kind, and arranged for our departure by way of Switzerland with the British Farmers, whom we were overjoyed to meet.

"On arriving at the frontier we were searched and our British sovereigns taken—not quite all, for Sister Bambridge and I hid four each in our boots. At Zurich Sir Cecil Hertslet, to my great surprise remembered me—the last time he had seen me was at Antwerp, where he saw us off during the bombardment."

Sister Clifton spoke in grateful terms of the devotion shown by Dr. Iles and Dr. McMillan and the Rev. Mr. Rogers, and especially by Sister Bambridge, "who brought me back to life."—Central News.

WAR AND TARIFFS.

(Philadelphia Record)

The Protectionists should be careful about felicitating themselves too unreservedly over the fact that the Manchester Chamber of Commerce has elected its directors out of [illegible] who are opposed to universal free trade. Of course Manchester has long been the centre of free trade opinion, and if Cobdenism were beaten there by a large majority it would look as if commercial progress had been definitely arrested and turned back on itself.

But, then, that is not at all what has happened in Manchester. What has happened there is a demonstration of the charge of the free traders that tariffs are a method of warfare; the only substitute for war available in peace. If war is a good thing for business, then protection is a good thing; not quite so good as war, but a fair substitute. The action at Manchester is proof that free trade, peace and the brotherhood of man are closely linked.

TOWN AND COUNTRYSIDE

News from the Neighboring Towns and Villages Written for The Telescope by a Staff of Live Correspondents.

CARGILL

Mr. Mrs. Robt. Loughleen entertained a number their friends to a progressive euchre party on Thursday evening and all spent an enjoyable time.

Miss Francis Taylor of Clifford is visiting with Mrs. E. D. Baille.

Miss Salling spent Thursday in Walkerton.

Mrs. J. F. Schuett and Miss Rose Hergott of Mildmay spent a few days last week visiting Mrs. J. D. Schuett.

In last weeks budget there were a few errors in spelling and some of the fair damsels were after the scribe, but he pleaded "Not Guilty" as it was the printer's mistake. No doubt the typesetters were sleepy and it is to be hoped the kickers will take it in that light. Instead of "Ten nights in a bar-room" it will be "Ten nights in a Drug store" one of these days.

Privates Kirvin, Hudson, Jas. Hamilton, John Hamilton, Wm. Brownscombe of the 160th Batt., Walkerton, Sundayed in the village.

Mr. Phil Sparling was in the county town on Saturday.

We regret to hear Mrs. Ed. Crawford is very ill and we hope for a speedy recovery.

Mr. Joseph Clancy who has been laid up for the past week with La Grippe is able to be around again.

Mr. Thos. Abell has disposed of his residence to Henry Bester who gets possession about May 1st.

Miss Myrtle Elder returned on Monday after a few weeks visit with friends in Woodstock.

Mr. Ted Young left on Monday for Palmerston where he has secured a position in G. T. R. Car shops.

Miss E. Loughleen spent a few days this week with friends in Galt.

Mrs. Jas. Wells of Port Elgin is visiting at G. R. Wells.

Mr. Bert Abell was in the county town on Monday.

The annual meeting of the Lawn Bowling Club was held on Monday evening in the Bank when reports were read which show a fair balance for the present year. The following officers were appointed:—Pres., C. W. Keeling; vice-pres., J. A. Garland; sec.-treas. J. T. Clancey. Eight of last year's members are now in khaki.

On Friday evening the citizens of the village and community entertained the following soldiers who were home for their last visit:—Lieut. Lee Young, Ptes. Alex. Thompson, Edgar Sparling and Welly Loughleen of 71st Batt., Galt, and Sergt. Clarence Hettrick of the Motor Transports, Toronto. About 130 played euchre after which the ladies took charge and lunch was served and they are to be congratulated on the spread for the short notice they had. Speeches were given by the chairman, Mr. W. D. Cargill, M.P.P. who came up from Toronto on the late train and Rev. J. Lionel Homer, and each of the khaki men were then presented with $5.00 as a slight token and Lieut. Young acknowledged on behalf of the men after which the floor was cleared and the light fantastic was enjoyed for a few hours. The boys took their departure on the afternoon train Saturday and a large crowd was present to bid them good-bye and a safe return.

RIVERSDALE

Miss Florence Stephens has left the village for a visit to Hepworth after a two months' enjoyable holiday with her grandparents, Mr. and Mrs. Lawrence Benninger.

The Stork visited the home of Mr. and Mrs. Adam Lippert bringing a baby girl.

Albert Dietrich spent the week-end at Mr. Kirstine's home in Brant.

Snowshoeing is the order of the day.

Miss Lizzie Heldmiller spent the week-end in Formosa.

The Riversdale Glee Club spent a very enjoyable evening at Glen Douglas on Wednesday last.

The box social Friday evening was a decided success. The programme was chiefly musical, Mrs. Brown giving a few of her favorite solos. Mr. Carter was auctioneer and Mr. T. Symons chairman. The proceeds, $50, go to the patriotic fund.

MILDMAY

The hockey match between Mildmay and the 71st Batt. of Galt, which was to be played on Friday night was called off. The game with Chesley was also called off. Two teams of Mildmay boys enjoyed a good game of broom and football hockey instead.

Ptes. Ivan Culliton and Clifford Scott, two strapping young men from near Mildmay, enlisted in the 160th Batt. last week.

Mrs. Lucas and Mrs. George Lambert paid a visit to Harriston on Wednesday last.

Mr. J. R. Wendt of Wroxeter and Mrs. H. Schwalm and Miss Dora Wendt of Harriston were Sunday visitors at the home of their parents here.

The funeral of Mrs. Butchart, relict of the late John Butchart, took place on Saturday afternoon. Rev. Mr. Welker of Walkerton conducted the funeral service in the Mildmay Methodist Church after which interment was made in the Evangelical cemetery. Mrs. Butchart died in Burlington on Thursday, March 23rd, at the ripe old age of 72 years. Mr. Alex. Butchart of Burlington, Mr. Edward Butchart of Edmonton and Mr. Will Butchart of Toronto were present at the funeral.

Pte. Anthony Schultels, who some time ago opened up a tailoring business in town, enlisted last week with the 160th Batt. Pte. Schultels will make a splendid soldier.

Mr. B. B. Patten of Walkerton visited in town Saturday and Sunday.

Miss Myrtle Lambert returned home on Wednesday after spending several weeks with Harriston friends.

Major Moffat of Walkerton was in town several days last week.

Mr. Fred. Arnold was at Toronto attending a convention of Chevrolet agents last week.

A bag of seed oats was stolen from a farmer's cutter, standing in a hotel-shed on Monday, March 20th. The stolen property was found and the culprit caught, but he sneaked away. We hope such low down petty stealing ceases.

ELMWOOD

Messrs Brown and Lytle shipped three cars of live stock last week. The present high prices are bringing the live products of the farm to market.

Mr. Jack Dobney paid a visit to the town of Durham.

Mr. T. O. Henderson has bought the property known as the old Drug store and is about to open up another store as soon as the present tenant vacates the property.

Mr. Richard M. Clement paid a business trip to Detroit last week.

Mr. Wm. H. Turner, son of Henry Turner, has severed his connection with the Hardware firm of H. Reuber & Son and left this Monday morning for Owen Sound to enlist with the 147th Grey Battalion. William will make a fine soldier and look well in khaki and will do honor to his king and country at the Front.

On Friday night last the local branch of the Red Cross Society gave a concert in aid of that society and also presentations to five of our young men who have enlisted and are wearing the King's uniform. Tea was served from 6 to 8 p. m. after which a fine programme was rendered by the young ladies of the village, and after the programme Mr. Sam and George Hepburn, William Tulloch and Geo. D. Lumney were each presented with a wrist-watch and Mr. Wm. H. Livingstone with a Masonic ring. Mr. H. H. Miller of Hanover acted as chairman. The total proceeds of the evening amounted to $80.00

The Rev. Mr. Langton of Chesley preached a very impressive sermon on "The value of the open bar" in the Baptist Church last Sunday afternoon. He, having been connected with the traffic in his younger years, was in a position to verify his statements from his own personal experience with liquor, the curse of every Nation.

VESTA

We are sorry to report that our neighbour, Mr. Wm. McGill, Sr., is under the weather in a serious condition.

The Entertainment which was to be held in the Methodist Church last Tuesday evening has been postponed to a later date.

OTTER CREEK

Mrs. James Hutton and daughter Janet were visitors at Mr. John Fenner's on Thursday last.

Mr. and Mrs. Ferdinand Wickle returned from their honeymoon on Saturday.

This weather is getting more spring-like every day. The crows are cawing and the snow is disappearing very fast. Just a few more weeks till the farmers will be very busy again.

Mr. Henry Rusewarm of the South Line has rented the house of Mr. Philip Gress on Lot 10 con 11.

Mr. Jacob and John Miller of Mildmay returned home from Buffalo after attending the funeral of their uncle John O. Miller who died in Buffalo.

GREENOCK

Miss M. Kirktown spent Saturday and Sunday at her home near Glamis.

Mrs. Minsinger of Berlin is spending a couple of weeks with her parents here.

Miss Olive Schurter returned home on Sunday after spending a week at Chepstow.

Mrs. Colman of Toronto is spending a couple of weeks with her parents here.

Mr. Jake Koller and Mr. Jake Schurter are busy cutting wood these days.

Grim winter is losing h's cold grip and spring is conquering again. Well I don't think there are very many of us sorry as March was extremely cold and rough.

PINKERTON

We are sorry to report the severe illness of Mr. Elmer Reid who has contracted pneumonia. We wish him a speedy recovery.

Lieut. A. E. Reid and Privates Elmer Gregg and Sam Reburn of the 71st Battalion, returned to headquarters on Saturday after spending their last leave here.

Mr. Jas. Gale returned home on Saturday from Toronto, having finished his theological course.

Pte. Gordon Garland of 160th Batt. spent Saturday and Sunday at his home here.

Capt. and Mrs. J. A. Reid of Calgary returned on Thursday to the former's parents here, Mr. and Mrs. Adam Reid. Capt. Reid left for Overseas on Monday.

A number here attended the Paisley skating rink on Friday evening.

Senator Donnelly returned to Ottawa on Monday.

Mr. and Mrs. D. Robertson and Miss Colwell of Glamis spent Sunday at Mr. Albert Pinkerton's

Miss Alma Reid of Toronto is visiting at her home here.

Mr. John McToer has purchased the farm of the late Geo. Sturgeon.

GLAMIS

Misses May and Lily McKenzie of Kincardine spent a few days last week with their cousins, the Misses Curry.

Mr. Collins, assessor for Kincardine township made his annual visit here on Tuesday.

A number of the Privates in the Tiverton company have been recruiting in this vicinity and not in vain.

Mr. and Mrs. John Wittig of 4th con., Bruce, were visitors at Mr. McIntyre's on Thursday.

A few from here took in the dance at James Needham's on Friday night.

Mr. Will. Stanley who enters into training at Tiverton this week was on Tuesday evening of last week presented with the following address and presentation at his home on 10th Kincardine by the young people of the Baptist church and congregation.

To Mr. Wm. Stanley,
Dear Will:

To assure you of our interest in you, and in the great cause which you have pledged yourself to champion, a few of your friends have gathered here this evening. It is a great sacrifice for one to give oneself in any service and we believe that it is indeed a noble sacrifice when one gives oneself in the service of his country and his God.

We realize that this means more to one than the important act of volunteering. It means undergoing the tests of training and the great trials of warfare. A pledge that is worth making is not easily kept.

We admire the more therefore those who join the ranks, where hard training and desperate fighting are called for. Like the others who have gone from our midst you will be missed and like them you will be followed by our interest and prayers.

May only good come to all who serve unselfishly their fellow-men!

As some evidence of our esteem and good wishes accept this wrist watch.

Signed,
CHAS. F. MCKINNON
D. A. C. MCLENNAN
CHRISTOPHER YOUNG

Glamis, March 21, 1916.

Mr. and Mrs. Edward Stanley and family who were living on McFarlane's farm 10th Con. Greenock for the past year moved back to their place near Kinlough last week.

A number from here took in the carnival in Tiverton on Wednesday.

Mrs. John Deehan and Mrs. Jos. Cunningham visited at Mr. E. Bells 2nd Con. Bruce and Mr. James McDonald's, Tiverton on Wednesday.

Mr. Will Robinson who was on the sick list is able to out again.

Miss Sadie Colwell is visiting her sister, Mrs. J. D. Robertson.

Rev. Mr. Reith is spending a few days in Toronto.

Mr. and Mrs. J. D. Robertson and Miss Sadie Colwell spent Sunday at Mr. A. Pinkerton's at Pinkerton.

Miss Mable Kirktown of Kaniskillen school spent the week-end under the parental roof.

Mrs. W. J. McKeeman, Pte. Clyde and Miss Phyllis Moffat were visitors to the County Town on Friday.

Mr. McCauley, pastor of the Baptist church entertained his S. S. Class of boys to tea and evening on Friday. One of the boys of the class, Master Redvers Johnson who is leaving shortly for the West was presented with a beautiful Bible from his teacher and class-mates.

Mr. Neil McDermid signed up here on Thursday and will join the company in Tiverton. Neil's only brother Dan is now in France.

BORN—To Mr. and Mrs. Amos Webb, on Thursday March 24th, 1916, a daughter.

Mr. Arthur Groves has bought the farm, belonging to R. Y. McFaygen, on the Boundry West.

Mrs. W. J. McKeeman and Miss Phyllis Moffat are spending a few days in Toronto.

March 17th, 1916, was a red letter day for Glamis when for the first time we had a company of soldiers, some of which were our own boys. It was arranged that Lieut. McKay and company of the 160th Bruce Battalion Tiverton march to Glamis, when the community would provide a dinner for the boys. A big disappointment was the absence of Lieut. McKey, who had to go by daily morning train to London, to an official order received by wire the previous evening. About 45 of the company left Tiverton about 9 a.m., under the leadership of Corp. Barnes. Lunch was served to the boys at the home of Mr. Arch. McFadyen, Boundry West. Notwithstanding the very heavy roads along with a strong wind the soldiers reached here about 12.30, marched through the village and back to St. Paul's Church where dinner was to be served in basement. On arriving at the church they were taken to the auditorium where the reception committee extended a hearty welcome and congratulations. Later they were escorted to the basement of the church which was prettily decorated with bunting and flags of red, white and blue, under which were spread two large tables each seating about 33. Soon the soldiers and guests were seated. Rev. Mr. Reith, pastor of St. Paul's church and Mr. McCauley of the Baptist church presided at the head of the tables. A three course dinner was served during which time Messrs. D. A. C. McLennan, George McKay and Jack Graves furnished excellent music on the organ, violin and mandolin. After all had partaken to their full satisfaction Rev. Mr. Reith as Toast Master made a few appropriate remarks and the following toasts were given—"To the King" by Mr. McCauley responded to by Pte. Salmon, "To the 160th Bruce Batt." by Mr. Stevenson, to which Corp. Barnes responded. "Our Guests" by Mr. W. J. McKeeman and Mr. A. G. Montgomery of Tiverton responded. "To the Ladies"—Mr. Allan Nelson of Tiverton to which the toast master, Mr. Reith, responded.

Later in the afternoon the floor space was cleared and Corp. Barnes had a number of the boys go through some of their physical exercises, giving us an idea of the training they are getting after which they marched through the bush before returning to Tiverton. Messrs. Nelson, Montgomery, Kippen, Hughes and McFadyen were up from Tiverton with their teams and sleighs to give the boys a ride back. The boys gave every evidence of being well pleased with the reception given here.

MAPLE HILL

Mr. Walter Lancaster has installed a telephone.

Mr. Robert Goode has hired Harry Hossman of Elmwood to run the farm this summer.

Mr. John Felsing bought a fine holstein cow from Mr. Albert Warren.

Mr. Len. Dickison has returned to the West.

Mr. Ed. Hunt has joined the 160th.

Miss Maggie Rae of Malcolm spent Sunday at the home of Mr. John D. Little.

Mr. Henry Tanner has purchased a sawing machine from John Steele and is going to drive it with his Ford Car. The Ford will soon be considered an essential on the farm.

Mr. and Mrs. Ben. Stancel of Eden Grove visited at John Felsing's on Saturday.

Mr. and Mrs. John Felsing visited at Wm. Ernest's on Sunday.

The Eden Glee Club held a Garden Party in Elmwood on Friday evening. This Club is well known here and we are glad to hear that their garden party was a grand success.

Mrs. Joe Bergeman of Walkerton has been visiting at Mr Robt. Sinclair's.

Miss Isabel Gowanlock has accepted a position as stenographer at Mr. T. E. Attwood's.

Mr. Earl and Miss Edna Pinkney visited friends at Eden Grove last week.

Mr. Wm. Ellis has hired Frank Sutter of Dunkeld for the summer.

We are very sorry to report that Mr David and Master Harvey Frook are not getting any better.

News About Town

Special Edition

The ladies of the Walkerton I. O. D. E. are preparing to issue a special edition of the Telescope which will deal mostly with the 160th (Bruce) Battalion. The ladies have the reputation of making a great success of every enterprise that they undertake, and as they are taking hold with characteristic energy, the public may be assured that the Special Edition will be something worth while. Further information will be published next week.

Died at Hospital

Robert Jordan, an aged wagon-maker of Lucknow died in the Bruce County Hospital on Tuesday morning. He had been stricken with paralysis about three months ago. Mr. Jordan had no relatives in this country and during his sickness was looked after by friends in Lucknow. He was brought down to the hospital by Mr. J. B. (Singing Jimmy) Hunter on his doctor's advice but the journey was apparently too much for him as he succumbed early the following morning.

+ + +

A Quiet Wedding

Two popular young people were united in marriage at the home of the bride's mother, Mrs. Peter Pletsch on Thursday evening last, the contracting parties being Miss Sarah Elizabeth Pletsch and Mr. Harvey Damm. The ceremony was performed in the presence of a few immediate relatives by Rev. L. H. Pletsch, uncle of the bride, while the wedding march was played by Miss Gertrude Eckel. Little Margaret Pletsch made a pretty flower girl. Mr. and Mrs. Damm have the best wishes of a wide circle of friends in the town.

We have just received another big shipment of [illegible] Wash Materials for Spring. We will be glad to sh[illegible] you.

McBURNEY & CO.

Our Big Men

Who is Lieutenant-Governor of Ontario? is the question reported to have been asked by a Sister at the Separate School to a class of small boys the other day. "Mayor Lippert" was the ready response of one little chap who no doubt figured that His Worship was "cock of the walk" in these parts at any rate. Another lad named Reeve Alex. McNab, confident no doubt that if the popular Alex. isn't at the head of the Government, he ought to be. To our way of thinking, either one of these men in gold lace with a sword, would be simply irresistible. But by the way, how many adults in Walkerton know the name of the Lieutenant Governor? Hands up!

+ + +

Presentation to Henry Clark

A large company, composed of members of Knox Church, gathered at the home of Mr. Thomas Henderson on Monday evening to take leave of an honored member of the church, Mr. Henry Clark, who was about to remove to Galt. Mr Norman Robertson read a beautifully composed address expressing regret at the departure from the town of one who had been so closely associated with the congregation as a member and as one of the church managers. Mr. H. M. Lay on behalf of those present and other friends in the congregation, presented to Mr. Clark a handsome gold headed umbrella and a club bag. Mr. Clark replied with grateful expressions for the kindness shown him. Mr. Clark left on Tuesday for Galt where he will make his home with his son.

IMPORTANT PROMOTION

Son of the County Treasurer Gets Staff Appointment In England.

Word has been received that Lieut. Eric Robertson, who went to England a few months ago to join the British Flying Corps, has been singled out by the authorities for an important appointment. He has attained to the distinction of being named as a staff officer of the War Office and has already taken over his new duties which will mean a good deal of travelling between the War Office and the multitude of aerodromes now established throughout England. From the letter received by his parents, Mr. and Mrs. Norman Robertson, it appears that the promotion is rather a disappointment to Lieut. Robertson who had become very keenly interested in flying. He would much rather use his wings than occupy an executive position but he is ready to go wherever he is sent.

THAT "MAPLE SUGAR"

The Two Merchants Who Were Fined Will Go After the Wholesalers.

For selling adulterated maple sugar, David A. Fedy, merchant, of Mildmay, and S. Bourgeman, a Chesley merchant, were assessed $40.50 each fine and costs, by Magistrates Tolton and Richardson here on Monday. The charges were laid by H. J. Deger, Dominion Inspector of Pure Foods. As the analysis showed that the adulteration was not injurious, the minimum fine was imposed by the magistrates, otherwise the defendants would have been liable to a fine of $103 each, besides costs. The analysis showed that the article was not maple sugar at all but was made from ordinary sugar with maple flavoring added. It appears that in both cases the merchants were entirely innocent of any intention to defraud the public. They understood they were getting pure maple sugar from the wholesalers in London who sold it to them and they intend making it hot for the wholesalers in the courts. David Robertson K. C. appeared for the Inspector, and O. E. Klein for Mr. Fedy.

REAT YOUR SEED FOR SMUT

The Ontario Government estimate that the Farmers in Ontario lost $5,000,000 through Smut in grain crops in 1915.

By reason of the prevalence of Smut last year the danger is rendered greater this year. There is one way to prevent this and that is to treat your Seed with Formalin or Formaldehyde.

Use "Beaver Brand" Formaldehyde, guaranteed Government Standard, and avoid the loss and dirt in 1916. Full directions furnished.

A POPULAR COMMANDER

(Toronto Star)

Concerning Col. Weir himself, no two opinions are expressed; he is the right man in the right place. Take him how you will, he is a big man; one born to lead and to command; one who will always temper justice with mercy. For years he was commander of the 32nd Bruce Regiment. In that capacity he popularized himself to a remarkable degree among both officers and men. On the occasion of the visit of the then Duke and Duchess of York to Toronto in 1902, his battalion was one of the finest from outside the city. Shortly after his return on that occasion an enthusiastic admirer wrote of him: "If the Bruce boys ever march to battle they will ask no other leader than Col. Weir. His very presence will ensure victory." Now the boys from Bruce are indeed girding themselves for battle—many of them being men who marched under Col. Weir ten to fifteen years ago; and under this leader of their choice they will march to victory or to death.

Good For Chesley!

Chesley has done well for the 160th. Besides sending her large quota of men, that town raised $1,700 in a one day whirlwind campaign on Friday to purchase a motor truck and equip a bugle band for the Bruce Batt. With a population of 2,000 Chesley claims to have nearly 200 soldiers at the Front or in training.

+ + +

Letter From Paris.

That the people of France are counting on an early and certain victory may be judged from a letter received by Miss Reaburn this week from her sister-in-law, Mrs. Adrian Reaburn of Paris. Mrs. Reaburn speaks of her husband, who is representative of the American Express Co. at Paris, being away at Lyons attending a Sample Fair where manufacturers were laying their plans to capture German trade after the war. So successful was the Fair that it was necessary to extend it for several days. Mrs. Reaburn said that at date of writing (March 13th) the French had no fear of the Germans taking Verdun. The French are proud of the wonderful work of their army during the past month.

+ + +

Easter Sunday

Easter Sunday will fall at an exceptionally late date for the year 1916. It will be Sunday, April 23. Since the year 1801 Easter Sunday has fallen on a later date than for this year only twice, in 1859, when it fell on April 24th, and in 1886, it fell on April 25th, during a period of 115 years. Easter Sunday fell on April 22nd in the years 1818 and 1912. In recent times Easter Sunday represents a day of pluming and preening by devotees of style—the day when the women of civilization wear for the first time, the newest and latest creations of milliner and modiste. Protestant church devotees observe Easter Sunday as commemorative of the Resurrection of Christ. It answers to the Jewish Passover, instituted to commemorate the Providential escape of the Hebrews in Egypt when the avenging hand of God passed over the homes of the Egyptians and slew the first born. The houses of the Jews being marked with blood of the paschal lamb, they were passed over. Most nations call it that. Originally the term Easter indicated the day of feasting in honor of the Goddess of Spring (Eostre) held in April. Easter Sunday is set two days after Good Friday, this year on April 21st.

Final Drive For Recruits Is Now in Full Swing

100 Men Needed

To Make Up for Rejections and to Provide for Base Company of Reserves—Church Bells and Factory Whistles Mobilized for Final Recruiting Rush—Full Strength of 160th is Now 1153 Men.

The final drive for the completion of the 160 Bruce Regiment is being made this week. One thousand khaki-clad recruiters are on the concessions and side lines of every township making the final round-up which it is hoped will fill the ranks of the Battalion to overflowing. The latest figures just before the Telescope goes to press are; —18 officers and 1135 non-coms and men. This is a few more than the required number but the Battalion staff state that a hundred or more recruits are still needed to make up for rejections which may still be made and to provide for a base company of reserves.

It is recognized everywhere that the 160th Bruce has been a leader from the first in recruiting system and schemes for recruiting. That reputation will stay with the 160th to the last chapter. Even for the grand finale Major Moffat "put over" something new. The Major plays the role of chief conspirator at the Armouries in the Battalion's present job of getting the men and always has something up his capacious sleeve. In connection with the grand drive the Major arranged for a sort of artillery preparation at nine o'clock each morning in the form of a volley from all the bells and whistles on the churches, schools, and public buildings of Bruce County.

The results are in a large measure gratifying. Seventeen recruits were brought in on Tuesday, and each day brings its complement from all parts of the County. The only really disappointing section is the Township of Carrick, where in spite of the fine-tooth work both in circularizing and personal canvass, only seventeen recruits have yet signed up. A number of recruits from Carrick have come in the last few days and it is possible that this Township may do something like its fair share. For the sake of this township's reputation we hope it will do so.

A big recruiting rally is to be held at Mildmay on Friday afternoon. All the places of business in the village will be closed.

Real Estate Deals

Mrs. Schaus of Clifford sold her property near the Grand Trunk Station here this week to Mr. James McArthur. Mrs. Beattie sold her house and five acres in the West Ward to Mr. Severson of Acme, Alta., who is coming to live in Walkerton.

+ + +

Where Responsibility Rests

Whether the Ministers themselves or the crafty satellites on whom their incompetence depends are ultimately found guilty, responsibility must rest where authority was entrusted. The deepest revulsion and horror are aroused by the revelation that many brave Canadians who might have returned to tell of a shorter road to victory are filling battlefield graves through the failure of a supply of munitions for which they were depending on tricky contract-manipulators indifferent to every consideration except profiteering. The war is a terrible warning against incompetence in office.—Toronto Globe.

Joins Burton's Bantams

If by taking thought, "Tommy" Haigh could have added a cubit or so to his stature that plucky little Britisher would have been found long ago in the trenches in Flanders where so many of his relatives are to-day. It was not until the Bantam Regiment was started at Toronto a month or so ago that an opening occurred for Tommy. He immediately applied for a place and is now down in the city drilling with Burton's Bantams. "Tommy" came to Walkerton about seven years ago and has been employed by the Canada Spool & Bobbin Co. He has one brother who was in the Gallipoli campaign and is now at Salonika with the Northumberland Fusiliers. A son of this brother is in the trenches in France. Another brother of Tom's and a brother-in-law are serving in one of the Lancashire regiments, and a nephew, Arthur Ferrer of Walkerton is now in England with the 34th Batt. C. E. F.

CARD OF THANKS

Mr. and Mrs. Henry Dippel and family wish to thank their friends and neighbors for their kind aid and sympathy during their recent bereavement.

160th Roll Call

As only the usual number of copies of the Telescope were printed last week hundreds of people were unable to get extra copies of the Telescope containing the Roll Call of the 160th to send to their friends. To subscribers and others we are glad to announce that the complete Roll Call of the Bruce Batt. will be one of the features of the Special Edition of the Telescope which will be issued before the end of the month by the ladies of Walkerton Chapter I. O. D. E.

+ + +

Want to Be Naturalized

The following residents of this County applied this week for naturalization papers: — Joseph Felsinger, Carrick, Chas. T. Kuensing, Carrick, Mary Tegler, Carrick, Simon Scharbach of Cargill. The following who have been residing in Canada since July 1, 1867 or before have taken the Oath of Allegiance:—Frederica Rossnau, William Milhausen, John F. Wilkin and Peter Schneider of Carrick; Justus Holm, Sophia Siebahn, Christopher Gehtman, Mrs Edmuthe Glinta of Walkerton.

+ + +

The Fighting Macs

A family that is surely doing its share for the 160th Batt. is that of Norman McDonald of Tiverton. Mr. McDonald, himself a Fenian Raid Veteran, has three sons with the Bruce Battalion, the third and youngest having let his farm on shares this week to join the King's colors. He is a stalwart Scotch-Canadian just a shade under six feet and should make a first class fighting man. The other two sons are Sergt. Neil McDonald of Walkerton, the sergeant tailor of the Battalion, and Private "Mac" McDonald. The fourth and only remaining brother is unable to join owing to a sightless eye, otherwise he would be with the 160th too.

+ + +

A Walkerton Boy

The Collingwood Enterprise publish a lengthy address of appreciation which was presented to Mr. and Mrs. Millard Stauffer, recently by the staff of the C. C. Bell stores, previous to leaving for Toronto. The address was accompanied by the further presentation of a beautiful music cabinet.

The Collingwood Enterprise says:—In the removal of Mr. Stauffer to Toronto where he enters into a wider field of business activity, Collingwood loses a good citizen, an active business force and an excellent musician and entertainer. Mr. Stauffer has been with Mr. Bell for three years and has proved himself a live wire. He is a great advertiser and by the many successful campaigns he has carried out has fully demonstrated the value of the intelligent use of printers ink. Mr. Stauffer is not only an advertiser but a successful organiser and booster of business. Some of his sales such as made in Canada proved a great financial success to his employer.

NEWS ABOUT TOWN

Pte. Bain spent Sunday at Baden.

Mr. J. B. Heuther went to Preston on Monday.

Mrs. K. M. Taylor visited in Toronto last week.

Pte. Urban Zettel spent the week-end at Waterford.

Mrs. Flett is reported to be very much improved.

Pte. Robinson spent Sunday at his home in Wingham.

Mr. John Forsyth leaves next Tuesday for Stavley, Alta.

Chas. Petteplace jr. has joined the Bank of Commerce staff.

Mr. G. S. Schwindt, has a new five passenger McLaughlin car.

The 160th Batt. will parade to the Methodist church on Sunday morning.

Mr. J. B. Heuther left on Monday to conduct a merchandise sale at Preston.

Mrs. Stauffer returned from the Hospital this week but is still feeling poorly.

Mr. John Poltus purchased a new Dodge car from Kolpin and Ermel last week.

Mr. James Craig of Paisley has purchased a Dodge car from Kolpin and Ermel.

Penslar Tread Easy Foot Powder for hot, tired feet. 23 cents a can at Hunter's.

Mrs. Bell and her mother, who have been spending the winter in Toronto, returned to town this week.

Pte. Harry Watts entertained a number of his soldier friends at his home on Friday evening last.

Mrs. Timothy Hanley of Chepstow returned home from a visit to friends at Tottenham and Toronto.

Mr. J. H. Ramsbottom is attending the funeral of his aunt, Mrs. Chas. Kennedy, at Campbellville to-day.

Mr. John Hartman, East End blacksmith, has accepted a position at Mitchell and leaves for there this morning.

Silver Creek flooded Brewery St. badly last week. Six inches of water on the roadway made it impassable for pedestrians.

Miss Annie Ferguson of Stratford General Hospital, has been spending a few days with her parents, Chief and Mrs. Ferguson.

Mr and Mrs. W. H. Adams and little daughter came up from Toronto on Saturday, Mr. Adams returning to the city on Monday.

Private Stanley Johnston of the 108th Batt., Toronto, spent Sunday with his parents, Mr. and Mrs David Johnston of Brant.

Private sale of parlor, dining-room, kitchen and bed-room furniture at Mrs. Thos. Pellow's residence, corner Durham and Yonge Sts.

What does Dodge Brothers mean? It means the best automobile on the market for the price. Come and see it at the Walkerton Garage.

We will supply anything in auto repairs. If not on hand we will get it for you in the shortest possible time at the least expense.—Walkerton Garage.

Mr. Levi Goode had a fresh hatch of a dozen spring chickens arrive on Monday, not the incubator brand either. They are Plymouth Rocks and as lively as crickets.

Word has been received that Private Frank Schafter who left here last year with the Pioneer Battalion, has been discharged in England owing to physical defects and will be sent back to Canada shortly.

TO OUR FRIENDS

Half a thousand homes in Bruce have free telephone connection with The Telescope. When you have an item of news call us up and give it to us. This invitation is not to Walkerton people only, but to all our many patrons throughout the whole county. The Telescope has the valued help of one of the largest corps of District Correspondents possessed by any Canadian weekly. But even our correspondents cannot be expected to get all the news. If anything happens in your home of public interest, telephone to No. 48, Walkerton, and give us the privilege of passing it on to our readers. We want our paper to be a faithful epitome from week to week of what is going on in Bruce. Officers of local organizations of every description are especially urged to take advantage of this invitation.

Get your C. P. R. tickets at Hunter's

Pte. Geo. Wanless spent the week-end at Berlin.

Mr Fred Weller was in town on business Thursday.

Miss M. Havill was a visitor in Toronto last week.

Mrs. Jos. Lindsay is visiting her son Will at Stratford.

Mrs. Johnson of Paisley left last week for Swift Current.

Miss Ethel Lindsay returned this week, from Stratford.

Mrs. C. Petteplace was a visitor in Toronto the past week.

Mr. S. D. Croft of Stratford, was a business visitor here on Friday last.

Mr. and Mrs. P. R. Lindley and family removed to Brantford this week.

Mr. N. C. McKay visited London and St. Marys on business the past week.

Miss Marion Haughan, trained nurse of Stratford, is visiting at her home here.

Mr. Linus Harrison of Toronto has been visiting his sister, Mrs. John H. Appel.

Miss Young of Chepstowe and Miss Ida Thompson left last week for Arcola, Sask.

Miss Annie Ferguson, nurse, of Stratford Hospital, spent Sunday at her home here.

Elroy McKenzie, aged 19, son of D. A. McKenzie of the "Advocate," left for Toronto to enlist in the signal corps.

Mr. Charles Stephan has quite recovered from his recent attack of pneumonia and is back at the store again.

Mr. A. J. Skelton left last week on a two months' business trip to the West. He expects to go as far as Lethbridge.

Mrs. Thomas Pellow returned home last week from Detroit where she spent the winter with her son, Mr. Charles Pellow.

Mr. Walter Swanson, eldest son of Night Watchman Swanson, arrived here from Calgary on Friday to enlist with the 160th Batt.

The ladies of the 2nd & 4th Cons. Elderslie who had charge of the Red Cross Tea Rooms at Paisley last Saturday made no less than $235.

Men, women and children of every age, find Rexall Orderlies a perfect laxative. Sold only by Rexall Drug Stores, 15c and 25c boxes.

Mrs. Thos. Pellow, an old and respected residence of the town, intends leaving shortly to make her home with her daughter at Winnipeg.

Mr. S. H. Hessenaur of Berlin was in town on Monday. "Sam" is buying potatoes at Berlin in carload lots. He says the price will go still higher.

Some folks will greet the spring by grasping the pen and writing poetry. Some other real good and worth while folks will grasp a gun and join the army.

The Hair Tonic which has gained our confidence is Rexall "93" Hair Tonic. All Rexall Drug Stores sell it under positive guarantee—50c and $1.00 bottles.

Mr. A. W. Partridge of Barrie succeeds Mr. A. C. Moore as assistant at the local agricultural office. Mr. Moore having joined the Guelph O. A. C. battery.

In lieu of paying a $300 fine for procuring liquor for a soldier of the local company, Angus McIvor of Kincardine enlisted in the ranks of the Bruce Battalion on Monday.

Mrs. Robt. Walton of Guelph who has been visiting parents Rev. and Mrs. Sanderson left on Friday, accompanied by her husband, for their new home at West Toronto.

Pte. Chester Cunningham of the 71st wrote home last Thursday:—We left Galt last night at eight o'clock, and never saw such a crowd in all my life as was down to see us off.

The organ of Knox Church was run by electric power for the first time on Sunday morning. The steel organ blower installed by Mr. Davis of London gives great satisfaction.

Earl McFarlane of Wiarton, a deserter from the 34th Batt. was brought down from Wiarton on Monday to serve six months in the county jail for deserting from the Battalion on July 14th last.

A Walkerton man advertised 15 thoroughbred Wyandottes for sale in last week's Telescope. The little ad. brought him a purchaser for the entire outfit the same day that the Telescope was published.

The members of the Organized Bible Class of the Evangelical Church arranged a pleasant surprise for Mr. and Mrs. Harvey Dasman last Wednesday evening. The newly wedded couple were invited over to Mr. Geo. Eckel's where [illegible] the members of the Class [illegible] miscellaneous showe[illegible] evening was sp[illegible]

Corp. Jones of the N. C. O. School is very ill with erysipelas at the Bruce County Hospital.

Mrs. Alex. McNab has been in a very critical condition the past week but at latest report is doing well.

WANTED—capable general servant, also nurse girl for afternoon. Apply Mrs. H. M. Lay.

Mr. Brunt of Lanark, who is visiting his brother-in-law, Mr. R. Glave, was taken very ill on Thursday morning but has since recovered.

Col. Shannon of London, Commanding Officer of this military district accompanied by Col. Smith, Gen. Staff Officer, are here, Wednesday, inspecting the 160th Batt.

Mr. Con. Ryan, an old and well-known resident of Walkerton, passed away at the House of Refuge on Thursday in his 61th year. His wife and family are living in Chicago. The funeral took place to the Roman Catholic Cemetery on Friday.

A meeting of the Brant Farmers' Club will be held at the home of Mr. August Pletsch on Tuesday evening, Apr. 11. The subject for the evening will be a debate on, "Resolved that the license system is better than prohibition." Ladies welcome.

Deputy Sheriff Frank Harris badly sprained his ankle and at time fractured one of the bones by a very simple accident. He was getting up from the tea table on Monday evening when his ankle suddenly turned and snapped. He will be laid up for several weeks.

The death occurred on Thursday of Elizabeth Allen, the wife of Fred C. Zarn, in her 29th year. Besides her husband, she leaves a little daughter four years old. The funeral was held on Monday afternoon, service being conducted by Rev. M. Mosig, pastor of the Lutheran Church.

Mr. Sam Hessenaur of Berlin was here this week attending the funeral of his sister-in-law, Mrs. Pletsch. His wife who was formerly Miss Dippel of Carrick, has been very ill, and is just out of the hospital where she has had no less than three operations within the past few months.

Among the latest recruits to join the 160th is a former popular Walkerton boy, Mr. Harry Harcourt, son of Mr. Harcourt, formerly traveller for the Bobbin Co. Mr. Harcourt threw up his position with the Detroit Times to cross the line and join His Majesty's forces in his old home town.

Rev. Thos. Wilson has received an invitation to supply the pulpit of a Presbyterian Church in the city of Philadelphia during the month of August. Mr. Wilson will probably accept and arrange to spend August as his vacation month in the Quaker City. The invitation came through a gentleman from Philadelphia who heard Rev. Mr. Wilson preach at Hamilton a couple of years ago. An invitation was forwarded to Mr. Wilson for last summer but he had made other arrangements for his vacation and was unable to accept at that time.

Silver Medal Contest

Six boys took part in the silver medal contest held under the auspices of the W. C. T. U. last Friday night. The medal was awarded to Boisie Farewell but all six contestants were highly commended for the excellence of their recitation. The other boys were:—Leslie McConnell, Nelson Lay, Arthur McCartney, Joshua Mitchell, John Frame. Rev. Mr. Walker presided. The recitations were interspersed with musical numbers by Mrs Cooper, Mr. A. S. Royce, Miss Ruth Warren, Miss Vera Dippel, Mr. Clayton Tevell, and Miss Loughlean. In presenting the medal to the winner and clasp pins to the other contestants, Rev. Mr. Rock had a few appropriate words of encouragement for the boys. Regret for the absence through illness of the worthy president, Mrs. Stauffer, was expressed by the chairman. Before the audience dispersed a hearty vote of thanks was extended to those responsible for the arrangement and carrying out of the programme on the motion of Mr. H. M. Lay and Dr. Farewell.

MARRIED

MARKLE—BAKER — At St. Andrew's Manse, on Thursday, March 23rd, by Rev. W. I. McLean, M.A., Mr. George Webster Markle, of Brant, to Mrs. Annie Baker, of Southampton.

SCOTT— In Carrick, on Monday, Mar. 27th, to Mr. and Mrs. George W. Scott, a son.

LORENTZ — In Carrick, on March 27, to Mr. and Mrs. Jos. Lorentz, a daughter.

DAUGHTERS OF EMPIRE

Are Busy Working on Special (160th Batt.) Edition of the Telescope.

The ladies of Walkerton Chapter, I. O. D. E., now have their committees in full swing on the Special 160th Batt. Edition of the Telescope which they are preparing to issue the last week of April. That this Edition will be something worth while, goes without saying as the ladies are entering upon their new enterprise with characteristic energy. The Special Edition will be an ideal souvenir of the Bruce Batt. It will be entirely edited and managed by the ladies, and the Telescope believes that the people of Bruce have a surprise in store for them. It will be printed on fine paper, illustrated with cuts, and will be sold for ten cents a copy. This edition will be entirely separate from any regular edition of the Telescope and will NOT be sent to regular subscribers in the usual way.

THE BRUCE FIGURES

Several Townships Were Practically Unanimous For Prohibition in Recent Canvass.

Mr. L. C. Benton, County President of the Citizens Committee of One Hundred, gives some interesting information in a circular letter addressed to the members of his committee throughout the County. Mr. Benton figures that 74½ per cent of the electors signed the petition which he regards as most satisfactory, considering the time of year at which the canvass was made. Based on the number of votes polled in the last Provincial election, 103 per cent of the electors of Kincardine Tp. signed (surely a record), 101 per cent from Amabel Tp., the same from Bruce Tp. and 100 per cent from Saugeen. Wiarton leads the towns with 89 per cent. Teeswater heads the villages with 90 per cent, closely followed by Lucknow 87 per cent, Port Elgin and Tiverton 86, Tara 85 and Paisley 84. Besides the regular voters, no less than 10,406 women and youths signed the supplementary petition which was not counted in the percentages above.

TALENTED BRUCE POET

Thomas O'Hagan Ph. D. has Just Issued Book of War Poems.

A little book of Canadian war verse from the pen of Dr. Thomas O'Hagan of Toronto, has just been issued from the press and is bound to commend attention. It is entitled "Songs of Heroic Days" and is dedicated "to the Brave Canadian Hearts that Beat and Battle for the cause of Freedom and the Safety of the Empire." A number of the poems have appeared in the Toronto Globe, Mail and Empire, and Detroit Free Press during the past year. When the author read from his poems before the Women's Press Club of Toronto last winter one of the members suggested that an engraved and illuminated copy of the poem "I Take Off My Hat to Albert" be presented to His Majesty, King Albert of Belgium. This was done and His Majesty's gracious letter of acceptance is indeed a Royal foreword to the book. We take the liberty of reproducing a characteristic verse:—

King of Belgium, Duke of Brabant,
 Count of Flanders, all in one;
Little Kingdom of the Belgae starr'd
 with honor in the Sun!
You have won a place in history, of
 your deeds the world will sing,
But the glory of your nation is your
 dust-stained fearless King;
So I take off my hat to Albert.

The poet pays tribute to the heroes of Langemarck:

Let them taste of Northern courage
 Where the lordly maple grows;
Let them face the heroes nurtured
 Where the stars have wed the snows;
We are sons of sires undaunted,
 Children of the hills and plains,
Ours a courage born of duty,
 Pluck and dash of many strains.

While giving expression to much of the sadness of these piteous times, there is a singing note of confidence and cheer, and consciousness of a righteous cause running through the book. The warm hearted Irish-Canadian ancestry of the poet is evident at times. Here is a sample of his musical unaffected verse in lighter vein:

O, the Kaiser's bhoys are marching,
 "nach Paris" they are going,
But they're athopped to rest a minit
 at the Marne and at the Name;
And the Gordons and the Munsters
 are thryin' to entertain them,
For they've every kind of "record"
 that the Teutons want to choose;
They have battle cries that sounded
 for centuries in the Highlands,
They have war cries fierce and stirring
 as the breath of Munster gales;
They are shoutin' to the heavens, and
 they're shoutin' to the Kaiser,
"Faugh-a-ballach!" sons of Odin, or
 we'll tie you up like bales.

Copies of "Songs of Heroic Days" may now be had at McCrums (fifty cents.)

Why The French Seized Corfu

(New York Sun.)

The writer of the following article, Ioan Dimia-Oghlou, is a former Greek officer of the Anatolian Volunteers. He volunteered to serve in the Greek army shortly before the outbreak of the first Balkan war and served through the first and second Balkan wars. He was honorably discharged and was being employed as a journalist in the island of Corfu, representing Egyptian and Cyprian publications there, when on January 12 the French landing on the island took place.

Ioan Dimia-Oghlou about fifteen years ago was the American Dragoman at the port of Messina, Asia Minor.

In the darkness of the night French troops, loaded on four cruisers and guided by numerous destroyers and torpedo boats, slipped through the Corfu Channel, and while the 25,000 residents of the city of Corfu were sound asleep the soldiers landed, and before sunrise had put in chains the chief of the German spies on the island.

With the exception of the two official representatives of France and Italy, M. Benegny and M. Matis, no one on the island knew of the presence of the French in the city; not even the prefect knew that foreign troops had already landed in his little municipality.

TEUTON AGENTS SEIZED.

The French troops not only landed on the island, but proceeded at once to the Hotel Europe and put under arrest the secretary of the German Consulate.

While they were busy rounding up other prominent Austrian and German agents, the German Consul got word of the landing of the French and fled from the consulate in a bathrobe, taking refuge with a retired Greek officer in the extreme end of the island.

Before sunrise the entire population of the island woke to activity. About 4 a. m. the bellboys of my hotel were rapping at every door, singing out: "The French have landed!"

Within half an hour the streets of the hitherto quiet city were filled with crowds. Men, women and even little children flocked to the landing place to see the strangers.

The French had landed, arrested the German agents in the city, out guards in front of the Austrian, German and Turkish consulates, and then, like true Frenchmen, informed the prefect that they were there and they intended to stay there for some time, and that they also expected others, Serbians and Montenegrins, who would soon arrive.

Like a true Greek, the stately prefect of Corfu protested against the landing of the French and in the name of our King ordered the midnight intruders to leave. But there were two compelling circumstances which soon cooled his ardor, the population of the city had already gone wild with joy over the landing of the French; they were cheering the intruders and those who did not know the words of the "Marseillaise" were humming the martial tune to their heart's content. Another reason which compelled our prefect to yield was "The French commander was so polite and irresistible!"

THOUSANDS CHEER INVADERS.

With the sunrise thousands were either at the landing place cheering and assisting the "invaders" of the city to land their provisions and horses or actually doing the longshoreman work for the newcomers.

In the meantime an immense crowd had escorted a group of French soldiers to the Achilleion, the marble palace of the Kaiser.

There were very few people in the island who had set foot in the place. Thousands of acres of this Greek island were to all intents and purposes Imperial German territory. Occasionally some inhabitant of Corfu could steal a glimpse from a distant housetop of the wonderful marble palace of the German Emperor, but for the average person even the approaches to the gates were as inaccessible as the seventh inner gate of heaven.

When the crowd arrived within view of the outer gates of the palace garden they held back by habit. I was near the front of the crowd. All at once we came to a standstill. However, this hesitation of the timid did not last long.

Once within the precincts of the mysterious and beautiful gardens we spread everywhere, some to various statue lined avenues, some around spacious fountains and others to the flower studded lawn under the well trimmed trees. For about an hour or so more than 10,000 Corfeans acted like picnic crowds. Some of the more serious inhabitants still followed the French detachment who were bound for the palace proper. I followed this crowd.

As we escorted the French I noticed that many young and middle aged mothers had headed us off, and with the intention of letting their little ones catch a glimpse of the French soldiers they had perched the children on the shoulders of the marble statues which lined the main avenue to the palace building. Here and there the crowd chaffed these mothers, saying, "Don't let the Kaiser see you do that!"

PALACE GARDENS VISITED.

The good natured crowd marched as far as the entrance hall of the palace proper, but no further. About a dozen or so of the French soldiers established a cordon at the foot of the long staircase, while about fifty or so slowly climbed up the stairs.

At the top of the stairs the French soldiers were observed fixing bayonets. Like a flash this fact became known to the crowd. We all suddenly realized that the French had not landed on our island so secretly just for the purpose of arousing our curiosity.

By this time other Corfeans had also come to the gardens, until the Achilleion grounds resembled a public park on a Sunday afternoon. After a two hours wait we saw a French soldier descend the stairs as though he was the herald of an imperial ceremonial. When he reached the foot of the stairs he motioned to those who were guarding the main entrance hall, and they gathered around him. After five minutes' conference the officer disappeared up the stairs. Half an hour more of waiting, then our patience was rewarded. Between two rows of French soldiers a group of men and women descended the stairs of the Kaiser's palace.

On seeing this procession the crowd pressed in, but soon the ever-smiling and polite French officer motioned to the crowd to make room for his prisoners. Several men and women in the procession were recognized by any in the crowd, who greeted them with uncomplimentary salutations. I was near enough to the procession to count the men and women in it accurately. There were forty-five women and sixty-two men in that group of German residents of the Imperial Palace. Two of the women excited especially unfriendly feeling.

WOMEN SPIES SEIZED.

These women were known in the city of Corfu as adventuresses who in the past had spent money lavishly and had sought to gain the confidence of the few civil and military officials of our city. The Parisian officer had arranged the ceremonial procession of his prisoners in a truly Parisian fashion, "Mesdames first!" Then came the men. What an assortment! In this group there were men of all stations. From the elaborately dressed and proud possessors of upturned mustaches to the smooth-faced odd-looking German seaman type, they were all in this collection.

Excited as the feelings of the Corfeans had been until then, they had abstained from expressing them violently. But when the populace recognized in the midst of those German prisoners a Greek who had recently returned from America in company with a young German, who had passed himself off as an American, and had travelled on board a Greek steamer, then the anger of the Corfean populace broke its bounds, and in an instant there was a sudden dash, accompanied with jeers and insulting epithets directed to the Greek who had been conspiring against the Entente Allies. The streets became filled with enthusiastic crowds shouting their opinion of the German spies at the top of their voices.

All day long the city was the scene of violent demonstrations. The few German sympathizers kept indoors while here and there even King Constantine received his share of the abuse heaped upon the German spies.

But the next day had more in store in the form of sensations for the Corfeans.

OIL FOUND IN THE PALACE.

Like a whirlwind the report was spread that the French had discovered a good gallons of oil in the cellar of the Marble palace. Many ridiculed it, but the report persisted.

In the afternoon I went directly to the palace and inquired of the French soldier doing sentry duty if this report was true.

He told me that it was.

Even then I doubted. I waited until the French officer had received my card and responded to my inquiry.

The polite, very polite French officer in charge of the Marble Palace came down the stairs—my card in his hand—and after the mutual exchange of courtesies took my arm and led me up the forbidden stairs. I climbed up our thirty steps and reached the upper entrance door where, after having been saluted by two French sentries, we further proceeded toward the west wing. I had heard people of Corfu speak of the magnificence of the interior of this palace and had regarded it as idle exaggeration, but now that I beheld its interior its magnificence and beauty dazed me.

The interior of the Achilleion is magnificent without doubt, but its beauty is not peaceful and harmonious; it is awe-inspiring, sumptuous, and, above all, dazzling.

My companion led me through many corridors lined with statues of the celebrities of ancient Hellas and Rome. Finally we came to a door above which there was a round window through which pierced the sunlight. The French officer knocked gently, and in the next moment it opened to a court yard. At this door, also, stood two French soldiers.

In the centre of the courtyard was a huge fountain, anything like which I have never seen in all my travels. The officer in charge told me that it was 40 feet across. As we proceeded toward the outwardly curving edge of this gigantic fountain I observed that the water in it was stagnant.

SUBMARINE SUPPLY FOUND.

"It is oil," answered the French officer.

In the succeeding two days every detail of the secret workings of the German submarine agents were unearthed.

It was known that the Kaiser had never cared for this sumptuous marble palace. The climate of our island was never to his liking, and he had never stayed in this place as long as the newspapers had claimed. We learned that the German Emperor was in the habit of visiting this island to cover the German "excavations" conducted by various German antiquarians and that these scholars of antiquity were in reality German military engineers.

It was discovered that German engineers had laid a two-mile long pipe line, connecting the bottom of the large fountain in the court yard of the Achilleion with a sunken metal oil tank far off in the channel of Corfu.

The people of Corfu assert now that the Germans had in the past, every now and then, imported some old statre, buried them under ground and then unearthed them for the purpose of justifying their "excavation expeditions" on such a large scale. A few of the townspeople ever remember an old Athenian archaeologist asserting that the island of Corfu was never populated by cultivated Hellenes who would have possessed relics of any value. But the local pride of the islanders made them ridicule this Athenian scholar as an idiot.

Since the landing of the French almost every Corfean has become an amateur detective. They daily visit the seashore and inspect the olive oil storehouse, which was owned by a German. This depot and a wharf of its own. Our island is a great exporter of olive oil, and the German who owned this large storehouse was in the business of exporting this produce of the island. Every year he was in the habit of bidding the highest per cask for the oil product of Corfu. He gathered all the oil that the island produced yearly. When the casks were piled high along the water front facing his depot a steamer appeared, unloaded empty casks, and loaded the casks full of fresh olive oil.

Now the people of Corfu say that they had always thought it peculiar that every manual laborer in the employ of this olive oil merchant was a German. They had never thought it strange that the empty casks that the visiting steamer was in the habit of unloading were taken to the interior of the depot. Empty casks are always kept within sheds to protect them against the weather.

However, according to the finding of the French since their landing, these empty casks were not empty; they were filled with petroleum.

These hundreds of casks, filled with oil for power generating purposes, were taken to the interior of the depot. There they were emptied into a large tank, which was connected, through underground pipes laid many years ago, with the ostensible excuse of "excavating," with the huge fountain in the courtyard of the palace of Achilleion. From there another pipe system extended under ground far away to the sea, where this pipe emptied into a large sunken huge tank away out in the channel.

The Austro-German submarines that have raised so much havoc in the Mediterranean until recently were in the habit of submerging right on top of this tank away out in the channel.

This sunken reservoir was like a very large funnel, to which a protruding valve in the stern of the submarine fitted itself. The narrow point of the protruding valve was removed from within the submarine, and after attaching a two-inch hose to the end of the valve on the side of the supply tank the screws were open and in sucked the oil from the sunken tank to the oil bunkers of the Austrian or German submarine.

FRENCH DISCOVER TRICK.

Thus everything had gone well until one of the Austrian or German submarines had torpedoed the French cruiser, the Leon Gambetta, too near the island of Corfu.

A few days after this torpedoing of the Leon Gambetta a group of Anglo-French secret service men were transferred from Athens to Corfu.

The very first thing they discovered after their landing was that the ground from the bogus oil depot to the imperial palace grounds in the distance was German property. Then, after inquiries they also found out that the former German-owned olive oil depot was now being operated by a Greek company whose present head had recently returned from St. Louis, in the United States. Several of the laborers were also from various parts of the United States.

While they were investigating these clues, a British destroyer stopped a Greek sailing ship in the waters of Corfu which ship, ostensibly was returning to Corfu from the United States of America with empty olive oil casks. The commander of the British destroyer inspected the ten rows of the alleged empty casks and found them empty, but he did not allow the Greek sailing ship to proceed to Corfu. Instead, he conveyed the suspected ship to the island of Malta and there, after rigid investigation, they found 300 casks of petroleum oil in the hold of the Greek vessel. However, the Anglo-French naval authorities in these waters kept this find as their own secret.

Next they laid wire netting along the various approaches to the Corfu Channel. After this they brought their submarine cable finders and dragged the entire coast of our island, and finally found the pipe line that was laid by the Germans from the marble palace of the Kaiser to the sunken tank, two miles out at sea.

I have been told by several French officers that more than one Austro-German submarine has already been scuttled in the Corfu Channel, while others, their base having been cut, made a desperate attempt to reach the African coast and there were trapped by the French trawlers.

The French, having realized that it would take powerful pumps to empty this two mile long pipe line, and knowing that it would take some time to accomplish this task, have resorted to a very simple but unique process which has answered their purpose.

They are feeding water into the oil fountain in the centre of the Achilleion court yard. This water forces itself directly to the tank that is sunken in the sea, as the position of the tank is much lower than the base of the fountain in the palace yard. Every gallon of water thus poured into this fountain raises the oil to the surface; and as the oil is thus raised they are filling the empty casks which they have confiscated from the German oil depot.

A few hours after their entrance to the famous palace they succeeded in filling the sunken tank in the sea water.

Because of the great quantities of oil stored in the island it is being said in Corfu that the Teutons had in mind other oil burning vessels than submarines alone.

The hunt is not over yet. The Anglo-French naval officers are making extensive investigations throughout other Ionian islands, and we daily hear reports of the unearthing of other submarine bases.

Under these circumstances is it any wonder that neither the people of Corfu nor even our Government at Athens have the "face" to seriously question the rights of the French in making their midnight visit to our island? So far as we are concerned we are very pleased with the visit of the French, even if they did come to our city unannounced, uninvited, and in such an hour of the night. No one among us doubts but that our French visitors will leave us after the war is over.

The Penetrating Stare.

Can a stare be felt? A woman who has conducted many experiments says it can, but "no matter how deep her absorption, the stare at her back will always disturb her. All girls feel a stare." Dr. Cooper, "a psychologist," says a stare is not felt, and that he has tested it a thousand times. It is probably all imagination on the part of the woman, for it is easy in such cases for what one imagines to become real to her. When she passes a man, and he stares at her, she can doubtless feel that stare a block away, for it will take a while for the impression of a stare to pass away. Stares are no doubt a great annoyance to women, but there is no way to prohibit them. The only way to do to abolish the stare is for women to dress simply and go modestly about their business.

Distinction has been achieved by an Ohio woman by the simple expedient of buying a hat made of 50 new one-dollar bills. It is probably the first $50 hat ever made that [illegible] value apparent to [illegible] provi- dence [illegible]

A Navy Taffeta

The gown illustrated here is an afternoon gown of navy blue taffeta. The bouffant hips and the high collar are notable features. The sleeves are of Georgette crepe in the same tone. Cream lace forms a soft vest which is tipped by an odd stock collar of the silk.

Old Laws and New Weapons

About 75 years ago, when our rights on the sea were threatened by Great Britain's methods of suppressing the slave trade, we thought it proper, in the words of the then President to make it clear in "a language neither of equivocal import nor susceptible of misconstruction" that the United States would not tolerate "interpolations in the maritime code at the mere will and pleasure of the governments," and must "deny the right of any such interpolation to any one or all the nations of the earth without our consent."

In dealing with the question of armed merchant ships the German apologists appear to think it singular that we should withhold our consent to such occasional revisions of sea law and custom as happen to be of service to the Central Powers, and have persuaded some putative neutrals to accept necessity as an all-sufficient reason for consenting to any changes in the law of nations that seem for the moment expedient. Thus the Chicago Tribune very frankly approves of the disarmament of traders on the ground that it will simplify the task of destroying them. "Such destruction," it argues with exemplary candor, "is of great importance to the Central Powers in their conduct of the war," for seeing that Britain, by retaining command of the sea, is able to lay in all sorts of necessary supplies, "the interruption of this service is of great, if not vital, importance to the Central Powers."

It does not seem to occur to the Chicago Tribune that the continuance of this service is of equally vital importance to the foes of the Central Powers and that they cannot clearly understand why, in this war, they should be obliged to surrender an immemorial right. With singular sagacity and insight, the Chicago Tribune apprehends that "the object of arming the Allies' merchant craft is to protect them from capture or destruction by German or Austrian submarines." This is unquestionably true, nor has it ever seriously been pretended that the guns were mounted only as decorations. To-day, as in the past, they are designed for no less sinister a purpose than to protect traders from capture or destruction, and the only real quarrel the Germans have with them is that they have sometimes served this purpose very well.

The argument of the Chicago Tribune is that as the modern armed merchant ship carries guns "to use against enemy warships," the armed merchant ship "is therefore an armed ship." The conclusion is so inevitable that the most ingenious opponent will find it difficult to controvert. The most he can do it to point out that in this respect the armed merchantman of the present day differs in no way from the armed merchantman of the past. The submarine, indeed, differs in many respects from the commerce destroyers of other days, but it is a little difficult to understand why the trader should be asked to make allowances on this account and weaken himself for the benefit of the enemy.

The submarine has manifest advantages or it would not be used. Germany is at perfect liberty to employ other vessels in attacking the commerce of the enemy, and if she chooses to use submarines it must be because they possess peculiar merits which other vessels lack. If certain disadvantages are associated with these merits it is nevertheless hard on the enemy to ask him to make up for them by surrendering his long-established right of self-defence.

Nowadays a trader has a better reason for defending himself than ever before. There was a time when, in the ordinary course, a captured merchant ship was taken into port, but now she faces certain destruction when captured by a German. The case of the Appam is exceptional, and it must be remembered that the Appam was not taken by a submarine but by a more powerful type of vessel, the very presence of which disposes of the German argument against arming merchantmen. It may be added that the notion that traders in the old days were armed only against privateers and pirates is absurd, for there were many cases in which serious resistance was offered to ships of war, to say nothing of such extraordinary incidents as the capture of a French frigate by the Indiaman Exeter in 1800.

The Germans have made much of the submarine. They have celebrated it as a new weapon possessing extraordinary advantages, and at one time they predicted that it would prove irresistible. Now that they have found that resistance is sometimes possible they ask nothing less than that we should consent to such a revision of international law as will enable them to make good their prediction. Revision of some sort is, indeed, as the Chicago Tribune insists, "of great, if not vital, importance to the Central Powers."

It is perhaps not so important to Germany's opponents that the custom of the sea should be revised in their favor, but they have reasons quite as potent to justify a change. If the submarine is more vulnerable than earlier types of commerce destroyers it is also in several respects more formidable. Nor has the best armed trading vessel of to-day as good a chance as the trading vessels of old to resist the attacks of the regular cruisers. The Exeter incident would be unthinkable to-day. To-day, moreover, the trader has Zeppelins and other aircraft to reckon with. Are all the new dangers to be accepted unresistingly merely because there happen to be submarines afloat? It is of obvious importance to Germany's enemies to reduce the power of the submarine, yet they do not ask for reforms to meet their needs. They would probably be content if Germany would show enough respect for international law to stick to the long-established method of detention, visit and search.—New York Tribune.

PANAMA HATS TRIMMED

The trimmed panama promises to be a feature this coming season. Above is one with a flaring brim which has the upper brim and part of the crown covered with bright printed cotton. At four points a bright color flower lends an attractive detail.

A CRUSH OF WORLDS.

How Our Solar System May End and a New One be Born.

The whole of the present solar system is ultimately to fall into the sun, causing an explosion that may result in a new solar system. Such is the theory put forward by Professor Philip Fauth, a well-known astronomer, whose reputation has rested principally upon his researches into the conditions on the moon.

The novel feature of Dr Fauth's theory is that it is based upon the supposition that a great part of the known solar system, including especially the planets Jupiter, Uranus and Saturn, are not composed of mineral matter at all, but are tremendous masses of ice or balls of ice surrounding a mineral kernel. Furthermore, he declares, a part of what is now known as the Milky way is not mineral or gaseous, but "a ring of ice dust," masses of particles of ice suspended in space, the other planets receiving a constant addition to their ice mass from this source.

Professor Fauth declares that the world already at some remote periods has had a similar experience, resulting in the death of nearly all animate nature and that all species of life as we know it have arisen since then. Eventually the planets swinging through their narrow orbits will fall into the sun, causing a new explosion and perhaps the birth of a new solar system, but for thousands of years before that time, all life, either on earth or elsewhere, will have disappeared.

Old Man of the Mountain.

The title "Old Man of the Mountain" was first applied to Hassan Ben Sabbal, who founded a formidable dynasty in Syria A. D. 1090. He was the prince or chief of a sect of the Mohammedans. Having been banished from his country, he took up his abode in Mount Lebanon and gathered round him a band of followers, who soon became the terror alike of Christians, Jews and Turks. They paid the most implicit obedience to his commands, and believed that if they sacrificed their lives for his sake they would be rewarded with the highest joys of paradise. For 200 years these "assassins," as they called themselves, continued to be the terror of the country. Whenever their chief, the "Old Man of the Mountain," considered himself injured he dispatched some of his assassins secretly to murder the aggressor. This is the origin of our use of the word assassin for a secret murderer.

Hot Lemonade.

You've heard of it before?

Yes, but it's good just the same.

It discourages the grip microbe.

And it is good for the health generally.

But hot drinks should not be taken recklessly.

One should remain indoors some time after indulging.

As far as the health goes, cold drinks are safer in winter and hot in summer.

But, for a cold, hot lemonade is wonderfully good, especially just before retiring.

It may also be taken for the between-meal drink if one be remaining indoors.

One lemon of ordinary size will make two small or one very large glass—the required amount.

Yvette Guilbert finds the new generation of Americans are shorter in the legs. And yet their legs are being pulled quite as vigorously as their fathers' were.—Kansas City Journal.

First Young Thing—I started reading 'Les Miserables' last night. It is very interesting. Second Young Thing—Isn't it! I think it is Victor Herbert's masterpiece.—Boston Transcript.

A Coral Earring

(By Donald Chamberlin)

A man and a woman sat in an Italian restaurant in New York. At a near table sat a man with a pointed beard. The couple were speaking of Naples.

The man with the pointed beard sat gazing at a coral earring the woman wore with an evident interest. He also listened to the couple's conversation. When they turned their talk from Naples to Milan he raised his glass toward the man and said:

"Pardon me, signor; I am a citizen of Milan. Meeting one familiar with the place of my home, I cannot refrain from asking him to drink with me to the finest city in the world. I trust the signora will join me as well."

Both the man and the woman raised their glasses and drank to "the finest city in the world," and the proposer of the toast was invited to join them at their table. It was not long before they had become so well pleased with each other that an exchange of cards was made. The man with the pointed beard was Andrea Michelli. The others were Signor and Signora Carelli. Michelli was familiar with all Italian cities except Naples, where he said he had never been. Carelli, though he admitted he had been there often, did not like the place, declaring it to be the worst city in the world.

"In what respect?" asked Michelli. "not long ago our Milan journals were full of a murder in which a beautiful woman high in the social circle was made away with, and at the same time a lot of valuable jewels were taken."

While saying this Michelli fixed his eye on that of Signor Carelli. The latter returned it with the same fixedness till Michelli's gaze was removed; then the conversation fell into other channels. Michelli called a waiter and asked if he could bring a certain kind of wine from the south of Italy. The wine was brought and the party drank to the King and Queen of Italy, then pursued their chat, drifting over the peninsula for awhile, then taking up the manners and customs of the Americans.

Carelli drank very little wine, but the signora was not sparing of it. For this reason her husband was the more taciturn of the two, and the chat was carried on between her and Michelli.

"May I ask," he said, "where you got those coral earrings? I have never seen such beautiful carving."

The woman before replying looked at her husband, then said that she had been given them by her mother and believed they had been cut in Paris.

"The reason I am interested in them," said Michelli, "is that my wife has some corals which I have always supposed came from Naples. In fact, I have been told that the most beautiful work done in corals is executed in that city. Would you permit me to examine them?"

The woman looked again at her husband for instructions. He was very pale, but said nothing. It seemed that his wife felt the request to be an order. At any rate, she reluctantly took off one of her earrings and handed it to Michelli. He examined it admiringly, then asked for its mate. The woman hesitated, looked up at Michelli as if surprised at such a request, then handed him what he had asked for. He looked at the two together and said:

"These are not mates."

"Indeed!" said the woman, with genuine surprise, then, turning to her husband, asked if he had ever suspected what the signor said.

Carelli seemed too much agitated to reply.

"I thought," said Michelli, "that you got them from your mother?"

Both the woman and the man were now visibly agitated. Michelli took out a wallet, from which he drew forth a coral earring, the exact mate to the finer of the two shown him by the woman.

"Giuseppe Rivadona," he said, "I came to America for the express purpose of taking you back to Naples. I am not a Milan merchant, but a member of the carabinieri and attached to the Naples force. This woman is not your wife, for it was your wife in Naples who put me on your track. When you give jewels that you have gained by murder to a woman it would be safer for you to give them to your wife."

The man addressed sat as if crushed. The woman was scarcely less moved. She sat looking at the man; he at vacancy.

"Will you go with me?" asked Michelli, "or must we have a scene?"

The man made no reply. The carabineer took a pair of bracelets from his pocket, kept them concealed and said:

"You and I can walk out side by side, and no one need know that we are linked together."

Slowly the man lowered his wrist and received the bracelet. Then the three walked out of the restaurant, and when the street was reached the officer called a cab, and all were driven away.

By the time the climax to this little drama was enacted the restaurant was filled to overflowing, but no one there dreamed that the three persons leaving the restaurant were going to Italy to enact the end of one of the most important murder cases in the history of Italy.

Pleasures.

The objects of pleasure are two in number. First, to kill time, and, second, to keep us from doing something else which would make us more miserable. The pleasures of the American people, roughly speaking, are likewise twofold—namely, making money and spending it. Some people derive all their pleasure from making money, and others all their pleasure from spending it. Others combine the two.

Being an inventive people, the Americans have created many ways of spending money. Being too busy making it to spend any time on the drudgery of running their country they spend a large portion of it in supporting the politicians. This, indeed, is one of their chief pleasures. And their superb sense of humor enables them to enjoy intensely the accounts of what all the politicians are doing, which enterprising papers publish from day to day.

The Americans have other pleasures, but compared with this one they are mostly trivial.—Life

"Men can reconstruct a turkey from its bones." "Theoretically, you mean. But woman can make some pretty fair soup."

Use MILBURN'S LAXA-LIVER PILLS FOR A SLUGGISH LIVER.

When the liver becomes sl[illegible] an indication that the bowe[illegible] are working properly, and if they do not mo[illegible] regularly many complications are liabl[illegible] to set in.

Constipation, sick headache, bilio[illegible] headache, jaundice, heartburn, wate[illegible] brash, catarrh of the stomach, etc., come from a disordered liver.

Milburn's Laxa-Liver Pills [illegible] the sluggish liver, clean the coated tongue, sweeten the obnoxious breath, clear away all waste and poisonous matter from the system, and prevent as well as cure all complaints arising from a liver which has become inactive.

Mrs. John V. Tanton, Birnam, Ont[illegible] writes: "I take great pleasure in writing you concerning the great value I have received by using your Milburn's Laxa-Liver Pills for a sluggish liver. When my liver got bad, I would have severe head-aches, but after using a couple of vials I am not bothered with them any more."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by Th[illegible] T. Milburn Co., Limited, Toronto, Ont.

A PEEP INTO SPACE

Can the Finite Mind of Ma[illegible] Measure the Universe?

To the visible universe there are a[illegible] tainable limits. It may be that t[illegible] greatest telescopes have not yet reac[illegible] ed the bottom, or the boundaries, [illegible] the entire system, but they have most done so.

This is shown by the thinning o[illegible] of the fainter stars. These stars, as [illegible] whole, are the [illegible] distant, and [illegible] they were unlimited [illegible] ery increase in the penetrating p[illegible] of telescopes would bring previou[illegible] unseen ones into view, in proporti[illegible] ately undiminished numbers.

As a fact, however, there is a ra[illegible] falling off in the proportionate nu[illegible] ber of great distances. This [illegible] by Kapteyn's law of star density. Taking the "parsec" as the unit [illegible] measurement (a parsec is equal [illegible] nineteen million million miles), [illegible] density of the stars at increasing [illegible] tances comes out as follows: At 0 d[illegible] tance, 1.00; at 40 parsecs, 0.91; at [illegible] parsecs, 0.80; at 213 parsecs, 0.67; 540 parsecs, 0.30; at 850 parsecs, 0.[illegible]

This does not mean that the ab[illegible] lute number of stars decreases wi[illegible] increase of distance, but that the ra[illegible] tio of their number to the volume [illegible] space occupied decreases in the pr[illegible] portion shown, so that at a distan[illegible] of 850 parsecs there are only 15 per cent. as many stars as th[illegible] if there had been no fall[illegible] in [illegible] lative density.

Various counts and estimates of actual numbers included within v[illegible] ous limiting distances have been m[illegible] and these show that the total num[illegible] of stars in the visible universe [illegible] numerable and probably does not [illegible] ceed a thousand millions at an ou[illegible] estimate.

The fact that a fairly defini[illegible] or outline has been found fo[illegible] ble universe is in itself a [illegible] it is not unlimited in exten[illegible] virtually certain that [illegible] around us in such a manner [illegible] sume roughly the form of a [illegible] ular disk, the most distant [illegible] edges of which lie in the pl[illegible] Milky way.—It is thus like[illegible] [illegible]

[illegible] be infi[illegible] though what we call the un[illegible] gon." As to other universes [illegible] beyond the limits of ours an[illegible] ble to us, that is purely a spe[illegible] which appears more or less p[illegible] according to the manner in one's mind approaches it.

But, at any rate, there is no evidence of the existence of o[illegible] er star systems. From time t[illegible] one hears suggestions that this [illegible] nebula is an "outside universe," shining to us from its mil[illegible] crowded stars across imm[illegible] tracts of intervening space. B[illegible] far more probable that no gre[illegible] other object visible in the mi[illegible] telescope is unconnected with th[illegible] verse to which our sun and our [illegible] belong.

As to the continuance of the [illegible] tor's work in forming new sun[illegible] new planets, of that there can [illegible] question. This work is, in truth [illegible] ibly going on before us in the hea[illegible] There is the utmost variety of [illegible] among the suns, just as th[illegible] among the human beings in [illegible] If our lives were lengthened [illegible] year would be but as a secon[illegible] we should see the stars around [illegible] appearing and new ones spring[illegible] existence, as we see flowers [illegible] and fresh ones blooming in th[illegible] den.

And if you fly to another im[illegible] boundary instantly another outsid[illegible] panse stretches away before yo[illegible] is, then, perfectly legitimate to [illegible] pose that, while the visible [illegible] is limited, the invisible univers[illegible] no bounds. In comparison wit[illegible] all that we see, or can ever [illegible] truly, infinitely less than as a [illegible] of sand to a desert or a drop of [illegible] to an ocean.—Garrett P. Serviss.

"Here's a scientist who says the objects commonly regarded as [illegible] mate really have feelings." "I [illegible] it. I heard a clarinet last nigh[illegible] sounded as if it was suffering [illegible] ribly."—Washington Star.

Had Dyspeps[illegible]

Says: HE NEARLY TURNED UP HIS TOES.

Burdock Blood Bitt[illegible] CURED HIM.

Mr. H. N. Manderson, [illegible] writes: "About twenty-five years [illegible] in the Province of Quebec, I came [illegible] near turning up my toes with dy[illegible] A cousin of mine persuaded me to [illegible] Burdock Blood Bitters. In about [illegible] weeks I could eat anything from ra[illegible] pork to unleavened bread. Three bot[illegible] did the job, and I have never b[illegible] troubled with my stomach since. [illegible] would say that this is wonderful if [illegible] could only see what we sometimes h[illegible] to live on in this country; bannock, [illegible] cooked beans, etc."

Burdock Blood Bitters has been [illegible] the market for the past forty years [illegible] cannot be excelled as a medicine [illegible] diseases or disorders of the stomach.

B.B.B. is manufactured only by [illegible] T. Milburn Co., Limited, Toronto.

FARM GARDEN

THE HOT BED.

There is nothing better than a good hotbed for starting early vegetables.

The hotbed protects the plants from the cold, and also supplies bottom heat. The soil is constantly kept several degrees warmer than the air above, which is favorable for quick and strong growth.

Fresh horse manure, containing a liberal amount of straw bedding, is the best heating material that can be employed.

If thrown into a loose pile, horse manure will heat violently and unevenly, and soon become cold. The hot bed needs a steady and moderate heat, and one also that is lasting. In order that this may be obtained, the manure should be forked over, shaken apart, and if dry, watered and allowed to stand a few days, and again forked over, piled and permitted to heat a second time. The object is to get the whole mass into a uniform degree of fermentation, and when this is secured, the manure is ready for the hot bed.

Sash can be purchased that is made especially for hotbeds. They are glazed with small lights, and the frame painted. A size convenient for handling, and especially adapted for home gardens, is about two and one-half by four or five feet, with glass about 10x14, laid with not more than one-quarter-inch lap. They should be made like skylight sash.

The frame should be constructed of sound one-inch lumber, the back 12x14 inches high, and the front 10x12. It must be well fitted to the sash, so as to allow as small opening as possible and yet permit the sash to be easily moved up and down, even when the frame is quite wet.

The soil in the hotbed must be light, rich and friable. Any considerable quantity of clay in it is very objectionable. If possible the soil should be unfrozen when put into the bed. Gardeners generally prepare the soil in the fall before, covering the pile with sufficient coarse manure or straw to keep out the frost.

Careful attention is required in making the bed, as future success largely depends upon the manner in which this work is performed. Having removed the snow and ice, erect a rectangular bed one foot larger each way than the frame to be used, carefully shaking out and spreading each forkful, and repeatedly treading down the manure so as to make the bed as uniform as possible in solidity, composition and moisture. It is of the utmost importance that this shaking apart and even pressing down of the manure be carefully and thoroughly done. Where this attention is not given, one portion will heat quicker than the other, and the soil will settle unevenly, making it impossible to grow good plants.

The right depth of the bed varies with the climate, season and kind of plants to be grown. A bed that is shallow will quickly give a high temperature, which will soon subside; one that is deeper, if well made, will give a more moderate heat, and last considerably longer. A bed about two feet deep will be best for general purposes.

The bed completed, the frames and sash may be put on and fresh manure carefully packed around the outside to the very top. Should the weather be at all severe, this outside banking must be replenished as it settles.

The bed should then be allowed to stand with the sash partially open for a day or two, to permit the steam and rank heat to pass off. The earth should then be put on and carefully leveled.

The soil must be dry and friable. If wet or frozen ground must be used, it should be placed in small piles so that it may well dry out before spreading.

At first the heat will be quite violent, often going up to 120 degrees, but it soon subsides, and when it gets down to 90 degrees the seed may be planted.

Every season thousands of hotbeds fall of good results for the reason that the soil is not allowed to dry out, and the first rank heat not permitted to pass off. The consequence is that seedsmen are blamed for failure resulting from over-heat, or wet, soggy soil.

It must be borne in mind that the essentials for success are a steady, uniform degree of heat and moisture, the soil at all times kept a few degrees warmer than the air, and the careful "hardening off" by exposure to the air and diminishing the supply of water of the plants before transplanting them into the open air.

The temperature inside of a well-built hot bed will rise very quickly to 90 or 100 degrees upon a still, sunny day, even with the temperature outside is far below freezing. On the other hand, the temperature will quickly fall to that outside if upon a windy, cloudy day the sash be left open ever so little.

A rush of cold air driven over the plants is far more injurious than the same temperature when the air is still.

During cloudy weather a bed will go several days without watering, but will dry up in an hour when open on a sunny day.

FARM NEWS AND VIEWS.

About this season of the year we are likely to read a great deal about the advantages of certain practices in plowing. One man has good success with subsoiling, and earnestly advises every farmer to subsoil. Another farmer has tried subsoiling and has found that it actually reduced crop yields, or at least did not help them any. Still another man will find deep tilling machines plowing 12 to 18 inches deep profitable on his farm, and immediately concludes that very deep plowing will be profitable under all circumstances. As a matter of fact it is not, of course. All this goes to show that the practice advisable to follow on any certain type of soil cannot be furnished any way except by actual trial. Probably in the great majority of cases subsoiling will not pay, nor extremely deep plowing, too, for that matter. Undoubtedly there are many cases known where either of these practices may prove extremely profitable. How to plow in order to get the best results is something that no man can work out for you. You must find it out for yourself on your own type of soil.

Most farmers with only a few animals can hardly afford to keep pure-bred males. Yet they cannot afford to use scrubs. One solution of the problem is for several neighbors to club together and secure the pure-bred sire needed. This will really make the cost of the pure-bred sire less to each farmer than would be the cost of scrub sires if each owned one.

Sheep are the great enemies of weeds, and where sheep can be turned into a field, or a flock herded along the roadside, they will effectively clear up waste vegetation and in addition the trampling of their feet will destroy many insects. The sheep at the same time turn waste material in to mutton and all they require is a little grain for finishing. Frequently when sold they return a profit, but the entomologists hold that even if they merely pay for the extra grain they eat their function in destroying weeds and keeping down insects makes their use well worth while.

A rich soil is the first essential to good farming. Too often we forget this and try to skimp along hoping to make crops grow without any plant food to do it on. If plants are to grow, they must be fed, just as animals must feed. Animal manures carefully conserved, commercial fertilizers rationally and liberally applied and green manures plowed under in a proper environment, each or all, will turn the trick. But plant food you must get.

Winter's Poem on the War

In the Sunday edition of the New York Times unusual space and prominence are given to a poem by William Winter, entitled "My England." The fact that he is an American, of course, makes his utterance upon the war the more remarkable. This is his poem:

My England! Not my native land,
But dear to me as if she were,—
How often have I longed to stand
With those brave hearts who fight for her!

Bereft by Fortune, worn with Age,
My life is all I have to give,
But freely would that life engage
For those who die that she may live.

Mother of Freedom! Pledged to Right!
From Honor's path she would not stray,
But, sternly faithful, used her might
To lead mankind the nobler way.

Her task was hard, her burden great,
But 'round the world her edict ran
That reared and ruled a Sovereign State
Securely, on the Rights of Man.

No vandal foot should tread her land,
No despot hold her realm in awe;
The humblest peasant should command
The shelter of her righteous law.

In vain her lion port was braved!
Her pennant streamed o'er ev'ry sea,
And wheresoe'er her ensign waved
All fetters fell and Man was free.

To-day be all her faults forgot,—
The errors of her nascent prime,
Or wily politician's plot,
Or blunder that was almost crime.

To-day when desperate tyrants strain,—
By Greed and Fear and Hate combined,
To blast her power and end her reign,
She fights the fight of all mankind.

She fights for us—for this fair clime,
Our home belov'd, where freemen dwell,
Columbia, grandest born of Time,
That Teuton malice burns to quell.

My England! should the hope be crost
In which she taught the world to strive,
Then all of Virtue would be lost
And naught of Manhood left alive.

But 'tis not in the Book of Doom
That Justice, Honor, Truth should fall,
That earth be made a living tomb,
And only brutal Wrong prevail.

It cannot be the human race,
Long struggling up to Freedom's sun,
Is destined to the abject place
Of vassal to the murd'rous Hun!

In ev'ry land that knows the ills
Of bondage, and has borne its aches,
The deathless pulse of Freedom thrills
And Reason's noble rage awakes.

See splendid Italy advance,
And, grimly leaping from his lair
To grasp the hand of glorious France,
Stalk forth the intrepid Russian bear!

My England!—patience, valiant, true!—
No foes without nor frauds within
Will shake her purpose to subdue
The cohorts of embattled sin.

The swinish horde, the gilded beasts
In whom no touch of truth survives,
Who ravish women, murder priests,
And strew the sea with infant lives;

The Lords of War, who kill and maim,
Exultant, while their people groan,
Steeping themselves in crime and shame,
To keep a despot on his throne;

That pigmy, in whose 'wildered brain
Himself an Attila appears,
Who takes the name of God in vain
And drowns the earth in blood and tears!

My England, strike! Droop not, nor pause
Till triumph on your banners shine!
Then take a grateful world's applause—
Millions of hearts that beat like mine.

THE SONG OF THE PLOW.

I cut through the furrows,
The brown loam springs high;
The sunlight is golden,
The blue of the sky
Brings promise of summer,
Of fruit and of grain.
I cut through the furrows,
It's springtime again!

I cut through the furrows;
The flash of my steel
Is sword-like, but peaceful;
How happy I feel!
The winter is over,
The summer is near;
I cut through the furrows,
For springtime is here!

I cut through the furrows
As if in a dream—
I see the corn waving,
The faint golden gleam
That blooms in the summer—
I hurry and hum,
I cut through the furrows,
The springtime has come!

I cut through the furrows
With joy in my soul,
I wish the whole world
Might be happy and whole;
I wish that the swords
Of the nations might be
Just plows—and the springtime
Might come o'er the sea.

—Margaret E. Sangster, Jr., in The Christian Herald.

Proof Against Wasp Stings.

A Scotch naturalist in a paper on the habits of wasps, tells how a blackbird will stand at the side of a hanging wasps' nest and deliberately tear it in pieces in order to get at the larvae, apparently undisturbed by the swarm of angry insects, whose vicious stings instantly put to flight the human curiosity seeker who ventures near to watch the demolition.

The HouseKeeper

To white the skin make a paste of buttermilk and oatmeal (not rolled oats); cover the face and neck just before bedtime, bind up and allow to remain on all night. Wash off in the morning with tepid water. Repeat till face is sufficiently bleached.

Grapefruit seeds planted in a small jardiniere will grow and make a pretty centrepiece for the breakfast table.

To make a glue for putting labels on tin, take one quart of boiling water, two ounces of pulverized borax, and then add four ounces of gum shellac and boil till dissolved.

To restore color and polish to scratched furniture, rub it briskly with camphorated oil, not spirit of camphor. It should be rubbed on lightly and quickly with a piece of flannel.

If you wish cauliflower to be extra nice, boil it in milk instead of water.

The onion salt which comes bottled in the grocery department is a useful flavoring for the kitchen dresser or storeroom. Like celery salt, it saves taking the time to cut the vegetable and extract the juice or grate it.

To clean a corset, make a suds of hot water, borax and a tablespoonful of ammonia. Scrub the corset clean, rinse in hot water, then in cold, and hang on the line in the sun to bleach and thoroughly dry.

EAT GREENS.

They Are a Great Aid to Health at This Season.

With the approach of spring the homemaker begins a "preparedness" campaign against the disease the flesh is usually heir to following a long winter's diet of the heavy heat-producing foods, varying from "spring fever" to bad complexions and actual breaking down of tissues.

Just as soon as it is compatible with the household budget, green vegetables should have a place on the menu. These vegetables are the leaves or lungs of plants and have very little nutritive value, but because of the antiscorbutic nature of their salts they are a very valuable article of diet.

Spinach, which is known as "the broom of the stomach," is one of the best spring foods. It contains a large amount of water—from 80 to 90 per cent., and when young can be cooked in its own juices. Never throw away the water in which these greens are cooked for by so doing most of the minerals are lost.

Asparagus is very easily digested and may be eaten by invalids with impunity. It flushes the kidneys to some extent. Cabbage contains sulphur, so necessary for the blood. Cauliflower, which belongs to the cabbage family, but is less likely to cause flatulence. Celery is easily digested, but is better cooked than raw. Among the salads with which we may vary our fare are lettuce, endive, escarole, celery and romaine, all cooling and easily digested.

Fruits are equally important. The acid-salts they contain make them good "blood purifiers" and give them certain cathartic qualities. These salts are mainly potash, lime, magnesium and iron, which make them especially valuable for growing children and for patients suffering from diseases due to the lack of these salts. The cathartic action is stronger in fruits which contain cellulose, such as figs, prunes, dates and apples. The digestibility is increased by cooking. For semi-invalids and old persons it is advisable to eat no raw fruit.

9 YEARS

I suffered with an abscess on my face," writes Mrs. Herbert Cox, of Port McNichol, Ont. "I tried everything and received medical treatment for some time, but in vain. Finally the doctor advised an operation, which was performed, but instead of improving, the sore became worse. I had despaired of ever finding a cure, when a friend recommended Zam-Buk. I tried it, with the result that before long the poison was drawn out and the sore began to heal. Perseverance effected a complete cure, and now not even a scar remains."

Zam-Buk is equally good for eczema, blood-poisoning, ulcers, boils, piles, burns, cuts, and all skin injuries. All druggists, 50c. box, 3 for $1.25, or from Zam-Buk Co., Toronto.

ZAM-BUK

AFTERNOON GOWN.

A particularly distinctive afternoon gown is illustrated here. It is of a satin and metal striped material, in combination with ecru lace and chiffon. The colors are silver and helio. The metal striped material is confined to the tunic in back, while the lace and chiffon forms an apron effect in front.

Where tall, is concerned, give a woman a handicap of a mouthful of hairpins and she will beat a man to it.

STRENUOUS PASTIME.

The Whip Game as Played by Natives of British Guiana.

Of all the games it has been my lot to witness, the most strenuous was the whip game I saw in British Guiana. Before the game the women handed around bowls of the native drink, "paiwarie."

Then the players, men and boys, lined up in two rows facing each other. Each carried a whip ornamented with fibre tassels, those of the two end players having whistles attached.

A gentle stamping began, which gradually grew louder till the earth seemed to throb.

Shouts of "Yau au!" rang along the line, and the players waved their whips and swayed gently backward and forward as they stamped.

Presently the two end men passed down between the rows, while those lined up moved slowly in the opposite direction. In rotation the other pairs of men did likewise, and then the whistle men ran swiftly to their original places. The stamping increased in fury, and the whistlers whistled at each other in wild excitement.

They raised their whips and feigned to lash out at each other without much hurt.

The women ran up and down the rows offering their calabashes of "paiwarie," and then the real whipping began.

Two men challenged each other to a contest, and the rows retired, still stamping. The whippers, splendidly built fellows, stripped save for loin cloths, were a thrilling sight as they cautiously judged their distances, letting their whips just touch each other's legs.

Then one of them stood firmly and half turned away from the other. Immediately his whip sang through the air and came down on his opponent's calf with a crack. The victim did not flinch, but joined his whipper in a wild sort of dance.

Again and again he submitted to the lash, and then it was the other's turn. I cannot say who won—both were stoics of tremendous endurance. I would have called the bout a draw.

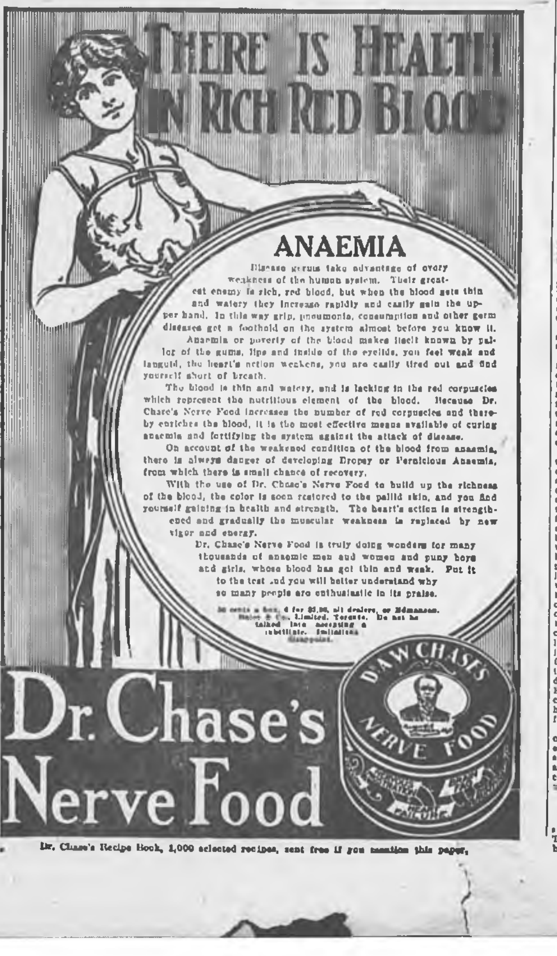
Then the two whippers retired to an adjoining hut, where they indulged freely in "paiwarie," and others of the challenging row took their places in the game, which lasted until the rows were exhausted.—Temple Manning, in Cleveland Plain Dealer.

Uniforms They Wore.

In Angus Hamilton's "Afghanistan" is mentioned the following interesting episode:

"The staff of the frontier regiment on guard along the Afghan side of the border had accepted an invitation to the tiffin at the Russian post. They arrived in due course, appearing in all the full dress grandeur of second hand railway uniforms. The officer commanding the detachment exhibited on the collar of his tunic the mystic words 'Ticket Collector.' His subordinate, a subaltern, was content with the less exalted label of 'Guard.' Out of courtesy to their guests the Russians suppressed their merriment, receiving nevertheless the impression that a portion of the subsidy granted by the government of India to the ameer of Afghanistan was taken out in the castoff uniforms of British public companies. The fact was that the ameer, through his agent in India, had acquired a large parcel of discarded clothing at one of the annual sales of condemned stores in northern India."

The first thing to learn about skating is to be light on your feet. If you are not you'll light on your head.



THERE IS HEALTH IN RICH RED BLOOD

ANAEMIA

Disease germs take advantage of every weakness of the human system. Their greatest enemy is rich, red blood, but when the blood gets thin and watery they increase rapidly and easily gain the upper hand. In this way grip, pneumonia, consumption and other germ diseases get a foothold on the system almost before you know it.

Anaemia or poverty of the blood makes itself known by pallor of the gums, lips and inside of the eyelids, you feel weak and languid, the heart's action weakens, you are easily tired out and find yourself short of breath.

The blood is thin and watery, and is lacking in the red corpuscles which represent the nutritious element of the blood. Because Dr. Chase's Nerve Food increases the number of red corpuscles and thereby enriches the blood, it is the most effective means available of curing anaemia and fortifying the system against the attack of disease.

On account of the weakened condition of the blood from anaemia, there is always danger of developing Dropsy or Pernicious Anaemia, from which there is small chance of recovery.

With the use of Dr. Chase's Nerve Food to build up the richness of the blood, the color is soon restored to the pallid skin, and you find yourself gaining in health and strength. The heart's action is strengthened and gradually the muscular weakness is replaced by new vigor and energy.

Dr. Chase's Nerve Food is truly doing wonders for many thousands of anaemic men and women and puny boys and girls, whose blood has got thin and weak. Put it to the test and you will better understand why so many people are enthusiastic in its praise.

50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

Dr. Chase's Nerve Food

RUNNING NOSE COLDS CURED
SNEEZING STOPPED INSTANTLY

The worst of a cold is how suddenly it comes. No time to hurry to the drug store, croup develops, the lungs are affected with pneumonia or tuberculosis and it's too late. Keep Catarrhozone on hand—it kills colds instantly. Something magical about the way it cures catarrh and bronchitis. Catarrhozone is the best remedy because it cures in nature's way; it heals, soothes and restores permanently. Carry a Catarrhozone Inhaler in your pocket, use it occasionally and you'll never catch cold: that is worth remembering.

Beware of dangerous substitutes meant to deceive you for GENUINE CATARRHOZONE, which is sold everywhere; large size, containing two months' treatment costs $1.00; small size, 50c; sample size, 25c.

THE POULTRY WORLD

AN EGG MARVEL.

In the recent egg-laying contests one hears considerable about the 300-egg hen. When a hen reaches this mark the owner, as a rule, places a great value on the bird. The real value of this bird would amount to nothing if she could not reproduce her great laying quality in her progeny. This they do not always or often do.

The 300-egg hen is not an ordinary one, but an extraordinary one; a freak, in a sense. She is not as yet a tangible commodity, to be bought and sold with a guarantee that she will produce a certain guarantee that she will produce a certain number of eggs per year. This being the case, a little duck will in time revolutionize the egg production of America. This is the pure bred pencilled and white Runner duck, which lays a pure white egg and has a world's record to her credit as the greatest of all egg producers. Six of these ducks in competition at the Agricultural College egg-laying contest in Australia laid 1601 eggs in 12 months. These eggs averaged 34 ounces per dozen, while the ordinary hen's eggs will average 24 ounces per dozen.

The 1601 eggs laid by these six ducks weighed 4563 ounces, while the best pen of hens laid 1441 eggs weighing 2935 ounces—a difference in favor of the ducks of 1628 ounces, or over 100 pounds. If the hens had laid as many eggs to equal this excess weight of 100 pounds, they would have had to average 380 eggs per year. Therefore, there will never be a hen that will be able to equal the egg production of the Runner duck.

For the past thirty years Runner ducks have been known by those who breed them to be layers of from 250 to 300 eggs per year, so that they are not freak layers, but are bred in line for years past for great egg production. There are no better flavored eggs than those of the Runner duck. They are rich and strengthening for invalids, containing 30 per cent. more protein than the ordinary hen's eggs.

The ducks are not noisy and can be kept on a small lot. They only need water for drinking, not swimming water. They are very small eaters and do not consume much more feed than the ordinary hen. The meat is the finest flavored of all fowl, and the young ducks grow very fast. At ten weeks they are ready for the market. Hotels prefer these young ducks to the squab pekin, as they are a more desirable size for serving, and not so greasy.

The original Runners came from the Sunda Islands, of which the island of Java is the largest, and they are dark fawn and brown, some black. All of these birds show the pencil markings in the fawn and dark feathers of the duck, and are very upright in carriage. This proves that the light fawns as bred in America are a mongrel duck, as they have been bred without any pencil markings in the fawn feathers. Many breeders claim that the Runners originally came from India. This is not so, the home of these birds is to be found in the interior of the Sunda Islands, in the hands of the native chiefs.

FOR COLDS, ROUP, ETC.

The well-bred, healthy fowl, kept under proper and favorable conditions, is not naturally inclined to disease. But to secure such a desired condition we must look back—in other words, we must date back to the grandparent stock in building up a healthy, sound strain of fowls, which do not show a semblance of hereditary disease, and continue to discard delicate specimens.

Such a condition is not always possible, but the idea may be carried out as to the future.

Treating fowls separately is not the most pleasant task, neither is it necessary in most cases, if care is taken to give prompt attention to colds, by simply treating the whole flock by the following method, which cannot harm the fowls which may not need treatment, but may prevent colds or disease which might otherwise shortly develop in the flock.

For colds, roup, diphtheria or any throat or head trouble, caused from colds or from contamination with other fowls affected with above diseases, the entire flock may be treated at night when the fowls are on the roost, without handling a single fowl, by the use of a vapor made from equal parts of gum camphor and carbonate of ammonia. Use an ordinary vaporizer, or one can be made by using an ordinary lamp, a metal chimney being preferable, such as are used in incubators and brooders, and elevating a seamless pan or box above the top of lamp chimney. If this method is not possible, a small oil stove or alcohol lamp may be used. Place the equal parts of gum camphor and carbonate of ammonia in the pan, light the lamp and place in the roosting house when the fowls are at roost. Close doors and windows and allow it to burn until the fowls show an indication to get down from the roost. For colds, repeat three nights in succession. For developed throat and head diseases, continue the treatment for ten nights.

When fowls have developed roup or diphtheria, they should be separated from the flock and treated in a separate house from those not apparently affected. Diseased fowls contaminate the drinking water.—Woman's World.

NOTES.

If the parent bird is off in size, shape and color, so will be the chick. This is one reason why the best breeders in a measure hold their own in the poultry world, they realizing the value of good fowls.

Early hatched chicks pay best. They mature into winter layers, make good broilers at the season's best prices. Those retained to further develop get the best roaster prices. One early hatched chick from a commercial standpoint is worth two June or July-hatched, unless wished for exhibition at mid-winter poultry shows, when the later-hatched fowls mature into first-class show birds, while the early hatched have passed their first bloom.

Utility should be one of the first considerations in the flock, and with the progressive breeders it is, although strange as it may seem, utility seems to cheapen the stock in the eyes of the would-be-purchasers from the price they seem to demand. A good utility fowl, male or female, is worth more than just the market price for either live or dressed poultry.

Early chicks are profitable to raise either for broilers or future winter layers, but only when they can be reared with the proper accommodations. March is a changeable month, with a good deal of cold, high winds, and often spells of rain. To do well, the young chicks must have proper brooding quarters to do their best.

Manitoba Woman Sends Message

TELLS SUFFERING WOMEN TO USE DODD'S KIDNEY PILLS.

Mrs. F. J. Garlie, Who Suffered With Backache, Says That the Results She Got From Dodd's Kidney Pills Were Wonderful.

Stewart Valley, Sask., April 3.—(Special)—Mrs. F. J. Garlie, wife of an estimable resident of this place, is enthusiastic in her praises of Dodd's Kidney Pills.

"Dodd's Kidney Pills have helped me wonderfully," Mrs. Garlie says in an interview. "A year ago I was so bad with my back I could hardly move. I took four boxes of Dodd's Kidney Pills and they helped me more than I can tell you."

Mrs. Garlie is now able to attend to her household duties as well as nurse her fine big baby boy and she feels that she cannot recommend Dodd's Kidney Pills too highly.

Backache is the bane of the average woman's life. It is accompanied by a weakness and lassitude that makes life a burden. But thousands of women all over Canada are telling their suffering sisters that relief and cure is to be found in Dodd's Kidney Pills. They cure the kidneys and nine-tenths of women's ills come from diseased or disordered kidneys.

THREE NEW V. C.'S

And the Heroism for Which They Were Honored.

One of the finest self-sacrifices of the war—how an officer to save the lives of his men flung himself down on a live bomb—is told in an announcement of three new V. C.s in the London Gazette. The awards are:

Second Lieutenant Alfred Victor Smith, 1-5th East Lancashire Regiment (T.F.).

For most conspicuous bravery. He was throwing a grenade, when it slipped from his hand and fell to the bottom of the trench, close to several officers and men. He immediately shouted out a warning, and himself jumped clear and into safety; but seeing that the officers and men were unable to get into cover, and knowing that the grenade was due to explode, he returned without any hesitation and flung himself down on it. He was instantly killed by the explosion. His magnificent act of self-sacrifice undoubtedly saved many lives.

Private (Shoeing-Smith) Charles Hull, 21st Lancers.

For most conspicuous bravery. When under close fire of the enemy, who were within a few yards, he rescued Captain G. E. D. Learoyd, whose horse had been shot, by taking him up behind him and galloping into safety. Shoeing-Smith Hull acted entirely on his own initiative, and saved his officer's life at the imminent risk of his own.

Private Harry Christian, 2nd Battalion, Royal Lancaster Regiment.

For conspicuous bravery. He was holding a crater with five or six men in front of our trenches. The enemy began a heavy bombardment with "minenwerfer" bombs, forcing a temporary withdrawal.

When he found that three men were missing, Private Christian returned alone to the crater, and, although bombs were continually bursting actually on the edge of the crater, he found, dug out, and carried one by one into safety all three men.

Lieutenant Alfred Victor Smith—the bomb hero—was the only son of the Chief Constable of Burnley, Lancs. He was 21 years old.

REPLENISH YOUR BLOOD IN THE SPRING

Just now you are feeling "out of sorts"—not your usual self. Quite exhausted at times and cannot devote real energy to your work. Sleep does not rest you and you wake up feeling "all tired out." Perhaps rheumatism is flying through your muscles and joints, or may be your skin is disfigured by rashes, boils or pimples. Headaches, twinges of neuralgia, fits of nervousness, irritability of temper and a disordered stomach often increase your discomfort in the spring.

The cause—winter has left its mark on you. These troubles are signs that your blood is poor and watery, that your nerves are exhausted. You must renew and enrich your blood at once and restore tone to your tired nerves, or there may be a complete breakdown. The most powerful remedy for these spring ailments in men, women and children is Dr. Williams' Pink Pills for Pale People, because these Pills cleanse bad blood and strengthen weak nerves.

New, rich, red blood—your greatest need in spring—is plentifully created by Dr. Williams' Pink Pills, and with this new, pure blood in your veins you quickly regain health and increase your strength. Then your skin becomes clear, your eyes bright, your nerves strong, and you feel better, eat better, sleep better, and are able to do your work.

Begin your spring tonic treatment to-day for the blood and nerves with Dr. Williams' Pink Pills — the Pills that strengthen.

These Pills are sold by most dealers, but do not be persuaded to take "something just the same." If you can't get the genuine Pills from your dealers they will be sent you by mail, post paid, at 50 cents a box, or six boxes for $2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont.

CURRENT COMMENT

The Kaiser is said to be selling his castles. His castles in the air tumbled down long ago.

For slandering Mrs. Asquith the London Globe has had to pay $5,000. It will be more careful in future.

The French now propose to use liquid fire against the Germans. They believe in fighting the devil with fire.

The new president of the Philadelphia & Reading Railroad began his career as a flagman. There is always room at the top for the right man.

A Windsor man married a 12-year-old girl and now he is being charged with bigamy. We would like to hear the excuse of the clergyman who made the child a wife.

Belgium has been a[illegible] that she will be c[illegible] so to the terms of peace an[illegible] that she will be reimbursed for all her losses and trouble. Why these repeated promises?

A conductor on the Intercolonial Railway has been left $16,000 by an old lady to whom he paid attention while she was travelling the road. Moral—It pays to be kind to old ladies travelling.

Eight hundred thousand French children have been made fatherless by the war, according to a statement [illegible] the Senate by Senator Jer[illegible] Add to these the German [illegible] orphans made by the war and [illegible] see the awful responsibility of the Kaiser.

There is another conscientious [illegible] lection in favor of the newly married man. "When a man hath taken a new wife, he shall not go out to war, neither shall he be charged with any business: but he shall be free at home one year, and shall cheer up his wife which he hath taken."—Deuteronomy xxiv. 5.

Canada is paying monthly between $11,000,000 and $12,000,000, about $350,000 a day, for her share in the war. This is apart from the Do[illegible] n's share of the Imperial expenditure on rations and equipment of the [illegible] lian troops overseas. These figures should show us the need for [illegible] Save and serve.

Montreal fashion experts—we did not know such existed—declare that trousers are to be worn longer and narrower than usual this season, and that the best-dressed men will have the legs break a little over the boot—whatever that may mean. Perhaps the Montreal fashion experts are responsible for the high-water [illegible] ladies are now wearing.

Commenting on Canada's [illegible] financial showing, the Buff[illegible] says: "It is a striking fac[illegible] ing the first seven months of [illegible] rent fiscal year our trade wi[illegible] exceeded by $54,326,709 our [illegible] all the countries of South Am[illegible] combined!" Yes; if it were not for Britain and Canada, the United States trade and commerce would be much curtailed.

Dr. Alexander Graham Bell, inventor of the telephone, is credited with the statement that he is looking for the telephone transmission of sight before long. The achievement is not improbable. We can hear and speak through the phone and we can look on the movie pictures. There is nothing improbable as to sight by wire. But will this be an unalloyed blessing. No woman will then go to the phone without first primping up, and look at the long wait we may have.

New York State, we learn, has a larger population than Canada. The record shows that there are in the commonwealth 463 incorporated villages, of which 22 have a population of between 4,000 and 5,000 each, 30 have between 3,000 and 4,000, 58 between 2,000 and 3,000, 111 between 1,000 and 2,000 and the remaining 242 have less than 1,000. The largest is Peekskill, which has 15,862 inhabitants, a larger population than that of any one of a number of cities. The city of New York has hopes of outstripping London in population before long.

The Philadelphia Record says that during the past fifteen year hundreds of thousands of Americans who have emigrated to Canada have forsworn their allegiance to the United States and have become subjects of King George. A particularly striking case of this kind is that of John W. Leedy, now a candidate for the Legislature of Alberta. After serving through the civil war and taking an active part in Kansas politics he became Governor of that State from 1896 to 1899. Soon after he moved to Alaska and [illegible] into Canada. Who can blame [illegible] Millions of people have sworn [illegible] allegiance to the United States.

DEATH KNELL OF THE HUN.

(Buffalo News)

Will Kuropatkin break through? If he does it will be the death knell of the Central Powers. To prevent that happening will be a formidable task. The Germans will weaken their western line if they adopt their aforetime tactics of rushing troops to the places most threatened on the eastern front. Such a move would be the signal for a forward drive by the allies. In all probability that is what they have been waiting for, and throws some light on the recent pronouncement of the French authorities that they are the end of the war.

There are shells on the seashore of Barbadoes so small that 100 of them can be laid on a space covering only an eighth of a square inch.

EDITORIAL COMMENT

Florida Times-Union:— We hear a lot about women's taste—yet look at what they marry.

+ + +

Advertising is part of the news these days. Readers can tell the live stores by the adv'ts.

+ + +

"A New York millionaire travels with three detectives, five attendants and a private nurse." How thankful one ought to be for poverty.

+ + +

Winnipeg Tribune :—It's a funny old world. Dancing and "bridging" for war at [illegible], while our boys are shooting and dying at the front.

+ + +

Guelph Mercury:— The suggestion is now made that the right to vote be withheld from single men who refuse to enlist. No bullets—no ballots, eh?

+ + +

The British Government is considering a proposal to extend the military age for single men to 45 years, the present range being from 18 to 40. At the beginning of the war the limit was 30 years.

+ + +

The German War Ministry has set its countenance against the voluminous feminine skirt, which is the style, the reason being that too much cloth is used. Of course some allowance ought to be made for the difference in the length.—Orillia Packet.

+ + +

There is some criticism of the recruiting of young boys for military service. Several boys under the military age have been sent back to Canada from the Old Country. The recruiting officers ought not to accept any boy who is below the regulation age.

+ + +

An advertisement in English by a real estate dealer in Parana, Brazil, reads this way: "The river is the most watery in the State, and one of the most extended in the world. It is navigable until this State for ships of great profoundness; it is also sufficiently faithful."

+ + +

The Mexican outbreak may be President Wilson's salvation. It will provide a vent for the belligerent element among his countrymen and leave him a freer hand to deal with the trouble makers across the sea. And it may help some people to forget that unfortunate too-proud-to-fight speech.

+ + +

[illegible] warrior, describing his [illegible]ience in one of the huge vats [illegible] thirty men tub together, de[illegible] after he had been in it for [illegible] hour, scrubbing his feet most [illegible] time, he came out to find they [illegible] as black as before he went in. [illegible], if I hadn't been scrubbin' [illegible]other chap's feet all along."

+ + +

All sorts of suggestions are being made for supplying the shortage in farm help. The Owen Sound Sun asks: How would the business men, clerks and others in Owen Sound; and other towns who have been in the habit of taking weekly half-holidays during the summer months like to make it a whole day each week and spend the time assisting their farmer friends?

+ + +

Publishing a newspaper in France these days is a great feat. The Toulouse Ecole Laique, a 4-page weekly, of which three and three-quarters pages are entirely blank, only a few lines of advertisements remaining, as a result of the strict censorship. On the day after it was issued the editor received this telegram, signed "Old Subscriber": "Continue your magnificent campaign. You have my enthusiastic support."

+ + +

Do you ever stop to think what a town, any town, owes its newspapers? Do you realize how much of your past growth and present prosperity is due to the unceasing advocacy and advertising of its local papers? A good way to convince yourself what you and your business owe to your local paper, or papers, is to figure to yourself what your town would be without them. This is one thing which some men apparently intelligent and thoughtful in other matters evidently never do.

+ + +

Cheer up! The robins are here, and the song-sparrows, and the bluebirds and the juncos. And with them they have brought their cheerful songs. The performance of the robin in the middle of summer, when the competition is so keen, may be regarded as commonplace enough; but in the first days that come to indicate the break-up of a hard winter its notes are golden. The song-sparrow is always a delight; but in the early spring, when the winter seems still in doubt whether to go or stay, his poorest effort is an inspiration.

+ + +

Youth's Companion:— When Sir G. Reid, the genial high commissioner for the Australian Commonwealth, was made a Knight Commander of the Order of St. Michael and St. George, the people of Australia, who had known him as plain George Reid, worried him a good deal about his new dignity. At one of his political meetings, says the Family Herald, someone called out, "Say, Sir George, what does K. C. M. G.' mean?" Without a moment's hesitation, the new K. C. M. G. replied: "Keep Calling Me George!"

A clash occurred between the Provincial Auditor and Sir Adam Beck at the Public Accounts Committee. The Auditor claims that there are big discrepancies between the total expenditures shown in the Hydro statements and in the actual vouchers as laid before him. "The statement", he said "prepared by the Hydro Commission does not reflect in any particular form that I am aware of, the actual expenditures as appeared in the accounts of the Commission taken from their records."

+ + +

One of the problems confronting Russia after the prohibition of the traffic was what to do with the 140-000,000 gallons of Vodka left on hand and avoid the plan of running it into the gutter. Portions of it have been diverted into various useful manufactures, but the most important announcement of all is that a famous Moscow chemist has perfected a process whereby in combination with certain vegetable oils, synthetic rubber as high in quality as the natural product is produced.

+ + +

A representative of the Hydro Electric Commission was in Tara last Thursday, and the next duty of the Council will be to canvass the town to ascertain how many of our citizens will install the light in their homes and business places. The Commission requires this information before they can proceed with the work. In conversation with the representative of the Commission, The Leader learned that the cost to Tara per horse power will be $36.27. Tara has contracted for 100 horse power.—Tara Leader.

+ + +

William McDonald M. P. P., the popular member for North Bruce has come forward with a bill to give the local municipalities a square deal on the automobile tax. Seventy-five per cent of the tax on autos to be returned to municipalities by the Provincial Govt. by Dec. 1st in each year is the substance of the bill. At the present time the Govt. returns a proportion of the extra tax on railways, and if this is just, and we believe it is, why not have a fair share of the auto tax returned to the municipalities in which autos are owned and in which they use the road.

+ + +

Mr. Norman Lambert of the Globe who may be regarded as a good authority on the subject, calculates that the ground prepared for crop to date in the three prairie provinces is this year 8,038,000 acres, while in 1915 the total was 13,372,000 acres. The decline is not the outcome of any voluntary action, but of weather conditions. Much work can be done in April and May, and some of the difference may be made up before the planting season is ended. It is agreed, however, that the whole acreage under crop this year will be less than that of 1915. Last year, however, was phenomenal in several ways, and with some loss it is easily possible that the record of 1916 will be counted a good one.

+ + +

Some of the papers supporting the Ontario Government are now boasting of the rate of progress at which the Government is moving in the matter of temperance and declaring that it has altogether outdistanced the Opposition in its policy. Without any desire to cast reflections on the Government it may be said it took quite a long time to get this pace on. It evidently saw that public opinion was in advance of the stand it had hitherto taken. Mr. Rowell has always stood ready to co-operate with the Government in any measure for the restriction or abolition of the liquor traffic, and has not sought party advantage thereby. He deserves some credit for sowing the seed of the fruit that is now about to be reaped.

+ + +

Peter McArthur, the well-known author and contributor to the newspapers, is of the opinion that gossip has a deterrent effect on recruiting. He says: "It is all very well to take high ground about gossip and to refuse to repeat or consider it, but during the past few weeks I have been forced to change my opinions about this pastime, or vice, which ever you care to call it. So far as individuals are concerned, gossip is just as detestable and negligible as ever. But when gossip affects the efficiency of a nation at war it becomes a matter for indignant consideration. I have been forced to the conclusion that both the recruiting and contributions to patriotic funds have been seriously retarded by gossip. There are all sorts of stories afloat that are damaging to soldiers and patriotic workers, and I cannot think of any way to check them, except by turning on them the light of publicity from the highest quarters. It would be useless for me to publish them, for I am not in a position to refute them, and I would only give them wider publicity. If you want to know what they are just listen to the gossip in your own town or neighborhood, I find these stories the same wherever I go; and everywhere they are doing incalculable harm."

+ + +

RECRUITING IN BRUCE
(Toronto Star)

One heart-sore to the people of Bruce in their military efforts has been the response of Carrick Township. This is a pronounced German settlement. It is a full population of husky youths and able-bodied men, who have enjoyed all the benefits of British citizenship, but its contributions to the army have been practically nil. Conscription, the people say, would remedy that condition of affairs.

Our Boys in Khaki Write Newsy Letters

LETTER FROM HERB VANHATTEN

Mrs. Andrew Becchio received the following letter last week from her son, Herb. who is now in the hospital in England convalescing from a shrapnel wound in his left arm.

No doubt you will be surprised to hear that I am in England, I landed at Southampton on Monday, after being in the Hospital in France just 3 weeks. My arm is still swollen and very stiff, so the Doctor had it x-rayed, and found that the elbow bone had been chipped. It is coming along nicely now, though it will be some time before it will be alright. I consider myself lucky as I was lying flat on the ground when I was hit, and had it been about an inch higher I would have got it through the head. We had fierce weather the first couple of months we were in France, and had an awful time for a while. In October, and November, it rained nearly every day, and our trenches got so muddy we could hardly get through them at times. I wrote to Charlie and Henry and told them I was here and expect to hear from them to-day. Do you hear from Frank and Jennie? I hope they are well. I put in five months in the trenches, and that is enough for a while if not for good. Well, Mother, I think I will close for this time. Hoping to hear from you soon. I will write again this week, and tell you more about life in the trenches.

Pte. H. Vanhatter,
Duchess of Connaught Canadian Red Cross Hospital, Toplow Buck's.

WITH THE 71st

Private Ed. Eidt of the 71st Batt. gives an interesting description of the trip from Galt to Halifax in a letter to his father, Mr. Nicholas Eidt, dated at Moncton, N. B.:-

Moncton, N. B.

Dear Father:—

Just a short line to let you know how things are going, while we are waiting here at Moncton for a short time. We have been having a fine trip. Old soldiers say it is the nicest trip they've ever had.

Our train started from Galt at eight o'clock Wednesday night. We were escorted to the station from the armories by the 111th Battalion with three bands and the whole city turned out to see us off. We had our full equipments and kit bags, which made quite a load.

We stopped at Guelph where we were joined by "D" company and our bugle band. We arrived in Toronto about 11.30 and were joined by "B" Company, "A" Company having gone ahead. Our train is composed of fifteen coaches, the kind the colonists use on their way to the west, with folding seats and bunks overhead, on the whole, very comfortable. We have two blankets in our equipment and we sleep two in a bunk, using four blankets. We get very good food on the train, supplied by the government. The mess-orderlies serve it out the same as in the barracks and we eat in our seats. Passed through Montreal yesterday at noon and passed on the opposite side of the river from Quebec City at nine o'clock.

The country from Montreal to Quebec is low and swampy, the whole land is covered with water. The houses are all frame and most of them are very shabby looking shanties. The country around there is all right for dairying and pulp mills, but not for anything else. There must be lots of game—saw a big set of moose horns drying on a barn. The country became hilly when we entered New Brunswick, whole ranges of high hills, like mountains, along the Restigouche river. We stopped at Campbellton about noon and had a short march around the town. It is a very beautiful city on the Bay of Chaleurs. It was partly burned a few years ago. New Brunswick is also nothing but forest and pulp mills as far as we have gone; miles and miles of swamp country, with now and then a village with an Indian or French name and a little Catholic church. But the scenery is beautiful, right along the coast part of the way.

We expect to be in Halifax by tomorrow (Saturday) noon at the latest and will likely go right on the boat then.] We still have about 230 miles to travel.

Well, I will say good-bye for now.

Ed.

P. S.—We will likely be at Bramshott Camp in England.

+ + +

LANCE-CORP. HANLEY WRITES.

Two interesting letters from the battle front have been received by Mrs. Timothy Hanley of Chepstow, from Lance-Corporal W. P. Hanley. He writes:—

We are still out on resting billets, but not for long. We're in the best of health and spirits, ready for another period of hard work. The weather is fairly good at the present but a cold breeze is causing a little discomfort. The bombardment from the Artillery is very intense for the present and the past two weeks. I don't think our Allies have very much to worry about to keep the Germans in their own trenches. The Germans are surely making great efforts, and sacrifices to try and break through the British and French lines but on every occasion our lines remain intact and cause enormous losses to the enemy. The Russians are surely doing marvelous work especially in Turkey and Asia. The aeroplanes are especially active when the weather permits. The German aeroplanes dropped a number of bombs close by here a few days ago but failed to do any military damage. I received your last letter and parcel of tobacco, pipe and chewing gum. I appreciated them very much being [illegible] they were sent from home.

In a later letter, dated March 8th Lance-Corp. Hanley refers to the sad death of his uncle Patrick O'Hagan and asks for further particulars. He continues:—

The cannonading still grows in fierceness along the Western front. Along the French portion of the Front, one of the fiercest battles of the world was fought and likely is still raging. Although the French have lost a little ground, I believe considering the number of shells the Germans used and the loss of life, it was really a victory to the French. The aeroplanes on both sides of the lines are very active. The weather in Flanders is very cold and the ground is almost covered with snow. Likely this cold spell will be over in a couple of weeks. All the Battalion are well and appear quite cheery and confident of an early closing of this terrible war.

+ + +

FROM DAN McGARRITY

Mr. and Mrs. Patrick McGarrity Fairbanks Farm, Brant, received a letter from their son Dan last week. He is now in France on active service. He was well and has been in the trenches, and expects to go back after a few days rest. He sent the following piece of poetry, composed in the trenches by a comrade of his from Calgary where Dan enlisted.

"SING ME TO SLEEP"

Sing me to sleep where the bullets fall,
Let me forget the war and all.
Damp is my dug-out, cold are my feet
Nothing but bully and biscuits to eat,

Sing me to sleep when the bombs explode
And shrapnel shall rise a La Mode,
Over the sand bags helmets you find
Corpses in front and corpses behind.

Far, Far from Ypres I want to be,
Where the Germans can't pot at me
Think of me crouching where the worms creep,
Waiting for Sergeant to sing me to sleep.

Sing me to sleep in some old shed,
A dozen rat holes around my head,
Stretched out upon my waterproof,
Dodging the rain drops through the roof.

Sing me to sleep where the camp fires glow,
Full of French bread Cafe de Beau,
Dreaming of home to-night in the West,
Somebody's overseas boots on my chest.

Far, Far from "Play" Street I want to be,
Sights of Old Calgary I'd rather see.
Think of me crouching where the worms creep,
Waiting for Sergeant to sing me to sleep

NEWS ABOUT TOWN

Thought He Knew Him

Passing through a military Hospital a visitor noticed a private in one of the Irish regiments who had been terribly injured. To the orderly the visitor said: "That's a bad case. What are you going to do with him?"

"He's going back, sir," replied the orderly.

"Going back!" said the visitor, in surprised tones.

"Yes," said the orderly. "He thinks he knows who did it."

Special One Way Fares to Pacific Coast Points, Daily until April 14th.

Those contemplating a trip to Pacific Coast points, including Victoria, B. C. Vancouver, B. C., Seattle, Wash., Portland, Ore. etc. should consult Canadian Pacific Ticket Agents for particulars of low fares in effect daily until April 14th.

23c to Get His Dollar.

Bracebridge Gazette: A fine of $20 was recently imposed on a man for sending a cheque without the legal war-stamp. It seems a small thing to kick about but the one who should put the stamp on a cheque is the one who gives it. Many forget to do it. It is a small way to make 3c. Some do not realize the expense they put others to. Here is an instance in our business: The Gazette did some advertising at a charge of $1. The bill was sent at a cost of 3c. In due course a cheque for $1 was received. The cheque was without a war stamp and was payable in Gravenhurst. As there is only one bank in Gravenhurst a cheque costs 15c to cash. The bill was returned to be receipted which would cost another 5c stamp. The total cost of getting that $1 account would be 23c or 23 per cent.

The Tone of the New Edison

Music lovers have hoped for years that some day a genius would make possible an artificial tone that would actually sound like the original. This, Mr. Edison has done, at last, in the New Edison Diamond Disc Phonograph. With the wonderful Diamond Stylus (no needles to change) he has created a tone so true, so lifelike, that one can scarcely distinguish it from the original.

A REVELATION:

This seems almost too good to be true. Come in and hear it. Judge for yourself. We will be glad to play the New Edison for you without obligation. It will be a revelation to you as it has been to others

Mechanics' SHOES

We call the working men's attention to our excellent shoes built purposely for the mechanic. Nothing in them but good solid leather. Heavy durable soles with uppers of heavy calf or kangaroo. Nothing omitted that would in any way add to their durability, and while they are built for hard usage they are built to be comfortable. They are good looking and moderately priced.

Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letter head for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

Telescope Job Department

POETS' CORNER

A SONG FOR CANADIAN SOLDIERS AND OTHERS

(This is one of the songs which the Canadian boys are now singing in the trenches. It was sent over by a Bruce County Boy, who has been at the front since last August.)

When my King and country call me
and I'm wanted at the front,
Where the shrapnel shells are bursting in the air;
When the foe in fury charges and
we're sent to bear the brunt,
And the roll is called for service—
I'll be there.

Chorus:
When the roll is called for service—
I'll be there.

When the Kaiser's lines are broken
and his armies out of France,
When the Belgian desolation we repair,
When the final muster's ordered and
the bugle sounds advance,
May the God of Battles help me to be
there.

Chorus:
When the roll is called for service,
I'll be there.

When the Allies march through Prussia with the foe in full retreat.
That our hearts be kept from Hatred
is our prayer.
When the right of might is ended in a
crushing last defeat,
And the roll is called in Berlin—
I'll be there.

Chorus:
When the roll is called for service,
I'll be there.

When for me the Last Post is sounded, and I cross the silent ford,
I've a Pilot who of mine fields will beware,
When Reveille sounds in Heaven and
the Armies of the Lord
Sing the Hallelujah Chorus—
I'll be there.

Chorus:
When the roll is called up yonder—
I'll be there.

News About Town

The Chesley sleuths are on their job alright. A Flesherton young man drove a box of dynamite over there for the hydro one day last week, and after arriving had his contingent seized by the constable. They thought they were up against a dynamite plot and would take no chances. The arrival of a hydro official on the scene prevented further complications including a probable incarceration of the young man until the matter could be cleared up—Flesherton Advance

Power House Buried

The old Saugeen has again had its annual innings, and considering the amount of congealed moisture which has formed during the last few weeks the damage was not so great. The ice backed up to the floor of Denny's bridge and buried the power house, but finally the force of the current opened a way into the lake and there was a grand rush for awhile. Both bridges stood the test, and while the power house was somewhat crumpled up there is a lot of it left, and the light company hope to be able to give us light again in ten days or two weeks.—Southampton Beacon

Great Old Goose This

Mrs. John Buchart, of 12th con Brant, is the owner of the most aged and industrious domestic goose in Western Ontario, or perhaps in the Dominion. It is 26 years since this goose was hatched, and she is reported to be quite smart yet. Last year she laid nine eggs, then hatched and raised two goslings. In the course of her life Granny Goose Buchart has probably shed enough first-grade feathers to fill a bed-tick, raised a dray-load of fine Thanksgiving roasts and is still working as good a wealth producer as any of her greatest grand-daughters have been. If some wide-awake poultry fancier had that never-die goose in his flocks, along with some of her progeny, he would be advertising the most virile and fertile strain that ever lived, and sell the eggs 25c for hatching.—Paisley Advocate.

+ + +

$70,000,000 Turnover—

The T. Eaton Co. had a business turnover last year of 75 million dollars and will under the new taxation law of companies by the Dominion government, contribute about 2 million dollars to the Federal Exchequer. The government takes 25 p. c. of all the profits over 10 p. c., so it will be seen the T. Eaton Co. made tremendous profits last year. The T. Eaton Co. sends many parcels by express and parcel post into different urban municipalities in competition with merchants who pay a business tax to the general expenses in country towns and villages and if the T. Eaton Co. contributed a share of its abnormal profits to the places in which it did business, taxation would be lighter in every urban centre in this province. Besides this contribution of taxation would tend to help debt-burdened municipalities and keep the large stockholders in big companies from becoming multi-millionaires.

High School Exams For Month of March

The results of the weekly examinations held during March are given below. The names are arranged in order of merit.

FORM I.

Honors—N. Lay, A. Reinhart, L. Yack, W. Pilfo[illegible].

Pass—M. Wilson, G. Hibbert, E. Ramsey, C. Wilton, J. Commane, W. Brown, F. Myles, M. Honeyman, B. Moore, F. O'Neill, I. Wister, D. Kenny, B. Taggart, H. Everett, B. Farewell, J. Michell.

Below Pass—W. Lettner, B. Cunningham, F. Garner, W. Small, H. Jasper, A. Milhausen, G. Henderson, L. Elder, N. O'Malley, J. Patterson, H. Lewis, E. McNab, J. Gill.

FORM II.

Honors—E. Coulter, A. McCool, E. Glave, D. Frost, D. Glesin.

Pass—O. Tovell G. Young, E. Hyslop, T. Queen, A. Weller, M. Forsythe, M. Buehler, G. Pfohl, B. McCool, G. Lewis, V. Tovell, E. Baudhauer, Leander Bilger, M. Kerney.

Below Pass—C. Cargill, M. Leech, H. Thompson, R. Garner, E. Stevens, V. Eid[illegible], E. Lindsay, N. Pinkerton, L. Bilger, M. Hyslop, M. Ernest, L. Batte, E. Milhausen, N. Wilton, W. Ramsey, H. Irwin, F. Scherrer, M. Chisholm, S. Brecklebank.

A. D. Thompson.

CANADA IN FLANDERS

One of the most readable war books that has come to our table is Sir Max Aitken's "Canada in Flanders: The Official Story of the Canadian Expeditionary Force." Some few weeks ago when it came from the presses of those famed English publishers, Hodder and Stoughton, we read with no little pleasure the remarks of the well-known book reviewer, "Claudius Clear" in the columns of the British Weekly, and in making reference to the book which is now upon the shelves in L. H. Reesor's bookstore, we can do nothing better than repeat the opening paragraph of his review. He writes:—

This is only a shilling book, but I question whether anything equal to it has been written since the war began. In his preface Mr. Bonar Law says: "The present work seems to me a model of lucid, picturesque, and sympathetic narrative, and it will have, I feel sure, a lasting value." This is high praise, but the book deserves higher praise still. I have no hesitation in saying that Sir Max Aitken is to be ranked with Sir William Napier in the power of describing a battle. Hitherto Napier has been without a rival, the first writer in this country who has made the story of a campaign really interesting, the one military author who makes us hear the tramp of charging squadrons, the rattle of musketry, the thunder of artillery, till we are actually sharers in the excitement of the strife. Sir Max Aitken will attach only a secondary value to the literary merits of his book, but is concerned to set before us the splendid patriotism of Canada and the magnificent achievements of Canadians. But he has done this in such a manner that the book should be in the hands of every reader in the Empire, for the inspiring quality of it, its nobility, its bravery.

E nlist today! Your King and Country need you!
N now is the time, and not this time next year!
L et NOTHING hinder you; you know your duty!—
I ndeed to every one it's very clear!
S o will you render to the British nation
T he service she expects from every station.

HUMOR

E BALL ROLLING

ston Transcript)

It seems as though women [illegible] for spending money.
—I know it. Why, whenever my [illegible] too sick to go shopping she [illegible] doctor.

EASY TO SEE.

(Judge)

Brown—The boss says that when he was a boy on the farm they had a mule that was just like one of the family.
Jones—Yes, and I know which one.

DIFFERENT GIRLS.

(Kansas City Journal)

"I found that astronomer rather dull. He used to talk to me about the stars."
"I don't find him dull," averted the other girl ecstatically. "He says he t[illegible] the stars about me."

THE CORRECT WAY.

(Baltimore American)

"I see where the Australian premier says that their interests and ours in the Pacific should make us go hand in hand."
"I think it would have been better had he said we should get on together swimmingly."

PATRIOTISM AND PRUDENCE.

(Baltimore American)

"When the war broke out Biffins declared he was going to the front."
"Did he?"
"Yes. He's now a hotel bell boy."

FORCE OF HABIT.

(Kansas City Journal)

"How do you like his dancing, girls?"
"He leans on his partner so."
"Well, he got his practice dancing with a chair."

STILL THEY COME.

(Life)

Crawford—It seems a pity that the war correspondents were not allowed to see anything of the conflict.
Crabshaw—If they had they would not have had time to write so many books about it.

MORE FUEL.

(Kansas City Journal)

"The agricultural department is sending out booklets cautioning people that there is a scarcity in the fuel supply."
"The booklets may help to rectify that."

NATURALLY SO.

(Baltimore American)

"Your wife has impressed me with her ability to keep a secret."
"Then she must have made a telling impression."

THE OLD LADY ONCE MORE.

(Boston Transcript)

Mrs. Kawler—I understand that the eldest Jones boy went West and got into politics. He became mayor, didn't he?
Mrs. Blunderby—I don't think he ought to be mayor, but I heard he was an ex-mayor.

THE ULTIMATE CONSUMER.

(Judge)

Little Sister—I would laugh if I got a new box of candy for my birthday.
Big Brother—So would I.
Little Sister—But why would you laugh?
Big Brother—Because I'm bigger than you are.

QUALIFIED.

(Washington Star)

"What profession do you think your boy Josh will choose?"
"Law," replied Farmer Corntossel. "Josh kin talk louder an' longer when he's got the wrong side of an argument than anybody I ever heard."

NOT ALWAYS.

(Judge)

"Do you always wear such lovely frocks?"
"Not after 1 a.m."

A MOVE TO INCORPORATE.

(Judge)

She—I shall have to be a little firm with you.
He—Fine! Let us make it a partnership!

A DISCIPLE OF EDISON.

(Boston Transcript)

Mrs. Popaco—I was reading where Mr. Edison says that four hours sleep is enough for any man.
Popaco—That seems to be the baby's idea, too.

TO THE LAST DITCH.

(Kansas City Journal)

"Well, have you been fixing your fences?"
"Been digging trenches," declared Congressman Flubdub. "I'm in for a real fight."

PARADOXICAL CONTENT.

(Baltimore American)

"I feel safe from accident on this train."
"Why so?"
"Because it is in charge of an engineer who has the reputation of being a wrecker."

HIS GOAL.

(Baltimore American)

"Look at that old seadog making his way to the sideboard."
"I guess he's trying to steer to port."

A GOOD PLACE TO LEARN.

(Life)

"And where is your daughter Minnie this year, Mrs. Nanvy?" asked the visitor.
"Why," said the old lady, "Minnie wants to be a teacher in domestic science, and she's taking a course in household derangements down at the Abnormal School."

SUFFICIENT REASON.

(Southward-Ho!)

"Why do you write articles on how cheaply people can live if they try?"
"In the hope of getting enough money to avoid having to live that way."

IN DARKEST ALABAMA.

(Cornell Widow)

"Say, Alabama is a dry state, isn't it?"
"Sure."
"Why, my dear, when I was there I saw several negroes who were intoxicated."
"Well, of course they can't stop the sale of that awful cotton gin entirely."

WAS IT SARCASM?

(Boston Transcript)

Mrs. Owens—I wonder if the doctor's wife meant anything personal just now.
Owens—What did she say?
Mrs. Owens—She said we might at least pay them a visit.

AN EDITORIAL THEME.

(Kansas City Journal)

"Whither are we drifting?" murmured the editor of the Punkville Palladium. "Guess it's time for another editorial on that."
"Aw, that editorial is out of date. The question now is where are we at?"

A RUDE SHOCK.

(Kansas City Journal)

"Your fashionable friend seems to be threatened with annihilation of the heart."
"Yes, she just received a dreadful shock."
"And what happened to fortune's favorite?"
"She was sitting in an employment office waiting for a chance to look at a cook, when a haughty dame swept in and offered her a job."

THE BABIES' MILK SUPPLY.

(Philadelphia Record)

Dr. von Mach is not very successful in meeting the explanation of Lord Cecil that the German babies must have milk enough because Germans carried off all the cows of Belgium and a good part of France. Dr. von Mach thinks that only a limit number of cows could have been carried off because Germany is short of forage. But the German Government has stated unequivocally that it has plenty of forage. So long as German Zeppelins and submarines continue the destruction of non-combatants, largely women and children, and Germans occupy much of France, it can hardly be expected that England and France will listen attentively to Dr. von Mach's pleas for [illegible]. Of course, if the German babies really need milk Germany can get plenty for them by accepting peace terms from the allies.

'TWIXT LOVE AND PRIDE

With noiseless touch she pushed open the yielding sash, and found herself part of the silent, star-lit night, with a faint wind fanning her and the deadness of sleeping nature all around. A tall, slight, dark-robed figure, she stood with one hand—scarcely less white than the rays that covered it—resting on the balustrade, her eyes wandering restlessly over the shadowy landscape. A perfect queen of night she seemed, or very fitting Juliet, had there but been a Romeo.

Presently, with steady, eager steps, came Denzil Younge toward her, and took up his position by her side.

"Dreaming, Miss Trevanion?" he said.

Mildred started perceptibly. Perhaps her thoughts—whatever they were—had been far away—perhaps too near. Whichever it was, she roused herself with a visible effort before she answered him.

"Almost," she said, "although the night is somewhat chilly for such romantic nonsense. However, you have shown me my folly, so there is little danger of my repeating it. Shall we return to the drawing-room?"

"In one moment," he answered, hurriedly; whereupon Miss Trevanion turned back once more, and, pausing with wondering eyes, laid her hand again upon the balustrade.

Denzil appeared a little pale—a little nervous perhaps—in the moonlight, but that was all; and his voice, when he spoke though low, was quite distinct.

"Why will you not be friends with me?" he asked.

"Friends with you!" Mildred repeated, with calmest, most open-eyed astonishment, raising her face to his. "Why, what can you mean? Have I offended you in any way? If so, I am sorry, and, believe me I did not mean to do so. I fancied I was treating you as I treat all my other acquaintances."

"No, you do not," he rejoined, with an odd repressed vehemence asserting itself in his tone; "you treat me very differently, as it seems to me. Why, on all the others you bestow a few smiles, a few kind words at least, while on me—Miss Trevanion, I wonder—I wonder, if you could only guess how much your simplest words are to me, would the revelation make you a little less chary of them?"

"I do not understand you," she said coldly, closing and unclosing her hand with angry rapidity; "and I believe you yourself do not know of what you are speaking."

"Yes, I do," he affirmed, passionately; "I know I would rather have your most careless friendship than the love of any other woman. I would almost have your hatred than what I fear now—your indifference."

The moon had disappeared behind a sullen dark-gray cloud and for a few moments they were left in comparative darkness. Miss Trevanion's heart was beating loud and fast; the cloudy drapery that partially concealed, but scarcely hid, her delicate neck and shoulders was strangely agitated. She could not see her companion's face, but felt that he was trying to pierce the momentary gloom to gain some insight into her soul. He should read no thought of hers, she told herself, with proud reliance on her own strength; he should not learn from her face how deeply his words had vexed her.

When once more the moon asserted herself and shone forth with redoubled brilliancy, Denzil gazed only on a calm statuesque figure and haughty unmoved features that gave no index to the heart beneath. She seemed a beautiful thing, a piece of nature's most perfect work—but a being hard, unsympathetic, incapable of any divine feeling.

He gazed at her in silence, wondering how so fair a creature could be so, and as he gazed, a man's step sounded lightly on the gravel beneath them. As she, too, heard it, Miss Trevanion's whole expression changed; her face was lit up with sudden animation, and took an eager expectant look that rendered her ten times more lovely than he had ever seen her. She moved lightly to the top of the stone steps that led to the grounds, and walked with impatience until a gray-colored figure emerged from the darkness, and, seeing her, took her gladly in his arms.

"Charlie!" she said, rapturously, and when he had half pushed her from his embrace, she put up her hands and smoothed back his sunny brown hair from his forehead, and kissed him three times fondly; after which she suddenly recollected Denzil's presence, and, drawing back, pushed Charlie gently toward him.

"Don't be alarmed," said the newcomer—"its only me, and not the long-expected come at last in the shape of the 'midnight marauder'—I like my grammar, don't you, Mildred? How are you, old boy? Glad to see you. Had no idea I should first come upon you spooning with my sister in the moonlight, but accidents will happen. Are they all quite well, Milly?"

"Quite well," Miss Trevanion answered, feeling rather disgusted and sore about the moonlight innuendo, and indignant that Denzil should stand there silent and allow it to pass for granted; "but you need not accuse me of flirting so soon, Charlie. I am not given that way, as you know, and Mr. Younge came out merely because he felt the night warm."

"Just so," said Charlie. "Odd how one always does feel the night warm when there's a girl on the balcony! And so," glancing in through the bright red curtains that concealed the room, "you have been going in heavily for society to-night. I can see Miss Ferrell and a fat young man, and your father, Younge, and 'my pretty Jane' and Sir George eloquent on Southdowns, and here, to excite my curiosity, the end of a blue silk dress, and there—I say, Mildred—come here. Who is the young person in tights?"

"That's young Mason, of the 10th," said Miss Trevanion, "and though he doesn't intend to, his clothes always do seem too small for him. The blue dress you see belongs to Frances Sylverton."

"Oh, does it!" exclaimed Charlie, turning away abruptly.

"Come in and show yourself," suggested Denzil. "You can't think how awfully glad they will be to see you. It was only yesterday your mother was complaining about the short leaves of absence you get, and your coming now so unexpectedly will enhance your value doubly."

"My dear fellow, consider—I'm in morning costume," protested Charles, gayly. "Would you have me throw discredit on the house of my father? Why, these Devercills are so nice they would not know exactly how to treat a fellow who could so far discard appearances as to turn up at half-past 9 in gray tweed. Mildred, I will bid you a fond good-night, and be visible again some time to-morrow, when you have gently broken the news of my arrival. Is my old room appropriated by any one? Can I have it?"

"Never mind your room yet," said Mildred—"do you think I can let you go again so easily? No, come in this moment when I desire you, and show yourself to the company in general. I would not miss mamma's look of surprise and delight for anything; so I insist on your obeying me—and, besides, you look charming in gray. Come darling—do."

"Well, on your head be it, if Mrs. Devercill retires in confusion," Charles murmured, and followed his sister obediently into the warm, handsomely-furnished drawing-room.

Miss Sylverton, sitting just inside the window, looked up with a sudden start as he passed her and, crossing the room to where his mother sat, laid his hand lightly on her shoulder.

He was not a handsome young man—was, in fact, the plainest Trevanion of them all—but the action he used toward his mother was full of such tender, beautiful grace as might have belonged to the most polished courtier of the olden days.

Lady Caroline turned, and half cried aloud in her intense surprise and joy. He was her eldest-born, the beloved of her heart, and she welcomed him accordingly; indeed, every one seemed only too glad to see once more Trevanion's fair, sunburnt face, and hear his honest, happy voice, unless, perhaps, Miss Sylverton, who, once her astonishment at his sudden appearance was at an end, appeared to lose all interest in his presence, and went back to her rather one-sided flirtation she was holding with "the man in tights."

"How d'ye do, Miss Sylverton?" Charles said, presently; and Frances put her hand coldly enough in his. "Have you been getting on pretty well? You cannot think how happy it makes a fellow to be heartily welcomed after a long absence, as I have been welcomed by you!"

"I cannot say how long or how short your absence has been," Frances retorted, "as I have had no means of remembering when it was you went."

"Whose fault was that?" he said, gently.

"Was it mine?" There was just a suspicion of tears under the long dark lashes. "I don't think I ever forbid you to come and say good-bye at Sylverton, did I?"

"No, not exactly, perhaps; but there are more ways of forbidding than those expressed in words. I have a dim recollection, a faint idea, that somebody told me, a few months ago, that she hated me."

"And I dare say she will tell you so again before she dies," returned Frances, with a little low, happy laugh; "meantime I am very, very glad indeed Charlie, to see you home again."

"Are you, Frances?" said Charles, softly.

After that, the young man in close-fitting raiment got very little of Miss Sylverton's society.

CHAPTER VI.

It was just at this period that Miss Trevanion became aware of a certain little failing of Eddie's about which she had hitherto been ignorant. It came to her knowledge in this wise: One hunting morning, during the chilly early breakfast, at which she always presided, her father having a prejudice in favor of the coffee administered by her fair hands, it so happened that the post arrived rather more than twenty minutes before the usual hour, and consequently the various letters were handed to the assembled men to peruse at their pleasure, while getting through the agreeable task of devouring cold game-pie.

"Two for you," said Sir George, and he flung Eddie a brace of missives that fell a little short of his coffee cup, and lay with the blank sides turned uppermost. One had a large square envelope, and crimson splashing crest and coronet, singularly unfeminine, which attracted general attention for a moment.

Mildred, idly toying with a teaspoon, looked up a minute later and noticed that the lad's face had grown wonderfully dull and pale for him, and that he was staring at the now open letter with a pained gravity unusual in his case.

"Has she bowled you out, Trevanion?" asked young Cairns, with a gay, thoughtless laugh, from the far end of the table, where he sat near two other men of his regiment staying at King's Abbott for a few days' hunting. "Regularly knocked you over, eh? You look like it."

"Not quite so bad as that," Eddie answered, the dejected expression disappearing altogether from his countenance with such rapidity that Miss Trevanion, still watching, concluded her fears had been groundless, and dismissed the incident, as meaning nothing, from her mind.

Later on toward the evening, however, wandering leisurely up-stairs to dress for dinner, and having occasion to pass through the picture gallery, beyond which lay many of the bedrooms, her own amongst the number, she beheld Eddie at a distant window, his head pressed against the painted glass, his entire attitude suggestive of despair. Even as she looked there arose before her a vision of broken bread and half-cut pasties, with much plate and china, and a gaudily-crested envelope lying in their midst.

She went up to him and laid her hand upon his shoulder.

"Anything the matter?" she asked, lightly enough, not anticipating any real trouble.

He turned and faced her, thereby displaying a countenance betokening anything but that inward peacefulness commonly supposed to come from the possession of a quiet conscience.

"Why, Eddie," Miss Trevanion exclaimed, "what is it? What has happened? Why are you standing here alone?"

"Nothing has happened," returned Eddie, in a voice that perfectly suited his face, and so was lugubrious in the extreme; after which he most ungratefully turned his back upon her.

"Surely you will tell me?" she expostulated. "It can be nothing so dreadful as your manner seems to imply. Come, Eddie, speak to me, perhaps—who knows? I shall be able to help you."

"Nobody can help me," said Eddie.

"Nonsense! It isn't like you to be so down-hearted is it? and I can generally assist everybody, you know; so let me try with you. You will confide in me, dearest, will you not? Indeed I cannot be happy when you look so miserable."

"Just so," broke out Eddie at last with the reckless scorn people generally indulge in when conversing with their best friends—that is when their best friends have succeeded in driving them into a corner—"and of course you will have no difficulty whatever in putting your hand in your pocket now this moment and giving me three hundred pounds on the spot."

"Oh, Eddie, what is it you mean?" Miss Trevanion asked, now thoroughly frightened,—ready money being an article very scarce and difficult of attainment in the Trevanion household, and Sir George's private affairs and general "hard-uppishness" being well known to the older members of the family.

"I mean that I have been gambling and have lost three hundred pounds," Eddie said.

And then Miss Trevanion felt that the trouble was a very real trouble, indeed. She could not speak to him for a moment, and so kept silence. Presently he spoke again.

"There is nothing to be done, Mildred, that I can see," he went on—"nothing. I have no means of paying this money, and so I suppose the sooner I proclaim myself a blackguard and get out of this country the better for you all."

"Do not say that," Mildred said in a low voice. "Is there no way of managing it? Let us think well before we give up in despair."

"There is no way," he said—"none. I have long overdrawn my year's allowance, and the governor is too hard up to advance, even if he would, another fifty—to say nothing of what I want. Besides, Mildred, I—I could not bear to tell him of it; he has so often warned me against gambling on account of that wretched old story about Willoughby Trevanion. I think it would almost break his heart if he fancied the family curse had broken out again in me, and—oh, Milly, I swear to you I never meant it; it all came about so suddenly, so miserably. I had always been proverbial for my luck, until that evening at the viscount's rooms, and then I lost my head, I think; and the worst of it is Pownix is just now so deucedly tied up himself that he can't afford to wait."

"For how long has this—this gambling been going on?" Miss Trevanion asked.

"About a year and a half."

"And how have you managed to pay your debts during all that time?"

"I never lost much before, and, when I did, I was always sure to win it back again the following night. That was the evil of the thing, you see: it drew me on, encouraged me, until I felt I couldn't lose, and then in the end, as I have told you my luck deserted me and left me as I am now, hopelessly in debt, and dishonored, and —and so on," wound up the poor boy, with a miserable choking sensation in his throat.

"Oh, dear, what can the matter be?" sung bonny Mabel, at the top of her clear sweet voice, the words, singularly appropriate, albeit unmeant, as they were, echoing merrily through the chamber as she came swiftly toward them through the gathering gloom.

Her advent, unexpected as it was, left Eddie and Miss Trevanion speechless.

"Why, you two," she said—"are you struck dumb that you both stand there so silent in the twilight? Has the 'holy friar' of our establishment appeared unto you and deprived you of the organs of speech? Mildred, you remind me of some stricken saint, leaning in that position, with the painted light of that window falling full upon you in such a dim religious ghostly sort of manner; while Eddie—Good gracious, Eddie, what's the matter with you?"

Miss Trevanion glanced at her brother, and he said—

"Oh, tell her—there is little good in keeping it secret now, when every one will know it soon"; and so "the queen" was enlightened forthwith, and, contrary to all expectations—as she was generally the most easy-going of the Trevanions—was supremely indignant on the spot.

"Well, I have never heard anything so disgraceful," declared that august young personage, when the recital was finished to the last word—"never! And if any one but you had told me of it, Mildred, I should not have believed them. I think"—to Eddie—"you ought to be thoroughly ashamed of yourself when you know poor papa is in such difficulties, and no earthly way of getting out of them. No, Mildred, I won't stop; it is useless to shake your head at me behind his back; I mean to say just what is on my mind—and I think too much could never be said on such a subject. You may spend your life glossing over other people's faults, but I am not an angel, and cannot; besides, what is to be done? How the money is to be paid I cannot imagine, I'm sure; and, in fact, I have no patience with him!" concluded Mabel, slightly out of breath, but with a finishing touch of scorn that would have done credit to a Parliamentarian.

"I don't suppose you have," said the scapegoat, very submissively, being so far "down on his luck" just now as to render him patient toward any indignity, even when administered by a younger sister. So he took his scolding with meekness, and made no open show of resistance or disapproval, though in his inmost soul he resented the treatment hotly, only he turned away from Mabel, and addressing himself once more to his first confessor: "Why don't you abuse me, Mildred?" he said. "Am I beyond your censure, that you refuse to say anything to me? Have you given me up altogether? If you have, I know it is only what I deserve."

Miss Trevanion moved abruptly away from the side of the oaken window-frame, against which she had been leaning, and went up to where he was standing rather apart. She laid her hand upon his shoulder.

(To be continued.)

DON'T COUGH YOUR THROAT SORE "NERVILINE" WILL CURE YOU QUICKLY

The Annoyance of a Bad Cough Soothed Away In One Day.

Nothing so bad for the throat as coughing and nothing half so annoying as to have some one near by that is hacking, sneezing or constantly clearing the throat.

Rub on Nerviline—it will save you all further pain and distress. Even one good rub with this soothing, penetrating remedy will bring the finest relief, will take out that rasping soreness, will stop that irritating tickle that makes you want to cough so much.

Nerviline isn't something new. It has a record of forty years of wonderful success behind it.

In rubbing on Nerviline you use something safe, reliable, and sure to cure. Its action is marvelous. The way it sinks in through the tissues—the way it penetrates to the seat of the congestion is really a wonder.

For chronic colds, coughs, or sore throat you can't beat this trusty old family remedy. Its name spells cure for any sort of pain in the joints or muscles. Try it for rheumatism, rub it on for sciatica or lumbago, test it for neuralgia or headache—in every case you'll find amazing virtue and curative power in Nerviline.

Most families keep the large 50c. bottle always handy on the shelf; trial size 25c., at all dealers in medicine, or the Catarrhozone Co., Kingston, Canada.

ANTIQUES

Of all the examples of Ancient Greek sculpture still preserved in our public and private collections none have been so useful to modern industries, in all countries, as the marbles which formed the frieze of the Parthenon at Athens.

The building of the Temple at the Acropolis of Athens was commenced during the administration of Pericles, about the year 445 B.C., and occupied eleven years in building. It was constructed entirely of white marble, from Mount Pentelicum. Callicrates and Ictinus were the architects. The sculptures were produced partly by the hand and partly under the direction of Phidias, perhaps the greatest sculptor of all time, and certainly the most versatile.

Phidias was an Athenian—born 488 B.C. He was at first a painter, and afterwards became famous as a sculptor, in many materials, besides marble. He was a great worker in ivory statues and was unrivalled in the art of making statues in bronze. Wood and clay—and probably glass—were materials used by him also. His talent lay chiefly in representing the gods of mythology, though as Cicero observes "he did not copy the features and resemblances from any visible objects, but formed to himself an idea of true beauty upon which he constantly fixed his attention and which became his rule and model and guided at once both his design and hand."

The series of sculptures forming the frieze adorning the Parthenon represented the solemn quinquennial procession to the Temple of the Panathenaea, at which the whole people were represented.

As a connected subject this was the most extensive piece of sculpture ever made in Greece, its total length being 524 feet.

The principal feature of the frieze was the train of horsemen representing Athenian citizens who served in the cavalry, the rank and wealth of the horsemen being defined by the dresses and armor they wore. The horses in this section of the frieze are of exquisite beauty, and of the one hundred and ten which are introduced no two are in the same attitude, and each is characterized by a marked difference of expression. Flaxman, in his lectures at the Royal Academy, used to speak of these horses with enthusiasm. He considered them as the most precious examples of Grecian power in the sculpture of animals. He said: "They appear to live and move, to roll their eyes, to gallop, prance and curvet; the veins of their faces and legs seemed distended with circulation; in them are distinguished the hardness and decision of bony forms, from the elasticity of tendon and the softness of flesh. The beholder is charmed with the deer-like lightness and elegance of their make, and we can scarcely suffer reason to persuade us they are not alive." The large heads and thick neck are characteristic of Grecian horses, particularly those of Thessaly, to this day.

In 1674 the Marquis de Nointel ordered careful drawings to be made from these sculptures, and these fortunately have been preserved, otherwise it would have been difficult to identify and accurately arrange the fragments later on when they were set up in the British Museum.

The Earl of Elgin had secured this treasure, and by a special act of legislation in 1816—just a century ago—it was purchased for the British Museum, the price paid being about $175,000.

WOULD NOT BE WITHOUT BABY'S OWN TABLETS

Baby's Own Tablets are guaranteed by a Government analyst to be absolutely safe and free from injurious drugs. Once a mother has used them she would not use anything else for her little ones. Concerning them Mrs. George Taillon, Noelville, Ont., writes: "Please send me two more boxes of Baby's Own Tablets, for I have found them so good for my baby, I would not be without them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Spontini's Decorations.

Caspare Spontini, the composer, regarded himself in the light of a demigod, and when inspirations crowded upon him he donned a wide, toga-like gown of white silk with a border of gold and a fez of white silk embroidered in gold from which a heavy tassel hung down. With great dignity he sat down before his desk, and if a grain of dust was visible on the paper on which he penned his music he rang the bell impatiently for his servant to remove the obstacle. Spontini owned so many medals and decorations that they could no longer be accommodated on his breast. At a grand musical reunion at Halle an old musician remarked to a comrade, "See how many decorations Spontini has, while Mozart has not one." Spontini, who overheard it, replied quickly, "Mozart, my dear friend, does not need them."

Mysterious Chimney Swift.

Much has been learned about bird migration, but much yet remains to be learned, and the following is one of the most curious and interesting of the unsolved problems: The chimney swift is one of the most abundant and best known birds of the eastern United States. With troops of fledglings, catching their prey as they go and lodging by night in tall chimneys, the flocks drift slowly south, joining with other bands, until the northern coast of the Gulf of Mexico they become an innumerable host. Then they disappear. Did they drop into the water or hibernate in the mud, as was believed of old, their obliteration could not be more complete. In the last week in March a joyful twittering far overhead announces their return to the gulf coast, but their hiding place during the intervening five months is still the swift's secret.

Very Thoughtless.

Goddard had got as far as the sixth hole and was all set for a three-foot putt. Only those who have played golf know what an important moment this is and how necessary it is that everybody and everything should be quiet. Just as he brought the head of the putter back to hit the ball a young caddie came running up, waving both arms and yelling, "Hey, Mr. Goddard, that is your factory in Long Island on fire!" Goddard watched his ball go wide of the cup by at least two feet, then turned to the caddie and asked, "Don't you know enough to keep quiet when a man is trying to putt?"

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, bladder weakness, constipation, catarrhal conditions, pain in the sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment, with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength, and happiness by this method. Write to-day. Address: Mrs. M. Summers, B-x 8, Windsor, Ont.

BRITONS STILL USE WOOD.

We all remember learning long ago at school that the ancient inhabitants of the British Isles lived by the produce of the chase, and that they stained their bodies blue with a paint called woad.

It is interesting to know that this plant is still cultivated in England, and that, under the name of dyers' woad, it is manufactured into a coloring material that is much valued for the treatment of cloth.

The woad seed is sown in April and May, the harvest time being five months later, when the plant is about one foot high. The green woad is crushed, fermented, balled, dried in wind-swept sheds and finally powdered and casked. Woad was, for a long time after the period of the ancient Britons, one of the principal dyes used in England; but it was largely superseded by indigo.

It's now employed for "setting" other dyes, for its gives cloth a finish not obtainable by other means. The cloth supplied by the Government for naval, military and police uniforms is always "woaded."

Minard's Liniment used by Physicians

Cleaning Buttons.

Cut steel buttons may be polished with powdered pumice stone, slightly moistened and applied with a soft brush or cloth.

Mother-of-pearl buttons should be cleaned by covering with a paste made of whiting and water; when quite dry, brush it off and polish with a dry cloth.

Only a fool would allow the coign of vantage to burn a hole in his pocket.

HORSE SALE DISTEMPER

SPOHN'S DISTEMPER COMPOUND

You know that what you sell or buy through the sales has about one chance in fifty to escape SALE STABLE DISTEMPER. "SPOHN'S" is your true protection, your only safeguard, for as sure as you treat all your horses with it, you will soon be rid of the disease. It acts as a sure preventive, no matter how they are "exposed." At all good druggists, horse goods houses, or delivered by the manufacturers.

SPOHN MEDICAL CO.
Chemists and Bacteriologists Goshen, Ind., U.S.A.

THE BEST WAY

To Keep the Hands in Fine Condition After Working.

To loosen the cuticle on the nails and remove stains and discolorations, put a dessertspoonful of lemon juice in a cupful of warm soft water and dip the nails in it, letting them remain a few minutes.

To remove fruit stains from the finger-nails wash them with a nail brush in strong tea and afterward in clear, warm water.

To remove stains from the hands have prepared a powder made of equal quantities of powdered oxalic acid and cream of tartar. Dip the hands in water, rub a little of the powder on the stains and then wash with castile soap.

Ink may be removed from the hands by bathing in water into which has been put a few drops of oxalic acid.

To remove anilin stains from the hands bathe them in a bowl of water containing a few drops of acetic acid or some vinegar.

Delicate Young Girls, Pale, Tired Women

There is no beauty in pallor, but proof of plenty of weakness. Exertion makes your heart flutter, your back and limbs ache, and you sadly need something to put some ginger into your system. Try Dr. Hamilton's Pills; they make you feel alive, make you want to do things. They renew and purify the blood; then come strong nerves, rosy cheeks, laughing eyes, robust, good health. You'll be helped in a hundred ways by Dr. Hamilton's Pills, which are an old family remedy of great renown. Thousands use no other medicine and never have a day's sickness of any kind. Get a 25c box to-day. Sold by all dealers.

WHAT'S IN A NAME?

Well the Man who Owned This One Was Not to Blame For It.

The lawyer was in his private office when the office boy brought in a card. The lawyer took it and after one look at it frowned and then smiled. The inscription on it read: Mr. Roller Skates.

"Is it a pair or only one?" he inquired.

"What, sir?" responded the boy, not seeing the point, of course.

"That's all right. Bring him in."

The caller followed shortly, and before the lawyer could put him on the stand he volunteered his testimony. He had observed that the lawyer still held his card in his hand.

"Pardon me," he said, smiling broadly and nodding toward the card, "but I'm not to blame for it. My father's name was Skates, and my mother's name was Roller, and they gave me my mother's family name. That was sixty odd years ago and there were no other roller skates in this country at that time."

The lawyer cheerfully accepted his apology and also a comfortable retaining fee ere the caller skated away.

BINDER TWINE

Why It Will be Very Dear This Year.

The average farmer in the United States and Canada probably does not give a thought to the State of Yucatan from one year's end to the other. He doubtless never stops to think of that country on the southeastern coast of Mexico which projects out like a boot into the Gulf of Mexico and the Caribbean Sea.

He will think of Yucatan many a time, however, before he gets his binder twine next summer, for twine will be higher than it has been for years, and the farmer does not like to pay useless toll or tribute to anyone when he buys his necessities. This year he will pay for the sisal fibre and for hauling it on the ships and railroads and for spinning it into twine in the American factories, as he has always done, and which he is willing to do. But, in addition, he will also pay a liberal tax to the military Government of Yucatan and another liberal sum to the American bankers who are loaning the necessary money to maintain a complete control of the sisal market.

Why the prices will be so high is explained thus: In 1912 the Yucatan Government appointed a commission to buy and hold sisal when prices were low, in order to maintain fair prices. This commission, known as the Regulating Committee, maintains a great monopoly and a decree issued on December 3, 1915, compels all Yucatan growers of sisal to sell their fibre to the Regulating Committee. That is why binder twine is high and is likely to be higher.

A High Priced Fricassee.

Lord Alvanley, a noted wit and high liver in England a hundred years or so ago, insisted on having an apple tart on his dinner table every day throughout the year. On one occasion he paid a caterer $1,000 for a luncheon put up in a basket that sufficed a small boating party going up the Thames. Being one of a dozen men dining together at a London club where each was required to produce his own dish, Alvanley's, as the most expensive, won him the advantage of being entertained free of cost. This benefit was gained at an expense of $540, that being the price of a single fricassee composed entirely of a "noix," or small pieces from each side of the back, taken from thirteen kinds of birds, among them being 100 snipe, 40 woodcocks and [illegible] pheasants—in about 300 birds.

ELLA'S RECOMPENSE

's the most extraordinary, sud- naccountable thing I ever knew! ad been gone some time—oh, more an hour—when he came in. He ied quite distrait, and quite unlike imself, and he said he found he must o to London, and was to start by the hree o'clock train for Leuchtenberg to-day. I don't understand what is taking him away. Something about his brother. Certainly he talked a great deal about seeing James; isn't odd?"

"Yes, very odd," returned Ella, in a oice that sounded constrained to her- elf.

"Then," continued the widow, "it as quite remarkable the way he essed me to go back to London. He med restless, too; walked up and and asked where you were, as as afraid you might come in rupt us. I said I really didn't u he suddenly remembered ld have hardly time to put together, and dine, or he went off. I declare I pset. What in the world off in such a hurry? I t to consult James about I would allow my brother to me! What do you think,

Mrs. Vereker. I do not to think. Perhaps Colonel red of being here without es and so some trifling nough to call him away."

re is no use in asking ad- pathy from you, Ella; You d as a bat! It's quite plain ed to go away, and wants o, like a good girl, and cher to come to me— e this morning worry- gies about leaving you. quite made up my mind then. I shall try to get away on the thirtieth."

"That's only ten days off!"

"I know that," retorted Mrs. Vere- r. "Go and look for Frau Gudscher."

Ella was shocked to find how stunned she felt by this unexpected stroke, distressed and vexed to perceive how the idea of this comparative stranger had seized upon her imagination; and now he was gone, quite gone, probably she would never see him again. ould indifference show the indes- tender care she had from him only last This was weakness, folly, des- folly. I must say I am rather curious to know how he has disposed of his property. I believe he was very well off. I should think he would hardly make a will without naming me; but there is no knowing."

It jarred painfully on poor Ella, these constant allusions to the possible bequests made by her lost kinsman. Her spirits were broken for the time, and she was unequal to the irritating torment of Mrs. Vereker's perpetual repetition of the same phrases and idea. She was deeply thankful when the journey was accomplished; and, having duly attended to her mistress' needs, she crept to bed, trying to comfort herself with the consciousness that she was within three quarter's of an hour's drive of Kensington and Kitty.

The next morning Mrs. Vereker was much too tired, too unhappy, too generally out of sorts, to get up till she had partaken of tea and toast. Then she was much exercised in her mind by a note from her brother's solicitor, in which he explained that, for obvious reasons, he was compelled to have the funeral on that day, in the absence of any authority superior to his own; that he would, of course, show the last mark of respect to his esteemed client, but would be at his office and ready to receive Mrs. Vereker if she could make it convenient to call, as he had papers and documents, etc., she might wish to see.

"Dear me!" cried Mrs. Vereker, "I wonder who the executors can be? Old Indians, I suppose, and not in the country. Very foolish of poor James. I wish he had consulted me. I will go, certainly. I can have a brougham and drive there; and don't unpack much, Ella. I shan't go to church tomorrow. We will try and get nice lodgings on Monday. Hotels are ruinous. Isn't it strange to think of returning to London just in time for poor James' funeral? I am rather surprised Colonel Cecil did not come in last night. I suppose he will be at the funeral."

After an early and substantial luncheon, Mrs. Vereker drew away to the interview, to which she looked forward with such curiosity.

Then Ella sat down to enjoy the first moment of freedom and solitude she had tasted since the fatal telegram had been delivered. She sat long in deep thought, and shed not a few tears. But depression was abhorrent to her; her strong vitality resented it; her higher sense dreaded it as a source of weakness, and she dared not be weak with her whole future and Kitty's depending on her. She would always keep a tender, sunny spot in her memory for "Cousin James," but just now she would not think of him or of Colonel Cecil. She would be active and resolute; she would fix a day on which to leave Mrs. Vereker. She would write to Miss Griffin and Kitty; she had had no time to do so before leaving Friedrichstadt.

After arranging Mrs. Vereker's belongings, Ella sat down to write, and soon her intended notes swelled into letters. She had finished and was in the act of closing them, when a waiter suddenly threw the door open and announced "Mr. Dimsdale."

"Oh, Mr. Dimsdale! How good of you to come! How glad I am to see you!" cried Ella, starting up, and feeling inclined to embrace the short, broad, rather red-faced gentleman who came in.

"I have been very anxious to see you," he returned, shaking hands cordially with her, "and I am glad to see you alone. But," he continued, drawing a chair to the table at which she was sitting, "I am sorry to say I am the bearer of bad tidings."

"Ah! is Kitty ill? not dangerously ill?"

"No, no; there's nothing the matter with her; but this sudden death of poor Lyall's has been a grave misfortune for you."

"I am sure I have lost a kind, good friend," returned Ella, struck by his tone.

"My dear, you have lost a large fortune. Did you not know that he had a will drawn up by which you were named residuary legatee; that I was named one of your guardians, and a friend of his own, a Colonel Cecil, the other?"

"I had no idea of this—not the least!" cried Ella.

"So much the better, as things have turned out. I have had a long walk with Mr. Lyall's solicitor, who tells me his late client came back rather unexpectedly from Germany, quite full of making a new will. Smalley (the solicitor) was out of town, and there was a delay in setting to work. The will was, however, got ready for signature; it leaves two thousand pounds to Colonel Cecil, two thousand to Mrs. Vereker, sundry small sums and annuities to old servants and to employees, and the residue, which must be more than thirty thousand pounds, to yourself. On Monday last Smalley attended at Mr. Lyall's lodgings with the will, for his signature; Lyall welcomed him cordially, and said he would be glad to finish the business. He got up to ring for the landlord to witness the signature; suddenly gave a short scream or moan, as if in agony; fell to the ground, and never spoke again. Of course doctors were called in, and everything done, but in vain. Sir Herbert Golding, the greatest authority on heart disease, who had been attending your cousin, said he quite anticipated his dying in that sudden manner. These are the facts of the case. Mr. Lyall dying intestate (he had destroyed his former will), Mrs. Vereker succeeds to everything; no one else gets a fraction. I should think she must do something for you."

"I do not expect much," said Ella, shaking her head sadly. "How good it was of poor Cousin James to think of me! I should, of course, have been very glad to have some money, but I am not disappointed—I am no worse off than I was. I always looked forward to work."

"But I am awfully cut up about it," said her good-natured friend. "It was such a chance for you! Surely, when the intentions of the deceased were so clearly shown, Mrs. Vereker will give you the two thousand pounds her brother intended for herself."

"I wish she would," returned Ella. "Time will show."

"And are you going to stay on with her?" asked Dimsdale.

"No, I shall leave next week; I am anxious to find an engagement for—"

The entrance of Mrs. Vereker cut short her speech. She looked flushed and excited, and did not seem to notice there was any one in the room besides Ella.

"Here is Mr. Dimsdale," said the latter.

"So I see. Well, Mr. Dimsdale, I suppose you are here to put up this young lady to urge absurd claims upon me. I really don't know what people mean! There is Mr. Smalley making the most ridiculous propositions. I will not be dictated to."

"Really, madam, I do not understand you," said Mr. Dimsdale, stiffly.

"I dare say you do, Ella," said Mrs. Vereker, turning sharply on her. "I have good cause to be angry with you for your mean, underhand ways when I had taken you up and done everything for you, to go and induce my brother to leave his money away from me! You ought to be ashamed of yourself." She paused, out of breath.

"I suppose it is useless to assure you that I was utterly ignorant of Mr. Lyall's intentions," said Ella, wearily.

"I don't believe any one had an idea of his intentions except his legal adviser," said Mr. Dimsdale.

"Providence will not allow such intentions to be carried out," cried Mrs. Vereker; "and now, after doing her best to injure me, I suppose Ella expects me to provide for her!"

"Indeed I do not; I can work for myself. I ask nothing from you but to let me go and look for something to do."

"She cannot keep you," put in Mr. Dimsdale.

"Well, that sounds sensible," returned Mrs. Vereker, looking hard at her, "and remember, Ella, if you are wise, you will not listen to stupid, interfering would-be friends, but trust to me. You will find that your best plan, I can tell you."

"No doubt it is," said Mr. Dimsdale, seeing the uselessness of trying any but fair means, "and I will intrude upon you no longer. You will let me know when you remove to Miss Griffin's, which will be, I suppose, your destination. Good morning, Mrs. Vereker; good-bye, Ella."

"Yes, it is far the best to trust to me," said Mrs. Vereker, looking after him in triumph, "and if you show a proper spirit I will try and overlook the way in which you influenced my brother."

"I wish I could convince you that I never knew or imagined that Mr. Lyall would mention me in his will. I never gave it a thought, and, believe me, I want nothing from you. I only wish to return to Miss Griffin's on Wednesday. You can, I am sure, find at least a temporary maid."

"Oh, I dare say I can. I can afford to give good wages now. But I am glad to see you are sensible; you shall go on Wednesday if you like, and I will make you a handsome present. Now, as I am quite ready to forgive—I am naturally forgiving—I will not again mention anything unpleasant, and you must write some notes for me at once. It is very curious that Colonel Cecil went straight away from the funeral somewhere out of town. I will write and ask him to dinner—the note will be forwarded—just come and help me off with my bonnet, then you can write out several things before dinner. My head aches, what with excitement and annoyance."

The three days which ensued were confused and hurried.

Mrs. Vereker being greatly engaged with her own solicitor and her late brother's, threw upon Ella the tremendous task of finding a suitable person to replace herself, at least of selecting suitable specimens for Mrs. Vereker to interview.

Besides this she had letters to write and memoranda to copy, so she gave up any intention of paying Kitty a flying visit, as she should so soon be again an inmate of Miss Griffin's establishment.

But in spite of all her efforts to be strong and brave, she had never, even in her worst days of struggle and shabbiness, felt so depressed and unequal to face the future.

Her stay with Mrs. Vereker had revealed possibilities of which she had never before dreamed—revealed them only to show they were far away out of her reach. Life would never again be the same as it had been before her visit to Friedrichstadt.

It seemed so strange that for an instant she had touched both love and fortune, only to see them melt like mist-wreaths before the first gleams of real daylight.

Still she worked earnestly and intelligently for her employer to the last, occasionally giving a thought to the probable amount which Mrs. Vereker would consider a handsome present; perhaps it might be a hundred pounds, or, if she was in a generous mood, two! That would be a grand addition to her little capital.

The day before she was to return to the only approach to home she had known since her mother's death, she had accompanied Mrs. Vereker in a shopping expedition and on their return they found Colonel Cecil's card and a note, in which he regretted he could not accept Mrs. Vereker's kind invitation, without assigning any reason.

"Now, isn't that provoking!" cried Mrs. Vereker. "It will be hardly proper for me to have him here when I am alone!" and she drew up her head with a little giggle. "Couldn't you stay a few days longer, Ella?"

"That is quite impossible, Mrs. Vereker."

"I must say you are not too obliging. Never mind, you have not behaved badly on the whole, and I shall not forget it."

At length Ella's last day of residence with her kinswoman dawned, and the morning hours were fully occupied by Mrs. Vereker, who seemed anxious to use to the utmost Ella's final moments of service.

"I shall say good-bye to you now," said the widow, as a waiter removed the luncheon. "I have to see Lady de Courcy at two, about that nice woman who lived with the Duchess of Dumfries."

"The one that wants sixty pounds a year?"

(To be continued.)

It was after the wedding. "What did you think of the bride?" asked the spinster. "Um—rather amateurish, I should say," replied the woman who had been married four times.

If it wasn't for the coffee mother used to make, many a married man would be at a loss for something to kick about.

SUNDAY SCHOOL LESSON

Lesson II. April 9, 1916.

Aeneas and Dorcas.—Acts 9: 32-43.

Commentary.—I. The healing of Aeneas (vs. 32-35). 32. As Peter passed throughout all quarters—From the preceding verse we learn that the Christian church was at this time enjoying a season of rest from persecution. The apostles were carrying out the parting command of the Master, as he was taken from them, and were preaching the gospel in Judea and Samaria. Their headquarters were still at Jerusalem and from there they made their journeys to spread the truths of the gospel. On such a tour as this Peter was proceeding when the events here recorded took place. Came down—From the elevated regions of Judea. Jerusalem is about two thousand five hundred feet above the sea, and the places here mentioned are in the low plain along the seacoast. Also—This word indicates that Peter had been laboring among the Christians on the uplands of Palestine. Saints—Holy ones. This name is commonly applied to Christians in the New Testament and especially by Paul in his epistles. Lydda—The Hebrew name of this place was Lod. It is situated about twenty-five miles northwest of Jerusalem and twelve miles south-east of Joppa, and is on the line of railroad which connects Joppa and Jerusalem. It now has a population of seven thousand. 33. He found a stricken man—It appears that Peter was seeking for those who needed help. Aeneas—All we know of this man is what is recorded in this and the following verses. Eight years—The condition of Aeneas was, humanly speaking, hopeless, and any cure must be considered as supernatural. Palsy—The sick man was a paralytic. 34. Jesus Christ maketh thee whole—Peter keeps himself in the background and exalts Jesus. It is not Peter's skill or power that gives health and strength to the relaxed man, but it is Jesus Christ. Peter has implicit, active faith in his Master, for he speaks of the cure as already accomplished and complete. Arise, and make thy bed—The bed was a sleeping mat laid upon the floor, and to make it meant to roll it up that it might be put away. For Aeneas to comply with this command was to demonstrate the fact that he was healed. He arose immediately—The man who "had kept his bed eight years" at once showed himself to be a well man. 35. All ... saw him. Saron doubtless means the plain of Sharon in which Lydda is situated. The case of Aeneas was well known in Lydda and the surrounding region, and an event so marvellous as his healing would be quickly and widely reported. Turned to the Lord—The people were convinced that it was by the power of Jesus that the paralytic was healed, and they were brought to believe in him as the Messiah and as their Saviour.

II. Dorcas raised from the dead (vs. 36-43). 36. Joppa—Situated on the Mediterranean Sea. This was a city of the Philistines during the early part of Israel's occupancy of Canaan and was not wrested from them until David's time. It was then the seaport of Jerusalem, as it is at the present time, although it does not possess a good harbor. Its present name is Jaffa, and it has a population of more than fifty thousand, more than half of whom are Mohammedans. A certain disciple—Women as well as men were called disciples. Tabitha... Dorcas—Tabitha is the Aramaic form of the Hebrew proper name which in Greek is Dorcas. The name in either language means gazelle. On account of the beauty and gentleness of this animal the name was frequently given to girls in ancient times. Was full of good works and almsdeeds—Dorcas not only did good deeds, but she was devoted to them "as if her heart was overflowing with kindness, which found expression in good works and almsdeeds." 37. Had washed—The custom prevailed then as now of washing the bodies of the dead in preparation for burial. "The primitive Christians washed the bodies of their dead, not only out of decency and affectionate respect for them, but as a token of their firm belief in the resurrection of the dead."—Clarke. Laid her in an upper chamber—Instead of burying the body immediately, as was the custom in that land then, as it is now, it was kept, in the hope that Peter, who was not far away, might be the means of her restoration to life. 38. Lydda was nigh to Joppa—The distance is about twelve miles. Disciples had heard that Peter was there — The Christians were interested in the expected visit of Peter to them and were probably informed by himself when he would be at the places he would reach on his journey. Sent unto him two men—Some commentators suppose messengers were sent to Peter while Dorcas was yet alive, but the narrative does not suggest that interpretation. Would not delay—They do not expressly utter the request for a miracle. Only the hope he will not delay; just as if she might seem to go too far to hear and return.—Whedon.

39. Peter arose and went with them—The apostle was interested in the case that urged his speedy attendance at Joppa, and it is reasonable to suppose that the spirit gave him direction to go. The widows stood by him weeping. It seems certain that the widows here mentioned were those whom Dorcas had relieved by her "good works and almsdeeds." Some writers think that they were associated with her in her works of charity. Their weeping showed their affection for her. Showing the coats and garments—They included outer and inner garments. Some of them may have been worn by those to whom they were given, and some may have not yet been given out to the needy. While she was with them—While she was alive. 40. Put them all forth—Peter was present when Jesus raised the daughter of Jairus to life. On that occasion all were excluded from the death chamber but Peter, James and John (Matt. 9: 25; Mark 5: 37.) Peter desired to know fully the will of the Lord in the matter and he desired that nothing should hinder his communion with God or obstruct his faith. Kneeled down, and prayed—He assumed the attitude of a suppliant and his prayer was heard. He was assured that the Lord would raise Dorcas to life. Said, Tabitha, arise—It was not presumption for Peter to speak thus; it was faith. He had been commissioned and empowered for this kind of work. Opened her eyes—The first manifestation of life. Sat up—Strength was coming with the return of life. 41. Gave her his hand—In raising Jairus' daughter to life, Jesus took her by the hand before he bade her to rise. In this case Peter assisted Dorcas to arise after she had come to life. Called the saints and widows—The Christians of Joppa and those who had shared her bounty or joined in her labors were deeply interested in her restoration to life and they were to be the first to greet her now raised from the dead. Presented her alive—They had prepared her body for burial, but with the cherished hope that through divine power exerted through Peter she would be restored to them. Their hopes were fully and joyously realized.

42. Known throughout all Joppa—An event of such a character must become quickly known throughout the city. Many believed in the Lord—There seems to be intended by these words a fuller acceptance of the faith of Jesus than when it is said they turned to the Lord (v. 35). The belief here wrought by the resurrection of Dorcas is like that mentioned of those who were won to the faith by the raising of Lazarus (John 11:45). This miracle was wrought to open the way for a larger reception of the gospel, to strengthen the faith of those who were already believers, and to relieve the sorrows of those who were mourning. 43. Tarried many days in Joppa—The call for Peter to hasten to Joppa was evidently inspired by the Spirit, and by the same Spirit Peter was impressed to go. The raising of Dorcas rendered Joppa a most fruitful field for his labors. With one Simon a tanner—Simon was a common name among the Jews. This Simon was distinguished from others of the same name by calling him a tanner. The business of a tanner was considered in a sense unclean by the Jews, inasmuch as it necessitated contact with the dead bodies of animals. It appears that Peter's prejudices were giving away, since he was willing to associate with one who was not a rigid Jew.

Questions.—What was the attitude in Judea at this time toward Christianity? What was the work of the apostles? Where is Lydda? What had Peter been doing? Who was healed at Lydda? Describe the disease. Describe the healing. What effect did this have on the people? What can you say of the character of Dorcas? Whom had she helped? Describe the manner in which she was raised. What effect did this have? With whom did Peter lodge?

PRACTICAL SURVEY.

Topic.—Christian faith exercised.

I. In the healing of disease.

II. In the restoration of life.

I. In the healing of disease. With the conversion of Saul the persecution of Christians subsided. The Jewish authorities were in turn made to suffer opposition through the effort of the Roman emperor to set up his statue in their temple. This was an encroachment upon them quite opposite to anything they had met in the disciples of Christ. With this altered condition the apostle Peter found opportunity to visit the various companies of saints who had been driven from Jerusalem during the persecution. Visitation was not for the purpose of magnifying his official rank among the disciples, but to use the power bestowed upon him for the upbuilding of all believers. He was an example of modesty and power combined, so characteristic of real greatness. His faith in the power of Jesus was demonstrated for the upbuilding of the church. Not only was suffering relieved and sorrow turned to joy, but far and near it was seen and declared that Jesus had power to save. Divine love and divine power shone forth in the miracles of Peter so that many were won to Christ at each place where he visited. Peter's words to Aeneas witnessed to the actual presence and the divine power of Jesus Christ. His words supplied a firm foundation for the sick man's faith in Christ. The miracle wrought was convincing proof that Jesus still lived and continued his work among men. The healing of Aeneas resulted in the conversion of many. The spiritual interests of the church were upbuilt thereby. Divine healing exalted Christ and led to seasons of revival. The value of apostolic ministry was recognized and the purpose of miracle set forth. The power and influence of Christianity continued to spread. Persecution had made the church strong on defensive lines. Apostolic visitation was fruitful in aggressive spiritual expansion.

II. In the restoration of life. It was a sad and tearful congregation that greeted Peter at Joppa. The stricken church sent for him. They were in sore need of comfort. They naturally turned to one on whom the Lord had bestowed other and greater gifts than physical healing. The company at Joppa afforded a very fine example of the oneness and sympathy that existed among the primitive believers. The brief biography of Dorcas is exceedingly full, though condensed in a single paragraph. The tears and gratitude of the widows were a genuine testimony to Dorcas and her character. The title "disciple" referred to her faith. Her almsdeeds described her love. In her case discipleship included not only the belief and profession of Christ's doctrines, but also a conformity to His example. Here was the religion of the heart and life. Her method has been perpetuated and her name immortalized in the annals of the Christian church. A character like Dorcas, one who lived to do good, could not fail to exert an influence. The crowded presence of the weeping company was not in harmony with the great emotion surging in the apostle's heart. It was for the good of the kingdom of God that Peter was inspired to ask for the return of Dorcas to life. The results abundantly justified the exhibition of miraculous power. It was accomplished through the living Christ. The whole event sets before the world the word of God with power, the church with its blessing, the office of the ministry with its love. The entire circumstance may be related in few words while the lesson it has taught for centuries is one which cannot be estimated throughout the church. Individuals and families have been comforted in the prospect of reunion. At Joppa the scene is described touchingly. Weeping widows, apostolic praying, an awakening call, restoration to life, friendly assistance and lastly the presentation of the loved one to her friends. The event thrilled the church with joy and all Joppa with wonder. It was a marvelous distinction conferred upon Dorcas and a marvellous exhibition of divine compassion toward the needy widows, and a marvelous testimony to the claims of Christianity. The humility and faith of Peter are clearly brought to view. Christianity was established above the prejudices of worldly wisdom. The disciples were enabled to declare Christ's power among His followers. T.R.A.

HOW CANADIAN WON THE V. C.

(George S. Craig, in Detroit News.)

This story is about an officer, one of the jolliest, cleanest, squarest officers in our battalion—Lieutenant Campbell. I think he was from London, Ontario. He was in charge of the machine gun section. Ride! That man just seemed to have grown on a horse. And game! I'll never forget him before the charge, walking up and down the line—we were all flat on our stomachs in open ground—swinging his little bamboo cane and smoking a cigarette.

Campbell always was light and frivolous when he was going into battle. The prospect seemed to inspire him with a kind of superb gaiety, and he kidded the men till they forgot that the shells were falling around them and that every once in a while a poor guy rolled over on his side with a little grunt and then was silent forever.

Well, we charged, and drove the Germans back for quite a distance. Then they got reinforcements from somewhere and pressed us steadily back. It was all hand-to-hand fighting, with the bayonets being used freely. I had gone forward with the "Suicide mob," as the bomb throwers were called, and had come through without a scratch, but we were out of bombs, and things were breaking against us. The only place for us to make for was the trenches, and to reach them we had to face a murderous machine gun fire. The whole battalion was in danger of being wiped out there.

Then Campbell pulled his hero stunt. Keep the circumstances in mind. Here we were at close quarters, with the Germans pouring on us in droves. If we could reach our trenches we would have a chance, but to get there through the hail of fire from all sides and at the same time save ourselves from being slaughtered by the superior forces in front of us seemed impossible. The only thing that could stop the rush of Teutons was machine gun fire. Remember that these little devils spit 650 shots a minute. Troops advancing shoulder to shoulder against a gun firing at maximum speed and turned slowly from side to side have about as much chance to avoid bullets as a dense mob has to dodge water drops from a fire hose played on it at close range.

Our machine gun section was badly shattered, and there was but one gun left. A section, you know, is carried by three men. One has the gun itself, the other the tripod on which to set it, and the other the ammunition.

Lieutenant Campbell had grabbed the gun part from a falling man, and a corporal whose name I don't remember had the ammunition. The fellow carrying the tripod had been killed, and the tripod itself captured.

Campbell and the corporal got in the rear of our retreating line and directly in front of the German rush. In less time than it takes to write it, they had figured out the one thing that would save the battalion from being cut to pieces before it gained the trench shelter. Campbell dropped to his knees. The corporal mounted the gun on his back and worked it while a third chap fed the ammunition.

Well, when that gun began to spit out its more than ten shots a second at the closely packed Germans the situation was changed immediately. They were brave enough and tried to press forward but the men in front fell so fast that the second line had to climb to get over them. That gun firing its 650 shots per minute simply deluged their solid ranks with lead, and at close range the execution was terrific.

I don't know how long Campbell stayed on his knees, while the corporal fired, but I do know that the Germans sent rank after rank up in a wild effort to break through. They couldn't go around because the approach was between two hills. They weren't able to get enough by that awful fire to hit us hard and our battalion reached the trenches with only the normal number of killed and wounded. The lieutenant and his machine gun had saved us.

When was all over Campbell fell unconscious—not from a wound, but from pain. The corporal was killed as he was dragging him to shelter. Pain—that man had a right to fall from it. The gun had got hot from the firing and it had burned through his uniform, through the naked flesh to the backbone!

Yes, Campbell recovered, and was given the D.S.O.—Distinguished Service Order—a decoration awarded officers. He recovered to do exactly the same thing again when part of our crowd was in a tight fix at Givenchy. The only difference was that this time the trench had been blown up by a mine and was in such a mess that there was no place to set the tripod. Campbell knew what to do, and he did it. He did it till the battalion was saved, and his back once more just a seared mass of burned flesh.

I know what his back looked like, for I saw it when we got the body back to the lines. Campbell and the men who tended the gun with him had stuck just a wee bit too long.

Well, anyway, he got the V. C.—at least his folks back in London did.

Nuremberg.

Nuremberg was once almost the richest and most famous town in Europe. The well known saying of Pope Pius II. that a Nuremberg citizen was better off than a Scottish king was justified by the accounts that have been preserved of the town and its burghers. In the fifteenth century there came from Nuremberg the first watches, known as "Nuremberg eggs," the first cannon, the first gun lock, the first wire drawing machine, the clarinet, certain descriptions of pottery and the art of painting on glass. For 500 years its walls defended the valley of the Pegnitz against all enemies. Four hundred towers once topped the walls, but only about a third of them now remain.

The Change of a Word.

"Spanking" did not suggest chastisement originally. It was unknown to Johnson in this sense. To him a "spanker" meant "a person who takes long steps with agility." Rapid motion seems to be the root idea of the work "spank," which is not merely representative of the sound of the act, as "slap" and "smack" are. The low German "pakkern," or "Spenkern," to run and spring about quickly, is close to the original meaning: hence a "spanking pace," a "spanking breeze" and a "spanker," in the sense of an active and sturdy person.

Zepps. and Aunt Sarah

As was our usual custom, we had retired early. So it was just after 10 when my dreams were rudely destroyed by a sudden punch in the ribs.

"Sh!"

My wife held up a warning finger.

"Didn't you hear a whirring noise? Listen, John, for goodness' sake! What is it?"

I kept my presence of mind.

"It's only Aunt Sarah snoring," I said, calmly.

Aunt Sarah is living with us, temporarily. At least, that is her idea of the matter. To me it seems that the time when Aunt Sarah did not form one of our household is so remote that the Norman Invasion is a recent historical event in comparison.

"It's not!" cried my wife, excitedly. "It's a Zeppelin!"

Oh, these women! How they know things!

As she spoke, there was a loud crash outside. The windows rattled, and an indescribable odor—as unpleasant as it was alarming—filled the room.

"The asphyxiating gas!" gasped my wife.

Now, it was just possible that Aunt Sarah was frying stale fish and sausages over a leaky paraffin lamp, and had set alight her false hair in the process. But such a combination of peculiar circumstances was more than unlikely.

I concluded that Emily was right.

When I have made up my mind that a certain course of action is advisable I am not the man to hesitate.

Our coal cellar door was, unfortunately, closed and locked, as we discovered simultaneously by bruising our foreheads and noses.

Our first thoughts—instrugled by a second violent explosion—were for poor Aunt Sarah.

"If she wakes," said Emily, anxiously, "she won't hear anything—being as deaf, poor dear! Do hold that candle more carefully, John; the grease is dripping all over your clothes!"

I put the candle gingerly on the grimy floor, and tried to look dignified. "Outside," I said, "men and women—our own flesh and blood—are shivering under the fire of these cowardly bomb-dropping fiends. Heaven knows what destruction they have wrought already, or how many lives have been lost! In such circumstances, Emily, we have something more solemn and serious to think about than grease spots. What is to be done about Aunt Sarah?"

"If we are to practise loving our enemies," said my wife, "it would be easier to begin on Aunt Sarah than on those atrocious Germans!"

"I don't regard Aunt Sarah as an enemy," I replied, "and therefore shall not attempt to practise loving her. I look upon her with the icy indifference due to earthworms. But, whatever she is, it is quite clear that she cannot come down into the cellar here with us. For one thing, the door is not wide enough. In the second place, it would take her at least an hour to dress, by which time——"

Another loud explosion, followed by a penetrating odor that made us cough violently and reel into each other's arms for support! Before we could make up our minds what to do, something occurred which literally froze the marrow in my bones. It was a loud yell of laughter.

Who but a fiend with a heart of stone could laugh in such appalling circumstances?

"The Germans!" whispered my wife, clutching my arm hysterically. "They must have actually landed. They are here—in our back garden!"

And Aunt Sarah was upstairs. Or had the barbarians found her and roasted her in her dressing gown?

"There is only one thing to be done," I said, heroically. "Put out the light. Close the cellar door and lock it on the inside. I am sorry for Aunt Sarah; but if the Germans find her—at least they will not eat her. We will bury her afterwards with military honors—if we survive."

"I am not vindictive," said Emily, sadly; "but the way in which she has been grumbling lately at the bacon for breakfast has made me tired, And we always give her the very best back rashers."

"Aunt Sarah," I said solemnly, "will be only one more innocent victim of the ferocity of the Huns. We need not shed crocodile tears, but we can respect her memory."

"She was going to alter her will tomorrow," murmured his wife. "She told me so, and she said we should be the losers by it. It is strange how human plans are upset."

"I am beginning to love the Germans already," I replied.

How long we should have stayed there, holding our noses, and shivering in the darkness I cannot say, but something happened which put a stopper on our little scheme of self-sacrifice for all time. I heard the loud, jovial voice of our next-door neighbor shouting:

"Hallo! Are you all asleep in there? Come out and see my new motorbike. Bang on the door, George! Surely they haven't gone to bed yet!"

And Aunt Sarah—who knows nothing of our half-hour agony in the coal cellar—still growls at the bacon and gives no hint of leaving us.—Answers.

VALUE OF A PASSPORT.

The Odd Experience of a Stranded Tourist in Paris.

"Until you go broke in a foreign country you never can realize just what a useful thing a passport is," said the returned traveller. "It not only enables you to get into a country; it also helps you to get out, sometimes in a most unexpected way. Everybody abroad thinks well of a passport, but nobody sets quite as high a value upon it as a pawnbroker.

"Owing to a delayed remittance I had occasion to visit one of those men in Paris. The article I offered for security was worth many times the loan requested, but he refused an advance on account of unsatisfactory references. My temporary address in Paris and my permanent address in Washington were not sufficient guarantee of my honesty.

"Just as the case assumed a desperate complexion the broker suggested a solution of the difficulty.

"'Have you a passport?' he asked.

"I had, at the hotel.

"'Fetch it,' he said. 'If that looks all right, I'll let you have the money.'

"Up to that time my passport had been a useless piece of luggage; then I blessed the foresight that had bidden me secure it."—Washington Star.

Was All Choked Up

Could Hardly Breathe.

BRONCHITIS

Was The Cause; The Cure Was

DR. WOOD'S Norway Pine Syrup.

Mrs. Garnet Burns, North Augusta, Ont., writes: "I caught a dreadful cold, going to town, and about a week after I became all choked up, and could hardly breathe, and could scarcely sleep at night for coughing. I went to the doctor, and he told me that I was getting bronchitis. My husband went to the druggists, and asked them if they had a cough medicine of any kind they could recommend. The druggist brought out a bottle of Dr. Wood's Norway Pine Syrup. I started using it, and it completely cured me of my cold. I cannot tell you how thankful I was to get rid of that awful nasty cold. I shall always keep a bottle of Dr. Wood's Norway Pine Syrup on hand, and I shall only be too glad to recommend it to all others."

Dr. Wood's Norway Pine Syrup is a remedy that has been on the market for the past twenty-five years, and we can recommend it, without a doubt, as being the best cure for coughs and colds that you can possibly procure.

There are a lot of imitations on the market, so when you go to your druggist or dealer see that you get "Dr. Wood's;" put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

The genuine is manufactured by The T. Milburn Co., Limited, Toronto, Ont.

Scientific Odds and Ends

The Cuban sugar crop of the present season promises to be larger and better than ever. There are 184 mills at work grinding cane, whereas there were but 176 last year.

The Columbian Government has undertaken to encourage silk culture by an appropriation of $10,000 and other important inducements to silk growers and manufacturers.

The death rate in the United States for 1914 was 13.6 per 1,000, the lowest ever recorded in that country.

The French fishing fleet off the Newfoundland banks, consisting of 11 steam trawlers and 25 sailing vessels, caught 23,294,428 pounds of cod.

Opium is third on the list of Greece's exports, following tobacco and currants.

A $5,000,000 contract has been placed in New Zealand by Great Britain for cheese for the army. This is a fifth of the cheese product of the island.

The homing capacity of the terns has recently been made a subject of investigation. At Bird Key, Dry Tortugas, birds were caught in their nesting places, tagged, marked with paint on head and neck and carried in large cages to a distance, whereupon they were liberated and watch was kept for their return. It was found that "the noddy and sooty tern can return from distances up to 1,000 miles in the absence of all landmarks, at least so far as the terms 'landmark' is understood at present." A return from the open sea was found to be effected as readily as from a place on the coast. Birds returned from Galveston, from Cape Hatteras, from Havana, etc. In these cases, however, a certain percentage were lost.

The use of peat as fertilizer in the United States is growing rapidly, $250,000 worth in 1914, against $170,000 worth in 1913.

Births among the negroes are greater than among the whites, but owing to the larger death rate among them, especially of the young, the increase of the blacks is rapidly falling behind that of the whites.

Among the patents recently granted was one to Edison which contemplates the manufacture of phonograph records on a base of paper, which, it is promised, will make a much cheaper and more durable record than those at present in use. It is contemplated that the paper base shall be coated with a solution of diphenylamin with a larger proportion of shellac and some other minor ingredients. It is also possible to make the recordings on the plate much finer than heretofore so that the capacity of the record will be increased.

Bolivia's chief exports are tin and rubber.

Pure water has a bluish color.

Damascus in Syria is the oldest of all existing cities.

The bamboo trees flower once in every fifty years.

An adult man produces in twenty-four hours enough heat to boil five or six pints of water.

Heart Would Beat Violently. Nerves Seemed to Be Out of Order.

The heart always works in sympathy with the nerves, and unless the heart is working properly the whole nerve system is liable to become unstrung, and the heart itself become affected.

Milburn's Heart and Nerve Pills will build up the unstrung nervous system, and strengthen the weak heart, so that the sufferer will enjoy the very best of health for years to come.

Mrs. John N. Hicks, Huntsville, Ont., writes: "I am sending you my testimony for the benefit I have received from using Milburn's Heart and Nerve Pills. As a nerve and heart builder they have done wonders for me. At times my heart would beat violently, and my nerves seemed to be all out of order, but after using a few boxes of Milburn's Heart and Nerve Pills I feel like recommending them to others that they might receive benefit as I did."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years, and are universally considered to be unrivalled as a medicine for all disorders of the heart or nerves.

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Women's & Misses' New Spring Coats

These charming New Coats are so varied and so well designed that they include styles suited for every type of figure.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by a Staff of Live Correspondents

MAPLE HILL

The regular monthly meeting of the Farmers Club will be held at the home of August Pletsch, next Tuesday, April 11th. There will be a debate, Resolved that the Licensed System is better than Prohibition.

Mr. Frank Little left for his home in Kerrobert, Sask., on Tuesday.

A few of our young people journeyed to the home of Mr. James McWhinney to a taffy-pull and report a very sweet time.

The water has been so high at the Power House that they were unable to run for two or three days last week.

MAPLE HILL HONOR ROLL

Pte. Stewart Pinkney, Pte. Norman Wilkin, Pte. Michael Hunt, Pte. Geo. Cunningham, Pte. Clayton McWhinney, Pte. Herbert Lines, Pte. Percy Lines, Pte. Thomas Liddle, Pte. Chas. James, Pte. Fred Service, Pte. Joe Scales, Pte. Frank Scales, Ptes. Wm. Riehl, Gilbert. Liddle. Wm. Weldner.

We are proud to think that so many of our boys are doing their "bit" in khaki.

VESTA

The funeral of the late Mr. Wm McGill Sr. took place to the North Brant R. C. cemetery on Tuesday April 4th inst.

Syrup making is in full swing in this vicinity.

The farmers are glad to see the fair spring showing its face at last.

EAST BRUCE

Mr. Dunc McArthur is engaged with Mr. Tom Houston for the summer.

Mr. John Rose made a business trip to Tiverton last week.

The leaving of the snow did not make a flood like the January thaw, the Willow Creek wasn't within two feet as high.

Miss Tena John left for Regina last week to visit friends.

Mr. John and Wm. Snowdown of Ashfield are visiting their uncle, Mr. Wm. Snowdown.

Pte. R. Mills is laid up with the measles.

Mr. M. Nelson has rented Mr. Evert. Westman's farm.

Mr. John McKay has started the saw-mill again. There are as many logs as other Springs.

Cattle buyers are around buying their grass cattle. The average price is about 7 cents.

Mr. John McGillivary received a kick on the face from a horse. The cut required seven stitches.

Mr. John Rowley, a well known resident of the Base Line, Greenock, died very suddenly on Thursday night. He was about forty years of age and leaves a wife and family of five children. He had been sick only two days and was to have been operation on but passed away before the specialist, Dr. Lucey, could get here from Guelph. The funeral, which was held Sunday afternoon to Starkvale Cemetery was under the auspicies of the I. O. O. F. of which the deceased was a member.

OTTER CREEK

Mr. Henry Steinhagen lost a valuable horse and Mr. Conrad Hossfeldt lost a valuable cow. The cow apparently seems to have choked.

Cooking maple syrup is the order of the day.

BORN—To Mr. and Mrs. George Scott, a son.

Mr. C. Voigt of the South's milling staff is on the sick list. His brother has taken his place for the time.

Mr. Jacob Miller is also on the sick list.

The funeral of the late Mrs. Amos Pletsch took place from the residence of her parents, Mr. and Mrs. Henry Dippel, fourteenth con. of Carrick. The remains were laid to rest in the Evangelical cemetery, 10th concession, while the choir sang the very appropriate hymn, "There will be no dark valley." Rev. L. H. Pletsch preached in German from Job 7-8, Isaiah 38-12 and in the English language, 2 Corinthians 4-17. The deceased was born in Alsfeldt, Grey County, in the year 1890 and died March, 29 1916, after a lingering illness of three years. She leaves to mourn her early departure, husband, parents, five brothers, seven sisters and many relatives and friends. Her favorate songs were sung at the service: Lead Kindly Light, and Sweet Rest at Home. The coffin was strewn with flowers which show the high esteem in which she was held. There were present the relatives: Mr. Samuel Hessgauer, Berlin, Miss Hetting, Bridgeport, Mrs. Hyple, Clifford, and Mr. and Mrs. Noah Darbecker, Listowel. We extend our heartfelt sympathy to the bereaved friends.

Light after darkness,
Strength after weakness,
Joy after sorrow,
Rest after weariness,
Sweet rest at last.

HANOVER

An old-time Hanoverian and a much esteemed lady passed away in Hanover on Tuesday of last week in the person of Mrs. James Lockie, at the advanced age of 78 years. Her maiden name was Ellen Matilda McClung, the fourth daughter of Mr. D. McClung Sr., who died 15 years ago at the ripe old age of 93 years.

Surrounded by the members of her family, the remains of Mrs. Anthony Wagner, were tenderly laid away in the family plot, in the Hanover cemetery, on Tuesday of last week. The remains were brought from Southampton where Mrs. Wagner died, at the home of her daughter, Mrs. Henry Grasser.

The members of the Saugeen Chapter, I.O.D.E., congregated at the home of Mrs. Kirchner to bid farewell to Mrs. G. S. Wilson, who left for Winnipeg. Mrs. Wilson has been associated with the I.O.D.E. since its organization here in 1914, was its 1st Vice-Regent and one of its most enthusiastic workers. A gold-handed umbrella, suitably engraved, and the new I. O. D. E. clasp were presented by Miss Martin, while Miss Hahn read a beautiful address.

Garfield D. Schaefer, recently of Hanover, who went to Hamilton last January, was instantly killed at the Dominion Steel Foundry plant at Hamilton when a cable he was handling broke, a 75 pound pulley block falling and smashing his skull. Deceased was a son of Mr. Henry Schaefer, and was a genial, manly young fellow.

CAROILL

Mr. Geo. Sirns spent a few days last week visiting his brother John in Toronto.

Mr. H. E. Burrows of International Harvester Co, Harriston, called on his local agent, Freeman Taylor, on Thursday.

Messrs. William and Karl Cliff were in Durham on Friday. Lew, who has been visiting there for the past month, returned with them.

Mr. John Hall, our popular auctioneer, was in Walkerton on Monday.

Rev. Diehl of Paisley was a visitor at the Rectory on Thursday.

Mr. Joseph Kunkel left on Thursday for a months visit with his son Henry at Powesson.

Mr. Robt. Loughleen was in Barrie a few days last week visiting his son, Corp. R. Loughleen.

We are pleased to report that Miss Lillian Taylor who has been seriously ill is improving and will shortly be enjoying good health.

Mrs. O. W. Keeling left on Monday for a few weeks visit with friends in Listowel and Cranbrook.

Mrs. W. Moody of Elora spent Friday and Saturday at the home of her sister, Mrs. Wm. Mathews.

Mrs. Wm. Palmer was a visitor in Hanover the first of the week.

Mr. and Mrs. Thos. Hood entertained a number of their friends on Thursday evening to a progressive euchre party and all voted them ideal host and hostess.

Lance Corp. Grainger and Private Thompson of Walkerton Sundayed in the burg.

Pte. Herb Hanson and the Misses Ellinghausen and Brisian of Walkerton spent Sunday at Mr. M. Hanson's.

Messrs. Fletcher and Archer of Paisley were callers here on Friday.

Mr. Wm. Monahan underwent an operation for hernia in the Bruce County Hospital at Walkerton on Monday by Drs. Stalker and Bricker and at time of writing is progressing favorably.

Mr. Alex. McDonald, tinsmith in Baledon's hardware store for the past year and a half, left on Monday for Chesley where he has secured a very lucrative position. Alex. was very popular here and our best wishes follow him in his new location.

Miss Marie Martin left on Monday for a few weeks visit with friends in Sarnia.

Mr. Wm. Jordan who has been a resident here for the past seven years, left on Tuesday for Brussels as teamster for the Philips Ament Co. The family will join him in the course of a few weeks.

We notice a great improvement in the st[illegible]s at 9 p. m. since the Children's Aid Society Agent was here. This is a step in the right direction and it is to be hoped it will be continued as reports were becoming too numerous.

Syrup-making is in full swing but the evening attendance is small this year on account of track walking being prohibited.

Mrs. and N[illegible] Kerr who spent the past two mon[illegible] with Rev. and Mrs. Homer return[illegible] to their home in Aultsville on Mon[illegible].

Mr. Hugh M[illegible] [illegible]ntgomery returned to Walkerton on Monday after spending the past week [illegible] Mr. Wm. Moffat.

Pte. N. Peg[illegible] of Southampton spent the week-end with his parents here.

Messrs. Jas. A[illegible]xander, Phil Sparling and Law Cli[illegible] left Tuesday for Chesley where they have obtained positions.

PINKERTON

Mr. Herb Fiddis who has been working in the mill here for some time has gone to Toronto. We understand he intends to enlist i[illegible] that city.

Mr. Horace and Miss Zeta Clark spent Sunday at Mr. D. Pinkerton's.

Mr. Elmer Reid, who has been very sick with pneumonia is now well on the way to recovery.

The Pinkerton Red Cross have shipped, this week, two bales to Toronto Headquarters, containing:—10 pillows 31 suits pyjamas, 18 sheets, 88 Towels 10 surgical shirts, 18 wash rags (knit), 1000 mouth wipes, 1 old sheet for hospital use, and 80 pair of socks. This was all made up since the New Year.

Mr. Richard Garland left last week for the West.

Miss Sadie Colwell of Kincardine has started to work in the store here.

A number in the vicinity are making maple syrup.

Senator Donnelly spent the week-end at his home here.

Prayer meeting was held at Mrs. A. O. McKee's on Wednesday evening.

MILDMAY

Mrs. Jacob Schaefer of the Formosa Road died on Sunday at the ripe age of 81. Death was due to apoplexy.

A big recruiting meeting will be held in Mildmay on Friday afternoon from 2 to 5 p. m. All business places will be closed during these hours.

Clarence Schultels who has lately been working at Cargill came home on Monday morning and enlisted in the 160th Battalion.

Don't forget this date Thursday April 13th, The Mildmay Spring Show is to be held on that day.

"Sport" Schefter of the Gazette staff enlisted here last week but was rejected as being medically unfit.

Miss Margaret Stewart spent Thursday last week with Harriston friends.

Mr. Klemmer of Clifford was a Sunday visitor at the home of his daughter Mrs. P. D. Liesemer.

Mr. Irvin Knechtel of Hunstein and Knechtel purchased a fine delivery outfit at Toronto last week.

Pte. Norman Kaufmann and Floyd Fink spent a few days last week in Brampton and Toronto.

Mr. David Harper while driving to town one last week observed a ground-hog in a field near the road. One more sign of spring.

Dr. Wilson was in Toronto on business last week.

Mrs. E. V. Kalfleisch and Miss Zeta Liesmer were spending a few days visiting friends in Toronto last week.

Mr. George Prose who has lately been on the staff of the Merchants Bank at Brampton, left his job and came home on Monday night and enlisted in the 160th Batt. George was was on the Merchants Bank here for several years and learned the banking business here.

The soldiers began to drill here on Tuesday morning. The town hall is used as a drill hall.

BRANT AVENUE, WEST

Mrs. John Lunday received a hurry-up call to the bedside of her daughter, who is seriously ill at London.

The farmers of this section are all ready for the big Spring drive. In fact some are already off to a good start. Ilan Waechter, who generally leads the way in this neighbourhood, commenced ploughing on Monday of this week.

Miss Jennie Campbell who has been on an extended visit with her sister at Barrie, has returned home.

The Avenue had quite a military look the other day when a number of Boys from the 160th were out looking for recruits, but excuses seemed to be the order of the day.

Lorne Campbell says he is either going enlist or get married, and also adds which is very true, there comes a time in the life of every man when he is called upon to make a sacrifice in some shape or form. However we fancy that either projects will receive ample consideration before Lorne takes the final plunge. If the work cut out by the agriculturalists in this section is seen to a finish Dead Man's Hill will be in possession of some of us at least.

The Kyte that has been flying in the vicinity of the Parlement Building at Ottawa is viewed with much alarm by some of the government members as they seem to think that the mysterious Kyte is just a fore-runner of a zeppelin raid.

Mr. Frank Geisler has been appointed pathmaster in the stead of Councillor Johnston, the right man in the right place alright.

GLAMIS

By all appearances Spring is here.

The roads last week were almost impassable for a few days.

The snow is nearly all gone now.

Syrup making is the order of the day.

Mrs. Osborne has returned to her home near Port Elgin after spending a few weeks with her mother, Mrs. O. Webb.

Misses Mary and Annie McLeod have returned from a visit with friends in Ashfield.

Mrs. A. Kirktown has returned to Markdale to wait on her mother who is ill.

Mr. John Groves of Kerrobert Sask. after spending the past three months at his home here returned West on Saturday. He was accompanied by his cousin, Master Redvers Johnson who will spend this year in the West.

Private Edgar McAfee of Tiverton spent the week-end at his home.

Mr. James Hampson Jr. is another of our young men to join the 160th to train in Tiverton.

A number from the vicinity attended the parties at Dick McGregor's and D. Symon's 4th Bruce, on Monday last.

Miss Ida McAfee nurse of Rochester New York is home on a few weeks vacation.

Mr. John McKenzie visited friends at Markdale last week.

Pte. Clyde McKeeman has again entered in training at Tiverton.

Miss Annie McDonald, Teacher S. S. No 4 Bruce, was a guest of Miss Mary A. McKinnon over the week-end.

The saw-mill commenced this seasons work last week. As the store of logs is not large it will not be running long.

Messrs James Hampson and Neil McDermid were examined in Tiverton on Monday by Dr. Struthers.

TREAT YOUR SEED
— FOR SMUT —

The Ontario Government estimate that the Farmers in Ontario lost $5,000,000 through Smut in grain crops in 1915.

By reason of the prevalence of Smut last year the danger is rendered greater this year. There is one way to prevent this and that is to treat your Seed with Formalin or Formaldehyde.

Use "Beaver Brand" Formaldehyde, guaranteed Government Standard, and avoid the loss and dirt in 1916. Full directions furnished.

G. T. Rourke, the Quality Tailor and Men's Outfitter

Satisfy the Practical and Critical Eye

The secret of our success lies in our Clothes, the way we make them up.

The unseen structure of a Suit—the hair cloth and canvas, thread and sewing is the hidden quality. Every business man knows that the stability of his business is measured by his re-orders. Our customers come back and express themselves well satisfied with our work. We put in the best trimmings, and the best workmanship that can be put into clothes.

Our New spring Suitings, Overcoatings and Trouserings, Blacks, Blues, Grays, in Serges, Worsteds, Lames, Vicunas, are here, and we invite you to come and look them over, you will see the latest styles and newest patterns to select from. Our past reputation as Tailors will speak for itself, give us your suit to make and we will do the rest. For Style and Fit we cannot be beat.

Our Special Ladies Suit Department

Ladies if you want a nice fitting Suit and latest style at a reasonable price, the new samples are here for Spring, come in and look them over and make your selection.

Men's Furnishings—New York Styles

Men's New Spring Hats, Ties, Shirts, Collars, Gloves, &c. are here.

Enlisted In Toronto

Leslie Huether, B.A., son of Mr. and Mrs. J. B. Huether of Walkerton, who has been attending Toronto University has enlisted for Overseas Service. He has resigned his commission as Lieutenant in the C. O. T. C. and joined the "University of Toronto Overseas Training Company" and has secured the appointment of Sergeant-Major of his company. He is also taking a course in the Divisional Musketry School and the Captain's course. Leslie's friends in Walkerton will wish him every success in serving his King and Country.

160th Bruce Regiment Will be Mobilized Here

Business Men Raise $500.00 in Five Minutes

Towards Expense of Sanitary Arrangements and Fixing Up Buildings — Council Will Put Up $600.00 and Citizens a Like Amount—Entire Battalion to be Here May 1 to May 20.

For three weeks, May 1 to May 20 and possibly a few days longer, the entire 160th Bruce Battalion will be quartered in Walkerton. The various detachments now located at various points will shortly be headed towards the County Town and will receive their first training as a battalion here before leaving for the larger camp at London for their summer training.

This information was conveyed to Lt.-Col. Weir and the officers, of the battalion here by the D. O. C., Col. Hodgins on the occasion of his visit here last week.

The good news was quite unexpected. Everything that could be done to have the Battalion mobilise in the County, had been done. The deputation which waited on the military authorities at London received no encouragement and until Col. Hodgins' visit here last week, it was thought that there was little hope that the Battalion would be mobilised here at all. It is understood that some other towns in the County wanted to bid but as Walkerton is ready and anxious to do all that can be done to make suitable arrangements here, it is now settled that Walkerton will continue to be headquarters as long as the Batt. stays in the County.

At a meeting held at the Armoury on Monday afternoon, Major Moffat outlined to the business men of the town the arrangements that the Battalion is making for the mobilization, and what was expected of the town.

Two hundred and eighty men are now billeted in private houses. The remaining thousand or more men will be fed at the Skating Rink and Curling Rink.

Sleeping accommodation will be arranged for them somewhat as follows—Station Hotel, 100 men; Quarters over Merchants Bank, 100 men; Rooms over S. A. Rife and Co's., 80; Methodist basement, 100; Presbyterian basement, 120; Saddlery Hardware, 80; Orange Hall, 30; Biscuit Factory, 100; Rooms over Fraser studio, 50; over McBurney's, 25; Business College, 60; School Building at rear of Armouries, 120; Young's Hall, 80.

Major Moffat stated that the Fair Grounds would be sufficient for drill grounds for the Battalion while here. The expenditure which the town was asked to contribute towards, was for the procuring of crude lumber for tables and benches at the Rinks, necessary fixing of buildings, equipment for shower baths, and sanitary arrangements totaling from $1,000 to $1,200.

Everybody present was desirous of heartily co-operating with the officers of the Battalion, and when the Chairman, Judge Klein, suggested that a subscription list be passed around then and there, the suggestion was immediately adopted, and nearly five hundred dollars was subscribed in the room within a few minutes.

As the Paymaster's roll now runs about $55,000 a month, it is seen that it means something to the town in a financial way, as well as in other ways, to have the Battalion quartered here.

An effort will be made to have the Battalion remain here over the 24th of May, when it is proposed to put on a big celebration in aid of the Battalion Funds. Col. Shannon has promised to try and arrange this, and it is expected that permission will be readily granted.

SUBSCRIPTION LIST

The subscription list up to the time of going to press, totalled:—

George Bros. $25; Art McCartney 25; Alex McCarter 10; Pletsch Bros 25; W. H. McBurney 10; Stephen Bros. 25; W. G. Sparle 10; L. A. Kedy 10; J. A. Wesley 10; M. J. Ramsey 10; Patterson Bros. 15; C. A. Fortune 2; Antonio Cunio 2; Fred W. Lippert 2; John Arscott 15; McArthur & Gibson 5; John Ward 15; Isaac Glinz 5; John H. Vogt 50; John Korman 50; A. R. McNab 2; P. H. Bremner 5. Total—$908 00,

CITIZENS RAISE $900 00.

Up to time of going to press, Walkerton Citizens had subscribed over $900 in less than two days towards the expense of having the 160th Bruce Battalion mobilize here. It was proposed to collect $600 from the Citizens, and ask the Town Council for a similar amount. It looks now as if nearly the total amount would be raised by private subscription alone.

BUTTER 72c A POUND

Not In Walkerton But It Is That Price In Paris.

A letter received by Edna Reaburn from her sister-in-law, Mrs. Adrian Reaburn on Friday gives some interesting light on the way the war has affected the price of ordinary commodities in Paris. Good butter is now 72c a lb., cooking variety 60 to 64c. Potatoes are a luxury at 2 lbs. for 9c. Carrots are 7 to 8c. a lb. Onions are 6c. a lb. four times the price they used to be. Chicken is cheaper than ordinary meat but at that it is 50c. a lb. Eggs are down a little but they are quite high enough at 4 to 5 cents a piece. Eggs for cooking are 2 for 7c. Small sized cauliflowers which used to be 8 to 10c., are now 20c. The poorest woollens are $3.50 to $4 a yard. Silks however are not out of the way in price at $1.08 per. yard for wide taffetas.

THAT 160th EDITION

Which Is Being Prepared By The Walkerton I. O. D. E. Will Be A Dandy.

Judging by the interest which the public is taking in the 160th Batt. Edition of the Telescope, and the way in which the ladies are taking hold, the latest enterprise of the I. O. D. E. is going to be a great success. The ladies who have the advertising canvass in hand, are receiving a good reception from the business people, which means something towards the financial success of the Edition. A large number of orders for copies have been received and those who are wise will send in their orders early to the committee, as the number of copies will be limited. Single copies are ten cents. It should be remembered that the 160th Batt. Edition issued by the Daughters of the Empire, is in no way connected with the regular edition of the Telescope and will not be sent to regular subscribers in the usual way.

FARMER LOSES HEAVILY

Over $6,000 Loss in Burning of Barn and Contents at Malcolm

The barn and contents of Mr. Alex. McIntyre, a well-to-do farmer of Malcolm, was destroyed by fire early Tuesday morning. Mr. McIntyre was a very heavy loser. The origin of the fire is a mystery. Mr. McIntyre arrived home from a meeting about midnight and found everything alright.

Less than two hours later he awoke to see the flames bursting from the building. In the barn at the time were over thirty valuable head of cattle, 4 horses and 8 pigs. Also all the farm implements and a quantity of grain. Only seven cows besides the four horses were rescued. Everything else was a total loss. Mr. McIntyre estimates his loss at over $6000. He carried $2,300 insurance, which would barely cover the loss on the building itself, which was a large up to-date structure.

Can't Beat 'em!

"An exceptionally fine body of men. They look as if they were handpicked" was the comment of Colonel Shannon, D. O. C. of Military District No. 2, while here on his visit of inspection last Wednesday.

NEWS ABOUT TOWN

Mr. T. E. Attwood went to Toronto on Saturday.

Mrs. Myles returned home from Toronto last week.

Mr. E. Myles visited Toronto on business last week.

120 men have signed up at Kincardine for the 160th Batt.

Mrs. Geo. Wilson and babe went to Midland on Saturday.

Royal Purple Calf Meal, 25 lb. bag, $1.00 at Hunter's.

Mr. W. H. Adams came up from Toronto for the week-end.

Help build up this community by doing all your buying at home!

There are not apt to be dead stocks where there is live advertising.

Miss Bolston has returned from spending the winter at Berlin.

Mr. George Sillers of the Guelph Battery was home for the week-end.

The Greenock Red Cross Society contributed $66.80 to the Red Cross Society.

Miss Lou Campbell went to Paisley for a few days this week before returning to Rochester.

Miss Hazel Ritchie, who has been visiting Mr. and Mrs. P. Ritchie, returned home to Paisley this week.

Mr. John Leifso, who sold his farm near Eden Grove last fall, has removed to his ranch at Readlyn, Sask.

Mrs. Jewell had word from her son Pte. Fred Jewell, now in France, that he was well and feeling fine and fit.

Mr. Hugh C. Wilson, teacher, of Essex, visited his sister, Mrs. L. A. Kedy last week, before enlisting with the 110th Batt.

The regular meeting of the Daughters of the Empire will be held at the Town Hall on Saturday afternoon at 3.30 o'clock.

Rev. R. S. Railton of Clifford will preach at the Methodist Church next Sunday. Rev. Mr. Walker will take the work at Clifford.

Liggett's Choclates are recommended for their purity as well as for their flavour. Sold and recommended by all Rexal Drug Stores.—A. P. Sieveright.

Merchants who holler about trade going to the Department Store should take a leaf out of the Department Store's book and do some aggressive advertising.

When little ones are peevish, give Rexall Orderlies; constipation is often the cause. Sold only by Rexall Drug Stores, 15c and 25c boxes.—A. P. Sieveright.

Mr. Frank Ruetz is becoming one of the biggest land owners in Carrick. Last week he purchased the Gilmar farm, lot 4, con. 4, Carrick, and now owns a 400-acre block.

"Are you going to have a garden this spring?" "Well, I am going to dig the ground and sow some seeds as usual, but it depends on the neighbors' poultry whether I have a garden or not."

The Directors of the Northern Fair held a meeting Saturday night and decided to go ahead with arrangements for the coming Fall Show. This puts an end to the proposal to join forces with the Christmas Fair.

Mr. Matthew Hudson enjoyed a visit this week from his step-brother, Mr. George Nichol of St. John's, Newfoundland. Mr. Nichol was in New York on a business trip, and took advantage of his comparative nearness to come over to Walkerton for a couple of days.

Walkerton barbers raised the price of a hair cut this week to 20c. The barbers claim there is nothing in it at the present rates and as other towns have been charging 20c. for years, and in many cases, 25c. they figure that the people here can have "no kick coming."

ENLISTED AT WALKERTON

Peter Zuber, Walkerton, farmer, age 20, born in Brant.

P. T. Gillen, Walkerton, farmer, age 23, born in Minto Tp.

Mr. and Mrs. P. Bremner are in Toronto this week.

Mr. John Forsythe of Enniskillen left this week for Stanley, Alta.

The Special Edition will be issued about the 28th inst.

Corp. Wanless is taking a course in stretcher-bearers work at London.

The W. G. & R. shirts are the best shirts made in Canada. Sold by T. Pye.

Mrs. Braund who has been visiting at Mr. P. Bremner's, returned home to Brockville on Monday.

Mr. Valentine Pletsch of Brant went to the Bruce County Hospital on Tuesday to undergo an operation.

Lieut. Rowland and sixteen men of the 160th left this week to take a course of bayonet instruction at London.

Chief Ferguson has received word from his son "Bill" that he has taken a position on the police force at Syracuse, N. Y.

Will the party who took up a mislaid $3.00 umbrella last week, please leave at Telescope or post office and greatly oblige owner.

S. A. Rife & Co., have purchased some very high-class machinery for their tailoring department which will be the best shop west of Toronto.

Rev. Mr. Stafford who at one time was stationed in Walkerton preached splendid sermons in the Mildmay Methodist church on Sunday.

Peter Nistin and Hugh Kerney, both of whom have been confined in the County goal for some time, were taken to the London Asylum this week.

Mrs. Wm. Sutton and three children Ruth, Eva and Harrison, of Albany, N. Y. are expected here on a visit to Mrs. Sutton's sister, Mrs. J. H. Appel.

It is reported that Mrs. Gibson has asked to be relieved of her duties as caretaker of the post office, a position which she filled with credit for many years.

Miss Norma E. Lamb, superintendent of the City Hospital at Sherbrooke, Que., is spending two months with her parents, Mr. and Mrs. James Lamb in Brant.

Mr. H. M. Lay, Sec. of the Bruce Patriotic Fund acknowledges the receipt of $100 from the Carrick Canadian Patriotic Fund Association, per H. G. Wright, treas.

Dr. and Mrs. Stalker had a visit from their son, Mr. James Stalker of Toronto University, who is leaving in a few days for the Front with the 4th Div. Cycle Corps.

Mr. P. Ritchie had word from his son Edwin, of Delisle, Sask. stating that ploughing is well under way in that section and they expect to start seeding this week.

Rev. M. Rock was taken suddenly ill in the pulpit on Sunday morning and was unable to continue the service. His many friends will be glad to know that he is improving and hopes to be out again soon.

Chief Ferguson laid a charge yesterday against Fred Zarn, McGivern St., of neglecting to give his wife proper attention during her last illness. The case will be tried before Magistrate Tolton.

Two well-known and highly esteemed Brant men, the O'Neil brothers of Malcolm moved into half of Mrs. McKillop's big house on Jackson St. Walkerton has plenty of room for citizens of the O'Neill stamp.

Walkerton Council is to be commended for getting in touch with the Hydro Electric. The people will now have an opportunity of knowing where Walkerton stands in regard to rates. If the present rates compare favourably with hydro it is well to know it. If not, it will be up to the Town Council to get busy and submit a hydro by law to the people. In any case, what we want is the facts, and the Council is taking the right steps to get them.

The Woodstock Sentinel-Review had the following reference to Mr. Charles P. Hamlyn, brother of Mrs. James Whitehead of Walkerton and well-known here:-C. P. Hamlyn, of the 168th Battalion, who is taking a lieutenant's course at London, was in the city over Sunday. He is looking well and fit, and says the soldier's life is agreeing with him immensely and is the only life. He is wearing a fine gold ring with the number of his battalion engraved upon it, the joint gift of the city editors of the Stratford Beacon, Berlin Telegraph, Guelph Mercury, St. Thomas Journal, Galt Reporter and Brantford Expositor, with whom Mr. Hamlyn, as city editor of the Sentinel-Review, was closely connected in the exchange of municipal work. Accompanying the gift was an address expressing the best wishes of his fellow journalists.

Walkerton Council Asks Hydro For Estimates

Wants Figures For 150 H. P. From Eugenia

Tenders Called for the Fixing of Town Hall and an Iron Stairway at West End of Building—Resolution to Break Up Municipal Stone Pile Failed to Carry.

A motion was passed at Monday's Council meeting which sets the ball rolling for Hydro and if followed up will put Walkerton on the Hydro map in due time. The Council decided by this resolution to ask the Hydro Electric Power Commission of Ontario for figures on 150 h. p. delivered here from Eugenia Falls. It is expected that the hydro engineers will submit figures showing the cost of distribution in Walkerton, and the selling price for power and for lighting.

In case these figures compare favorably with the present rates, and it is expected that they will, it will then be up to the Council to submit a by-law to the people, and obtain the people's judgment on the question of installing hydro here. In the meantime what is wanted is facts and figures. The general opinion is that hydro rates would mean a big saving over present rates. If that is the case, the sooner we find it out the better. On the other hand, if the present rates are fair, it is well to know it. The hydro figures will soon show the people of Walkerton where they are at.

All the members of the Board were present but Reeve McNab, and the hydro resolution, fathered by Councs. Douglas and McCarter passed without division. Mayor Lippert pointed out that the resolution did not commit the Council to any expenditure. It would simply enable the Council to secure facts to place before the people. The next step would be to pass an enabling by-law by a vote of the ratepayers.

The Council decided to advertise for tenders for the reinforcing of the walls of the Municipal Building by four buttresses, and the building—in the Market House walls, as recommended by Architect Denison; also the construction of an iron stairway at the West side of the building to provide an additional exit from the auditorium. A special meeting will be held on April 20th to receive the tenders.

The old fire brigade sent in a bill for services to date, which was passed. The accounts for the Winter fire, including teams, amounted to $52.50.

The Council divided on the question of breaking up the old stone pile which has adorned the rear of the Town Hall for several years. Councs. Russel and Lettner moved that the Streets Committee be impowered to get an engine to break up the stone. Mayor Lippert said the Council had to go very carefully this year owing to much extra expenditure and suggested that the Committee first get an idea of the cost of the job before passing such a motion. The backers of the resolution persisted, and on the yeas and nays being called, it was beaten on the following division:—

Yea—Arscott, Russel, Lettner—3.

Nay—Douglas, McCarter, Pletsch, Lippert—4.

A number of accounts were passed.

REQUEST FOR HYDRO FIGURES

Douglas—McCarter—That the Council of the Municipality of Walkerton request the Hydro Electric Power Commission of Ontario to give the Municipality of Walkerton an estimate to the said Municipality of 150 horse power of Electric energy from Eugenia Falls to be supplied at Walkerton ready to be distributed by the said Municipality and that a copy of resolution be forwarded to the Hydro Electric Power Commission.

Back from California

Mr. William Adamson arrived on Thursday from Pomona, a suburb of Los Angeles, California, where he has been spending the winter, and where he and his daughter intend living permanently. Mr. Adamson likes the California climate, although he says they had an undue amount of wet weather this winter. Living expenses are a little higher than here and altogether he is quite taken with the land of sunshine and flowers. One commodity that comes high down there, he says, is fire wood. A cord of wood costs $12 but as it lasts a whole year in that sunny clime, one doesn't mind the expense. Mr. Adamson intends returning to California in a short time as soon as he can attend to some business matters here.

GLAMIS BOY WOUNDED

One of Three Soldier Brothers from Glamis Hit by Shrapnel

Word came by telegram to Mrs. Catherine McKinnon of Glamis on Monday, that her son, Pte. John Alex. McKinnon, 1st Batt. C. M. R., had been wounded in the back by shrapnel on April 1st. Pte. McKinnon is a young man about twenty-five years of age, and the son of the late Archibald McKinnon, an early settler of the Glamis neighborhood. Pte. McKinnon enlisted at Calgary, along with his brother, Findlay, and both brothers are now in France. A sister, Miss Elizabeth McKinnon, is also at the Front. Miss McKinnon was located at Chicago when the war broke out, and when she heard that her two brothers had enlisted, she decided to go too. She is now at the battle front and sees her brothers frequently. Just the other day the third and last brother, Malcolm, rented the homestead near Glamis and signed up with the 160th Bruce Regiment. The McKinnon boys are fine strapping fellows, six foot and upwards. They are highly thought of in the neighborhood, in fact are the pick of the countryside. They are braw fighters.

A few days ago, Mrs. McKinnon had a letter from the son who is reported wounded. In it he remarked jokingly that he and his brother were now at opposite ends of a trench and both would not be hit anyway.

SOLDIERS AT CHURCH

Men of the 160th Paraded to Methodist Church on Sunday Morning.

The Soldiers turned out on Sunday morning, two hundred and fifty strong. Headed by the Battalion band and bugle band, playing appropriate airs, they marched to the Methodist Church, attending in a body. The men occupied the centre portion of the building. Rev. Mr. Walker gave a powerful message on a timely theme, taking for his text: "Render unto Caesar the things that are Caesar' and unto God, the things that are God's."—He introduced his subject by saying that Politics and Religion are not necessarily divergent, that our duties to God, and our duties to our country may and should both be performed. He continued by showing that at present, our duty to our country is one of service. Too long have we considered our country as existing for our benefit. Now we find that we owe it something and Canadians are doing their part nobly, both men and women, the latter being the ones who really bear the heaviest part of the burden. He then cautioned us not to forget the duties owing to God also, for God is not always on the side that has the biggest army. It is only with His help that we can win. Prayer is a necessary equipment for our armies and for the people who remain at home. Service to our country and to God must go hand in hand.

The Choir, augmented by members of the Battalion, sang "Bless the Lord, and Miss Fryne sang a very pleasing solo, "Lord, Teach Me How to Live."

MILITARY CARNIVAL

Big Crowd Patronized Affair At Roller Rink—$100 Realized

About a hundred dollars was raised for the 160th Bruce Regimental funds by the Military Carnival held at the roller rink last Wednesday night. There was a great crowd present, although the number in costume was quite small. The Judges were:—Messrs. H. M. Lay, K. N. Taylor and Mayor Lippert. The Daughters of the Empire served coffee and refreshments, realizing a neat little sum for patriotic purposes. The prize-winners were:—

Best Fancy Costume—Gent—Small and Scherrer, as Gold Dust Twins; Lady—Miss Ferguson, as Peasant Girl.

Best Comic Costume—Gent—Wes Russell, as Old Nigger Woman; Lady—Misses La France and Crawford, as Indian Girls.

Best Original Costume—Gent—Corp. Bugler Hampton, as Clown; Lady—Miss G. Rife, as "Good Luck to the 160th Batt."

Best Patriotic Costume—Gent—David Rogers of Hanover, as Highlander; Lady—Miss C. Weitlaufer, as Scotch Lassie.

Good lively music was furnished throughout the evening by the Batt. Band under the direction of Sergt. Wright.

WIT AND HUMOR

TOO SHARP FOR HIM.
(Boston Transcript.)

"Why did you refuse when B. suggested burying the hatchet?"

"Because I believe the cuss has his ax to grind."

WHAT WAS THE MATTER?
(Judge)

Boyo—What's the matter with Sullivan's unheated furnace?

Chapp—It's underfed.

THE USUAL WAY.
(Buffalo Courier)

"But your fiance has such a small salary; how are you going to live?"

"Oh, we're going to economize. We're going to do without such a lot of things that Jack needs."

IT DEPENDED.
(Boston [illegible])

Young Aspirant—I called, sir, to see if I may count on your supporting me.

Practical Citizen—That depends, young man. Are you running for office, or do you want to marry my daughter?

LITERALLY SO.
(Baltimore American)

Wife—John, poor little Willie wants to come out of the corner where you told him to keep still.

Lawyer—His motion is denied.

DOROTHY'S DEFINITION.
(Chicago News)

"Now, Dorothy," said the teacher to a small pupil, "can you tell me what a panther is?"

"Yeth, ma'am," lisped Dorothy. "A panther is a man that maketh panth."

SAME AS BEFORE.
(Judge)

American [illegible] (returning from abroad)—There have been some changes in your department, I know. By the way, who is Secretary of State now?

Friend—Same as before—Wilson!

APPARENTLY RECONCILED.
(Kansas City Journal)

"I notice one trend of thought."

"What is that?"

"Most people have given up trying to figure the wherefore of the high cost of living and are hustling for the price."

NOT ENTHUSIASTIC.
(Washington Star)

"Does your husband believe in [illegible]?"

"About the same as he does in ghosts. He admits that there might be such a thing, and the mention of it makes him [illegible]."

BLANKETED.
(Judge)

She—You'd think he'd [illegible] he's a son of the Revolution, and—

He—I know—but he married a daughter of the Revolution.

SOMETHING LACKING.
(Kansas City Journal)

[illegible] Still, the [illegible] something lacking."

"What on earth—"

"He hasn't any poor relations to [illegible]."

TOUCHING EXTRACTS FROM A BUTCHER SHOP.
(Harvard Lampoon)

Customer—Come, John, be lively; bring the bones to Mr. [illegible] and get Mr. Smith's ribs to the front for him.

John—All right, sir; just as soon as I have sawed off Mr. Murphy's leg.

UNANIMOUS.
(Judge)

Critic—How is your new book?

Author—Why, I think it is punk, but my publisher thinks it is better than my last one.

Critic—Cheer up—maybe you are both right.

REFINED.
(Judge)

"Aren't the fashions this season less extreme?"

"Oh, extremely less."

SURE.
(Williams Purple Cow)

"Do you know where the little boys go who don't put their Sunday school money in the plate?"

"Yes'm—to the movies."

BOTH EXTREMES.
(Baltimore American)

"Minnie, my dear, do you know when you stop talking I feel that your silence is my paradoxical maximum pleasure."

"What on earth do you mean?"

"Because, at the same time, you are also my Minnie mum."

SYMPATHETIC.
(Washington Star)

"I'm sorry you don't admire Mr. Gumpins," said the capital woman. "His ancestors were very distinguished and estimable people."

"Yes," replied Miss Cayenne. "What a misfortune for his family that so many of them died."

MAKING THEM USEFUL.
(Kansas City Journal)

"Our congressman has sent us some free seeds. Shall I throw them away?"

"No. They will come in handy to plant in a [illegible] to keep the chickens occupied."

REVERSING THE USUAL ORDER.
(Baltimore American)

"Bill Smith is a very unusual man. Always doing the most unexpected things."

"What's he done now?"

"Mortgaged his limousine to pay for his cottage in the suburbs."

SANDY IN DOUBT.
(London Opinion)

Sandy (to McDougal, returning from wedding festivities)—"[illegible], friend, all's well."

McDougal—"Thank ye, laddie. But ye dinna ken the guid wife ye've gotten [illegible]."

AN ECONOMIST.
(Life)

Judge—You let the burglar go to arrest an automobilist?

Policeman—Yes. The autoist pays a fine and adds to the resources of the state; the burglar goes to prison and the state has to pay for his keep.

CURIOUS.
(Indianapolis Star)

Stranger—I noticed your advertisement in the paper this morning for a man to [illegible] canaries.

Proprietor of Bird Store—Yes; have you had any experience in that line?

Stranger—Oh, no; I merely had a curiosity to know how the canaries lost their tails.

The minister, not being acquainted with the family, was uncertain how to work out the obituary. Waiting for the bereaved widow, he plied his questions to Johnny. "Ah, my boy, perhaps you can tell me what were your father's last words." "He didn't have no last words," said Johnny. "Ma stayed with him to the end."—Puck.

Illustrating to a woman how to get off a street car, an Indiana man fell and was fatally injured. Unfortunately, his fate will be no warning to those who don't know that it is better to let women do things their own way.—Washington Herald.

"I forgot myself and spoke angrily to my wife," remarked Mr. Meekton. "Did she resent it?" "For a moment. But Henrietta is a fairminded woman. After she thought it over she shook hands with me and congratulated me on my bravery."—Washington Star.

'TWIXT LOVE AND PRIDE

"Poor old fellow!" she said, softly; whereupon Eddie Trevanion, in spite of his twenty years, fairly broke down, and buried his face on his arms, and burst out crying.

This was too much, even for "the queen's" stoicism; she repented her righteous anger immediately, and, putting her arm round his neck, proceeded to press her lips lovingly to the only portion of his ear at all visible, while Mildred, with tears in her soft [illegible] eyes, told him to cheer up—take courage, and "may be they'd manage it somehow, you know," with a good deal more to the same purpose.

As the girls hung round him in this fashion, and petted the sinning Eddie, until a looker-on would have deemed him a suffering angel at least, Denzil Younge sauntered up-stairs in his mud-stained scarlet coat. Entering the picture-gallery on his way toward his dressing-room and not seeing very clearly, in consequence of the fast-approaching darkness, he came upon the tableau at the end of the apartment almost before he had time to collect his senses.

The three figures looked gray and ghost-like to his bewildered eyes, but one thing was distinctly evident, and that was Eddie Trevanion's unmistakable distress.

"I beg your pardon," Denzil said, hastily. "I'm awfully sorry, Miss Trevanion, to have intruded in this rough manner, but unfortunately I did not perceive you until I was quite close. However, as I have committed my blunder, can I—may I—try to be of assistance?"

Mabel looked up eagerly. Here was a golden opportunity! Here was a rich young man with nothing on earth to do with his money, and unquestionably good-natured!

Could he be of some assistance? Of course he could—the greatest—if Mildred would only look up and answer him. Mildred did look up and answer him—answered him very distinctly, indeed, though scarcely in the spirit that Mabel had hoped for, having intercepted "the queen's" glance and interpreted it correctly.

"You are very kind," she said, steadily—"very kind indeed, but this is a matter in which I fear you can be of no help to us."

"Let me try," he implored, eagerly.

"Impossible," she returned, coldly; "you do not understand; it is a case in which no stranger can take part. Thanks very much all the same."

When Miss Trevanion said that, of course there was nothing left for the young man to do but to bow and go on his way, which he accordingly did, with a bitterly hurt feeling in his breast, engendered by that one word "stranger."

What a stress she had laid on it! How obnoxiously it had sounded as applied by her to him. How coldly distinct had been her voice when speaking it! Well, it wasn't her fault, he supposed, that she was gifted with neither heart, nor gracious manner, nor anything else tender or womanly—only with a glorious face and figure, which, of course, did no good to any one and only made one—Where the deuce had Connor put his brushes? That fellow was growing more confounded careless every day; and how horribly that brute of a horse he had given one hundred and fifty pounds for last week, had taken that last water-jump this morning, just when the entire field was looking on, too! On the whole, it hadn't been so very pleasant a day as he had fancied in the first heat of the moment, when it was all over, and he was discussing it during the homeward ride with old Appleby. Hanged old nuisance that old Appleby was, by the bye!" And so on and indefinitely sped Denzil's reflections, while the cause of them all still stood in the gallery where he had left her, with her kind little white hand on Eddie's shoulder.

"Hadn't you better go and get yourself ready for dinner, dear?" Mildred suggested, tenderly.

And then Eddie told her that it was of little use for him to go and clothe himself in broadcloth and fine linen when he knew that the first bite he ate would infallibly choke him.

This seemed dreadful to Miss Trevanion. He must be very far gone indeed in misery when he could refuse to accept the goods the gods downstairs were preparing for his delectation, and she was just beginning to argue with him on the subject of that supposed strangulation, when Mabel broke in suddenly.

"Mildred," she said, "I have an idea!" And Mildred appearing sufficiently struck with the novelty of this announcement, Mabel went on: "I have a plan, so say nothing further either of you about this matter to any one until to-morrow evening, and leave everything in the meantime to me."

"But won't you tell us your plan, whatever it is?" Miss Trevanion asked anxiously, rather taken aback by this unexpected prospect of rescue from their slough of despond. "I think it will be wiser of you to let us hear it." Upon which "the queen" said—

"No, I won't," very emphatically indeed, and marched out of the room with colors flying.

At eleven o'clock the next morning Mabel Trevanion said to Wilmot, the footman—

"Tell Jenkins to bring my horse around."

And Wilmot, the footman, having scrupulously and on the instant delivered that message to Jenkins, the groom, it so happened that ten minutes later "the queen" of King's Abbott was riding away on the high-road to Blount Grange, with her sister's little, nondescript, black-coated dog at her heels.

When at length she had reached the wished-for massive iron gates, and traveled all down the long line of stately elms that in the summer-time insured the glory and comfort of the Grange avenue, and had evoked a servant to answer to her impatient summons, she asked, eagerly.

"Is Mr. Blount at home?"

Yes—the master was at home just then, the man told her: whereupon Mabel jumped from her horse, desired a groom, summoned by the butler, to take her horse round to the stables, and gathering up her skirts, entered the spacious hall, her little bright-eyed follower still close behind her.

She went up one flight of low broad stairs and paused.

"In the drawing-room?" she asked, and nodded her head in the direction of that apartment.

"No, 'm, not there; in the libery, I think. But, if you will be so kind as to sit down for a few moments in the droo-room, I will inform the master of your arrival," said Dick Blount's most gentlemanly butler, with a majestic wave of the hand, after which he proceeded solemnly to open the door for her.

On the mat, precisely outside that very identical door, lay a large dog—a large and hungry-eyed dog—that fixed his glistening orbs on Bess's smooth sleek sides, and moved his lantern-jaws with greedy anticipation, and uttered a savage growl. Mabel stooped hurriedly and caught the tiny black creature in her arms.

"Dear me," she said, fearfully, "what a very unpleasant animal!"

The butler administered a kick more serious than playful to the huge-boned Growler, which sent him to a considerable distance, whence he snarled viciously to his heart's content, while his conqueror turned to Mabel, and reassured her gracefully.

"No fear, 'm," he said, still solemn, still the essence of good breeding—"no fear, I assure you, 'm. He's Mr. Roy's dog, and his bark is worse nor his bite."

After which piece of gratuitous information Mabel was allowed to proceed without further molestation, and presently the door was closed behind her.

She was still in a state of uncertainty as to whether it was Mr. Roy or his dog whose bark was of a character to out-Herod his bite, when the butler at length had succeeded in ushering her into the "droo-room." When, however, in a moment or so, she had recovered from her fit of abstraction, she became aware that a bright fire was burning in the large old-fashioned grate, and before the fire, with a foot on either side of the topmost bar, and a newspaper held before his nose, sat a man — a man with dark brown hair and a gray coat, and no whiskers to be seen—a man horribly unlike old Dick Blount, or any one else she had ever seen—and who took no notice whatever of her entrance.

The room was a long one, the carpet of the thickest, most sound-disguising texture; and so it was evident that the owner of the boots that were frying so peacefully on the bar had heard the door neither open nor shut.

CHAPTER VIII.

"Here's a pretty go!" thought Mabel to herself—she was given to slang in moments of excitement—"here's a pretty go, to be sure! I, all alone in a bachelor's establishment, without a chaperon of any description whatsoever, and the very first thing I meet is a young man, who, of course, will ask everyone far and near who I am. Oh, if papa hears of this, won't there be somebody to pay, and no mistake! I'm in for it regularly. Well, at all events, if this man turns and sees me, and asks me a single question, I feel that I can summon up courage and tell him a lie."

So, fortified in thought, she coughed slightly and dropped her whip, upon which the brown head turned lazily, and the handsome hazel eyes in that brown head saw her.

When he saw her, he said, "Good heavens!" quite loud, and, drawing his feet from the bar, stood up in double-quick time, newspaper in hand, and had the grace to blush a good deal.

"I really beg your pardon," he said; "I had no idea there was anyone in the room. Won't you come over to the fire and warm yourself? You must be quite frozen over there."

Miss Mabel bowed, summoned up a gracious air, and advanced a few steps; then, remembering her ill-used whip, she stopped suddenly, and glanced interrogatively, first at him, and then at the prostrate article in question.

Standing so, Mabel Trevanion was, of all things that could be seen, the prettiest that day. She was flushed and warm from riding, slightly confused also at the turn affairs had taken, and a little wave of hair had come undone of its own sweet will; having made its escape without permission, it hung down abashed and penitent at one side of her oval face, a rich, sweet piece of loveliness that greatly enhanced the beauty of its owner. The tiny black dog she still held closely in her arms, while one hand supported the heavy folds of her riding habit in such a manner that, unconsciously to herself, it revealed to the stranger's admiring eyes one of the smallest, daintiest little feet imaginable.

He picked up her whip and placed it on the table; and just at that moment it occurred to him, oddly enough, that a certain Grace Gordon of his acquaintance was by no means so good-looking a girl as he had hitherto believed.

"Won't you come over and sit here?" he asked, again, indicating the comfortable arm-chair from which he had a minute before extricated himself. "It's by far the pleasantest affair in the house."

"Is it?" said Mabel, and forthwith proceeded to make herself at home among the cushions. "I dare say it is, really; but then it is scarcely polite of you to say so, because—where is Mr. Blount?" added Mabel, breaking off abruptly.

"Well, he is out of the house just at present," said the young man with charming unconcern.

"Out!" exclaimed Mabel.

"Yes—gone on a tour of inspection with some old tenant, who came for him about half an hour ago—dreadful sort of person, you know, with a dislocated nose, who, Dick tells me, is always wanting him at the wrong time. Shouldn't wonder, from his general appearance, if he insisted in taking Blount to the extremest end of the plantations."

"At that rate he can't be back for hours," said Mabel, half rising, and looking disconsolately pretty; "and so perhaps I had better mount my horse again, and go and find him out myself."

"I am afraid you couldn't possibly do that," observed her companion, with decision. "In the first place, you would never hit upon the right direction, and, in the next, if there is a thing on earth Blount is particular about, it is his young trees. He'd be awfully angry, I'm certain, if you went crashing through them with a horse. If you will allow me to offer you advice, I would suggest your sitting quietly here for a little time, and probably in twenty minutes or so he will turn up. But perhaps I can assist you—can I? Pray make any use of me you like."

"No, thank you," Mabel said, hesitating slightly, and coloring; "it is Mr. Blount himself I wish to see. I have some business with him"; and then she felt that this young man was staring at her, and doubtless wondering naturally what business sufficiently interesting she could possibly have with a bachelor to bring her from her own home at half-past eleven in the morning.

Who could it be? She puzzled her brains to try to remember anybody she had ever heard of answering to the name of Roy, and failed. Of course he was one of those Bilton officers [illegible] come over for a day's amusement, and happily must be utterly ignorant of anything connected with [illegible]. The latter place found the military element at Broughton, which was eight miles nearer than Bilton, quite sufficient for their needs, and so associated little with any of the other surrounding barracks; only Dick Blount, who was in the habit of enlarging the circle of his acquaintances, at times brought over to the Grange a strange man or two, to scatter powder among his game.

This man, "the queen" concluded, must be one of those occasional visitors, and if so, the incident might end very disagreeably indeed for her. Stories travelled with railway speed in that part of the country, and certainly lost nothing in their travelling, whatever they might gain. Although personally unacquainted with the Trevanions, he was probably in the habit of hearing the name mentioned two or three times a week in the course of conversation, and so would understand perfectly who she was once he discovered her identity with the baronet's family. Then, if he repeated this escapade of hers, as in all likelihood he would, what was to prevent the story spreading until it finally reached Sir George's own ears?

Mabel knew well how seriously annoyed both her father and mother would be if they heard any rumors of that sort—how she would be questioned and cross-questioned, until the whole truth was elicited, and Eddie's shortcomings as well as her own brought to light. She determined at all hazards to keep her name a secret—or would it not be better to get some other cognomen altogether, and so put this young man off the right track completely? No! Stanley—her friends of that name were at her father's, and it might possibly get them into some scrape—but Manvers: they were cousins of old Dick's, and nobody would think it in the least extraordinary that they should ride over to see and question him about their affairs; besides, whether or no, this troublesome young man would not have time to prosecute any very deep researches into the truth, as she had heard last week that the present regiment stationed in Bilton sailed for India on the 14th.

So far so good—the only pity was that it had not sailed on the 1st, and then all this uneasiness might have been spared her. But now how was she to bring matters to a crisis, and leave him under the full conviction that her name was Manvers? Dick Blount would never betray her—that was one thing certain, and surely—

"Asleep?" said the voice by her side.

"No—only thinking."

"About Blount? What a lucky old fellow he is. I almost think I shouldn't much mind being Blount myself, if I could get some people to think about me. What a very charming little dog! Is it your own? May I know its name?"

"Bosh; and it is not my own, being my sister's. Poor little creature! You are not quite yourself, are you, after the fright you got awhile ago? Do you know that your great dog outside the door did his very best to eat my poor pet, and frightened it almost to death?"

"What, Sancho? I'm sure I'm awful sorry. I won't keep that brute any longer, I think; he wants to devour everything he sees—myself included, at times—and isn't worth half the trouble he gives. But"—with a smile—"how did you know he belonged to me? You didn't see any resemblance, I hope?"

"No, it wasn't in that way I made my discovery, but Mason, when he was driving the dog away, said it was 'Mr. Roy's;' and—and that's you, isn't it?" said Mabel, with a beautiful upward glance and smile.

"Yes, that is my name," he answered, after which he laughed, a little curious, intensely amused laugh that puzzled "the queen" a good deal.

She smiled again, however; and the young man wilfully led on by the expression of her eyes, said, softly—

"And yours?"

"The queen" was at heart essentially truthful; indeed, up to this, she had never, in the whole course of her existence, uttered a deliberate falsehood, and consequently, the sin being new to her, she blushed. She did more—she grew actually and hopelessly crimson, and hesitated unmistakably for a moment; after which, having passed her Rubicon, she said, slowly and distinctly—

"Manvers."

"Manvers?" repeated the man named Roy; and, when he had repeated it again, he stopped short to stare at Mabie Trevanion in a manner that betrayed the most open and extravagant amazement; but she, with her eyes bent upon the lowest portion of the fire, could not see the expression of his—could only hear the abnormal questioning tone of his voice.

"Yes, Manvers," she declared, for the second time, but did not find that repetition make the lie easier.

"Of Dering?"

"Yes," Mabel answered, rather more faintly this time, and without raising her eyes.

Her companion appeared mystified beyond all conception, and seemed utterly unable to remove his gaze from the face of the girl before him. He attempted no further conversation, but stood there as though moonstruck, watching now poor Mabel's restless hands, as they lay uneasily upon her lap, now her discontented, ever-changing features, as she sat in silence and contemplated the burning coals. Presently she roused herself with an impatient shrug, and rose to her feet.

"Am I to stay here all day?" she asked fretfully, almost angrily. "Is Mr. Blount never to return, I wonder? It seems to me that I have been idly sitting here for hours and hours and hours."

(To be continued.)

SIMPLY WONDERFUL FOR CHEST COLDS
MAKES 'EM WELL OVER NIGHT

Nothing Half So Quick to Relieve and Cure as Good Old "Nerviline."

Don't lie awake to-night coughing your throat sore—don't let you chest cold develop further—that's the way to coax on pneumonia.

Be sensible, and, as thousands before you have done use Nerviline. It sure is a bully fine thing to knock out a cold or bad cough.

After once using Nerviline you'll swear by it for all time to come.

You'll say it's more like a miracle than anything else to feel its warm soothing action upon your tight chest.

You'll be amazed at the quick way it cured your cough and broke up your bad cold.

It's safe for even a child to rub on Nerviline. Although five times more powerful than most other liniments, yet Nerviline has never yet burned or blistered the tender skin of even a child.

It's worth while to remember that wherever there is an ache or pain Nerviline will cure it.

Try it on your sore muscles, on a stiff joint, on the worst possible case of rheumatism, neuralgia, sciatica or lumbago. There are ailments Nerviline is guaranteed to cure mighty quick.

The mother of a large family can save heaps of work and worry, can cure little ills before they grow big, can keep the whole family well by always having Nerviline handy on the shelf. The large 50c bottle is the most economical. Trial size 25c, all dealers, or the Catarrhozone Co., Kingston, Canada.

"Ill Blows the Wind—"

A well-known professional footballer enlisted in the Black Watch, and was in the habit of receiving a parcel from home regularly every week. It contained the usual assortment of cakes. On one occasion, however, the parcel was found to contain nothing but a lady's corset and an invoice from a London firm, with a lady's name and address. What had happened was obvious—the labels had been torn off two packets and got transposed in putting them back again. A very nice letter was despatched with the corset to the lady, explaining the circumstances, and requesting that if she had received their parcel she would kindly forward it to the camp. In due time a letter was received from the lady, explaining that their parcel had reached her some few days previously, but it was not much good to return it, as the things were all stale, but she hoped to forward in a day or two a parcel in its place. From that date until the regiment left for active service, a parcel, full of eatables, was duly received every week from the lady.

How He Got Along.

An attorney living on the north side was arrested a few weeks ago charged with violating the motor speed law. When his case was called in city court the next day he asked that it be continued for a week. The arrest caused his wife considerable embarrassment, and she spent most of her morning conversations with the neighbors during the next few days in explaining just how it happened.

On the day of the trial one of the neighbors was sitting on the porch as the attorney returned home.

"Hello, Jack," said the neighbor. "How did you get along in the police court?"

"Fine!" yelled the attorney; then he whispered, "Twenty-five and costs."

SPRING BLOOD
IS WATERY BLOOD

How to Get New Health and New Strength at This Season.

Spring ailments are not imaginary. Even the most robust find the winter months most trying to their health. Confinement indoors, often in overheated and nearly always badly ventilated rooms—in the home, the office, the shop and the school—taxes the vitality of even the strongest. The blood becomes thin and watery and is clogged with impurities. Some people have headaches and a feeling of languor. Others are low-spirited and nervous. Still others are troubled with disfiguring pimples and skin eruptions; while some get up in the morning feeling just as tired as when they went to bed. These are all spring symptoms that the blood is out of order and that a medicine is needed. Many people take purgative medicines in the spring. This is a serious mistake. You cannot cure yourself with a medicine that gallops through your system and leaves you weaker still. This is all that a purgative does. What you need to give your health and strength in the spring is a tonic medicine that will enrich the blood and soothe the jangled nerves. And the one always reliable tonic and blood purifier is Dr. Williams' Pink Pills. These Pills not only banish spring weakness, but guard you against the more serious ailments that follow, such as anaemia, nervous debility, indigestion, rheumatism and other diseases due to bad blood. In proof of this Mrs. J. [illegible] Hughes, Hazenmore, Sask., says: "About a year ago I was badly run down, my nerves were all unstrung, and I could not go upstairs without stopping to rest. As I was a long ways from a doctor I determined to take Dr. Williams' Pink Pills and in the course of a few weeks I felt like a new person. As an all round restorative I can heartily recommend this medicine."

If you are ailing this spring you cannot afford, in your own interest, to overlook so valuable a medicine as Dr. Williams' Pink Pills. Sold by all medicine dealers or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Science Short Ones.

A California man has a watch which is kept running on the principle of a pedometer by the action of the feet [illegible] in walking.

When interviewing first became a feature of journalism in the United States, English writers denounced it as the most dreadful form which American impertinence had yet assumed.

Lady-birds are of great service to the gardener by reason of their destruction of plant lice, among which they lay their eggs, and as the larvæ come to life they feed on the lice.

The action of the surf is now stilled by jets of compressed air released at points below the surface from pipes leading from a compressor on the shore.

Boiled Rosebuds.

Although it is little known in this country, Turkish women consider rosebuds boiled in sugar a luxury not to be missed. They claim that these make an excellent preserve.

In China a species of lily is dried and used for seasoning [illegible] and other dishes. This is looked upon as one of the choicest of native dishes.

Many provinces of this same land grow lilies expressly for the purpose of marketing them in this connection. They are usually picked just previous to their opening and then cooked as ordinary vegetables.

FOR WAR WIDOWS.

Salvation Army to Find Husbands for Them Here.

(By Times Special Wire.)

New York, April 4.—A despatch from Pittsburg to the Tribune says:

Thousands of war widows of British soldiers will be assisted in getting good husbands in the United States and Canada by the Salvation Army, in conjunction with the Canadian Government, according to announcement to-day by Col. Wm. Evans, in command of the Salvation Army here.

Because a great many of the best men of England have been slain, the widows are without an adequate matrimonial field, Col. Evans declared, and many must come to American shores for sustenance and livelihood.

The Salvation Army, he says, will assist the Canadian Government in placing the widows in an environment that will enable them to get good husbands, and in the larger cities will introduce them to desirable bachelors.

Col. Evans thinks the agricultural provinces of Canada and the western states will get a majority of the widows.

INDIA'S QUEER BELIEFS.

Buddhists Would Die Rather Than Lose a Limb or Eat Meat.

India's population is 325,000,000. Practically all the races and religions of the world are represented. Ninety-eight and six-tenths per cent. of the people cannot read or write. Four per cent. of the inhabitants eat regular meals. The remainder eat when they can and where they can. The average native in India lives on less food per diem than any other human being in the world. Religious prejudices are intense. Men willingly die rather than submit to some dismembering surgical operation, for did not Allah command them to appear before him as they left him to come into the world?

The Buddhists will not eat meat or take even a medicine derived from an animal. They died by millions during the bubonic plague rather than take a prophylactic serum made from pepsin—because the pig from which pepsin was obtained was unclean to the Mohammedan and Hindu, and the killing of this animal and the bull from which the broth was made was against the tenets of the Buddhistic faith. I know an editor in Poona, India, to absolutely refuse a $1,000 yearly advertisement of a patent medicine because it contained pepsin.

Indians are fond of sweets and last year imported over $10,000,000 worth of sugar. Clothing is made chiefly from cotton, which is largely grown in the country.—W. E. Aughinbaugh in Leslie's.

Painter and Pawnbroker.

Mr. Frank Brangwyn, A. R. A., knows his Paris as well as most and also a good many more out of the way parts of the world besides—Russia, Spain, Algiers, Turkey and the rest—which he has visited in the pursuit of his art, more especially during his earlier days, when he was less affluent than to-day. In which latter connection he once had an amusing experience. During a financial crisis he sought to effect a loan of [illegible] on the security of one of his own pictures. The pawnbroker offered [illegible], to the artist's indignation. "Why, the frame alone is worth more than that," he protested, to be met with the crushing reply, "I know it is, and it is on the frame that I am lending the money."—Westminster Gazette.

WOMEN MADE THEM.

Great Men Who Acknowledged Their Wives' Power.

Tom Hood, the pathetic humorist, when absent from home, gave his testimony to the truth of Rousseau's saying that "Man is what woman makes him." "I never was anything, dearest, till I knew you, and I have been a better, happier, and more prosperous man ever since. Whatever may befall, my wife shall have my acknowledgment of her tenderness, worth and excellence."

Happy was the domestic life of Benjamin Disraeli, Lord Beaconsfield. He married late in life a woman much his senior, who brought him wealth, but to whom he was greatly attached. Once, as he was parting with her at the entrance of the House of Commons, where he proposed making an important speech, the full force of the carriage-door shut against her thumb. Though suffering greatly, she bade him a smiling adieu, in order that he might not be disconcerted, before driving to the surgeon to have her crushed thumb dressed.

Thackeray's tenderness to the poor, insane wife whom he loved to the last is a well known fact. The poet Longfellow, who, by a fearful catastrophe, lost the queenly woman whom he wooed through the pages of "Hyperion," maintained a domestic life as nearly perfect as falls to the lot of mortals. "During twenty years," wrote a friend, "following this event, he only waited for the hour which came at last. Through all the grand poise of his being, through his meek but manly acceptance of all the events of life, this was the one prevailing truth—he was waiting for the end."

The secret of the sustained power and energy of Gladstone, the "old man eloquent" lay in the fact that his domestic relations were always delightful, and that Mrs. Gladstone was entirely devoted to his well being. Always accompanying him even to the hustings, ready to shield him from every exhausting condition, she was likewise the companion of his intellectual life. And no man of true greatness but gives grateful acknowledgment to such womanly influence whenever he has been its happy recipient.

Among such may be numbered the blind Postmaster-General who brought in postal orders, Mr. Fawcett. By an accident Mr. Fawcett became blind at the age of twenty-five, yet in the next twenty years he accomplished remarkable feats through the help of his wife. Miss Garrett, before their marriage, a woman of rare capacity, became after the event, his secretary, fellow student, adviser, and other self.

BIG RUSS GAIN.

Took Fortified Mountain Camp in Armenia.

Petrograd, April 3.—Progress of the Russian army in the Caucasus continues. Monday's official communique on operations on this front says:

"In the course of our offensive we passed the watershed of the Upper Tchoruk river and seized strongly fortified mountain positions 10,000 feet above sea level, taking a company of Turks prisoner. In the course of the pursuit of the enemy in the region of the [illegible] convent we captured a Turkish camp with tents and shelters and a store of arms. South-east of Mush, in the region of the village of Mahhanbout, our detachments dispersed parties of Turkish cavalry."

Can Do My Work
Pain is All Gone

MISS DOLLIE McCLAIN TELLS OF DODD'S KIDNEY PILLS.

Alberta Lady Tells of Quick and Complete Cure Through Using Dodd's Kidney Pills.

Ferguson Flats, Alta., April 10—(Special.)—"Yes, I am very glad I can say that I have tried Dodd's Kidney Pills and found them all that is claimed for them." So says Miss Dollie McClain, an estimable lady residing here.

"I was troubled with a sore back that made me almost helpless. I took one box of Dodd's Kidney Pills and my back is all right. I can do my work and the pain is all gone."

Thousands of women in Canada are suffering daily tortures from pain in the back. Thousands of others like Miss McClain are doing their work without an effort because they took the advice of others and cured their backache by using Dodd's Kidney Pills.

Every woman should use Dodd's Kidney Pills. They are the finest tonic in the world because, acting directly on the kidneys, they tone up those organs to do their full work of straining all the impurities out of the blood. Pure blood means new strength for all parts of the body. New strength means new cheerfulness. That is why so many women so cheerfully testify to the benefit received from using Dodd's Kidney Pills.

FORCED TO QUIT.

Eton's Head Master Sympathized With Germans.

London, April 2.—Rev. Edward Lyttelton, head master of Eton College, has resigned. His resignation will take effect next Christmas.

Dr. Lyttelton in speeches during the war has made the declaration that it was the duty of Great Britain to extend the principles of Christian charity to Germany, and as a result he has been assailed by the newspapers as unpatriotic and a visionary. Several of the newspapers have accused him of being pro-German. Dr. Lyttelton denied these assertions.

A Little Too Much.

One evening a little boy entered a grocery store and handed the clerk a note which read: "I am a poor woman and have no money. My children and I are starving. Won't you give us something to eat?"

The kind-hearted clerk filled a large basket with food and gave it to the boy, who quickly departed.

In a few minutes he again entered the store.

"What's the matter now?" said the clerk.

"Ma sent me back to get the trading stamps," the lad replied.

ISSUE NO. 15, 1916

HELP WANTED.

WANTED—SPINNER ON D. & F. and Whitley Mules. Steady work; highest wages. For particulars, apply The Slingsby Manufacturing Co., Ltd., Brantford, Ont.

GIRLS WILLING TO WORK ON British Army Orders, knitted underwear. Seamers, plain stitchers and learners. Bright, healthy employment. Good wages. Zimmerman Mfg. Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

FOR SALE.

FOR SALE—RUFUS RED BELGIAN Hares and Gray Flemish Giants; fully pedigreed. D. C. Waters, 173 Jackson street west, Hamilton, Ont.

FOR SALE—FANCY PIGEONS AND flying homers; prices reasonable. L. J. Hellon, 8 Caroline street south, Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCATION to train for nurses. Apply Wellandra Hospital, St. Catharines.

Where Pigs Climb Trees.

Presumably the walrus and the carpenter never did settle the discussion as to whether pigs had wings, and there are persons who seriously think it was a foolish time for an argument.

And yet is it any stranger than the undisputed fact that in Morocco pigs climb trees in search of nuts — not only pigs, but goats, too? The puzzle is not in the pigs and the goats, however. They are of the common variety that we see in the back lots in our own communities. It is the tree that is strange. It is called the Argan nut tree and grows near Agadir if only it shoots out from a steep hillside. The trunk is broad and flat and almost horizontal and so are the main branches, forming ample and solid foothold for any animal which may be tempted by the olive-like nuts growing within easy reach of the main branches.

MICA AXLE GREASE

Has been the standard for years. The mica fills the pores in the spindle. Saves friction, wear and money.

TRAINING THE FLEA.

How the Tiny Insect Is Weaned From Its Jumping Habit.

"The teaching of the flea to do any sort of trick is, of course, a tedious, difficult matter," said the flea trainer. "The first thing to do is to break it off its natural habit of jumping.

"One can see how necessary this is when one considers the flea is less than one-eighth of an inch in length and has a jump of three feet — [illegible] times its own length. If a six-foot man had the same leaping power he could make leaps of 1,800 feet, [illegible] that when a flea has the advantage of one leap he is as good as gone for ever. My apparatus for jump breaking is a round glass ball. I confine him in this for three weeks. I look through this ball, touch it, flash lights into it, talk, do everything to let the flea accustom himself to my presence. At first he will jump and jump. He strikes against the curved walls and gets bruised. After a time, and I find three weeks to be ample, the flea gets to know me, and he also gets to know that it is less painful to crawl than to jump and get bruised.

"The flea cannot differentiate between transparent glass and no glass, so that, when I take him from the ball he still strikes this peculiar obstruction and so he don't jump. So, you see, a flea must have some reasoning power somewhere, but I am in no position to say where it is located. That is why I have to pick fleas up with tweezers and put them on my arm when I want to feed them. They don't dare to jump on me."

A Japanese Breakfast.

The usual Japanese breakfast consists of rice, miso soup, pickles and occasionally fish. Tea is always served with it and is drunk clear, without sugar or cream. Miso soup consists of strips of radishes, seaweed, eggplant or other vegetables cooked with bean curd and water. The cooking is not continued for a long period, and so few vegetables are used that the soup partakes only slightly of the flavor of the ingredients.

Your Ninety-First Birthday—how are you going to celebrate it? You can live to celebrate it by eating the right kind of foods. Give Nature a chance. Stop digging your grave with your teeth. Cut out heavy meats, starchy foods and soggy pastries and eat Shredded Wheat Biscuit. It supplies all the nutriment for work or play with the least tax upon the digestive organs.

Made in Canada.

ELLA'S RECOMPENSE

"Yes, and I am sure she is worth it. So you will be gone before I come back. They will get you a cab, and you must come and see me sometimes. I hope you will find something to do soon. Take my advice, and don't be obstinate and contradictory; those is your great faults. Dear me, it is nearly 2 o'clock! I must go! I am so glad I put on my bonnet before luncheon. Ring for the waiter. Is the carriage at the door? Good-bye. There, there is the present I promised you; now you see I can be just and forgiving, so let me hear no more of claims and worries."

Bestowing a hasty kiss on her young cousin, Mrs. Vereker went away down stairs. Ella walked to the window, and with rather a desolate sense of freedom watched her driving off. She looked at the envelope Mrs. Vereker had placed in her hand. Something crackled within. She wondered with a certain expectation of disappointment, what it contained. [illegible] for a pound or two, a [illegible] and [illegible] that these crisp ten pound notes! —that was all, out of the wealth inherited! First Ella laughed [illegible] bitterly, then she sat down, [illegible] to her eyes as she thought what a provision against the uncertain future [illegible] before herself and dear, thoughtless Kitty, the two thousand pounds bequeathed by the unsigned will to Mrs. Vereker would have been.

There was no use in thinking about it. Only five months before she was made radiantly happy by Sir Theodore's success in securing for her the little sum left by her grandmother. Now she was no worse off. She must not be weak and sentimental; she must be true to herself and to the helpless little sister who had a daughter's claim upon her.

She put the last touches to her packing, and returned to the sitting room to direct and stamp a little parcel of photographs, a gift to the friend who had taken Kitty during the holidays.

She laid the bank notes beside her, and having completed her task, was just rising to ring and ask for a cab when the waiter came in and presented a card.

"Gentleman wants to know if you'll see 'im."

Could she believe her eyes! The card was inscribed "Lieutenant-Colonel Cecil, —th Bengal Cavalry." She was not conscious of answering; but the next moment Cecil, looking very grave, even severe, walked into the room, and the door was shut.

Ella started up, quivering with surprise and pleasure. She was the first to speak, "Oh, Colonel Cecil, I thought you had gone away out of town again—at least, Mrs. Vereker thought so." She hardly knew what she said as she gave him her hand.

"I am not going out of town again—until I leave it altogether."

Leave it altogether? Where could he be going? she asked herself.

He was evidently ill at ease; something was on his mind.

"Mrs. Vereker is not at home," resumed Ella, watching Cecil with a kind of apprehension, as he stood on the hearthrug, resting his hands on the back of a chair.

"No," he said absently. "I knew she was out. I suppose she is tremendously busy." He smiled for the first time since he came into the room. "Are you to stay with her?"

"No, I am going back to Miss Griffin."

"I see I am only just in time," he said, noticing a small portmanteau and other signs of packing. He paused abruptly, his eyes resting with a questioning look on hers.

She had flushed quickly, but grew composed as she returned to her seat. "Yes," she said. "I should have been gone in two or three minutes. I am glad—" she stopped.

"I am exceedingly glad to have caught you," put in Cecil, drawing a chair opposite to her, "for I want to explain one or two things. I am awfully cut up about poor Lyall's death not on my own account, but chiefly on yours. He told me before he left Friedrichstadt that he intended you to be his heiress, and he asked me to be your guardian. It was to—to consult with him about some matters concerning you that I left Friedrichstadt so abruptly. Everything seemed to be going right, and I went to see my sister in Derbyshire; there I heard of his death." He paused.

"Ah, how grieved I am to think I shall never see his kind face again," cried Ella, keeping her eyes fixed on the penwiper with which she was nervously playing.

"Smalley tells me Mrs. Vereker intends acting as she ought, and will do something handsome for you," continued Cecil.

"She has done it," said Ella, with a faint smile, handing the notes across to him.

"What! thirty pounds instead of thirty thousand!" he cried. "You must be mistaken! This is merely a trifle for your immediate expenses."

"She distinctly told me I was to expect nothing more."

"Commend me to a gentle, timid, womanly woman for intense selfishness!" exclaimed Cecil, indignantly. "We must do something better than this. You must allow me as your guardian—"

"No, no! I do not wish you to interfere, Colonel Cecil," interrupted Ella.

"What! do you distinctly warn me off?" cried Cecil, starting up, and walking restlessly to and fro, finally taking his stand by the mantel-piece.

"I am very grateful to you for troubling yourself about me," said Ella, with proud humility. "But I want no appeal to be made on my behalf to Mrs. Vereker. I am no worse off now than I was before I knew my good, kind, Cousin James. He himself is the great loss to me, a loss I shall long mourn." She again stopped abruptly, as if she feared to lose command of her voice; there was an awkward pause. Cecil had come to this interview full of undefined purpose, and trusting for guidance to such indications as we hoped to find in her manner, in her voice. She was terribly white and composed; he had faced some dangers in his day, but he felt this was a trying moment. At length he exclaimed:

"Miss Marston, I must speak frankly. I must beg you to hear me—my time grows short. I was obliged to hurry away from paying the last respect to poor Lyall, for I was summoned by Sir Everard Morton, our commander-in-chief, who is at home now. He has offered me an important post on the northwest frontier. I have accepted."

"When do you go?" asked Ella, with an irrepressible quiver about her mouth.

"I ought to go in a fortnight," resumed Cecil, watching her intently.

"A fortnight!" repeated Ella, faintly, dropping the penwiper and instinctively raising her hand to shade her eyes, resting her elbow on the table.

"Ella," cried Cecil, "can it be that my going affects you? speak truly to me, for my future depends on you." He caught her hand and held it in both his own; she rose from her seat, leaving her hand in his grasp, and slowly raised her eyes to him with sweet seriousness.

"What can I say?"

"Does my going grieve you?" he repeated.

"Yes, very, very much!" she said, in a low tone.

"Then come with me—be my wife," cried Cecil, his dark eyes lighting up. "You little darling! I have loved you nearly from the first hour we met! I should have told you so long ago, but for poor Lyall's scheme of making you his heiress! I left Friedrichstadt to tell him I could only be your guardian for life. I was a fool to think of what the world would say when the real treasure is yourself! Can you care for a fellow that is old enough to be your father. No younger man could love you more passionately, more fondly than I do! Will you have me, Ella? do you love me?

He raised her arms to his neck and pressed her close against his breast, and her tender yielding to his embrace told him more emphatically that he was loved than even her whispered "I do."

The next moment she disengaged herself, and exclaimed: "And Kitty? what shall I do about dear Kitty?"

"She shall stay with Miss Griffin, and imbibe all the knowledge of all the accomplishments you think necessary, till she is old enough to come out to us, and I will be a father to her. Come, Ella, a long kiss to complete the compact!"

A moment, an age, an unmeasurable space of divine folly, of glorious exaggeration, and Ella, trembling, and dazed by the sudden change from darkness to light, from poverty and isolation to the wealth of love Cecil seemed ready to lavish on her, asked, "But must you really go in a fortnight?"

"I can manage to postpone my start for a month. I must go then: that is time enough for every preparation, and I will not leave you behind!"

"It is late; I really must go," cried Ella, "Miss Griffin will be expecting me."

"I will come with you," said Cecil, "and explain matters; there is no time to be lost."

He put his arm round her. "Let me look, into your eyes once more," he said, "and assure myself that you love me, for your eyes are true!"

Ella had drawn away from his embrace and turned to leave the room, when the door opened to admit Mrs. Vereker, who at first did not perceive Colonel Cecil.

"Why, Ella, not gone yet?" she exclaimed. Then, in her lowest tone: Ah, Col. Cecell, I had no idea I should find you here! It is very good of you to come here again. But, indeed, I am more in need of friendship and sympathy than ever"—her black-edged pocket-handkerchief was pressed to her eyes—"The loss of a brother I loved so well is the last blow—" she broke off.

Ella, overcome with a sort of comic dread of what was to follow, paused.

"At least poor Lyall has left wherewithal to heal your wounds. A golden salve is rarely unacceptable," returned Cecil, dryly.

"You are unkind," cried Mrs Vereker, struck by his tone. "Once you would not have spoken in that cruel way."

Cecil hesitated how to announce his new happiness, and Mrs. Vereker turning sharply to Ella, exclaimed: "You had better go, if you are going. It is not nice to be driving about by yourself in a cab after dark."

"I quite agree with you Mrs. Vereker," said Cecil. "Miss Marston has been obliged to go about too much alone, and I propose taking measures to provide her with proper care and companionship."

"Indeed!" with increasing surprise. "Have you found an engagement for her?"

"I have."

"Well, Ella," returned Mrs. Vereker, greatly puzzled; "I am sure I have brought you good fortune."

"I think you have," said Ella, laughing and blushing.

"We had better not delay any longer, Ella," said Cecil. "I will of course take care of you now—and always."

"Why, Ella! Colonel Cecil!" screamed Mrs. Vereker. "What is the meaning of this?"

"It means that in about a fortnight I shall salute you as cousin—in right of marriage with your Courier Maid."

THE END.

Antiquity of the Organ.

The organ is the most magnificent and comprehensive of all musical instruments. While the pipes of Pan, aside from that mythical personage, indicate a very ancient use of pipes as a means of producing musical sounds, the "water organ of the ancients" furnishes to the student of organ history the first tangible clew regarding the remote evolution of the instrument. In the second century the magripha, an organ of ten pipes with a crude keyboard, is said to have existed, but accounts of this instrument are involved in much obscurity. It is averred that an organ, the gift of Constantine, was in the possession of King Pepin of France in 757, but Audheim, a monk, makes mention of an organ with "gilt pipes" as far back as the year 700.

"She's a very frivolous woman." "Neglects her children and husband fearfully, I'm told." "Why, that woman doesn't even pay any attention to her rubber plant!"—Kansas City Journal.

HERE AND THERE.

The famous "Council of Three," who brought to a successful conclusion the Civil War in America, were Abraham Lincoln, the President, Andrew Johnson, the Vice-President, and Mr. Seward, the Foreign Secretary. Of these, Lincoln was murdered, and Seward was dangerously wounded, on the eve of the peace celebrations that heralded the close of the conflict. The campaigns of Queen Anne's reign were run by an unofficial War Council of three persons one of whom was a woman: the Duke of Marlborough, who controlled the army; Lord Godolphin, who controlled Parliament and the Privy Council; and Sarah, Duchess of Marlborough, who controlled the Queen. In theory, this usurpation of authority on the part of these three irresponsible individuals was indefensible, but its effect was to secure victory for the British arms.

The popular theory that during wars the proportion of boy babies to girl babies is greatly increased above the normal average is supported by the birth announcement column of the London Times in November. Out of 414 births announced the boys exceed the girls by no fewer than 22. In the last Registrar-General's annual report, dealing with the period before the war, the proportion of male to female births was 1,033 to 1,000. If the Times announcement column figures be taken as representative they show a proportion of male to female births since accurate statistics have been kept was 1,054 to 1,000 in 1844.

The British Army Ordnance Corps, keeps a record of every big gun from the time it is born till the time it finishes its career, worn out or destroyed by an enemy's shell. Every gun has its history sheet, on which is set out where it was manufactured and tested, and at what time. Every time that gun fires a shell at the enemy a note is made of the fact in the history sheet, so that the capabilities and wearing power of any particular class of gun can be studied at any time, its defects noted, and improvements suggested. At the end of this war the experts at the War Office will be able to say exactly which kind of gun was best for a particular kind of work, and manufacture accordingly.

Ancient Egypt paid taxes with a vengeance. The names of more than 150 different taxes imposed on the Egyptians of the Roman period have been learned from the papyri. Besides the poll tax, they include taxes on exports and imports, on animals, on business transactions, such as sales and mortgages, imposts for the benefit of the Government and its officials, from the Emperor downward, who took his bakshish in the form of a national offering, at his accession. When one further considers the other burdens to which property was liable, the imposition of public duties and the discharges of costly municipal functions the wonder is that there was anything left to tax.

Germany can send small war craft of shallow draught from Antwerp to the Black Sea under their own power without once venturing into "blue water." Some years ago Messrs. Yarrow Limited, of Glasgow, completed two small monitors for Roumania, and these two vessels steamed across Europe to their destination. They first went to Antwerp and then up the Rhine to beyond Mayence. After this they proceeded by canals to the upper reaches of the Danube, down which they steamed to Galatz, a Roumanian town about fifty miles from the mouth of the Danube in the Black Sea.

An old-time writer once explained: Blackguard—in all great houses, but particularly in the Royal residences, there were a number of mean and dirty dependents whose office it was to attend the wood-yard, sculleries, etc. Of these the most forlorn wretches seem to have been selected to carry coals to the kitchens, halls, etc. To this smutty regiment, who attended the progresses, and rode in the carts with the pots and kettles, the people in derision gave the name of "blackguards." The word did not, however, originally carry with it any necessary suggestion of lowness of character, but only of lowness of status, and dirtiness of appearance that was quite unavoidable.

Probably the word "grocer" originally meant "one who sells by the great, or utters his commodities by wholesale," and they trace it to the French word "grossier." An act entitled 27th Edward III. c. 5 was directed "against grocers engrossing merchandizes"—that is to say, against the absorbing or monopolising of trade. Here there appears to be an early instance of hostility to the running of great stores. Blackstone the legal authority, distinctly states that engrossing was the "getting into one's possession, or buying up large quantities of corn or other dead victuals with intent to sell them again."

Potash fertilizers seem to give protection from frost. A French market gardener has found that plants in a field strongly fertilized with kainit suffered little from a series of heavy frosts, those on a lightly fertilized area were more injured and those on untreated land were much damaged.

Bagdad stands on both sides of the Tigris, connected by a bridge of boats, 220 yards long, and is shut in by a brick wall forty feet high and five miles in circumference.

The Germans have recently issued a law that birds are no longer to be blinded to improve their singing. Is this symptomatic of a change of heart?

Moral "Risks."

It is pointed out by a modern thinker that there is no such thing as a moral risk, for when we talk about a "risk" we mean that there is a possibility, but not a certainty, that harm will result. A boy takes a physical risk when he goes skating on that part of the river where the ice is thin. He may fall through and injure his health or lose his life. But when we venture on thin ice in our moral life there is no risk in the matter at all. There is assured catastrophe from the moment we start in that direction. No one can do anything which he knows involves possible moral danger without thereby definitely passing beyond the line of mere danger into positive injury to his character.

SUNDAY SCHOOL LESSON

April 16, 1916, Lesson III.

Peter and Cornelius.—Acts 10. 1-48. Print 10.1-16.

Commentary.—I. The vision of Cornelius (vs. 1-8). 1. Caesarea—This was the Roman capital of Palestine at this time, the residence of Herod Agrippa who had been appointed procurator of Judea and Samaria. It was situated on the Mediterranean Sea and at one time was a prominent city. It is now a mass of ruins. Cornelius—A common Roman name. Centurion—A captain over a hundred soldiers. The Italian band—The Roman procurator, or governor, had a body-guard, and it is probable that the soldiers that composed it were brought from Italy. Cornelius was not a high officer, but he was in a responsible position. 2. A devout man—He gave careful attention to the interests of his soul. He was not a pagan, for he feared God and worshipped Him. With all his house—He had a wholesome religious influence over his family and taught them about the true God. It seems also that this influence extended to the soldiers under his care. Gave much alms—His devotion to God led him to perform acts of charity to the people of Caesarea. Prayed to God alway—It seems probable that Cornelius received some knowledge of the true God from the Jews among whom he lived. He had regular times for prayer. He was in earnest to know God's will and to do it.

3. He saw in a vision—As Cornelius desired to know spiritual truth, the Lord opened the way to a clearer revelation of Himself. It is evident that he was awake when this vision was seen by him (v. 30). It came to him while he was fasting and praying. The ninth hour—Three o'clock in the afternoon. It was the time of the evening sacrifice and the evening hour of prayer. An angel—A man "in bright clothing" (v. 30), a superhuman messenger. 4. He was afraid—When Cornelius realized the nature of his visitor, he was startled and amazed. What is it, Lord—His question indicated a desire to know what the Lord would impart to him and a submissiveness to the divine will. Thy prayers and thine alms are come up—They are likened to the incense which is offered up in the temple. For a memorial before God—The prayers of Cornelius and his deeds of charity had not been unnoticed. God regarded them and in His own time sent the answer. 5 Send men to Joppa—Joppa was nearly thirty miles south of Caesarea on the shore of the Mediterranean. Simon—Peter, one of the most prominent of the Lord's apostles. Human agency was to be employed in answering Cornelius' prayers. 6. Simon a tanner—We note with what detail the messenger gave direction to Cornelius. The occupation of a tanner was considered in a sense unclean by the Jews, for there was of necessity contact with the dead bodies of animals. By the sea side—The Jewish rule was that a tannery should be at least fifty cubits from the city. Simon's house was outside the city and close to the sea. The traditional house of Simon is still shown in Joppa. He shall tell thee—The Lord would employ Peter to impart to Cornelius the needed and desired information. 7. A devout soldier—Naturally Cornelius would select a devout soldier to go with his household servants on this important mission, since spiritual interests were involved. 8. Declared all these things unto them—Cornelius told the messengers of the message that had been divinely sent to him.

II. Peter's vision (vs. 9-16). 9. On the morrow—Cornelius had sent the three messengers to Joppa at once after the angel's visit to him, and they reached the place at about noon the next day. Upon the housetop—The roofs of Oriental houses are flat and are much used as places of rest and retirement. Sixth hour—Twelve o'clock, noon. 10. Would have eaten. He wished to eat. Orientals eat their first meal late in the forenoon and it is likely that Peter had eaten nothing that day. While they made ready—While those in the house were preparing food. He fell into a trance—He was not in his natural condition of wakefulness, nor was he asleep. He was in a state in which there were revealed to him objects, which, though not real, impressed themselves vividly upon his mind. 11. Heaven opened—There appeared to be an opening in the sky and heaven seemed to be the source from which the sheet came. A certain vessel—Something that would contain many animals. It was like a great sheet let down by cords attached to the four corners. 12. All manner—To the Jews beasts, birds, fish and creeping things were of two classes, clean and unclean, and both classes were mingled in this great vessel. 13. There came a voice—Peter recognized it as God's voice (v. 14). Kill and eat—Before Peter fell into a trance, he was hungry; now the means of satisfying his hunger is presented to him by the Lord. 14. Not so, Lord—Peter's Jewish training forbade his eating any animal food except that which was legally clean. He could not bring himself to consider it right to use unclean animals for food. Common or unclean—That food was looked upon as common which was used by the Gentiles, who had no respect for Jewish laws. The Jew held every act of life as religious. Unclean animals were those which Jews were forbidden to eat. 15. What God had cleansed—The heaven-sent voice revokes what had been enjoined from heaven at the giving of the law. The power which made the restriction can remove it. That it would be removed Christ had intimated (Matt. 15: 11) "Not that which goeth into the mouth defileth a man." The old dispensation is now to give place to the new, and Peter is taught by the vision that men are not to make such distinctions and separations for themselves. —Cam. Bib. 16. This was done thrice—It was done three times in order that Peter might be deeply and permanently impressed with the truth conveyed.

III. Peter's obedience (vs. 17-23.) When the vision had passed, Peter was considering its meaning. Just then the messengers from Cornelius arrived at Simon's house and were inquiring for Peter. At the same time the Holy Spirit told Peter that three men were seeking him and he should not hesitate to go with them, for they were divinely sent. The messengers explained to Peter what their mission was and gave some account of Cornelius and his vision. Peter was fully obedient to the directions of the Spirit. The messengers from Cornelius remained at the house of Simon, the tanner, that night and the next day set out with Peter and six brethren (Acts 11: 12) for Caesarea. The vision of Cornelius and that of Peter fitted together perfectly in every part. The two men were honest and earnest in their purpose to do the will of God; and when they were convinced in what direction duty lay, they were ready to go, although they could not see fully the reasons for the steps they were taking.

IV. Gentiles receive the gospel (vs. 24-48.) Cornelius called together his relatives and near friends to meet Peter and hear his words. The centurion received the apostle most cordially, prostrating himself before him. Peter told the company how the Lord had taught him that he should call no man common or unclean. After Cornelius had related his vision, Peter preached the gospel to those who were assembled with Cornelius. While he was speaking, the Holy Ghost came upon all who were present. The Jewish Christians were astonished because the Spirit came upon the Gentiles as well as upon themselves. The Gentile converts were baptized in the name of Jesus. Peter had learned the truth, "God is no respecter of persons" (vs. 34.) We find Peter not long after this standing up in the Christian council at Jerusalem to speak in defense of the Gentile Christians. He related his experience in finding out that Gentiles were included in the gospel scheme.

Questions.—Where was Caesarea? Who was Cornelius? Who appeared to him? What was he told to do? Where was Peter? Who went with Peter to Caesarea? Whom had Cornelius called together? What had led Peter to see that God was no respecter of persons? Whom does God accept? Give an outline of Peter's sermon. What occurred while Peter was speaking? Why were the Jews astonished?

PRACTICAL SURVEY.

Topic.—Christianity interpreted.

I. In its general scope to Peter.

II. In its saving power to Cornelius.

I. In its general scope to Peter. The second part of early church history is here begun. The great thought of the gospel, the conversion of the Gentiles, began to be an accomplished fact. Thus the infant church took a new departure and entered upon its world-wide mission, henceforth to pursue a new line of progress. The apostle Peter received a symbolic revelation of the fact that the restrictions of the Mosaic law were removed and that the distinction between Jew and Gentile was abolished. God provided special teaching for him before he could enter upon the work to which he was called. It was a hard task for Peter to surrender his Jewish exclusiveness. He had been brought up to believe that the law was eternal in its minutest details, ceremonial and judicial. It was difficult for him to comprehend the counsel of God with regard to the calling of the Gentiles and to see that the narrowness of Judaism was contrary to the all-embracing spirit of gospel grace. Though he found it difficult to wean himself from the old covenant, he was God's chosen instrument to begin his work among the Gentiles. Heathenism was knocking humbly at the door of Christ's kingdom. Peter's resistance was characteristic. It required a miracle to induce him to open the door for the Gentiles to come into Christ's kingdom. All his convictions, installed by training, ingrained by habit and deepened by narrow, but intense thought, suddenly gave way. The vision opened up a new era. It delivered him from the prejudice and custom which had incapacitated him for transiting from the old to the new. Peter realized divine teaching in the vision while he was perplexed about the scope of it.

II. In its saving power to Cornelius. It required a special divine interposition to prepare in the Gentile world an audience for a gospel sermon. Peter received a vision intended to break down his exclusiveness, while Cornelius received divine instruction to send for the apostle. Just when God was stirring large thoughts in Peter respecting the universality of the gospel, he was also working in Cornelius a desire for fuller knowledge of salvation. Cornelius was devout. He recognized the reality of religion. He reverenced God in his household. He practised known duties with diligence and zeal. With yearning heart he had penetrated to the true elements of the Hebrew religion. With all his excellence he was still unregenerated. The truth-seeker and the truth-teacher were drawn together. The servant of Christ and the soldier of Caesar met face to face. It was a happy meeting, divinely brought about and fraught with blessing. God's great sermon to the world was spoken by lips prepared to speak to hearts prepared to receive. It affirmed that the whole world was free to receive the message of the gospel. The two conditions which Peter laid down were repentance and faith. Cornelius received the gospel and embraced Christ without hesitation. A praying Gentile was the first uncircumcised person admitted into the Christian church. A praying apostle was the instrument to bring about the happy consummation. To Peter was given the distinguishing honor of bringing in the first Gentile convert. All barriers of race or rank were broken down. While Peter preached to Cornelius and his assembled household, the Holy Ghost was poured out in confirmation of the truth spoken, in confirmation of the genuineness of the faith of the Gentile converts and in confirmation of their fitness for church fellowship. The conversion of Cornelius created more astonishment than any other one conversion because of the new principle it embodied and the new policy it served to inaugurate. What Judaism had done ceremonially for one nation Christianity was to do efficaciously for all nations. Cornelius stood at the head of Gentile Christianity. His conversion marked the beginning of a new epoch. Springing forth from the bosom of Judaism the followers of Christ were at first regarded as a Jewish sect, amenable to Jewish ecclesiastical law and discipline. While the infant church was surrounded by dangers, its nearest and greatest danger arose from the church from which it had itself sprung. The union of Jew and Gentile was one of the questions of serious debate. Only as the church kept united could the outside difficulties be met.—T. R. A.

To Destroy Roaches.

An easy method to rid the house of roaches has been found by Mr. Means, assistant surgeon U. S. S. Cincinnati. He states that one time the store rooms and pantries become infested with roaches, and the ordinary insect powders seemed to have no affect on them. Sodium fluoride was then used with marked result. Not only were the roaches killed, but the ordinary black beetle that is found with the roaches.—From U. S. Naval Bulletin.

SCIENCE NOTES

Telephone line extension is now facilitated by the use of a machine which digs the holes for the poles at the average rate of 60 a day.

Electricity has been used successfully in France for ripening cheese.

Mistletoe is proving a pest in the lumber regions of the Northwest, and steps are being made by the U. S. Government forestry people to combat it.

Of the coal produced in Great Britain in 1913, 189,092,369 tons were retained for home consumption—representing 4,103 tons per head of the population.

Aluminum alloy pistons on motorcar engines wear excellently with the usual lubrication.

California's mining properties last year numbered 658, of which 277 are gold mines.

The fine watch is protected by a pneumatic pad.

A ticket clip for milk bottles has been invented for the accommodation of those who desire to leave directions for the milkman.

Take a man, his wife and three children, under 14, for example. Experts have agreed that for such a family $6 a week must be spent for food, $2.60 for clothing, $3.50 for rent, 50 cents for fuel and light, and then $2 for insurance, health, furniture, recreation, education and so on—a total of $14 a week.

A humming-bird, when stripped of its feathers is no larger than a bumble-bee.

The light of the sun is 600,000 times greater than the full moon.

The tensile strength of a paper fly wheel is far greater than one made of iron.

The horn of the rhinoceros is not joined to the bone of the head, but grows on the skin.

Consumption is most common between the ages of 25 and 30.

A pocket size electric fan has been invented.

Out of 16,000 houses in Schenectady, N. Y., only 417 are not wired for electricity.

The flatiron is the most popular of all the electrical household devices.

Gokteik Viaduct, in the Shan Hills, Upper Burma, is the highest railway bridge in the world. It is 820 feet above the water.

To increase the life of fire hose, the latest idea is to keep it inflated with compressed air.

EASY HOME-MADE TOYS.

Children Benefit From Utilizing Many Articles in Toy-making.

Hundreds of toys are thrown into the dustbin, or on to the fire, in every house in the course of a few weeks. This sounds rather a sweeping statement, but it is a true one. There are in all homes many little things, utterly unconsidered trifles, which the real toy-making enthusiast will pounce upon as soon as he sees them, and which he will save and guard jealously till such time as he has need of them. The less material you need to buy, the better the toy maker you are. "How cheap it sounds," one may exclaim, and so it is. Here are a few of the things to be found in all houses which are invaluable for this work, but which few people have the foresight to save:

Matchboxes, the large, strong ones are particularly useful; the empty cases in which incandescent gas mantles arrived; cotton reels of all sizes; tin foil; cardboard boxes of all shapes and sizes; the fluted card board packing, which is such an excellent substitute for corrugated iron; old buttons; beads, silver paper; all kinds of scraps of material. These are only a few things, of course. Many more will suggest themselves to the toy-maker as the work progresses. In time it will be found that there is a use for almost everything that had formerly been cast aside as worthless. A glue pot is one of the necessary "properties" of the toymaker; thin wire is another; a little enamel or paint is all useful; feathers are often needed, and should be saved for use when required. You never can tell just when you will want such things, and the best plan is to have a cupboard shelf or a drawer which is sacred to these things, and in which all the materials can be kept.

Children are kept happy and contented for hours together making toys. The work has an educational value, for it teaches them to think. They must be able to offer suggestions concerning the toy they are making; they must think of the best way in which to make use of the materials they have; they should not be encouraged to run to shop for everything they want; it is far better training for them to pretend they are shipwrecked mariners, with no other materials available. This will be a game, and at the same time it will tend to bring out all the ingenuity latent in the little ones. And when a toy has been made, no matter whether it be a properly furnished doll's house or a humble chest of drawers made out of match boxes, how much the children will value it, since they have made it all for themselves!

The reason toys so often are badly used and quickly broken is that they are too easily obtained. The child has had no trouble to get them, he has no affection for them, and so the things are treated carelessly. There is a feeling of affection for a toy that one has made, or helped to make. It has a personality. It has cost effort. And so we shall find that the home-made toy is a blessing, not only to us, but also to our children. It will teach them carefulness, self-reliance, patience. It will train them in habits of observation, and it will keep them employed during the dull hours; and lastly, it will teach them respect for their possessions—something which the cheap toy has very nearly destroyed.

SUNDAY AT HOME

IN MEMORIAM.

"Twas Truth's young soldier lay,
In sorest need.
The sudden call had come
With awful speed.

"Nothing is left me now
But silent death.
I must take leave," he said,
Of body, breath.

"Fold up this half-worn tent,
Put it away
Under the daisies, there,
Against that day.

"We journey to one end,
To sleep and wake;
The night is thick with stars,
And day will break."

And as he spoke there fell
From out its place,
The gold of heaven's full dawn
Upon his face.
—Theodore H. Rand.

OUR FAILURES.

In many things we all err. We try the byepaths, and the gleaming ways, which seem to lead upward to the heights, seem to scale heaven by a short and hazardous climb. It is something if the thunder breaks and drives us down, or some tale of the barren summit makes us wise in time, so that at any rate before death falls we find ourselves within the wicket-gate, on the right road, though far away. It is by failure more than by successes that God produces that result. And therefore the true success, in his eyes, is often what passes here as failure.

NO MAN'S LAND

It is an undiscovered country; it is not, at the poles, not under the burning equator not up the Nile or Amazon, but nearer home: in the house, and nearer, in your own heart. "Who can know it?" says the Book. Do you know? "Man, know thyself." The hardest task yet. No man has made a chart of this unknown sea, his own consciousness. It is distinct from the body; it is in it, not of it; it is a tenant; gravitation holds the body to the earth, but the ocean of consciousness rolls past, a tidal wave, swelling, rising; it touches the beams of His chambers who dwelleth in light that we do not know.

It is a sea where all our thoughts are drowned, says the poet, only the trouble is you cannot drown thoughts; they are dressed in an insubmersible tunic, and like a cork they cannot sink. Think of a sea crowded with fleets intelligent and free, yet they touch terrific limitations of space, on the one hand, and measure their time by the clock; on the other hand, they move in a larger world, with absolutely no boundaries, where speed is not measured by miles, or success by money.

The Kingdom is within; there is a Kingdom and a King, and He is living, powerful and immediate. "He is over all and blessed for evermore." He is light; will you pursue your studies in His day, or hang up a curtain and dwell in darkness? If you let down the sounding line, you will find no bottom, but exclaim with Paul, "Oh, the depths both of the wisdom and knowledge of God! How unsearchable are His works, and His ways past finding out. If you take the wings of the morning and dwell in the uttermost parts, you will find that He is there before you.

The British navy can send a searchlight for miles and miles. He is the great searcher of the heart; if you are wise you will pray, with another: "Search me, O God, and know my heart."

Remember, this is very practical navigation of these undiscovered seas. 'Tis not a watery wilderness, but occupied and filled with intelligences, angelic and human, who help us to discover.

Could we but stand where Moses stood,
And view the landscape o'er,
Not Jordan's stream nor deaths cold flood
Shall fright us from the shore.

Intuition, indentation, whispers will come to the devout and trained observer and conclusions will be arrived at which shall prove the personal property of every searcher. You can hold these precious treasures against all comers, and laugh at all critics. "Hast thou faith? Have it to thyself before God."

Remember, there is a double personality in every case. He calls and we answer. He gives and we receive. He beckons and we follow on to know the Lord. The greater includes the less. "Christ in you, the hope of glory." He, like the mother bird, hides us under the shadow of His wing.
H. T. Miller.

Where is the Flag of England?

The following spirited poem by an American writer, is a gracious tribute to the British flag, and a [illegible] of the much-desired moral alliance of the English-speaking races:

"Where is the flag of England?
They ask on every hand,
Some with a bitter hatred,
Some with a loyal stand;
Worshipped almost as a symbol,
Then scorned as a rag,
But somehow it still keeps waving on,
[illegible] the breeze till its work is done,
That glorious English flag.

Where is the flag of England?
It waves the throne above
Where a good king reigns by the grace of God
And a people's boundless love;
Of all the rulers earth now owns,
However the world may brag,
Not one so calm and so true is seen,
As George the Fifth, the gracious King,
Enrobed by England's flag.

Where is the flag of England?
It floats on every sea,
Borne by the hands of the bravest men,
And waving ever free;
It leads the way to the battlefield,
And the armies never lag,
For somehow or other they seem to know
England has conquered every foe
Led on by that wondrous flag.

Where is the flag of England?
'Tis floating o'er the free,
Protecting every Englishman
Wherever he may be;
The greatest power on earth may not
The humblest subject drag
Unjustly to a captive's fate,
Or it will feel the power innate
Of England's mighty flag.

Where is the flag of England?
Not yet where yet 'twill be,
Conjoined with "old glory" grand,
The emblems of the free;
One God, one Christ, one speech, one soul,
The two shall be unfurled
For progress, liberty, and right,
And England's fame, Columbia's might,
Shall help and bless the world.
—Rev. J. P. Hutchison.

To keep white silk gloves from turning color, wash in cold water with castile soap and add a little bluing to the rinsing water and dry in the shade.

HONESTLY BELIEVED
HE WAS GOING INTO
CONSUMPTION.
DR. WOOD'S
Norway Pine Syrup
CURED HIM.

Mr. Frank R. Anthony, 69 Ellen Street, Winnipeg, Man., writes: "Having taken several bottles of Dr. Wood's Norway Pine Syrup, during the past few weeks, to relieve a chronic cough and general throat trouble, allow me to express my unbounded satisfaction and thanks as to its sterling qualities. A short time ago I became suddenly subject to violent coughing fits at night, and directly after rising in the morning, for about an hour, and found I was gradually losing weight. All my friends cheerfully informed me that I looked as though I were going in consumption, and I honestly believed such was the case, however, after having taken several bottles of 'Dr. Wood's' I am pleased to relate that the cough has entirely disappeared, along with all the nasty symptoms, and I have since regained the lost weight. I have no hesitation in recommending Dr. Wood's Norway Pine Syrup as a sure cure for all those troubled in a like manner."

When you ask for "Dr. Wood's" see that you get what you ask for. It is put up in a yellow wrapper; three pine trees the trade mark; the price, 25c and 50c.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

NATURAL BORN HUNTERS.

Brazilian Natives Are Only Rivaled by Those of Australia.

If you want to find a thoroughbred sportsman you must look among the natives of the Brazilian forests. Especially among the Botocudo, to whom tracking game is the chief business of his life. He does it with such skill that he fills the white man with awe and wonder.

However enthusiastic a huntsman you are you will feel yourself a poor sportsman after watching him for a little while. The Botocudo hunter glides stealthily through the forest. He understands every sign and habit of bird and beast. He knows how high up an armadillo displaces the leaves of a tree in passing. He can distinguish the tracks of the snake and the tortoise. He can follow a tortoise to its burrow by the scratch of its scaly armor on the mud. His sense of smell is so keen that it gives him a great deal in hunting. Hidden behind the trunk of a tree he can imitate the cries of birds and beasts and bring them within range of his deadly poisoned arrow. He can even entice the alligator by making her rough eggs grate together where they lie under leaves on the river bank. If he shoots at an ape and the animal does not fall he will climb up after the animal by a hanging creeper where no white man would climb. However dark the forest, he is indifferent to this darkness. Laden with his gab of game he finds his way back to his hut by the sun and the lay of the ground.

His only rival is the Australian native. He will lie in wait behind a screen of boughs. He waits until the kangaroo comes to drink, or he will track him for days in the open. He will camp by his fire to be ready for his pursuit at early dawn. He keeps unseen to leeward.

When a number hunt together they will put up a brush fence in two long wings converging toward a pit, and so drive the kangaroo into it. They also form great hunting parties for a battue surrounding half a mile of bushland, and with shouts and clatter they drive all the game to the centre, where they can close round and dispatch them with spears and waddies. In fowling they show the same adroitness. A native will swim under water, breathing through a reed. He merely covers his head with water weed till he gets among a flock of ducks, which one by one he pulls under and tucks into his belt. They rarely need to make use of dogs in hunting, though they had learned this way of hunting long before the white man knew anything about. They used the dingo or native dog.

A Star Legend.

Ursa Major, the Great Bear, as the constellation has been known, in widely separated parts of the world, has many interesting stories connected with it. One is the Indian legend of the bear and the hunters. As pictured by the red men, the bowl of the dipper is the bear, and the stars in the handle are [illegible] hunters in pursuit. In the spring the bear comes out of the den in the hills, and the chase [illegible]. All summer it continues until at last in the autumn the bear is wounded and falls so close to the earth that its body drags along the horizon, tinting the leaves with its blood soon after sunset. Throughout the early hours of the winter evenings the dead bear is seen beneath the pole by the imaginative red men of the north.—Latimer J. Wilson, in Southern Woman's Magazine.

WOW!

(Boston Transcript)

Mrs. A.—So you told the delicatessen man that the wurst he sent you was the worst wurst you ever had. And what did he say?

Mrs. B.—He said he had no better wurst just than but was making some wurst which wouldn't be any worse and ought to be better. After which he assured me that his worst wurst was better than the best wurst of his competitors.

Suffered Awfully
FROM
BILIOUS HEADACHES.

When the liver becomes sluggish and inactive the bowels become constipated, the tongue becomes coated, the stomach foul and bilious headaches are the upshot.

Milburn's Laxa-Liver Pills will stimulate the sluggish liver, clean the foul-coated tongue, do away with the stomach gases and banish the disagreeable bilious headaches.

Mrs. J. C. Kidd, Sperling, B.C., writes: "I have used Milburn's Laxa-Liver Pills for bilious headaches. I suffered awfully until I started to take them. They were the only thing that ever did me any good. I never have any bilious headache any more."

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

EDITORIAL COMMENT

Will you fight, or pay, or hide behind the barn?

+ + +

Good day. Have you taken your sulphur and molasses yet?

+ + +

Peterboro Review:—If all the young men went to the war, who would be left to wear out the shoes that button up the side?

+ + +

The name of Col. J. Wesley Allison appears in the list of wounded and missing in the despatches relating to the battle at the capital.

+ + +

The insurance adjusters came and found that everything was burned alright. Since the fire "Lions Head" looks more like "Mouse's Tail."—Lions Head News.

+ + +

Robins are becoming quite plentiful but it looks as though swallows were going to be mighty few and far between after the new temperance act gets sifting.

+ + +

He had owned a dog, and this was the story he told:—"Yes, sir, the way that dog was devoted to me was amazing. He heard me say to my wife that I was pressed for money, so went and died the day before the dog tax was due."

+ + +

And now there are a lot of people who want the name "The Bowery" changed, but the authorities refuse. Name changing won't be so popular in Ontario now that the license fee for marriages has been boosted to $5.—Guelph Mercury.

+ + +

There is a hot-air register in the Markdale Standard office, to warm subscribers when they drop in to renew their subscriptions on cold days, and the Thornbury Review-Herald assumes that delinquents are offered a seat in the refrigerator.

+

After all that has been charged against one of Major-General Hughes' honorary colonels in Parliament, it may be that nobody in Canada will desire to accept an honorary colonelcy in future. Peradventure some may even ask for a recall of the commission.

+ + +

Through the daily papers all sorts of names have been suggested for Berlin. Among the few overlooked are Buttonville, Shirtster, Collardale, Cuffdom, and Pyjama. The Ontario Government has lately disqualified Beerburg and Porte-hause.—Orillia Packet.

+ + +

There are no strikes in France, although munition workers, without exception, receive five cents a day, the same pay as a French soldier. For many years to come, Great Britian will have fewer sneers for the people across the Channel, and a chastened opinion of herself.

+ + +

In its issue of last week The Hensall Observer said: "All persons indebted to the Observer office must pass in their cheques before the 8th of April, after which date we will not be responsible for our actions." It will be interesting to see what happens after the fateful date.

+ + +

Berlin, Ontario, will have to worry along for a time at least without a change of name. The private bills committee of the Legislature threw out the bill embodying the proposal for a change of name, the wishes of the people of Berlin not being sufficiently in evidence.

+ + +

One of the Canadian soldiers just returned from the Front says there is a general feeling that the war will be over before next Christmas. This is a little more encouraging than the remark credited to another of the Canadians that "the first seven years of this war will be the worst."

+ + +

Major-General Hughes was reported by cable last week as reviewing the Canadian troops in England and handing out decorations to the men. This performance is nothing, however, to what will happen when Sir Sam returns to Canada and his Cabinet colleagues review him and pin decorations on him.

+ + +

Bishop Fallon is an ardent recruiter. Addressing a meeting at Chatham the other night he declared: "After this war is over, if any young man comes to me for advice or counsel, I will ask him where he was in this hour of crisis, and if he has no satisfactory explanation he had better not come for it will mean an unpleasant time for him and a hot time for me."

+ + +

A merchant buys maple syrup, maple sugar, or other food products. It is bought in good faith that it is pure and unadulterated. A government inspector comes along and a sample is sent to Ottawa where the analysis proves that the article was adulterated. The merchant is then fined $25.00 and costs. That law is poor. Why does the government not go after the fradulent manufacturer instead of the innocent store keeper?—Kincardine Reporter.

+ + +

Canadian nickel can be exported only to British countries, according to the latest ruling of the government. A move that should have been made long ago, considering that Canada has the greatest nickel deposits in the world, and that metal is absolutely necessary to the manufacture of good armour plate.

+ + +

Through the Chesley Patriotic League Mr. M. A. Halliday, of that town has offered to present the regimental colors to the 160th Bruce Battalion. The colors will cost about $350 and Lieut.-Col. Weir has accepted the offer on behalf of the Battalion. The presentation will not likely be made until early in the summer.

+ + +

These papers publishing Pastor Russel's sermons dated from Canadian cities he is supposed to have spoken in, must feel cheap. The pastor has been knocking recruiting and the Canadian authorities have refused to let this pro-German fakir speak in many places. We would ask our newspaper brethren what they got out of advertising Fakir Russel.—Kincardine Reporter.

+ + +

One Canadian soldier fighting in France has been found to have no fewer than five wives in this country. There are two who have gone through the marriage ceremony four times, with each woman they wed still living. Forty have three wives, while over one hundred have just two. These astonishing facts have been brought to light through claims made for separation allowances. None of these much married men are of the Mormon persuasion, nor are they of any other religious faith which recognizes polygamy. Thus the Canadian government in granting separation allowances faces a new problem, and probably the bigamous ones upon their return will face prosecution.

+ + +

"Prohibition just clears the way for other reforms," was one of the most significant statements in Mr. Rowell's speech on the Temperance Bill. "It has become plainly evident that the Liberal party already is presenting the advance notices of new and aggressive policies, following its tremendous victory on Temperance. The preliminary outlines of these policies show that the Liberals are taking into consideration the needs of the cities and country districts alike. They are moving, for example, towards an attempt at greater social justice and a more equitable distribution of wealth, greater care for the child, the widow, the aged, the sick and unemployed, and towards an aggressive agricultural policy, including loans to farmers at cheap rates, rural credits, agricultural schools and demonstration farms, and development of co-operation in buying and selling.

+ + +

Agriculture had a big field day in Legislature, thanks to the forethought and initiative of a group of Liberal members, led by Thomas Marshall, M. P. P., for Lincoln, who proposed a resolution calling for advanced agricultural reforms. The Government voted down the resolution, but, before they did so, a six-hour debate occurred full of very real interest to the farmers of the province. The Liberal group had evidently studied the question with great care, and each member took up a particular phase of the subject. C. M. Bowman, West Bruce, for example, made an altogether noteworthy speech defining the relation of war and finance to agriculture, and applying it particularly to the Ontario situation. Mr. Nelson Parliment, Prince Edward County, dealt vigorously and intelligently with the problem of rural credits. Mr. G. A. Gillespie, of West Peterboro, who is an ex-President of the Ontario Dairymen's Association, presented the needs and problems of that industry. J. C. Elliott, of West Middlesex, who, in addition to his knowledge of conditions in Ontario, has his practical experience in Alberta as a background, discussed the question of agricultural education, and John Grieve, North Middlesex, discussed the live stock industry.

WHY THEY DON'T ENLIST
(Mildmay Gazette)

Three rousing recruiting meetings were held in Mildmay during the past two months, says the Gazette, and only a dozen recruits have been secured in the Township of Carrick, and nearly all of those are from the village of Mildmay. There is a reason for this condition of affairs and the reason is one that makes an honest man blush to tell it. The fact of the matter is that this town and township are actually reeking with pro-Germanism. And it is not among the German-born that this sentiment exists to the greatest degree but among their sons and daughters, who were born in Canada and know not the conditions existing in Germany. The war has reached such a serious stage that every man and woman is needed to stand behind the Empire and do his and her utmost in the time of crisis. This is true citizenship, and what every person in Canada owes to the Empire. What then can be said to the men and women in this town and township who are hoping that Germany will win this war, and are doing all they can to discourage recruiting? Is it any wonder that recruiting is difficult? This attitude is indefensible. This is no time for treason or treachery in Canada, and this pro-German should be stamped out once and for all. At the recruiting meeting on Tuesday evening several young ladies were heard to exult over the fact that no recruits were secured.

Letter From Ottawa
Can Sam "Come Back"?

Ottawa, April 8th.—How the Government benches did buzz when George Kyte flung his charges at them—buzzed like a swarm of blue bottle flies disturbed at the honey pot! They are buzzing yet. The cable buzzes with S. O. S. messages to Sam,' Come back and do your own explaining" or words to that effect. That is the great question of the day—can Sam come back—meaning has he got an answer ready.

For Sam has already wired his reply that he will return by the first boat to meet the charges against his dear friend Allison and the companies he got balled up with in the United States. Sam has a cabled summary of the charges in his pocket and can be studying the answers on his way over. He ought to arrive in Ottawa about the time this article is in print. He will read with relief the announcement that it is a Royal Commission and that its scope is strictly limited to the Kyte charges. Canada's War Lord will find this much more acceptable than does Sir Wilfrid Laurier who wants a committee of Parliament and full inquiry into all the transactions of the old Shell Committee.

However, the Government is bound to confine the danger zone to one spot if it can. If Sam resigns he has threatened to pull down at least two more Cabinet ministers with him. Here is a man who is worth saving as far as possible. Hence the Royal Commission and its narrow metes and bounds. There are 81 Royal Commissions which have been appointed by the Borden Government since 1911. Their cost to this country is a quarter of a million dollars—the price, so to speak, of free and irresponsible government in Canada. This Royal Commission on the Company Major General Sir Sam Hughes Keeps is one more. That makes eighty-two. The more the merrier. Sir Sam has got his colleagues into a lot of trouble. He is the man around whom the pleasant fiction was built, "He may be eccentric, but he does things." There seems to have been a method in his madness. George Kyte has shown some of the things he does—to say the least of it he burns Canadian money, likewise British, by the millions.

This Royal Commission, stingy as it is, is a desperate measure to save the Government. It marks the end of Sir Sam's power over his colleagues. Sam must obey orders now, cancel his London banquets, put off the family reunions of Hughes colonels, and hike home to save his bacon if he can. If he can't he goes out. Even such a staunch supporter as Premier Borden has no use for a discredited War Lord.

The Royal Commission proves no change of heart in the Cabinet. It was brought about by dissatisfaction in the ranks of the Conservative party in the House. It was the silent vote that spoke up, the humble, honest back-benchers who were not sweet on Sir Sam and his vagaries. They were pained and surprised at George Kyte's revelations, Sam's ramifications in the United States via Colonel J. Wesley Allison and his crowd of Yankee highbinders was news to them. There is reason to suppose that it wasn't news to his Cabinet colleagues because when Mr. Borden and Sir Sam came back from England last September they were met in New York by Allison and Yoakum who, no doubt, told them they were falling out with their partner, Eugene Lignanti, the flute player, and were settling up with as little noise as possible. Consequently the horror displayed by the Cabinet has more concern with the Eleventh Commandment which reads: "Thou shalt not be found out." Sir Sam's life-long friend, soul mate, confidential adviser, disinterested patriot and chief money-saver to the British Empire, is in process of being found out. Hence the stern command to Sam to come back and face the music.

One finds in the Conservative rank and file every degree of indignation from lukewarm to boiling. "Stealing" said one of them to me, "not drinking, is the vice of the country." Many of them feel just that way. Others point out that in Russia they send grafters, however high placed, to Siberia and that the course taken in France is a blank wall and a firing party at sunrise. They see red when they think of our boys bleeding and dying in the trenches while an outfit of Yankeeland pirates juggles with contracts for shell fuses. It was bad enough in all conscience for Major Gen. Sir Sam Hughes to father a Shell Committee which overfed itself eighty million dollars worth, but to go outside the country to hand another twenty-two million dollars of Canadain money to a get-rich-quick gang of Yankee grafters of which Col. J. Wesley Allison was the Wallingford and Benjamin Franklin Yoakum was the Blackie Daw—to lift these characters bodily out of the pages of George Randolph Chester and let them do their worst to Canada—well that was goading human nature too far.

Sir Sam is probably studying his answers right now. Like Admiral Sir Joseph Porter he retires to the seclusion that a cabin grants and mugs the case up. Can he bluff through? He did that before. The answer is no. The time for bluff has gone by. If Sam wants to justify his war tables, both here and in the United States, he will have to tell the facts. Airy banter will not go down any longer. It has been said that friendship is almost a vice with Major General Sir Sam Hughes. Instead of vice read crime. The Minister of Militia has three friends to explain to the public. Col. John Wesley Allison, his original soulmate, and latterly two others who were taken into a profit-sharing triumvirate of middlemen with no visible means of support—namely B. F. Yoakum, a New York curb-broker and a raise-the-wind promoter, and Eugene Lignanti, a flute player, in the Ritz-Carlton Hotel at Montreal. Lignanti fell out with his pals last September at which time he was aware of his own knowledge of contracts for the British and Canadian Government, which would bring Yoakum and Allison $1,800,000 in commission.

Incidentally Mr. Kyte's researches revealed the fact that Col. J. Wesley Allison's widely heralded patriotism was always on a ten per cent. basis. He couldn't possibly love the British Empire as he did for less—it would belittle his grand passion. As Sir Sam has already stated that Colonel J. Wesley Allison saved fifty million dollars on contracts for the British Government amounting to five hundred million dollars, it would appear that ten per cent. is his figure all round. If he saved fifty millions for the British Empire he saved fifty millions for himself on the principle, no doubt, that a fair exchange is no robbery. Sir Sam once expressed a hope that Colonel J. W. Allison would save all his little bills for personal expenses and such and present these at the proper moment. There need be little fear, I take it in that regard. So keen a saver as Colonel J. Wesley Allison will certainly save his bills until the time comes to cash in. As a Colonel, J. Wesley Allison is bound to make gallant charges and no doubt he will.

Looking over the indictment, while aboard ship, Sir Sam will observe that George Kyte has been calling his friend Colonel J. Wesley Allison, a liar and perjurer, as proved by three different kinds of evidence and demanding his extradition as a perjurer or a receiver of secret commissions. As a friend Colonel John Wesley Allison must be a great burden even to a jaunty weight carrier like Sir Sam Hughes. Most of the trouble harks back to him. He takes a lot of defending. The story runs that his name was originally Isaac Wesley Allison but that the Isaac end of it got him disliked when he was making bargains so he changed it to John which in combination with Wesley makes a splendid ambush. It is also said that when the Customs Bars were lifted at Morrisburg to let Colonel Allison's war purchases through, he slipped a few peace consignments over at the same time. Major General Sam or somebody else should give official denial to these stories. As a true friend the best thing Colonel Sam can do for Colonel John Wesley Allison is to give him a chance to appear before the Public Accounts Committee, by extradition or otherwise.

Another pal of Colonel John Wesley Allison's in whom the public is deeply interested is Benjamin Franklin Yoakum who took the long end of the million dollar split. He is likewise the bearer of an historic name which inspires great confidence. B. F. who seems to have had a finger in every pie that was about to be cut, is a New York curb-broker when he is on a peace footing. Evidently he is as keen as his illustrious namesake at making a fortune. Eugene Lignanti, the Montreal flute player, is some Orpheus. Of old the god drew after him with his music sticks and stones and trees and trees and rocks and he almost drew Euridice up—which would have brought a smell of brimstone into the house—but he wasn't a patch on Lignanti who after a year's performance on the war pipes drew out fifty thousand dollars cash and two hundred and sixteen thousand in promissory notes. Lignanti's success will encourage many young men to learn the flute—although heaven knows there are enough trying right now.

Such are the facts and fancies that everybody is buzzing about while Sam is on his way home across the deep blue sea. Some are sad, others angry, but one at least is cheerful, R. B. Bennett who introduced a "Joker" into his last speech on shells to the effect that great reputations would be blasted. His calculations are that if Sam is shot out, R. B., on the well-known principle that nature abhors a vacuum, will be shot in.

H. P. G.

THE HERALD OF SPRING

Blindly, madly down the hill,
Bleak and chill,
Poor old March goes tumbling, stumbling,
Ever grumbling,—
Wonders why the wind's so cold,
When he's old!
Climbing up, with nimble feet,
April sweet
Starts the elfin echoes ringing,
With her singing:
Hark! a peal of silvery laughter
Follows after!
Oh, her gown's the softest green
Ever seen,
And her eyes,—entrancing, glancing,
Are just dancing!
What a change from March's sadness,—
April's gladness!

Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letter head for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

Telescope Job Department

Production and Thrift

"CANADA from her abundance can help supply the Empire's needs, and this must be a comforting thought for those upon whom the heavy burden of directing the Empire's affairs has been laid. Gain or again the course before the farmers of Canada is as clear as it was year—they must produce abundantly in order to meet the demands may be made and I believe this to be especially true in regard to stock, the world's supply of which must be particularly affected in this great struggle. Stress and strain may yet be in store for us all before this tragic conflict is over, but not one of us doubts the issue, and Canadians will do their duty in the highest sense of that great word."—HON. MARTIN BURRELL, *Minister of Agriculture.*

"MODERN war is made by resources, by money, by foodstuffs, as well as by men and by munitions. While war is our first business, it is the imperative duty of every man in Canada to produce all he can, to work doubly hard while our soldiers are in the trenches, that the resources of the country may not only be conserved, but increased, for the great struggle that lies before us. '*Work and Save*' is a good motto for War-time."—*SIR THOMAS WHITE, Minister of Finance.*

THE CALL OF EMPIRE COMES AGAIN IN 1916

TO CANADIAN FARMERS, DAIRYMEN, FRUIT GROWERS, GARDENERS

WHAT IS NEEDED? THESE IN PARTICULAR—

WHEAT, OATS, HAY,
BEEF, PORK, BACON,
CHEESE, EGGS, BUTTER, POULTRY,

CANNED FRUITS, FRUIT JAMS,
SUGAR, HONEY, WOOL, FLAX FIBRE,
BEANS, PEAS, DRIED VEGETABLES.

We must feed ourselves, feed our soldiers, and help feed the Allies. The need is greater in 1916 than it was in 1915. The difficulties are greater, the task is heavier, the need is more urgent, the call to patriotism is louder—therefore be thrifty and produce to the limit.

"THE AGRICULTURAL WAR BOOK FOR 1916" is now in the press. To be had from The Publications Branch, Department of Agriculture, Ottawa.

HER DREAMS CAME TRUE

Life Unbearable from Indigestion Health Restored by "Fruit-a-tives"

MELLE. C. GAUDREAU

Rochon P.Q., Jan. 14th, 1915.

"I suffered for many years with *terrible Indigestion and Constipation*. I became thin and miserable. I had frequent dizzy spells and became so run down that I never thought I would get well again.

A neighbor advised me to try 'Fruit-a-tives'. I did so and to the surprise of my doctor, I began to improve and *he advised me to go on with 'Fruit-a-tives'*. I continued this medicine and all my Indigestion and Constipation was relieved. I consider that I owe my life to 'Fruit-a-tives' and I want to say to those who suffer from Indigestion, Constipation or Headaches, try 'Fruit-a-tives'. *Give this lovely fruit medicine a fair chance* and you will get well the same as I did".

CORINE GAUDREAU.

50c. a box, 6 for $2.50, trial size, 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

SPRING TERM at the NORTHERN Business College

OWEN SOUND, ONT.
OPENS ON MONDAY APRIL 3rd

Jeweler, Walkerton

POETS' CORNER

PATHETIC

A Thousand dollars in the Bank
And large ideas in his head,
Young Billy yearned a car to crank
And joyful, to the dealer sped.

A hundred things he should have learned
About the brake, the gears, the power;
But Billy, proud, instruction spurned
He thought to grasp all in an hour!

A score of blocks, or less, he drove
A course of strange obliquity,
A post! a trip to realms above!
A swift and sad calamity.

A dozen fragments of the car
X-Rays revealed within his hide,
But sadder was the damage far
To Bill's inflammatory pride.

One solemn oath he grimly swore:
That never more a car he'd crank,
Gone are the blissful dreams of yore—
Gone is the Balance from the Bank!

—P.P.G.

THE PUT-IT-OFFS

My friend, have you heard of the town of Yawn,
On the banks of the River Slow,
Where blooms the Wait-a-while flower fair,
Where the Some time-or-other scents the air,
And the soft Go-easys grow!
It lies in the valley of What's-the-use.
In the province of Let-'er-slide;
That tired feeling is native there,
It's the home of the listless I-don't-care,
Where the Put-it-offs abide.
The Put-it-offs smile when asked to work,
And say they will do it tomorrow,
And so they delay from day unto day,
Till death cycles up and takes them away,
And their families starve, beg or borrow.

News About Town

Alex McNeil, ex-M. P. and his son Malcolm, who have spent the last two years in Ireland, are leaving shortly for their home in Wiarton. Malcolm who is a lieutenant and connected with an Irish regiment, has been granted permission by the war office to join the 100th Battalion.

Mr. George H. Filsinger, of Carrick, made a deal this week whereby he becomes the owner of the Wm. Weigel farm on the 7th concession of Carrick. This farm has recently been owned by Mr. H. H. Miller, of Hanover, with whom Mr. Filsinger traded lot 23, con. 7, Carrick, for the Weigel farm. Mr. Filsinger gave some difference, but he undoubtedly made a good deal. He is now owner of lots 29 and 30 on the 7th concession. He gets immediate possession.—Mildmay Gazette.

Recently the Legislature took a day off and visited the Agricultural College and prison farm at Guelph. At the prison farm they saw an institution which has already cost $1,750,000 and accommodates only 300 prisoners—thus making an average capital expenditure for each prisoner of the amazing sum of $6,000. It's some soft job being one of Mr. Hanna's "boys." If the Government were asked to spend that much money on 300 decent old men, who are hard up, there would be an awful yell.—Kincardine Reporter.

THE DOLLAR WEEKLY PASSING

(Orange Sentinel)

The local newspapers in the smaller communities throughout Ontario and in the other provinces as well, have found it necessary to raise their subscription price from a dollar to ($1.50) a year.

It is a universal failing of publishers to hesitate about raising their prices to the subscriber or to the advertiser. Probably there is no class of men contributing to the needs of the people of Canada who are content with such a meagre profit as the men who conduct newspapers. To be a successful editor requires many years of training, which, in other professions would secure handsome financial rewards. A publisher has an investment also, in most cases, greater than the average businessman. His plant depreciates more rapidly than any other we know of, and if for the expenditure of his time and energy, he gets a bare living, he is thought to be getting all he deserves.

This probably accounts for the fact that the dollar papers have not been raised to $1.50 long ago. But at last, the weekly publisher finds he can carry the burden no longer. He has to pay more for his paper, for his ink, and in wages, which has skimmed the thin layer of cream off his milk and left him a diet which does not contain sufficient nutriment to keep his brain working sufficiently. With many a weekly publisher, it has become a question of getting more money from the subscribers he serves so earnestly, starving to death or finding a job in the munition factory. Some of them have enlisted. There are others too old to escape in that way. All of which explains the reason why the rural publishers have raised their prices.

SIGNALLER VICTOR BELL

Writes a Spicy Letter From France—Shell Dropped Three From Him but Did Not Explode—Mud is Up to the Knees

The following letter has been received by Mr. Henry Williams from Signaller Victor Bell at the front with the R. C. R.

Somewhere in France,
March 18, 1916.

Dear Emma and Henry:

Thought I would drop a line to you, and let you know I am well, hope you are the same. I received your letter today. We are having dandy weather here now, the mud is nearly all gone from around our billets now. They are making all kinds of fun of me for writing so much. They say I am writing all the time, but it can't be helped. I have just received eight letters today and a few yesterday. Had a big "Generals" inspection to-day. I was'nt there, all the rest were. I have been given a job all to myself, some job too. We are going on a route march to-morrow, about twenty miles I believe, with full pack on our backs. I weighed mine the last time we went and it just weighed 42 pounds, not so bad is it? The other Battalions call us the Camel Battalion on account of our big packs. What is the matter with you people up home worrying because I sent my watch home which just got a bad shaking up. We had it pretty stiff for about two weeks and four days. Just opened up a "Field-comforts" box from Canada and I located this writing tablet with the flags. It reminds me of the many happy hours I spent in Guelph. We got 13 boxes of Field Comforts to-day consisting mostly of socks, that makes about 8000 pair we have got this week, so you people of Canada are doing your share. Well, I have to stop for a while as I hear the cook shouting room for two more and he is boss at mealtime. Well back again, had cold ham, bread, butter, jam and tea for supper to-night, not bad considering on Active Service. I am alright because I have been lucky in getting some easy jobs just when the worst was on. I have seen some of the fellows come in from working parties, wringing wet up to the hips and no fire to dry their clothes, just had to walk around until they dried on them, so I consider myself lucky, as I have had none of that. Have just been in the trenches two days with mud up to the knees but that is about over now, at least I hope so, as we are having good weather now. Well I guess I will close for this time, as I have a lot to write and nothing to write about. The nearest a shell has dropped to me is 3 ft. but it did not explode so I am alright, if it had exploded I might not have been alright.

Good-Bye for now.

Your loving brother,
Victor.

TO GOOD TO LAST

An English charwoman whose husband was at the front and who was drawing her weekly separation allowance was asked what she thought of the war.

"What!" she replied. "A pound a week and no 'usband! Why, it's 'eaven! It's too good to last!"

ARMY OFFICERS' INSIGNIA

The symbols worn by officers in the British army to distinguish their rank:

Field Marshall—Cross batons surmounted by a crown and a star, and surrounded by a laurel wreath.

General—Cross sword and baton, surmounted by a star and crown.

Lieut.-General—Cross sword and baton, surmounted by a crown.

Major-General—Cross sword and baton, surmounted by a star.

Brigadier-General—Cross sword and baton.

Colonel—A crown and two stars worn on cuff or shoulder strap.

Lieut.-Colonel—A crown and star worn on cuff or shoulder strap.

Major—A crown worn on cuff or shoulder strap.

Captain—Three stars worn on cuff or shoulder strap.

Lieutenant—Two stars worn on cuff or shoulder strap.

Note—In England they have first and second lieutenant, a first lieutenant wearing one star, and a second lieutenant wearing two.

THE GREAT TRAGEDY

(Christian Guardian)

The war is teaching us great lessons in the value of things. A spectator at a military parade the other day was grieving over the sight of hundreds of young men in the very prime and heyday of life being gathered together to make food for war, but he was soon corrected by companions, and given another point of view with such emphasis and directness as would tend to make the lesson an unforgettable one. The sight of men giving themselves up at a time like this to save and safeguard all that we hold dear in the life of nations and peoples is not the tragic sight; to see the men to whom these things are mere names for which they will do and give nothing—that is the real tragedy among us. The saddest sight that can be seen in this Canada of ours today is that of hundreds of young men going about their sports and pleasures just as usual, as if all those best and highest things for which their fathers have struggled throughout many centuries were not in the direst peril and jeopardy.

CULROSS COUNCIL

Town Hall, Teeswater, April 3rd, 1916.—Council met today as per adjournment of last meeting. Members all present. Minutes of the last meeting were read and sustained.

The Engineer's Report with regard to a drainage scheme known as the Pennell Drain, affecting lands both in the townships of Culross and Kinloss had been received and was laid on the table. The parties interested in the drain being present the report was read, when some objections were made to the report by parties interested in the drain.

Moved by Wm. Case, seconded by Thos. McPherson: That the report of the Engineer re. the Pennell Drain be referred back to him for reconsideration with regard to bridges, maintainence of drain and completion of same.—Carried.

Plans and specifications were received from the Engineer re. bridge on the 6th Con., known as the McKague bridge, which was laid on the table and duly considered by the Council. When it was moved by Armstrong, sec. by Donaldson: That we drop the plans and specifications made by the Engineer on the McKague bridge as we consider it would be too costly, and that we have four cement abutments built and have two wooden structures placed over the two streams now in course filling in between the two structures with earth.

Moved by Wm. Case, sec. by Thos. McPherson: In amendment to motion for changing plans made by Engineer on McKague bridge: That if we do adopt the plan made by the Engineer that we arrange to repair the old bridge for the present until such times as our expenses are reduced.

For the Amendment: Case, McPherson, Kuntz. For the Motion: Armstrong, Donaldson. Amendment carried, motion lost.

Case—Donaldson: Whereas the Auditors in their Statement to the Council in February, 1916, stated that the Treasurer did not enter the Legislative grant in Cash Book for the year 1915 as received Dec. 31st, 1915. Whereas it now appears that said grant was mailed by the County Treasurer on Dec. 31st, 1915, and could only have been received on Jan. 1st, 1916, therefore at the request of the Auditors this Council wishes to correct this slight oversight.—Carried.

McPherson—Donaldson: That we appoint Wm. Case to have washout repaired on gravel road opposite Robt. Ireland's and also Sideroad 20, Con. 2.—Carried.

Armstrong—McPherson: That Jas. Donaldson be appointed to have the hill at Lots 4 and 5, Con. 10, repaired as soon as possible and a tile culvert put in on the gravel road, Con. 10.—Carried.

Armstrong—Donaldson: That we change part of road beat No. 49 and put it into No. 50 as a petition was presented to this Board demanding the same.

Case—McPherson: In amendment that we do not consider any injustice has been done to the parties interested in road beat No. 49, and that we leave the beat as arranged by Council.

For the Amendment: Case, McPherson, Kuntz. For the Motion: Armstrong, Donaldson. Amendment carried, motion lost.

Finance

P. Keffer, winter work on grav. road	$ 6.75
J. Clark, salary as treasurer	85.00
J. Clark, postage and war stps.	2.85
R. Ireland, winter work on grav. road	1.25
E. J. Jackson, winter work on gravel road	1.25
N. Melvin, winter work on grav. road	7.00
L. Howe, sheep killed by dogs	20.00
A. McDonald, sal. as Assessor	60.00
J. Bruder, error in tax bill	1.00
M. Geels, meat for indigent	1.00
W. Bannerman, cutting ice and rep. road	5.00

Donaldson—McPherson: That the Finance Report as now read be adopted and orders issued for payment of accounts and that this Council do now adjourn to meet again on May 29th as a Court of Revision and appeal. In the meantime the Reeve to call a special meeting if necessary.—Carried.

C. BUTTON,
Clerk.

SECRET OF AD WRITING

The secret of good writing is sincerity. This applies to all departments—advertising, editorial and news. The sincere advertisement will always command attention. Impressed with the knowledge that he has really a good thing to offer the public, the man who pens the advertisements puts into its wording a confidence and carefulness which makes it appealing to all. The most interesting department of a newspaper is its advertising. It is a certain sign board as to the enterprise and prosperity of a town. When the advertising runs light it means the local dealers are not reaching out for business. Well displayed, well written and well printed advertisements bring people to town. They make business better for all. They are the upbuilders of prosperity. Through them the smallest enterprise may be developed into one of importance. The newspaper does its community the greater service when it presents to the public a printed advertisement of something calculated to meet the people's need.

Residential Properties

I have the following residential properties for sale:—

Frame Cottage in good repair, seven rooms, good cellar, small stable on premises.

Medium sized brick house, in splendid condition, with good stable.

Double house, frame, in good repair, with good paying tenants, small stable on premises.

All conveniently situated. Good investments and reasonable prices.

GEO. D. MACKAY
WALKERTON ONTARIO

Team Harness

Owing to the great demand for team harness in the spring you will find it more satisfactory to place your order with us now, that we may give it our special attention. We guarantee all our harness to be made from No. 1 Oak harness leather which, coupled with first class workmanship, we know we can satisfy you, in every respect. Get our prices and let us have your spring order now.

McCARTER HARNESS CO.

The modern demand—simple, comfortable and artistic wall papers—is most amply shown in our new season's offering.

New decorative treatments, dainty and pretty bedroom papers with cut out borders to match—living room and dining room papers resembling cloth so closely that you would have to touch the wall to detect the difference—binders to panel the room, are all represented in the variety of colors, grades and prices.

Before decorating, consult us for new ideas in wall papers.

A booklet in color, illustrating model interiors is yours for the asking.

Walkerton - Ontario

The Works at Creusot

Shortly before the war a German artillery expert declared that in the manufacture of guns and armor-plate the great Creusot Arsenal of France had "never been surpassed." In the following article an eminent engineer, who has actually been employed in the Creusot works, gives a brief outline of their amazing resources:

It has recently been asked, "What would happen to France now if some desperately determined spy succeeded in destroying the Schneider plant at Creusot?" It would mean the crippling of the Allies' cause to a much greater extent than if our own Woolwich were blown up, and such a disaster can only be compared to the calamity that would befall Germany if a squadron of Allied airmen succeeded in annihilating the Krupp arsenal at Essen.

The Creusot works are the main source of French munitions. Messrs. Schneider have artillery shops at Harfleur and Havre, but interesting and big as they are, they have only a secondary standing compared with the factory at Creusot. Nor is the shipyard at Chalons-sur-Saone, vital to France as it is through the destroyers and submarines built there, so important a military asset as the Creusot arsenal.

Originally the factory at Creusot was placed there to take advantage of the local coal supply, and the useful iron and limestone were then within easy reach in sufficient quantities. That, however, was a long time ago, and the diversified output of the Creusot Works and the size of the plant to-day have far outgrown local resources. Coal from the nearby mines is not able to supply one-quarter of the fuel needed, and iron ore has been drawn of late years from Alsace, Spain and Algiers. Curiously, with navigable water not so many miles away, the works were built without heed to this means of transportation, and it was found expedient, after the original foundry came into the control of Joseph Eugene Schneider and his brother, Adolphe, in 1836, to run a railroad to the Canal du Centre, and this line was later extended to reach Chalons-sur-Saone. Creusot is eleven miles south-southeast of Autun, and 224 miles south-southeast of Paris.

From a German source comes this tribute to the Creusot works, and remembering what the gigantic Krupp plant at Essen represents in the metallurgical arts and the production of war machinery, the quotation is of great significance: "The manufacture of war materials, especially of guns and armor-plate, has always been vigorously prosecuted. In this particular the Creusot works have never been surpassed; in fact, it is only fair to say that they lead the world in this field of industry."

It was at Creusot that the steam hammer was invented about the middle of the 19th century, and that stroke of genius made it possible to forge single pieces of previously unheard of dimensions. It was because of this that the first heavy armour-plate was turned out there, and, later on, the wonderful turret armor of French defences was produced. Subsequently, with the advent of steel, the hydraulic press supplanted the hammer, and now at Creusot there are shaping presses capable of squeezing into form great masses of heated steel the biggest of these machines exerting a pressure of 10,000 tons.

The steel-making plant is a splendid example of productiveness and economy combined. Normally the output of steel is in the neighborhood of 200,000 tons a year, and ingots of 70 tons in weight are made and handled with astonishing ease. Pieces of armor-plate weighing from 20 to 25 tons each are worked into shape under the impulse of a steam engine developing 14,000 horse-power. And yet the utmost care is taken to utilize the gases from the blast furnaces and the coke ovens—some for the generation of power and some for the production of certain chemicals. Also, other by-products are obtained, and these are sold to the manufacturers of fertilizer and coal-tar crudes.

The Creusot plant is located in a narrow valley, which it fills from side to side for a distance of nearly three miles, and the various buildings cover an area of 150 acres. Railroad tracks run everywhere in and out of the shops, the combined trackage representing a matter of nearly 180 miles. For pulling or shifting the 5,700 cars of the company's rolling stock, there are available in the neighborhood of 70 locomotives. Normally the weight of raw material worked into shape daily exceeds 9,000 tons, and the peace-time pay-roll includes more than 20,000 men. The output and the number of employes have, of course, been increased since the outbreak of war.

This master plant has always led in the manufacture of big guns, heavy projectiles, and the fabrication of large gun-mounts and armor. Besides these, the famous Creusot field-piece, together with its carriage and limber and ammunition, is produced at this plant. But this does not cover their output. Here, too, are made boilers and steam engines, locomotives, steam turbines, petrol and gas engines, and automobile chassis—certainly a diversified product.

To-day the Creusot works are running continuously night and day, and this vast factory has done its part toward making it possible for General Joffre to announce lately that France has now more munitions than she needs. Efficiency has been the keynote of the Schneider management, and the Creusot works are rightly famous for the marvellous co-ordination of every department, making it possible for the plant to turn out an immense volume of finished articles with a minimum of lost motion.

One thing that has contributed very largely to this state of affairs is the policy that has prevailed in creating the administrative and the industrial personnel. There has been within the factory an organized system of education that has made it easy for an ambitious youth to advance. Any boy showing special aptitude for any branch of work has been helped along to that education which would peculiarly fit him to make the most of his native talent. This, in its turn, has promoted a bond of interest between the artisan and his employers, and the excellence of everything produced at Creusot bears eloquent testimony to the advantages of this co-operation.

Singleton—How does it feel to stand up and get married in church before a big crowd of people. Newlywed—Do you remember your first ride in an automobile? It's like that, only worse.

MADNESS DETHRONED.

Hegel believed that nothing was historically proved until it had repeated itself. Well, then this was not the first time the Lord had sent out a great wind into the sea so that there had been a mighty tempest in which the ship was likely to be broken up, nor the first time terrified mariners had cried out saying:

Come and let us cast lots, that we may know for whose cause this evil is upon us.

The lot was cast and it fell upon Grand Admiral von Tirpitz, father of German frightfulness at sea, architect of outrage, destroyer of Lusitania, [illegible] of horror. He was the exponent of Teutonic madness. His dethronement is a mighty victory for the forces of sanity, moderation and civil intelligence, which, by this sign, are rising in Germany. London sees in his going the removal of one great obstacle to peace. That may be premature optimism, but it is hardly too much to say.

The forms of make-believe customarily employed in such situations are more transparent than is usually the case. The German Government is anxious that the world should know what the retirement of von Tirpitz means. It asserts informally that the submarine warfare against merchant shipping will be continued "unwaveringly," according to the memorandum issued on Feb. 2 last. Then it adds:

It may be said, however, that no intensifying of the submarine warfare may be expected, and that efforts which have been made to have the submarine warfare extended to neutral shipping bound to and from enemy ports have no chance of success.

That came from Berlin by cable, passed, of course, by the Berlin foreign office. Later, the semi-official Overseas News Agency, in a carelessly phrased and obviously inspired wireless message from Berlin to Sayville, said:

In some quarters the belief prevails that the resignation of Admiral von Tirpitz as Minister of Marine was connected with Emperor William's decision not to extend submarine warfare beyond the limits announced to neutrals in the German Government's memorandum and not to direct it against neutral ships.

Here is news of a struggle within Germany of which the outside world was totally ignorant. Admiral von Tirpitz and his party, which is very strong politically, were for running amuck at sea, to destroy not only armed enemy merchantmen on sight, but also neutral vessels sailing to and from enemy ports. The von Tirpitz faction has elected to stand or fall by that atrocious programme. It has fallen. The Emperor, the civil power, and possibly, as is intimated, even the army, were against it. Once before, over the Lusitania, it came to a direct issue between the naval power represented by von Tirpitz and the civil power represented in Bethmann-Hollweg, and the naval power was forced to yield. Trouble with the United States was thereby averted, for, if von Tirpitz had prevailed, Germany would have refused to yield point or principle.

Gradually the influence of the von Tirpitz party restored itself, making capital of every new instance of German-American friction, saying, in effect: "That comes of being conciliatory. Be ruthless. Be utterly frightful. That will win the war." And there were moments when the civil intelligence of Germany, expressing itself through Bethman-Hollweg, von Jagow, and Zimmerman, was in grave danger of being overwhelmed by that feeling. It was been at issue now for the second time, and von Tirpitz is put aside. There will be a great clamor about it. The forces of recklessness in Germany will protest, but it is inconceivable that they can prevail. Peaceful relations between Germany and the United States will be hereafter, no doubt, more easily maintained.

If Germany had now the moral courage to abandon submarine warfare against merchant shipping altogether, thereby accepting herself the limitations of her submarine instrument instead that international law should be made over on account of them, her moral position in the world would be greatly changed. The romantic exploits of the Moewe reflect more credit and lustre upon her navy that anything her submarine fleet could ever accomplish against merchant vessels. The world does not begrudge Germany anything to which she is entitled, not even applause. No exploit deserving the appreciation of the world has failed to receive it, and nowhere has it been more heartily or generously given than among Germany's own enemies. The submarine commander who potted British warships in their own harbors the survivors of the Emden walking around the earth, the raiders of the Moewe—all of these were applauded by the British first of all. What a pity war did not stay within the rules!—New York Times.

Spanish Court Customs.

There is no court in Europe more tenacious of its etiquette—which was inaugurated several hundreds of years ago—than that of Spain. It is said that King Ferdinand VII. once made a Minister resign because he had accidentally touched his hand. One of the quaintest ceremonies is the closing of the royal palace gates at Madrid every night. Electric light has been in use in the palace for quite a long while, but nevertheless every evening at 11 o'clock the officiating gentleman in waiting appears, accompanied by several servants, who carry ancient lanterns, to demand a huge key from a higher official to lock the doors of the palace. This is all the more amusing as the huge key does not fit the modern keyholes. The key is then returned to third official, and every night gentlemen in waiting have to patrol the corridors of the palace, though sufficient guards are about, to watch over the slumbers of their royal master.

DOLLY'S DRESS.

When Dolly dresses for a dance
I gaze at her aghast,
My soul with dire forebodings of
Disaster overcast.
Her skirt is so extremely short,
Her waist so very low,
Extremes to meet would only have
A little way to go.

If Fashion should decide the skirt
Be shorter yet, alack!
And evening bodice be cut
Still lower in the back,
(Which journals of the modes announce
Will be the next decree
From autocrats sartorial)
O, where will Dolly be!

—Exchange.

White Serge, Chiffon and Silk

This extremely odd gown has a collar shaped like a lily which rolls back from the throat. Large novelty buttons are used on one side of the close fitting bodice and the cuffs are bell shaped. A draped tunic emerging from under the waistline forms an apron drapery.

Scientific and Industrial

Seaweed is made into a composition to take the place of bone for handles of cutlery.

The orange tree is the only one which bears fruit and blossoms at the same time.

In Sumatra the horn of the rhinoceros is esteemed as a cure for poison, and for that reason is made into drinking cups.

There are about [illegible] German-speaking people in the world and about [illegible] speaking Spanish.

The livers of [illegible] codfish are needed to produce a gallon of oil.

Nearly half the population of France is engaged in farming.

In a good year France pays taxes on more than a thousand million gallons of wine.

More than half of those who, from one cause or another, perished in the Franco-Prussian war were not belligerents.

The sun never sets on American soil. When it is 6 p.m. at Attoo Island, Alaska, it is 9.36 a.m. the next day on the eastern coast of Maine.

Lapouge says the wars of a century spill [illegible] 40-gallon blood, enough to fill [illegible] 40-gallon casks, or to create a fountain sending a jet of 150 gallons per hour flowing unceasingly ever since the dawn of history.

Greater London has about 2,000,000 more persons within its limits than Greater New York has.

Aluminium production in the United States totaled [illegible] pounds against [illegible] pounds in 1905 and only 83 pounds in 1883.

The area of Italy is [illegible] square miles, while the area of California is [illegible] square miles. And nearly all of California is grape country.

Corundum mining in the United States has ceased, while Canadian production dropped from [illegible] in 1912 to [illegible] in 1914. Artificial abrasives made in the electric furnace have displaced the natural products.

The number of liquor licenses issued in all the five boroughs of Greater New York last year was about 12,000. The State's share, net revenue, was around [illegible]; the city's about [illegible].

The area of Lake Superior is [illegible] square miles; Lake Michigan, 22,400; Lake Huron, [illegible]; Lake Erie, [illegible]; Lake Ontario, [illegible].

Horses have been known to live 40 years.

Guinea pigs do not come from Guinea, nor are they pigs.

When the wheel of a light car, cycle car on motorcycle is revolving 370 to 400 times a minute—as at road speeds of 30 to 32 miles an hour—the weight of the tire valve is quite appreciable and makes itself known in excessive vibration on the wheel. In order to overcome this a counterbalancing weight should be placed on the other side of the wheel. Where the wheels are of wood, a couple of screws can be inserted, instead of the lead strip, or copper rivets in wire wheels.

A new-born kangaroo is not much larger than a medium-sized thumb.

One man-eating leopard of India was known to have killed more than 200 men before it was dispatched.

Under the pressure of necessity, owing to its scarcity because of the war, platinum is being replaced in many electrical appliances. Formerly platinum was employed for the lead in wires in electric incandescent lamps, but at present wires made of nickel-chromium, metallic tungsten or metallic molybdenum are being employed with good results. Metallic molybdenum has also replaced platinum which was liberally used for the resistance wires of electric furnaces in ante-bellum days. Platinum was formerly employed for the ignition points of spark plugs, but the greatly increased cost of the metal has compelled the use of substitutes, chief among which is metallic tungsten.

Dr. N. A. Cobb, an authority on this group of animals, declares that there must be hundreds of thousands of species of nematodes ever nine-tenths of which are still unknown to science. Of the parasitic nematodes infesting vertebrate animals alone it is estimated that there are at least [illegible] species. Insects, mollusks crustaceans and other animal groups are also much infested, and as a rule a given species of host. Lastly, the species of nematodes living free in soil and water vastly outnumber the parasitic species. As these creatures are continuously prolific, the number of individuals must be quite beyond conception. Dr. Cobb estimates that in the upper foot of an acre [illegible] the number of nematodes runs in thousands of millions per acre.

LEAP YEAR LOGIC.

(Buffalo News.)

There used to be two stock subjects around which we weaved a web of words at the monthly meetings of our "Mutual Improvement Societies" and "Literary clubs." They were "Should capital punishment be abolished?" and "Is marriage a failure?"

We do not hear much about these subjects nowadays. That is to say, we do not hear them discussed in that form. But we do hear a great deal about "man being married to his art or business." The inference is that marriage interferes with a man's career.

Bacon says, "He that hath wife and children hath given hostage to fortune; for they are impediments to great enterprises, either of virtue or mischief."

We may, therefore, say that wife and children are disciplinarians! A person's character is only half formed until he is married. He has developed but one side of his character.

When a man marries and adds "home" to his vocabulary and wife and children to his life, his thoughts, hopes, aims, aspirations and ideals are purified and he is inspired to greater efforts and efficiency.

"What I am, what little I have been enabled to do, I owe largely to my wife," said Robert Louis Stevenson.

"It's all the doings of the little woman with the brown eyes,' declared the blind Senator of Oklahoma when elected to that office.

Mrs. Gladstone was the Grand Old Man's dynamo. Mrs. Edison is the great inventor's right hand.

Marriage, however, is an open question. From the beginning of the world such as are in the institution wish to get out and such as are out wish to get in.

Still, love is life's great lubricant and there is no greater incentive, no greater aid to efficiency than the companionship of a good woman.

Girls, this is leap year—do your worst!

The Greek Version.

A young Greek merchant of Washington, who has been taking lessons in English from a private tutor, has so far advanced that his teacher recently introduced him to the beauties—and perplexities—of Shakespeare. He was instructed to read a passage several times until he had the ideas firmly fixed in his mind and then, closing the book, to put these ideas into his own English, following as closely as his memory permitted the author's text.

He had read over a soliloquy of Othello's several times and was reproducing the Moor's somber thoughts with pretty fair approximation to the poet's words, but when he reached the last line, "Farewell, Othello's occupation's gone!" he stopped short, utterly at a loss. The original phrasing had quite escaped him. However, he had grasped the idea, for after a few seconds of frowning perplexity, his brow cleared.

"Ah, I haf eet!" he exclaimed. "Sol ees this: 'So long! Othello's lost hees job!'"—New York Post.

FOR GENERAL APPLICATION.

(Rochester Times)

A New York doctor advises people who would avoid the grip to keep their mouths closed. Excellent advice, which need not be confined to the danger of the grip.

AMERICAN OPINION OF AMERICAN.

(Montreal Star.)

American opinion is growing very bitter under this succession of wanton assaults upon the American right to travel on the high seas. The popular periodicals in the United States are increasingly savage in their attacks upon their own Government for lukewarmness in righteously resenting this systematic murder of American men, women and children; and popular periodicals undoubtedly reflect the trend of public opinion. For example, "McClure's" for April has an article on "Uncle Sham," dealing with the whole attitude of the American Government toward Mexico and Germany. On the ship-sinking issue, it lavishes sarcasm on note-writing as a retort to murder, and winds up in this way, describing a man who is expecting his grandmother to Christmas dinner:

"Just as the turkey is put on the table, the door-bell rings. You go to the door to admit grandma. But instead it's the postman. He hands you a letter. It's from the German Government.

"'Dear sir,' it reads, 'we regret to state that last Thursday we were forced to blow up your grandmother. She was on a ship. She had no business to be on it, because we said she had no business to be on it. No American has any business to be anywhere except where we say he has any business to be. Enclosed please find money order for $41.76. She didn't have long to live, anyway. Kindly sign and return enclosed receipt, form E. If you want a disavowal, we don't mind. Our voice is strong and our supply of stationery practically unlimited. In fact, in spite of the English blockade, we have so much of everything that we scarcely know where to put it. Hoping that this will prove satisfactory, we remain . . . .'

"All of which is calculated to make a chap feel fine, and especially be of benefit to grandma.

"Well, to go back, we start an investigation of the Lusitania.

"Then the Germans blow up the Arabic.

"We stop investigating the Lusitania and start investigating the Arabic.

"The Germans blow up the Hesperian.

"We stop investigating the Lusitania and Arabic and start investigating the Hesperian.

"The Germans blow up the Ancona.

"We stop investigating the Lusitania, the Arabic and the Hesperian, and start investigating the Ancona.

"The Germans blow up the Persia.

"We stop investigating the Lusitania, the Arabic, the Hesperian and the Ancona, and start in investigating the Persia.

"It's a great little game. It sounds like The House that Jack Built. Twenty can play as well as one. And there's no end to it as long as there's a ship left to blow up.

"In the meanwhile, we're busy writing notes.

"You see, we have to write one every time they blow up a ship. Then we have to write another to tell them what we meant by the first one. Then we have to write another to tell them that we meant it. And then even, they don't believe us. We can run a typewriter now with each hand, and we're learning to operate a third with our feet."

This is but one of many such outliterature, and we desire to emphasize literature, an dwe desire to emphasize the fact that the biting irony is American in origin and not Canadian. It without question reflects a growing indignation among out high-spirited neighbors which may easily be pushed too far, in spite of the Mexican diversion, which has so many ear-marks of having been "made in Germany." It is impossible to believe that the United States will forever submit to this submarine massacre of her innocent citizens.

EXERCISE FOR BEAUTY.

The Wise Woman Never Closes Her Eyes to Defects.

The wise woman stands before her mirror every now and then and carefully scans her figure to discover any flaws that may be corrected. To do this satisfactorily it is necessary to have a full length mirror and a hand glow so that ou can view yourself from every angle possible.

First notice your carriage. Is it erect and graceful, or does it droop forward from the waist? In these days it is more apt to be the latter, though fashion has at last consented to allow us to resume an erect carriage. If you have a disfiguring stoop correct it at once.

It may be necessary to wear shoulders braces, which can be purchased at any drug store and are inexpensive.

Some of you will find a roll of superfluous fat between the shoulders which produces the effect of "round shoulders. To correct this blemish throw away your pillow and sleep with your head and feet on the same level. Then cultivate the habit of standing erect and exercising whenever you have the opportunity, using this movement: Stand with the body erect and stretch the army out on a level with the shoulders and twirl them rapidly backward.

There is a preparation which will reduce this accumulation of flesh of it is applied every night, rubbing it thoroughly into the flesh. It is made of twelve ounces of alcohol and one ounce of iodine.

Many of you will find that your limbs are out of proportion; some will be too heavy, while others are too thin. To reduce the bulk of fat and make the muscles of the lower limbs.

To add flesh to the limbs massage them with olive or almond oil.

If your hips are out of proportion your figure is unattractive. Fashion may demand straight lines one season and a small waist the next, but the ideal size of the hips does not vary.

If you have ever made a study of the old Greek statues you could not help being impressed by the beauty of the hip lines. The hip bones should be well covered, but there should be no flabby fat. If your hips are too large the only help for you is in exercise and massage. It is useless to diet, for you will only make the balance of your body proportionately thin, and the hips will still be a blemish.

In case you are not familiar with exraising the foot as high as you can. Allow the weight of the body to rest entirely on the left foot while doing this exercise. Now kick for twenty times or more until the muscles are tired; then shift the weight over to the right foot and kick in the same fashion with the left.

Stand with your weight on one foot and raise the foot slowly until it is on a level with the trunk. Lower the foot and continue the exercise until you are fatigued. Repeat the exercise with the other leg.

Stand erect and take the position that a swimmer assumes when he is ready to dive. Bend the trunk forward without bending the knees and touch the finger tips to the floor. When you feel tired stop and rest. This same exercise will keep down abdominal fat.

Always remember if you desire to have a supple, graceful, beautifully formed body you must exercise. So make it a part of your daily life to correct the defects which detract from your attractiveness.

Measles and Morals.

Miss Rosamond Napier, in "Tess Harcourt," has this little gem of a story:

"Another little boy to see you, miss," said old Robson, the butler, to Tess.

This was a very fiery red but clean little boy, holding tightly a book covered in black cloth.

"Well, Tommy?"

"Please, miss, I've bringed back the lib'ry book as you gave Sunday, as we've got measles."

Tess beamed all over her face. At last her words were bearing fruit.

"Good boy, Tommy!" she encouraged. "Who has got them in your house?"

"Me, miss, please. I broked out Tuesday."

Fetching Frock Of Taffeta

In the illustration two of the season's popular tendencies are featured, namely, the cape bodice and bouffant skirt. Deep Georgette crepe cuffs with taffeta bands fall below the buttoned trimmed cape. The Bouffancy in the skirt is supported by a resilient material which is detachable.

Chats With the Doctor

BY A PHYSICIAN

VALVULAR HEART DISEASE.

Of all the sufferings with which Providence has seen fit to afflict human beings, none are worse than the latter days of those unfortunates who contract disease of the heart-valves. This is quite a different matter from the congenital malformations with which some children—luckily very few—are born; as from the fatty degeneration which attacks the old—particularly those who have indulged too freely in alcoholic drinks. But you find it almost at any age after infancy, and it is brought on generally by acute rheumatism, otherwise "rheumatic fever." When there is not a history of that as precedent, you learn as a rule that scarlatina, "scarlet fever," has caused it. Both lead to intercurrent attacks of endocarditis; that inflammation of the heart's lining membrane, with deposit of lymph on the surface, which subsequently produces adhesions, fibrous bands sticking parts together; and so preventing the normal fair play of the valves.

There may be much trouble following; perhaps no symptoms occur for some years. Then the victim becomes conscious of losing breath at the least exertion; and the sensation gets rapidly worse, until this dyspnoea is continuous, and all active movement has to be avoided. The kidneys and liver are subsequently implicated. The legs swell and there is puffiness under the eyes, and there may be ascites—abdominal dropsy. Finally the patient has to remain in bed; and there struggles for weeks or months with ever-increasing difficulty in respiration, until death mercifully closes the scene.

Something depends on the particular set of valves which are attacked. The mitral valve—so-called because of the supposed resemblance its two cusps bear to the bishop's mitre—is the most frequently implicated, and that which involves the greatest suffering. It separates the left auricle and ventricle. When the semi-lunar valves, which cover the passage from the heart into the aorta, the large artery—are attacked, there is not usually so much trouble. But the condition is apt to produce sudden death.

While the malady is so agonizing, in none is the skilful doctor able to give so much relief—mainly by drugs. And it is always requisite to be under his attendance and observation—never to take things into your own hands. He would rely most upon tincture of digitalis (foxglove) given in water twice a day in the dose of from 10 to 15 drops.

With the foxglove tincture it is often advantageous to combine about half a teaspoonful of sol volatile aromatic spirits of ammonia. When there is prolonged and severe suffering, five drops of tincture of opium may be added. And relief is further afforded by the application of two or three leeches over the heart. But all these things must be done in strict subordination to expert advice.

SPASMODIC ASTHMA.

It is necessary to speak of "spasmodic" asthma, because many people improperly term ordinary chronic bronchitis "asthma"; and also use the word rather loosely for almost any chest affection which involves shortness of breath. The true asthma comes on in fits: while the sufferer, at other times, breathes freely, and is quite devoid of any respiratory trouble. It depends on a spasmodic contraction of the muscular fibres of the smaller bronchial tubes; whereby the air passes to be oxygenated by the air cells of the lung.

Asthma is mostly inherited, and runs in families. But one does meet with cases in which no hereditary predisposition can be traced, and in which the trouble has arisen spontaneously. These cases are often tubercular; and the asthma only a form of very chronic tubercular consumption, in which the sufferer has narrowly escaped death from the prevalent malady. Asthma is not commonly thought to be contagious, but I once had as patient a very shrewd lady who became a great sufferer, and who had no asthma in her family. She thought she had caught it from her landlady in lodgings; and subsequently told me her suspicions had been confirmed by discovering that sheets, pillows, etc., from the bed of that landlady—a confirmed asthmatic—had been very improperly placed on hers.

Asthma seizures depend very much on locality, and the rules for selection or avoidance are not easy to lay down absolutely. Sufferers have to find what air and what place best agrees with them, and to settle down if possible in the most favorable country or town. Usually they are least liable to attacks in a smoky atmosphere such as that of a factory town, and are most subject, on the other hand, to the fits, where other people enjoy best health.

For internal treatment iodide of potassium, in doses of 10 grains dissolved in water, and taken three times a day, may be given from time to time—each course lasting from two to three weeks. When there is suspicion of tubercular mischief—or when the disorder is complicated with chronic bronchitis—there should also be a course of cod liver oil treatment from time to time. A teaspoonful of that should be taken twice a day after meals for a month or six weeks. This is particularly useful at the onset of winter.

The number of inhalants for use when the paroxysm comes on which are in the market is legion. Many or most are very effective; your chemist will recommend the best—I may not. Cigarettes made of blotting paper soaked in solution of saltpetre (nitrate of potash) and dried, are an approved remedy of this kind, as old as the hills.

CORNS, SOFT AND HARD.

The schoolboy protested he had been smoking for corns, but that did not save him from the usual chastisement which awaits those who are caught doing what they had not ought to. If only smoking would cure our corns, how happy we should many of us (relatively) be.

However, you can easily cure the soft corn, which is perfect agony. I learnt that only in recent years from a lady friend. None of the doctors' books said anything about it, and I hardly think the doctors know. All you have to do is to get a little powdered chalk and rub it on with cotton wool every night. Very soon your trouble vanishes. The sensitiveness is apparently due to the moisture, and disappears when the place is thoroughly dry.

You can also cure a hard corn if you have patience and perseverance enough, to endure a [illegible] and perhaps lameness [illegible] hard top, and apply strong [illegible] with a bit of stick—the butt-end of a lucifer match will do. Cut off [illegible] and repeat—in about ten days; and so on, till all is gone.

But most people don't care to do this and keep themselves easy merely by cutting the corn—until all the white core is out. Then you have comfort for a fortnight or so when the process has to be repeated. It is hardly necessary to be point out that your boots must fit properly. They need not be loose and too large, but they must not press unduly upon one spot, and so produce there the familiar corn.

His Face Was Covered With Pimples.

Pimples are not a serious trouble, but they are very unsightly.

Pimples are caused wholly by bad blood, and to get rid of them it is necessary to purify the blood of all its impurities.

Burdock Blood Bitters has made many remarkable cures; the pimples have all disappeared, and a bright, clean, complexion left behind.

Mr. Lennox D. Cooke, Indian Path, N.S., writes: "I am writing you a few lines to tell you what Burdock Blood Bitters has done for me. Last winter my face was covered with pimples. I tried different kinds of medicine, and all seemed to fail. I was one day in a friend's house, and there they advised me to use B.B.B., so I purchased two bottles and before I had them taken I found I was getting better. I got two more, and when they were finished I was completely cured. I find it is a great blood purifier, and I recommend it to all."

Burdock Blood Bitters has been on the market for the past forty years, and is manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

JUSTICE VERSUS LAW.

And a Judge Who Had No Patience With Legal Quibbling.

The Central Law Journal says that Theophilus Harrington, a Vermont judge in the early part of the last century, was a man who loved the right and cared little for mere legal quibbling. "If justice controls your verdict," he would often say to the jury, "you will not miss the general principles of the law." At one trial when the possession of a farm was in question the defendant offered a deed of the premises to which the plaintiff's lawyer, Daniel Chipman, objected because it had no seal.

"But your client sold the land," was paid for it and signed the deed, did he not?" asked the judge.

"That makes no difference," said Chipman. "The deed has no seal and cannot be admitted as evidence."

"Is anything else the matter with the deed?" asked the judge.

"I don't know that there is."

"Mr. Clerk," said the judge, "give me a wafer and a three-cornered piece of paper."

The clerk obeyed, and the judge deliberately made and affixed the seal.

"There, Brother Chipman,' said he, "the deed is all right now. It may be put in evidence. A man is not going to be cheated out of his farm in this court when there is a whole box of wafers on the clerk's desk."

A SKELETON IN THE CLOSET.

The Legend From Which the Well Known Saying Was Taken.

The origin of that singular and widely quoted saying, "A skeleton in the closet," which is found in almost every language in Europe is found in one of those curious collections of stories that have come down from the middle ages. In one of the these collections, compiled by an unknown hand about the middle of the tenth century, there is a story of a wealthy lady who, having a [illegible] grief, confided it to a friend who was apparently a perfectly happy woman. She was the wife of a nobleman, lived in his castle in the south of [illegible]. She and her husband were ever on the most loving terms. Not a [illegible] seemed to cast a shadow [illegible] path.

After hearing the story of her [illegible] friend the noble lady took her by the hand and led her to a secret chamber adjoining her bedroom, there opened the door of a closet and exposed a skeleton. "Know, my friend," she said, "[illegible] is happy. Every day I am forced by my husband to kiss this grinning head, which is that of a gentleman who was my husband's rival and whom I would have married had not my parents willed otherwise."

The Spinal Column.

The spinal column, or backbone, is the most ingenious engineering structure ever constructed. It contains within its centre the spinal canal, injury to which would produce in us immediate paralysis or death. The separate bones of the spinal column are fitted and adjusted so nicely that there is little danger of this, and, besides being provided with cushions, it is elastic and strong.

Was Not Much of a Believer in Patent Medicines

But Milburn's Heart and Nerve Pills Are All Right.

Mrs. Wm. McElwain, Temperance Vale, N.B., writes: "I am not much of a believer in medicines, but I must say Milburn's Heart and Nerve Pills are all right. Some years ago I was troubled with smothering spells. In the night I would wake up with my breath all gone and think I never would get it back. I was telling a friend of my trouble and he advised me to try Milburn's Heart and Nerve Pills. He gave me a box, and I had only taken a few of them when I could sleep all night without any trouble. I did not finish the box until some years after when I felt my trouble coming back, so I took the rest of them and they cured me."

Milburn's Heart and Nerve Pills have been on the market for the past twenty-five years. The testimony of the [illegible] should be enough to convince you that what we claim for them is true. H. and N. Pills are 50c per box, 3 boxes for $1.25; at all druggists or dealers, mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

SPRING TREE PLANTING.

There is a difference of opinion as to choice of spring or fall for planting trees. The argument in favor of fall planting is that the earth becomes fully settled around the trees, and the following spring finds them ready to start and grow with vigor. The advocates in favor of spring planting claim equally as good results from careful work. They make early purchases of trees, deeming it absolutely necessary for frequently unscrupulous of careless dealers do not hesitate to dig up trees from the nursery even after buds have commenced their growth.

Young trees should be planted, as they are surer to grow, have more and better small fibrous roots, will adapt themselves quicker to the soil and location, and with equal watching and care will grow so vigorously as to exceed older trees both in abundance of fruit, size, health and earliness of bearing. It is a mistake to choose standard apples, pear, plum or cherry trees that are more than two years old, and dwarf trees one year old.

Too great care cannot be taken in choosing the soil. A soil that is sandy is leachy, contains no moisture, and is liable to draught. A very heavy, clayey soil is directly opposite—too wet, tough and adhesive; few or no fruit trees do well in it. A gravelly soil is hardly more desirable. But a deep, loamy, or alluvial soil may always form a good choice.

The land should be well drained. Trees should not be planted where there is the remotest chance for water to settle and stand near the surface. Such land will surely ruin the tree and blight all hope for fruit.

In starting large orchards two teams are generally used. The first team plows to the depth of one foot a strip six feet or more wide. The second team follows with the subsoil lifter and stirs to the depth of two feet. A strip of the same width is then cross-plowed in the same manner.

This done, holes are dug one foot or more deep, three feet in diameter, and the three is placed at the same depth as when removed from its former place. The earth is then replaced, care being taken not to bend nor cram the rootlets of the trees, and abundance of lateral room is allowed for the growth of the roots. Many inexperienced persons lose their trees from too deep setting. No tree should be set lower in the earth than its original position.

Where the ground has not been plowed and subsoiled the planter must invariably dig his holes two feet deep and four or more wide.

Before the earth is put back in the hole and is placed around the roots of the tree the earth should be mixed with a good compost of ashes, well-rotted stable manure and chip manure. Leafmold, muck and lime may all form part of the compost. Let a large portion of the compost be placed beneath, but not in contact with the roots of the tree, and the remainder on the surface of the ground, to act as a mulch. The quantity will vary, according to the size of the tree, from a half-bushel upward. The effect will be most marked and the growth astonishing.

Should any of the roots become mutilated or bruised they must be pared off with a sharp knife to prevent decay—cut back on the underside until the sound wood is reached. Nearly all trees that come from the nurseries have lost some of their roots and their branches must be shortened in the same proportion. At the time of planting all branches should be pruned back to three or four buds from the base of each branch.

All large trees require stakes, while young trees will not, if firmly set. Where stakes are used, they must be fastened in the ground first and the tree planted by the side, and carefully tied so they will not chafe.

Mulching is almost indispensable. The earth should rise like a small mound toward the trunk of the tree, and over this should be a mulch two inches deep of hay, half-composed manure, sawdust or tan bark. It not only saves the labor of cultivation, but prevents the moisture of the soil from evaporation, renders the temperature more uniform, and prevents injurious effects from frost. The mulch should extend beyond the tips of the roots.

The ground should be cultivated carefully, never allowing grain crops nor root crops of an injurious nature to grow in the field. Neither should grass nor weeds be permitted. The cultivation and manuring incident upon the growing of some kind of judicious crop between the rows, as potatoes, beets, or turnips, will always be beneficial. Where no crop is grown there must be frequent cultivation, stirring the soil two or three inches in depth. A thorough mellowing of the soil is nearly equal to manure.

When securing trees from a distance, the trees are often dried. They can be restored by immersion for a day or two in water or thick mud.

No water should be used in planting, as it tends to harden and bake the surface of the earth, and has always proved injurious. All the moisture necessary will be supplied by mulching.

When buying trees, obtain them from some reliable nursery. Never patronize traveling swindlers.

Examine the branches and roots carefully and continually for insects, worms, or borers. This should be done several times during each growing season.

FARM NEWS AND VIEWS.

Barnyard manure is highly desirable where the soil is rather thin or close. The manure supplies both humus and plant food, and for that reason is economical. It is a waste product at the barn, but valuable to the gardener.

Preparedness for the orchardist and the gardener consists in having a spraying outfit with poisons and other materials ready to attack at the first provocation. This will maintain the crop and be a means of honorable peace.

The garden not only saves living cost, but it affords a living worth while. With a good garden, a home orchard, meat and bread, all of which may be raised on the farm, there is little likelihood that the farmer will starve.

Every gardener and grower of small fruits should have a spraying outfit and be ready for war in time of peace. This is the kind of preparedness that pays; it is the preparedness that insures fruits and vegetables. After insects get a start it is too late to spray. Spraying should be done when the first insects are seen and before they reproduce their young. When the sprayer is handy this may be done, but if one must wait several days till one may be ordered it may be too late. Arm yourself and be prepared. Should there be no need of spraying, you will have your outfit for future use.

Montana wool growers made $1,000,000 more from their 1915 wool clip than from that of 1914, though the 1915 crop was 4,000,000 pounds less than in 1914.

A writer in Inland Farming relates some strong facts about the horse and the way he sleeps. Even when not confined in stalls horses seldom lie down for more than an hour each night—that period being usually about midnight. The horse seems to prefer to rest standing up; stablemen have reported that some horses in their care have never been seen to sleep lying down. One animal had never been seen to lie down for more than 13 years. It is said that the horse sleeps "with one eye open," and is constantly on guard. His ears are continually turning and twisting so as to catch the slightest noise; not even an Indian in moccasins can approach a sleeping horse undetected.

Has been Canada's favorite yeast for more than forty years.
Enough for 5c. to produce 50 large loaves of fine wholesome nourishing home made bread. Do not experiment, there is nothing just as good.

LISTEN FOR THE BRONCHIAL WHEEZE WHEN YOU BREATHE DEEPLY

It means that disease will soon attack the lungs. Wheezing is distressing to the sufferer and annoying to his friends. Nothing half so certain in bronchitis and throat trouble as "Catarrhozone"; it gives instant relief and cures even the worst cases. Bronchitis fairly flees under the magic influence of Catarrhozone, which cures so thoroughly the disease never returns. Other remedies may relieve, but Catarrhozone cures bronchitis, catarrh and throat trouble for all time to come.

Beware of dangerous substitutes meant to deceive you for genuine Catarrhozone, which is sold everywhere. Large size, containing two months' treatment, costs $1.00; small size, 50c; sample size, 25c.

ANTIQUES

One of the best regarded objects, in an collection of antiques, is the clock, and it would be a fairly safe argument to give the "time-keeper" credit for having started more antiquarian collections than any other of the articles of absolute necessity in every household.

"Timekeepers" mark the subdivisions of a day. The ancient Persians divided the day into twenty-four hours, with sunrise as the commencement of each day. The Athenian day began at sunset. Astronomers count the hours continuously from one to twenty-four, beginning at noon. Our day begins at midnight, and is divided into two equal periods of twelve hours each. A shadow seems to have been the earliest form of time recording, but heat and water were early requisitioned for same purpose.

"Water-clocks" of very remote antiquity were known to the Egyptians, Babylonians and Phoenicians, and were used throughout the ages even to as late a date as the seventeenth century.

One form of water-clock was simplicity itself, just a bowl of water placed so that the water could trickle through a spout into a receiver marked to show the time by the depth of the water received.

Southern India had a "water-clock" worked in the opposite way: a thin copper bowl shaped like the half of an egg shell, with a small hole at the extremity, was floated upon water, and could be regulated by the size of the hole and the temperature of the water, to fill and sink at a given time.

Sermons and speeches seem to have been "clocked" by the sandglass in very early times, but the degree of accuracy by this medium seems to have been determined by the manner of preparing the sand; one curious prescription for this involving the preparation of ground black marble dust, which had been boiled in wine, and after being thoroughly dried the grinding to be repeated nine times.

It is not known exactly when wheels actuated by weights came into use as clocks. As early as 500 A. D. we hear of a command for "clocks and dials to be set up in churches to distinguish the hours of the day," but possibly these were of the "sun-dial" order.

As the word "clock" signifies a kind of bell a mechanical contrivance of some kind must have superseded the "shadow" method when it was coined.

A thirteenth century contrivance described as "resembling internally a celestial globe, in which figures of the sun, moon, and other planets, formed with the greatest skill, moved being impelled by weights and wheels," is sufficient proof that the clock was in evidence at that period.

Contrivances for telling the time by the striking of a bell seem to have been in use before the "dial" made its appearance as part of a clock, but we hear of clock dials early in the fourteenth century.

Some of these forerunners of the "Wag o' the wall" and the "grandfather's clocks," gave opportunities to artist and craftsmen to exercise their skill and ingenuity, but the "antiques" just named very materially widened this road to greater advantages for all.

A PROJECTING PERSONALITY.

"Cap, we'll have to let this recruit go."

"Why?"

"He weighs 350 pounds, mostly bay window. If we put him in the front rank it kills the alignment. And if we stick him in the rear rank he's in the front rank too."—Kansas City Journal.

THE BEST WAY

To Clean a Lot of Things in Use Just Now.

To clean nickel-silver ornaments, dip a piece of flannel in ammonia and rub the article.

To clean old passementerie, rub it with a cloth dipped in equal parts of alcohol and water. Dry it immediately with a clean cloth.

To clean raincoats, sponge with a mixture of alcohol and ether, to which is added a tablespoonful of ammonia to a pint of the liquid.

To clean white leather belts, rub them with a piece of white flannel which has been dipped in powdered borax.

To freshen plush, sponge it with chloroform.

To remove sticky spots from carpet, rub them with salt and alcohol.

PILES CURED at HOME by New Absorption Method

If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the new absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box P. 8, Windsor, Ont.

SEEKING HAPPINESS.

Little Things That Make Living a Joy Not Always Appreciated.

We are told that happiness comes by pieces and that it is these small bits linked together that make our lives worth while. Some of us are not content to take our happiness by degrees or at intervals. We want it all the time in big pieces, and if we cannot have it that way we think that we are deprived of our natural rights and look upon ourselves as human beings.

It is a rather singular expression of human nature how happiness affects the individual. With some of us it makes us friendlier toward others and anxious that they should experience like joys; with others it makes us too satisfied with ourselves to think very much of our neighbors.

Perhaps those of us who know what the joy of living means have experienced both of these attitudes at different periods of our lives and are in position, therefore, to appreciate a varying viewpoint, but even as it is only after we lose something of that joy of living and have found out for ourselves that there are shadows which no amount of sunlight can disperse that we can readily appreciate the blessing of whatever happiness may find its way into our lives.

The little things that count so much in our intercourse with each other are not always regarded as highly as they should be, and for this reason we pass by much that would give us joy if we only knew how and where to find it.

Minard's Liniment used by Physicians

Considering how many keys a piano has, it is curious how few of them are kept locked.

KEEP CHILDREN WELL

To keep little ones well the bowels must be kept regular and the stomach sweet. Nine-tenths of childhood ailments are caused by derangements of these organs. Baby's Own Tablets never fail to regulate the stomach and bowels—that is why thousands of mothers would give no other medicine to their little ones. Concerning them Mrs. Clias. A. Turner, Marie Joseph, N. S., writes: "We have been using Baby's Own Tablets off and on for the past year and a half, and have found nothing to equal them." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A BETTER WORLD.

Despite the rack and ruin,
The agony and tears,
The curse of war and battle,
The anguish and the fears;
Despite the utter hatred
And homes made desolate,
A better, grander, future
The coming days await.

From out the seething cauldron,
A brighter world shall rise,
The threat'ning clouds shall vanish
From overhanging skies;
The world will have grown better
From ordeals passed through,
Man's brotherhood be truer,
The whole world born anew.

A gentle spirit's brooding
O'er fields where carnage reigns,
The individual soldier
His honesty retains;
The hate is 'mong the leaders
By mad ambitions fired,
The rank and file have longed for—
A peace so much desired.

Evils shall be uprooted
Which through the years have grown,
Right in the end shall conquer
What's wrong be overthrown;
False theories shall vanish
And vain ambitions cease,
The wide world reap the glory
Of universal peace.

Through throes of purifying
Humanity shall gain;
The progress of the ages
Was born of grief and pain;
The grander the achievement,
More great is the sacrifice;
But progress, now as ever
Must pay the bitter price.
—Augustus Treadwell in the Brooklyn Times.

$1,000 REWARD!!

For a Case of Incurable Constipation.

To any person who cannot be cured of Constipation by Dr. Hamilton's Pills, the above reward will be paid.

No medicine gives such lasting satisfaction or effects such marvellous cures as Dr. Hamilton's Pills. Relief instantly follows their use. That blinding headache goes forever, that feverish feeling in the skin is soothed away, bilious fits and stomach disorders are stopped.

Don't be nervous about using Dr. Hamilton's Pills; they are mild enough for a child to use, yet certain and effective in action, in the most chronic cases. Get a 25c box to-day; they bring and keep robust good health.

Keep Minard's Liniment in the house

Boiled Nettles.

The countryman knows more about economy than the townsman when it comes to a matter of vegetables. A correspondent reports a conversation overheard in a village inn in Hertfordshire in this present year of grace. Vegetables were under discussion, and spinach was mentioned. "Not bad," one gourmet admitted, "but give me nettles," an inquiry has shown that the two are not dissimilar in taste. Another forgotten "vegetable" is the primrose. Primrose pasties were once a popular dish in Lancashire.—London Standard.

The Man With a Dream.

He may be right or he may be wrong,
He may be false or he may be true—
The singer is often more than the song,
The fact more than the man, produced;
But right or wrong, there's a glory in it—
Full to the brim each glorious minute—
When the man with the dream goes forth to see
What the world and the man and the dream may be!

And the ship may sink and the brave go down,
And the wrong may triumph and know no rest—
But one man more may have won a crown
For trying a little to do his best!
And the dream won't hurt, and the seed may blow
In a fertile heart that will come in time
To help it sprout and help it grow
In the sun and rain of a kindlier clime!

It is so with dreams, and with men that dream—
None even know what there is in store
Till he follows the path of the luring gleam,
Or whether it leads to peace or war;
For without the dream there is never a deed
That is worth the hour it costs to do—
And the man with the vision is this day's need—
For men may be false, but the dream is true!
—Baltimore Sun.

Minard's Liniment Co., Limited:

Dear Sirs,—Your MINARD'S LINIMENT is our remedy for sore throat, colds and all ordinary ailments.

It never fails to relieve and cure promptly.

CHAS. WHOOTEN.

Port Mulgrave.

Wanderings of Minor Planets.

The "mislaying" of the minor planets is sometimes due to their actually failing to keep their appointments at the places where, according to calculation, they ought to be. An instance is the case of No. 153, otherwise known as Hilda. Dr. Palisa discovered her in 1875 and calculated her orbit. But attempts to find her again failed, and she was almost given up as lost until Dr. Palisa found her again in 1879—a long way, however, from where she had been expected. The discrepancy was caused by the effect upon Hilda of the attraction of Jupiter, of whom she is a comparatively near neighbor. For these little planets are scattered over a wide belt. Hilda gets within 23,000,000 miles of the orbit of Jupiter, and Aethra at times actually comes nearer to the sun than Mars ever does.—London Chronicle.

Minard's Liniment Lumberman's Friend.

The Things That Come Hard.

"I am happy because it is so easy for me to write," said a beginner to one of the great masters of French prose.

"Go home and pray," said the master, "that it may come hard."

It is so of writing, so of thinking, so of life. The easy thing is barely worth doing. The hard thing is worth doing, though the end be failure. A goal, to make which one fairly tugs at life and yet misses, is better than a victory softly won.

So often the man who speaks easily tells us least, while the sparing words one wrenches from a taciturn speaker are imbedded in thought. Shakespeare said that Gratiano talked more than any other man in all Venice. But he compared his speech to a bushel of chaff in which lay hidden a single grain of wheat and that not worth the finding.

Self Poisoning by Food

The food which is taken to nourish the body and keep up vigor and strength becomes a poison to the system when digestion fails. You feel drowsy after meals, lose appetite, suffer from constipation, have pains in the bowels and through the body. Instead of being digested, the food ferments and gives rise to gas or wind on the stomach, which crowds about the heart, causing suffocating feelings and derangements of the heart's action.

Resort to aids to digestion cannot afford more than temporary relief, for the trouble is caused by torpid, sluggish action of the liver and bowels. These organs must be awakened so that they will filter the poisons from the blood and remove from the system the accumulating waste matter.

Here lies the cause of indigestion and dyspepsia, and neglect only leads to chronic and complicated derangements, which destroy all comfort and shorten life.

The ideal treatment for indigestion is Dr. Chase's Kidney-Liver Pills, because they promptly and positively remove the cause of trouble. Acting directly and specifically on the liver, kidneys and bowels, they cleanse the system of all impurities, and their occasional use keeps these filtering and excretory organs regular and active. The blood is purified, pains and aches disappear, and such derangements as indigestion, constipation, biliousness, backach and kidney derangements are cured.

One pill a dose, 25 cents a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

THE POULTRY WORLD

CARE OF BROODER CHICKS

The main essential when the chicks are received and placed under any hover is to have and maintain, especially for the first ten days or two weeks, a uniform temperature of from 90 to 95 degrees, and gradually lowering this as the chicks grow stronger and older, taking always the weather conditions into consideration. In the cold weather of early spring the chicks need and thrive better with more heat than later in the spring when it is warmer. The beginner should bear in mind that a high brooder temperature is better than a low temperature. While it is not good for the chicks to be compelled to stay in a temperature from 100 to 110 or over for any length of time, nevertheless it is not as harmful as if the heat went down to 70 or 80 degrees, for under those conditions it means a chilled chick; and if the results are not fatal they at least cause a check in the growth, from which the chicks seldom, if ever, fully recover.

In a measure the chicks confined to the high temperature can get away from it by crowding to the edge of the hover. This applies only to the small hovers, for in the large hover, with a capacity of from 100 chicks up, each chick can seek its own temperature and at the same time have ample ventilation, which is so essential to the welfare of brooder chicks. Where there is a lack of heat chicks must suffer, resulting in chilled peeps, and a check in growth if not a large death rate. So the lesser of the two evils is rather more heat hovers too little. In operating the larger hovers plenty of heat is essential. A thing to guard against, however, is lack of ventilation. These large brooders now on the market not only give sufficient heat, but warm the room in which they are placed and one of the main essentials to this combination is plenty of fresh air. Many of these brooders have been condemned because the operator placed them in a room or colony house that was much too small for the capacity of the stove. Again some have had success in early spring when the weather was cold, but when April and May came with warmer weather, difficulty was found in keeping the temperature down in the chick quarters and yet maintaining the desired heat under the hover. This can be avoided by the purchase of the right size brooder and placing it in colony houses that have room and windows enough to secure the proper ventilation.

Avoid crowding, the one evil that is indulged in by even poultry keepers of some experience and who should and in many cases do, know better, but each year take a chance. When the first long poultry houses with their good ventilation came into popularity, big units, especially among the large commercial Leghorn plants, were considered the proper thing. It cut down the operating expense considerably, and in many cases the units were made too large and while the operating expense was lowered, the profits also dwindled. So, with the brooder, especially the newer coal stove or oil-burning type. The rated capacity was as a rule, placed too high, and the average poultry keeper has found by experience that one-half the rated capacity was the proper number to be obtained the best success.

That brooder improvement has made wonderful strides over the old death-traps of a few years past is beyond dispute, and the beginner that selects one of the high-grade brooders now on the market will have success, providing that the proper essentials are complied with and the main ones to follow are an even temperature, especially for the first 10 days to two weeks, and plenty of fresh air through the aid of windows that do not subject the chicks to draughts.

NOTES.

The poultry breeder that wishes the best in eggs for hatching, day-old chicks, or stock, must expect to pay a fair price. Poultry is graded in the same manner as other lines of stock are graded, according to the breeder and what that breeder's stock stands for in merit. Not all flocks are alike, and there is a big difference in the strains of one breed due wholly to the skillfulness of the breeder.

The beginner in poultry should plan for an early start. Winter eggs are produced by chicks hatched early, and to obtain the most from poultry one must have a fair egg yield during the winter months, when hen fruit is at its highest.

For good fertility the breeders should not be forced for egg production. A good dry mash should be fed with not over 10 per cent. of beef scraps, especially for the heavy breeds. Exercise is important. Never allow the fowls to become sluggish. Fertility is largely due to the manner in which the hens are handled.

Many poultry keepers are afraid of fresh air for their poultry. For a number of years the press has put before the public the importance of good ventilation for poultry, yet in spite of this, a large number of poultry keepers still cling to the old method of closed poultry buildings.

GHOSTS OF THE LIVING.

A Case That Throws Light On the Problem of Apparitions.

It is not at all necessary to resort to the supernatural as the only sufficient explanation of apparitions. In truth, there is one insurmountable obstacle to regarding them as supernatural manifestations, and that is the simple circumstance that the ghosts wear clothes. It is quite conceivable that there really may be ghosts of persons, but nobody who gave the matter a second thought would contend for a moment that there can be ghosts of clothes. Nevertheless apparitions are always clothed and sometimes in garments of such modern cut that they were unknown at the time the person seen as a phantom lived on earth.

Aside from this, there is the interesting and by no means unimportant circumstance that houses are sometimes haunted by apparitions not of the dead, but of the living. I know of one case in which a gentleman entering a drawing room at 4 in the afternoon saw seated on the sofa a young lady with reddish gold hair, who appeared to be reading a book. There were two other persons in the room, one seated beside her on the sofa, and the visitor was surprised to find that they did not offer to introduce him to the young lady—did not, in fact, seem to see her. Later a guest at a week end party saw the same apparition in the same house, and it was seen a third time by one of the servants.

No light was thrown on the strange affair until, a year afterward, the wife of the son of the family arrived from Australia to pay a first visit to her husband's relatives and was immediately identified by the servant as the figure she had seen. The two visitors who also had seen the apparition subsequently made the same identification.

Since it is incredible to suppose that a person can be in two places at the same time—so that a lady can be both in Australia and in a house thousands of miles from Australia—it is a legitimate inference that phantasms, whether of the living or of the dead, are devoid of objective reality, are, that is to say, always and only hallucinations.—Metropolitan Magazine.

BOY CRIMINALS.

(Des Moines Capital)

The boys who are to-day committing crimes are generally doing it to obtain money with which to indulge evil passion. Work is the enemy of evil passion.

Football and baseball and all outdoor sports act as preventives of crime. Compulsory military drill in the schools and colleges would do the same.

Military drill builds up pride, and the proud youth generally undertakes to keep good company.

The responsibility of parents is great, and they err on the side of too much love for their children. When a boy is with a number of other boys in stealing an automobile, and the parents back the boy up in denying that he had anything to do with it when they know he did, that boy is on the way to ruin, and the parents are to blame in a great measure.

ZAM-BUK CURED IN 2 MONTHS

After 2-Year Useless Treatment

The healing power of Zam-Buk is so much greater than that of other ointments, that it has cured in many cases when all other ointments have failed. One such instance is that of Mr. Earle E. Gardiner, of Marquis, Sask., who writes: "For two years I suffered with a bad attack of salt-rheum on my feet. During those two years I tried every known remedy, but could find nothing that would cure the disease. Then I heard of Zam-Buk, and commenced using it. After the first few applications I notice an improvement, and this encouraged me to continue. Although I had suffered for two years, after only two months' treatment with Zam-Buk I am completely cured."

Zam-Buk is equally good for eczema, ulcers, abscesses, blood poisoning, piles, cold sores, chapped hands, chilblains, eruptions, etc. At all drug stores, 50c box, or from Zam-Buk Co., Toronto.

Science Short Ones.

Japan has fifty-eight coal mines.

Sweden has 6,600 co-operative societies.

In Denmark there are 10,000 women unionists.

The billboard is prohibited in Manila by legal enactment.

The olive crop of California is worth $3,000,000 annually.

The iron ore deposits of Sweden are estimated at 1,200,000,000 tons.

All steel trolley cars are now running between New York and Boston.

Nearly 300,000 persons are employed on the electric roads of the United States.

Sixty thousand tons of iron ore were taken from the soil of Ireland last year.

It is claimed that there are more varieties of flowering plants in New South Wales than in all Europe.

Bicycling in India is interfered with by the hordes of mosquitoes, which not only attack the rider, but pierce the tires of the machine.

The largest forest in the world is that in the Labrador-Hudson Bay district, which covers an area about 1,000 by 1,700 miles.

To get rid of a tree stump in Germany they bore a hole in the stump and pour into it equal parts of nitric and sulphuric acids. After a few weeks the largest stumps of hardwood are eaten by the acid and easily crumbled with a pick.

Ask for Minard's and take no other.

SPEED OF PROJECTILES.

How the Velocity of Cannon Balls and Bullets is Measured.

How fast does a bullet travel? The highest velocity ever given to a cannon ball is 1,626 feet per second. This is equal to a mile in little more than three seconds, or nearly twenty miles a minute.

A rifle bullet does not travel so fast as a cannon ball, the average rate being 1,216 feet per second. This matter of speed is tested in a very interesting way.

A long wooden shed is used, in which a distance of exactly 100 feet has been carefully marked off. At each end of this space is a stand something like a target with a large circular opening where the bull's-eye should be. Across each opening is stretched a small electric wire, connected with a delicate instrument in another room.

The rifle from which the firing is done is so aimed that the bullet which flies from it cuts both wires. Obviously the difference in time between the cutting of the two wires marks the speed of the bullet through that 100 feet.

When the first wire is cut an electric current is broken and a rod falls, moving a pointer on a slide in its descent. The breaking of the second wire acts in the same manner on another set of rods, slides and pointers.

The difference in the marks made by the pointers on the slides makes it possible to estimate the difference in their time of falling, and from these calculations accurate figures as to speed are obtained.—London Answers.

LOOKING INTO THE FUTURE.

In one of the Southern States the negroes are great patrons of a matrimonial agency. One negro, anxious to find a wife for his son, went to this agent, who handed him his list of lady clients. Running through this the man came upon his own wife's name, entered as desirous of obtaining a husband between the ages of twenty-eight and thirty-five.

Forgetting about his son, the darky hurried home to announce his discovery to his wife. She was not at all disturbed.

"Yes," she said, "I done give him my name. I puts it down when you was so sick in de winter and de doctor says we must prepare for de worst."

Tibetan Penal Code.

The Tibetan penalty code is curious. Murder is punished with a fine varying according to the importance of the slain; theft by a fine of seven to one hundred times the value of the article stolen. Here, again the fine depends on the social importance of the person from whom the theft has been committed. The harborer of a thief is looked upon as a worse criminal than the thief himself. Ordeals by fire and by boiling water are still used as proofs of innocence or guilt, exactly as was the custom in Europe in the middle ages. And if the lamas never inflict death they are adepts at torture.

"Jiggs went to church last Sunday and everyone was puzzled because he entered by the side door." "Force of habit, probably. He's so used to those Sunday side-door entrances."—

You never can tell. The lightest literature may have the heaviest sale.

SUNDAY AT HOME

IN MEMORIAM.

'Twas Truth's young soldier lay,
In sorest need,
The sudden call had come
With awful speed.

"Nothing is left me now
But silent death.
I must take leave," he said,
Of body, breath.

"Fold up this half-worn tent,
Put it away
Under the daisies, there,
Against that day.

"We journey to one end,
To sleep and wake;
The night is thick with stars,
And day will break."

And as he spoke there fell
From out its place,
The gold of heaven's full dawn
Upon his face.
—Theodore H. Rand.

OUR FAILURES.

In many things we all err. We try the bypaths, and the gleaming ways, which seem to lead upward to the heights, seem to scale heaven by a short and hazardous climb. It is something if the thunder breaks and drives us down, or some tale of the barren summit makes us pine in time, so that at any rate before death falls we find ourselves within the wicket-gate, on the right road, though far away. It is by failure more than by successes that God produces that result. And therefore the true success, in his eyes, is often what passes here as failure.

NO MAN'S LAND

It is an undiscovered country; it is not at the poles, not under the burning equator nor up the Nile or Amazon, but nearer home; in the home, and nearer, in your own heart. "Who can know it?" says the Book. Do you know? "Man, know thyself." The hardest task yet. No man has made a chart of this unknown sea, his own consciousness. It is distinct from the body; it is in it, not of it; it is a tenant; gravitation holds the body to the earth, but the ocean of consciousness rolls past, a tidal wave, swelling, rising; it touches the beams of His chambers who dwelleth in light that we do not know.

It is a sea where all our thoughts are drowned, says the poet, only the trouble is you cannot drown thoughts; they are dressed in an insubmersible tunic, and like a cork they cannot sink. Think of a sea crowded with fleets intelligent and free, yet they touch terrific limitations of space, on the one hand, and measure their time by the clock; on the other hand, they move in a larger world, with absolutely no boundaries, where speed is not measured by miles, or success by money.

The Kingdom is within; there is a Kingdom and a King, and He is living, powerful and immediate. "He is over all and blessed for evermore." He is light: will you pursue your studies in the day, or hang up a curtain and dwell in darkness? If you let down the sounding line, you will find no bottom, but exclaim with Paul, "Oh, the depths both of the wisdom and knowledge of God! How unsearchable are His works, and His ways past finding out. If you take the wings of the morning and dwell in the uttermost parts, you will find that He is there before you.

The British navy can send a searchlight for miles and miles. He is the great searcher of the heart: if you are wise you will pray, with another; 'Search me, O God, and know my heart."

Remember, this is very practical navigation of these undiscovered seas. 'Tis not a watery wilderness, but occupied and filled with intelligences, angelic and human, who help us to discover.

Could we but stand where Moses stood,
And view the landscape o'er,
Not Jordan's stream nor depths cold flood
Shall fright us from the shore.

Intuition, indentation, whispers will come to the devout and trained observer and conclusions will be arrived at which shall prove the personal property of every searcher. You can hold these precious treasures against all comers, and laugh at all critics. Hast thou faith? Have it to thyself before God."

Remember, there is a double personality in every case. He calls and we answer. He gives and we receive. He beckons and we follow on to know the Lord. The greater includes the less. "Christ in you, the hope of glory." He, like the mother bird, hides us under the shadow of His wing.

— E. T. Miller.

Where is the Flag of England?

The following spirited poem, by an American writer, is a generous tribute to the British flag, and a prophecy of the much-desired moral alliance of the English-speaking races:

Where is the flag of England?
They ask on every hand,
Some with a bitter hatred,
Some with a loyal stand;
Worshipped almost as a symbol,
Then denounced as a rag,
But somehow it still keeps waving on,
Kissing the breeze till its work is done,
That glorious English flag.

Where is the flag of England?
It waves the throne above
Where a good king reigns by the grace of God,
And a people's boundless love;
Of all the rulers earth now owns,
However the world may brag,
Not one so calm and so true is seen
As George the Fifth, the gracious King,
Enrobed by England's flag.

Where is the flag of England?
It floats on every sea,
Borne by the hands of the bravest men
And waving o'er the free;
It leads the way to the battlefield,
And the armies never lag,
For somehow or other they seem to know
England has conquered every foe,
Led on by that wondrous flag.

Where is the flag of England?
'Tis floating o'er the free,
Protecting every Englishman,
Wherever he may be;
For greatest power on earth [illegible]
The humblest subject dear
Unjustly to a captive's fate,
Or it will feel the power there
Of England's mighty flag.

Where is the flag of England?
Not yet where it will be,
Conjoined with "Old Glory" grand,
The emblem of the free;
One God, one Christ, one speech, one soul,
The two shall be unfurled
For progress, liberty, and right,
And England's fame, Columbia's might,
Shall help and bless the world.
— Rev. J. P. Hutchison.

To keep white silk gloves from turning color, wash in cold water with castile soap and add a little bluing to the rinsing water and dry in the shade.

A Splendid Stock of
Easter Gloves

This week and next will be marked by the great demand for **EASTER GLOVES,** that's sure. What woman does not desire a brand new pair of fine Kidds or Suede Gloves at this time and for this occasion we have made every effort to secure splendid new lines and as a result have an excellent stock.

Fine French Kid Gloves may be had in black with white point and white kids with black point, Tans and Browns with points of self, pique sewn, guaranteed. Per Pair **$1.00** and **$1.25.**

The White Washable Kid, one of the favorite sellers with us. It's dressy and will wash perfectly. Price per Pair **$1.50.**

Grey & Tan Treffousse Suede Gloves

For one thing these Suedes are guaranteed satisfactory as to fit, and for another they come in pretty shades of Grey and Tan. They're the most dressy glove we handle. Best French make. Price per Pair **$1.80.**

200 Pieces New Prints & Ginghams

Every yard of the good old fashioned dyes, Blues, Lilacs, Reds and Greys, all perfect goods. Selling at **12½c** and **15c** a yard.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

CARGILL

Mrs. Wm. Mathews visited with friends in Toronto and Hamilton last week.

Richard Schuett of Walkerton was here a few days last week.

The euchre party held in the Foresters Hall on Friday night was well patronized and a pleasant sum was realized in aid of the fund for those enlisted from here in the 160th Batt.

Mr. A. Mawhinney of Paisley spent the week-end with his son Frank.

Miss R. Loughleen and Miss Mary O'Connell were in the County Town on Saturday.

Lieut. Parker and Ptes. Clancy, Kirvin, Martin and Hanson of the 160th Batt. Walkerton, were Sunday visitors here.

Mr. Wm. Wade, formerly stave cutter here but now of Brussels, spent Sunday here.

Mrs. John Clancy and son J. T. left on Monday to attend the funeral of her brother, Thos. O'Donnell, in Wallaceburg.

Mr. F. F. Philipps of Stratford is relieving at the depot this week in the absence of Agent Clancy.

Mr. and Mrs. John Clancy were in Walkerton on Friday.

Miss Margaret Garvey spent Sunday at Joseph Clancy's.

SOLWAY

Mr. Charles Ormingston spent a few days of last week in Teeswater.

Mrs. Ben Michell had a quilting bee on Wednesday of last week.

Mrs. Fee returned to her home in the West after an extended visit to her brother's home, Mr. Walter Findlay here.

A number from here attended the funeral of the late Mr. Wm. McGill at Vesta on Tuesday.

Quite a number from this vicinity attended the O'Neil Bros. sale at Malcolm on Tuesday.

Miss Bernadette McGarrity has returned from Vesta where she spent a week.

HANOVER

The first death in the 117th Grey Batt. occurred last week when Pte. Victor O. Weller passed away at Toronto where he had been taking a course in bayonet work and physical drill. His death resulted from a combined attack of measles and pneumonia.

Lieut. Harold Young is back in France. A cablegram received by his brother, Ross Young last week stated: "France to-day."

Lieut. Arthur O. Helwig, son of Mr. and Mrs. G. W. Helwig of Hanover, has been transferred from the 153rd Battalion, Guelph, to the 162nd Batt., Parry Sound, of which Major Musgrove is second in command. Hanover has quite a showing in the way of offers.

John T. Strachan, B. A., brother of D. L. Strachan of Hanover, won a scholarship at Knox College, Toronto, valued at $125.

KINLOSS

There passed away on Thursday, March 30th, a very highly respected resident of Culross, in the person of Sarah Anne Good, relict of the late John Sittler, in the 64th year of her age. Mrs Sittler was born in Waterloo and moved to Culross with her husband thirty-nine years ago, where they settled on the homestead, lot 13, con. 15, Culross. One son and three daughters survive her, Mrs. Levi Erb, Kinloss, Mrs. John Baptist of Alberta, Mrs. Thos. Bushel of Kincardine Tp., and Ezra on the home farm. Mrs. Sittler was one of the best known and well beloved residents of the neighborhood and her departure will be departure will be deeply regretted in the vicinity.

OTTER CREEK

The farmers have started to plough around here.

Mr. Milton Dippel was at Listowel last week on a business trip.

Mr. David Greve has a black minorca hen which laid an egg 7¼ inches in length and 6¼ inches in circumference.

Maple sap is running well these days.

Mr. J. W. South was at Toronto on a business trip.

GLAMIS

The recruiting campaign was general throughout Bruce County last week. The Tiverton Company being well represented here.

Mr. Thos. Colwell has sold his farm on the boundary, to Ferris Bros. at a good figure.

Pte. James Thompson, made a business trip to Walkerton on Friday and brought home his uniform.

Mrs. W. J. McKeeman and granddaughter Miss Phyllis Moffat returned from Toronto last week.

The ladies Missionary Society met at "The Manse" on Wednesday for this months meeting.

Mr. John McLean, Boundary West, sold his 150 acre farm last week to Messrs Alex Kirktown Sr. and Ray Kennedy. The latter purchasing the 50. The farm sold for $5000.

Mr. Wilbert McNally signed up here on Thursday to join the 160th Batt. at Tiverton.

Mr. Thos. Colwell is having his auction sale on Friday.

Mr. Cecil Garland of Pinkerton was a Sunday visitor at Mr. James Thompsons.

Mr. John McLean has purchased the Sinclair farm of 200 acres near Tiverton for the sum of $10,200.

Mrs. Archie McKinnon received an official telegram from Ottawa on Monday of the news of her son John A. being wounded on April 1st in France. It is not known whether wounds are serious or not.

A number from here attended Beaton Wells sale on Friday.

The adjourned meeting of the lot owners of Purdys' Cemetery will be held in Purdy's Church on this Friday at 8 p. m. All interested parties are requested to be present as there is some important business to discuss.

The many friends of James Armour are sorry to hear of his serious illness at Almont, Mich.

All are pleased to hear that Pte. Edward Chapman has been taken back into the Tiverton Company.

Quite a number of Privates were home here for over Sunday.

Mr. Dan Finlayson returned home from Port Elgin on Saturday.

GREENOCK

A few around here tapped trees last week and are busy making syrup these days.

Mr. Jack Forsythe left on Tuesday for Stanley Alberta.

Mr. Jake Bruder lost a valuable horse last week.

Mr. Harry Goodhand returned on Tuesday to his home in Rochester after spending a month with his parents here.

Miss Viola Cunningham is spending a couple of weeks visiting friends at Fergus.

Mr. Robert Chambers moved to his farm near Pinkerton last week.

Mr. Alex. Kraemer put up a shed for Mr. Philip Grubb last week at Formosa.

Spring is pretty slow in coming this year. The snow is nearly all gone but the weather is quite cold yet and the roads are almost impassable.

Mr. Bert White was in the County Town on Saturday.

Mrs. Geo. Winter returned home last Monday after spending a week visiting her daughter at Walkerton and Clifford.

RIVERSDALE

Miss Belle Chatreau spent the week end as a guest of Miss Eva Benninger.

Quite a number of our boys are enlisting, Edwin Forsythe and Vincent Pettyplace being two of the latest recruits.

Mr. B. Klepfer visited the home of Mr. Lawrence Benninger last week.

Little Helen Scharbach who was on the sick list is now better.

Gustave Cassidy has engaged with Mr. G. Chatreau for the summer.

Mr. Tom Loftus, who has been very ill at Parry Sound, is recovering and will soon be able to return to his home here.

Bert Chatreau leaves next month to take a position in Walkerton Egg Emporium.

Albert Holdmiller had a splendid wood bee on Saturday last.

The recruiting officers met one original excuse last week when one of gallants produced his marriage license. Of course the news spread quickly by the telephone and tell-a-woman systems and now everyone has his eye on Fred.

Miss Mabie Cuskanette is spending a few days with friends in Teeswater.

The roads here are in very bad condition although the water has lowered considerably.

Mr. Albert Dietrich and Miss Agnes Dietrich Sundayed at the home of Mrs E. O'Hagan.

The young people are making good use of their time "making taffy while the sun shines."

Mr. Geordie Symons who has been engaged at Chesley has returned home.

Mr. and Mrs. Charles Brindley are moving to Riversdale this week.

Mr. and Mrs. Ab. Huffman are settled in their new house in the village.

Miss Agnes Dietrich and Miss Angela Barry spent the week-end in the county town.

Mr. William Hagen pays frequent visits to our litte "burg" lately. What's the attraction Bill?

A new flag was hoisted at the school last week.

Recruiting meeting will be held tomorrow night, April 14th in the village.

Mr. Gilbert Chatreau has purchased the farm of Mr. W. D. Halliday, who has gone west.

MILDMAY

Mrs. Lehman, whose son Rev. Father Lehman was parish priest in Mildmay several years ago, died at St. Agatha in Waterloo County. The funeral took place on Tuesday forenoon, to the R. C. cemetery.

Miss Clara Klemmer of Clifford is visiting this week at her sister, Mrs. P. D. Liesemer.

At the recruiting meeting on Friday afternoon Pte. Norman Kaufmann was presented with a handsome wristlet watch by his former school mates of S. S. No. 11, Miss McIntosh read the address after which the presentation was made by Miss McCullough.

Mr. and Mrs. Charles Jasper of Mildmay celebrated their golden wedding at the home of Thomas H. Jasper last Friday.

Mr. Edward Lobsinger left on Monday morning to take a position as baggage man at Elora. Ed. has been an employee of Herrgott Bros. the past year and a half.

The Hamel Furniture and Upholstering Company are working overtime at present and have been for several weeks owing to rush of orders.

Mr. Feo Hablman has closed up his barber shop and has left securing a situation at Berlin.

Mr. and Mrs. John Hessenauer of Berlin are visitors this week with their many friends about.

Another Recruiting meeting was held in the Town Hall on Friday afternoon from 2 to 5. The speakers were splendid, but, several unpleasant controversies occurred which one could not but wish had been avoided. In all meetings of this nature held here, there has been an undercurrent of something akin to enmity to the military men. Maybe enmity is too strong a word, but it is exceedingly difficult to understand how some people consider and think of those who are working so unselfishly and valiantly for the cause of our Freedom. We therefore hope that this feeling will soon pass away forever.

Mr. Chas. Pletsch and Otto Lantz left Ayton on Tuesday to secure positions in Detroit.

Half a century ago last Friday, April 5th, Mr. Charles Jasper, a young Carrick farmer, was married to Miss Mary Knight of Brant, the marriage ceremony being conducted by Rev. Mr. Wilmot, at the home of the bride's parents. The young couple immediately took up residence on the farm which Mr. Jasper had purchased from the Government, being lot 15, concession 12, Carrick, and set to work to clear the land and make a comfortable home for themselves. That Mr. Jasper made a wise selection of a home is shown to-day by the fact that there are few better farms in Western Ontario. Here they worked together for thirty-four years, two children being born to them; Mary, now Mrs. Chas. J. Dickison, and Thos. H. Jasper, who now resides on the old homestead. Sixteen years ago they retired from the farm, most of which time they spent in Mildmay, where they still reside. Their many relatives felt that they could not let this occasion pass without without a fitting celebration of the event, and accordingly a golden wedding was arranged to be held at the home of Mr. and Mrs. Thos. H. Jasper last Friday, and invitations were sent to the relatives. The response was practically unanimous, there being present, besides their own two children, sixteen grandchildren and three great grandchildren, together with relatives from Hamilton, London, Chesley, Elmwood, Hanover, Ripley, Teeswater, and Clifford. Mr. and Mrs. Jasper were taken completely by surprise, and it is unnecessary to say, were overwhelmed with delight by the presence of so many old friends. Mrs Fred Seiton of Hanover, who was their bridesmaid, was present, but the best man, Mr. Harry Knight of the Soo, was unable to come. The aged couple were presented with a well-filled purse of gold and many other valuable presents. Beautiful floral gifts were also tendered. It was indeed a happy gathering and Mr. and Mrs. Jasper were showered with congratulations and good wishes. After a splendid dinner had been served, the guests were entertained with various amusements, and music by the Aristocracy orchestra. Mr. Jasper, who is 83 years of age, is enjoying excellent health and is the only surviving purchaser of land from the Crown in Carrick. His sister, Mrs. Thos. Traynor of Brant, was the first white woman to settle in the Township of Brant.

A PLEA FOR NEWS

If anyone has—
Died,
Eloped,
Married,
Left town,
Embezzled,
Had a fire,
Sold a farm,
Had a baby,
Been arrested,
Come to town,
Bought a home,
Committed murder,
Fallen from an aeroplane,
—That's news—Telephone us.
Telescope Phone, No. 48.

PINKERTON

Ptes. Gordon Garland and Edgar Campbell have been home during the past week recruiting for the 160th Battalion.

We understand that Messrs. Wm. Bell and Jack Wilson have enlisted in the 160th Battalion. Our best wishes go with the boys.

Mr. Wm. Garland spent Sunday in Kincardine Twp.

We are pleased to see Mr. Richard Donnelly around again.

Messrs. Wm. Desmond and Frank Henmore had wood-bees last week.

Miss Sylvia Reid left last week for Harriston where she has secured employment.

Senator Donnelly spent Sunday at his home here.

Mr. Godfrey McKee spent Saturday and Sunday at his home in Southampton.

Mr. Herb Fiddis, who went to Toronto last week for the purpose of enlisting, has been rejected. This is Herb's second attempt at enlistment.

MAPLE HILL

The power house has been closed down for a few days on account of a wash out in the race.

Mr. David Coates of Prospect Hill purchased a steam engine from Herrgott Bros. of Mildmay and took it to the bush, hitched it to a circular saw and cut twenty seven cords of wood in four hours. Not bad for a start.

We regret very much that the names of our white haired boys did not appear in our honor roll last week. They are Adam Brocklebank, and Roy Hyslop now in France and Gordon Smith. This brings the number up to eighteen. There is still room in the 160th for a few more. Fall in, boys!

Pte. Stewart Pinkney and Pte. Jim Scott of the 160th spent Sunday at the former's home here.

Mrs. Brcham of Durham spent Sunday at the home of Mrs. J. Goode.

News About Town

Stay at home more evenings,
Help your wife house clean.
Attend church more regularly.
Supply newsy items to the Telescope.

A bit of vim was put into the recruiting game at Tiverton last week when the bells began to ring, as per arrangements from headquarters at Walkerton. The boys, armed with shot-guns, paraded the streets, and volley after volley was fired. Some of the farmers who had not heard of the arrangements left their woods and headed for the house to ascertain by telephone if the Germans had really reached Tiverton.

A little boy had got into the habit of saying "Darn," of which his mother naturally did not approve. "Dear," she said to the little boy, "here is ten cents; it is yours if you will promise me not to say Darn again." "All right, mother," he said, as he took the money, "I promise." As he lovingly fingered the money a hopeful look came into his eyes, and he said: "Say, mother, I know a word that's worth fifty cents."

The attention of the public is called to an order-in-council by the Dominion government prohibiting smoking in all public buildings under penalty of a fine of $50.00. Attention is being called by the press throughout Canada to this regulation. A strict observation of this order has been given to all caretakers and occupants of public buildings who are required to see that the prohibition of smoking is imposed. The press are also requested to give the above notice and warning to the public as well as the public notices posted in all such buildings.

+ + +

Greenock Farmer's Excuse

A Greenock correspondent writes:—Two recruiting sergeants have been canvassing in this vicinity for the past week and relate some amusing incidents which occurred during the personal canvass of the young men. One young fellow is reported to have said, "I know we were at war but who's fighting?" Another when asked to join replied "I'm going to be married." When the soldiers insisted that he was joking, he showed them the license adding the information that he had intended to be married a fortnight since, but owing to delay in the preparation of the bride-elects dress, the ceremony had to be postponed. Such bravery and self-sacrifice humbled his Majesty's men who silently departed. As they went to the high road each told his fellow that although a soldier's sacrifice was great it was as nothing when compared with the gallantry and self-denying sacrifice of this young farmer.

Housekeepers
ATTENTION!

Spring is coming on fast, and your thoughts naturally turn to house cleaning. We have just received in stock the most complete assortment of House Furnishings ever shown in Walkerton.

New Floor Rugs and Squares, Union Wool, Tapestry, Brussels, Wilton, Velvet and Axminster. Small Rugs for Bedrooms at $5.00, $6.00, $8.00 $10.00 and $12.00.

Squares in all the most useful sizes and various qualities, handsome rich designs at $15.00, $18.00, $20.00, $22.00, $25.00 to $40.00.

New Curtain Muslins at 10c, 12½c, 15c, 20c and 25c.

Curtain Scrims and Madras at 20c, 25c, 35c, 40c and 50c.

Small Rugs and Mats at 50c to $3.00 each.

Furniture Coverings, Cretonnes, Art Sateens at 15c, 20c, 25c per yard.

See our splendid showing of Oil Cloths and Linoleums, all widths and prices.

Beautiful display of Lace and Scrim Curtains, White, Ivory, Ecru and Arab shades from 50c to $8.00 pair.

All of these lines will be scarce and higher in price later on so it behooves the thrifty housewife to make her selection early, before stocks are broken. A peep through this department will convince you that our values are right.

McBURNEY & CO.

REMEMBER LITTLE THINGS

Are the horses in trim for Spring's work?

Make the cows keep you—that is their job.

A bolt now will save a trip to town in the rush season.

This is a good time to look over and repair all machinery, harness and fences.

A wide-tired, low-wheel truck is one of the most effective labor-savers on the farm.

We will never have good roads as long as narrow tired waggons cut the roads up into ruts.

The cost of supplying running water to the home is more than met by the comfort it brings.

A small hand forge is often very handy on the farm. In many cases it will pay for itself the first year.

A good supply of bolts, screws and nuts will save a great many hours of hard labour later on in the season.

The farmer who doesn't test his grain this spring will be using his land as a germination box next summer.

Is anybody you know going to make the old mistake of buying poor seed this year because it does not cost so much?

If some of your cows waste good feed because they are not possessed of ability to make milk economically, find it out.

Harrows, disks and cultivators should all be looked over carefully. Dull harrows are very inefficient tools to use.

It is well to remember, when digging post holes in dry soil, that a pailful of water in the hole helps immensely in the digging.

Spring Medicines

MANY Medicines are more or less overrated in their advertisements but we believe you will find such reliable preparation as Penslar Laxative Blood Alterative and Nyal's Spring Tonic to do what they say. Both are purely vegetable system tonics and give the body a regular house cleaning.

G. T. Rourke, the Quality Tailor and Men's Outfitter

Satisfy the Practical and Critical Eye

The secret of our success lies in our Clothes, the way we make them up.

The unseen structure of a Suit—the hair cloth and canvas, thread and sewing is the hidden quality. Every busi[illegible] man knows that the stability of his [illegible] is measured by his re-orders. [illegible]ustomers come back and express [illegible] well satisfied with our work. [illegible] in the best trimmings, and the [illegible]orkmanship that can be put into clothes.

Our New spring Suitings, Overcoatings and Trouserings. Blacks, Blues, Greys, in Serges, Worsteds, Lamas, Vicunas, are here, and we invite you to come and look them over, you will see the latest styles and newest patterns to select from. Our past reputation as Tailors will speak for [illegible], give us your suit to make and we will do the rest. For Style and Fit we cannot be beat.

Our Special Ladies Suit Department

Ladies if you want a nice fitting Suit and latest style at a reasonable price, the new samples are here for Spring, come in and look them over and make your selection.

Men's Furnishings—New York Styles

Men's New Spring Hats, Ties, Shirts, Collars, Gloves, &c. are here.

Kraemer, A. W., Riversdale, age 18, born in Greenock Tp.

✚

Lapunt, William, Greenock, age 45, born in Brant Tp.

RARE OLD DOCUMENTS

Crown Attorney Thos. Dixon has some interesting old documents in his vault at the Court House. A Sheriff's deed, issued away back in 1819, nearly a hundred years ago, is now yellow with old age and hard to decipher. It was issued by Sheriff Titus J. Symon of the Gore District and gives the title to a lot in the townsite of Coot's Paradise. In spite of its highfaluting name, Coot's Paradise appears never to have become a metropolis but is now a suburb of the city of Hamilton in the direction of Dundas. Another aged document is the title-deed of the Dixon homestead in Halton County bearing a date almost as old. An interesting old parchment is the record of a grant of two hundred acres of land made by the government of Upper Canada to Maria Smyth, the daughter of a U. E. Loyalist in the township of Dawn, now in Lambton County. It was issued during the reign of William the Fourth, under the Provincial Governorship of Sir John Colburne K. C. B. and is signed by Robert S. Jameson, Attorney General, D. Mutton, Auditor General, and D. Cameron, Registrar.

NOTICE TO THE PUBLIC

Announcement of the Leading Garage and Repair Shop, Walkerton.

Having opened up my garage for the auto season, I wish to announce to the public that I will keep on hand gasoline, motor oil and grease, spark plugs, etc. Having engaged an experienced man, we will be prepared for all makes and models of cars. All work will receive prompt attention. We will also carry on our small repair work as before. Auto livery in connection, prices moderate. Give us a trial. Thanking one and all for past favours and hoping for continuation of the same. Yours Truly,

W. M. Whyte,
Walkerton. Ont.

LATEST WAR NEWS

Pres. Wilson Threatens To Sever Diplomatic Relations With Germany.

(G. N. W. Despatch.)

London, April 10th. — French war office reports spirited bombardment of positions south of Haudremont Wood, east of Meuse last night. Heavy rainstorms hindered operations of infantry. Saloniki despatch says, apparently fearing an advance of the Allies German forces yesterday crossed the Greek frontier at Doiran and destroyed railway culverts.

Another Salonika despatch reports arrival of first detachment of Serbian troops from Corfu. Entire Serbian forces now completely recovered and newly equipped. Lisbon despatch says destruction of naval arsenal by fire, heavy loss to Country, was probably incendiary act.

Washington:—President Wilson has sent a note to Germany warning her that unless attacks on Merchantmen carrying Americans are stopped diplomatic relations will be severed.

THE SOLDIERS AID

Tea Room Will Be Closed After Next Wednesday After Successful Season.

The committee of the Soldiers' Aid Tea Room wish to announce that Wednesday April 26th will be the last day the Tea Room will be open. There are a number of plates and jars that have been left at the Tea Room and the committee would like the owners to claim them. They take this opportunity of thanking the many people in and around town for the great assistance they have given them in many ways. The committee feel very proud of the success they have made of the Tea Room and give the credit to the many friends who so generously gave donations and assisted on Wednesdays. The services of the members of the committee and others who helped in any way were given free of charge and no salaries of any kind were paid. Every cent made went to aid either the well soldiers by means of socks and other comforts through the I. O. D. E. or the sick soldiers through the Red Cross. The receipts for this year will be announced after the close of the Tea Room.

The special salesmen for the House of Hobberlin, Canada's biggest men's tailoring establishment, will be here on April 27th Stephen Bros.

Miss Olive Giesler left on Friday for the Gravenhurst Sanitarium. She was accompanied on the trip by her brother-in-law, Mr. A. Tschirhardt.

Mr. John Marsh, student Presbyterian Minister at Mildmay, offered his services to the 160th Batt., but was reject by the Medical Examiners.

The bulkhead in Truax's mill race broke under the heavy weight of water on Friday, necessitating the shutting down of the mill for several days.

Mrs. Wm Sutton (nee Dolly Harrison) and her three children, Ruth, Eva and Harrison, of Albany, N. Y., are visiting Mrs. Sutton's sister, Mrs. John H. Appel.

Street Inspector Smith has had a gang of men cleaning up the Front Street the last few days. The winter's accumulation is being teamed to the North Ward and used for road filling.

You hear it said that the ads. in some town papers are never changed. That does not apply to the Walkerton merchant's weekly announcements in the Telescope. It is to your interest to follow them closely every week.

In sending money to pay your subscription don't forget that The Telescope now is $1.50 per annum. If we receive a dollar we give you credit for only eight months. The new price went into effect at the end of January last.

Rev. L. Pletsch left on Monday to attend the Evangelistic Conference at Pembroke, Ont. Through the generosity of a wealthy resident, the members of the Conference will be conveyed from Toronto to Pembroke in a special car.

Lionel, the little three year son of Mr. and Mrs. R. J. Hepburn, had a nasty fall down the stairs on Friday evening. At first it was thought that some of the ligaments of of his ankle were torn but it proved fortunately, not to be so serious.

Mr. and Mrs. R. J. Hepburn and their two little sons are leaving to day on a visit to their former home at Montreal. Before returning to Walkerton Mrs. Hepburn will spend a couple of weeks with members of her family at Montreal. Mr. Hepburn will return to Walkerton the first of the week.

Special 160th Edition

SO DEEPLY are the people throughout the length and breadth of Bruce showing their interest in the Special 160th Batt. Edition of the Telescope which is being prepared by the Walkerton Daughters of the Empire, that the Committee has already ordered 3,000 copies: Even then the demand may shortly exceed the supply so that the wise ones will place their orders for copies with the Committee early. Orders for 100, 50, and 25 copies are coming from single individuals and the demand is certainly most gratifying to the Ladies. The Telescope can promise that the Special Edition is going to be a "dandy". We can say this without any modest blushes for the simple reason that we have nothing whatever to do with either the editing or management of the Special Edition. All the work is in the hands of the ladies. And it could not be in more capable hands. The women are well organized. Editorial, Advertising and Circulation Committee, each has its own particular work to attend to and they are attending to it in a way which a committee of men might find hard to emulate. With the energy and enthusiasm which they have put into the enterprise from the start, failure has been impossible, and success will no doubt be abundant.

The Special Edition will, it is planned, be ready for distribution on Friday evening, April 28th. It will have eight pages, printed on fine heavy paper, and will be illustrated with a number of cuts having to do mostly with the 160th Bruce Battalion. The Special Edition will not go to regular subscribers of the Telescope. All who wish copies, must order them from the members of the Circulating Committee, of which Miss Elizabeth Truax is convenor.

The ladies who are at the heads of the various departments of the Special Edition are:—Editor, Miss McGregor; Associate Editor, Mrs. Sieveright; Convenor Advertising Committee, Mrs. Skelton; Circulation, Miss Truax; Woman's Page, Mrs. Dixon; Military Department, Mrs. Wisser; Locals, Miss Mary Ross: Household Page, Miss Benton.

Miss Charlotte Weinert who graduated from the Walkerton High School last year and has been attending Stratford Normal, was operated on in the General Hospital in that city on Sunday last for appendicitis. At last reports she is recovering.

Pte. W. Symon of the 160th was taken to the County Hospital in a run-down condition. Pte Symon, who was a former member of the Branch of Commerce staff, had an attack of measles and grippe recently from which he did not properly recover.

Mr. D. McKerracher was in Toronto the end of last week attending the annual meeting of the Universal Tool Steel Co., which was held in Sir Donald Mann's office, Toronto Street. He informs us the business of the Company is in a very satisfactory condition with good plans for the future.

The report that the daily papers are again about to advance their subscription rate does not come as a surprise as it is known that for some time the figure realized is not sufficient to cover the cost of white paper and the advertising department has been compelled to make up the deficiency.

Mr. J. H. Ranesbottom was in Toronto on business for a few days last week. On Friday he attended the funeral of Mr. Thos. Donaghy at Mount Forest as representative of the officials of the Sun Life Insurance Co. Mr. Donaghy was an old insurance man, well and favorably known in Walkerton.

The "K. K. Klub" composed of Misses Florence Bradley, Jessie Balleigh, Isla Stewart, Jean Hendry, Bernice Smith, Gladys McCallum and Jennette McKee of Teeswater have sent to Judge Klein ten dollars to be used in aid of the 160th Regimental Band. This money is the proceeds of a sale and luncheon which this club of seven girls gave.

✚ ✚ ✚

Private Sale

Of parlor furniture, Happy Thought range, three burner oil stove, washing machine, white enamel-lined refrigerator, kitchen table, bed couch, electric fixtures, brown reed baby carriage, glass fruit jars, etc. at Mrs. J. S. Reed's—Mr. Thos. Young's residence.

IN JUSTICE TO YOURSELF!

THE MERCHANTS of Walkerton have something worth while to say to the readers of the Telescope every week. Housewives who give careful attention to the storekeepers' weekly announcements will save the subscription price of the Telescope many times over. In justice to yourself, WATCH THE ADS.

The following residents of Carrick, in addition to those whose names have been already published, have taken out naturalization papers with Mr. Thos. Dixon, Clerk of Peace:—Henry Rahn, Ludwig Rahn, Henry Ruiz, Wm. Cupperschmidt, John Faubel, Wm. Rehkopf, John Koester, Anne Elizabeth Nolahe, Fred Weiler, George Weber, Jos. Bergman. All of these have been residents of Canada since July 1, 1897 or before.

✚ ✚ ✚

This Week

Cracked eggs for Sale. Walkerton Egg and Dairy Co.

✚ ✚ ✚

Bowling Meeting

The annual meeting of the Walkerton Lawn Bowling Club will be held at the Town Hall on Friday evening at 7.30 o'clock.

✚ ✚ ✚

1200 Strong

The strength of the 160th Batt. is now over the twelve hundred mark. One hundred and fifty more men are still needed to complete the number for a Base Company and to make up for further rejections.

✚ ✚ ✚

1,000 Cars A Day

Mr. J. E. McGregor is Walkerton agent for the popular Overland Car, which is being turned out of the factory at the rate of one thousand cars a day to meet the big demand this season. See ad. on page 5.

✚ ✚ ✚

Four Sons in Khaki

Chief Ferguson has had word from his eldest son "Bill," that he has enlisted with the 153rd Batt. at Palmerston. Bill threw up a good job as policeman at Syracuse, N. Y. to enlist with the 160th, but on his way home heard at Palmerston that the ranks of the 160th were filled and decided to enlist there. This makes four sons of the Chief who have now signed up.

✚ ✚ ✚

Power Co. Engage Supt

The Saugeen Electric Light and Power Co. has engaged Mr. R. Stafford of Listowel to take charge of its system of power plants. Mr. Stafford has been in charge of the Listowel Power Dept. for several years and has made quite a reputation for himself as a successful superintendent. Mr. Stafford will live in Walkerton and is at present looking for a suitable house.

✚ ✚ ✚

Hurt By A Fall

The many friends in town of Mr. Arthur Lee, an old Walkerton boy, now a merchant at Tara, will regret to learn that he is in a serious condition as the result of a fall on an icy sidewalk. The mishap occurred about a month ago. It was thought at the time he was not seriously hurt but internal hemorrhage has developed the past few days and his condition is now causing anxiety. Mr. Richard Lee went to Tara to see his brother on Saturday and again on Monday night.

News About Town

REMINISCENCES OF DUNKELD

(By A Western Re

I came to the neighborhood of Dunkeld in '81 and left in '87. J. E. Eckford's brick house had just been built and was considered the last word in houses. Geo. Routledge next, then the Walton place which Tom Chisholm had recently bought. Mrs. Stephens and Abe Crampsie lived in the two houses there and Mat Parker by the river. Across the road were old man Chisholm, Angus Murray and old Mr. Crawford. George Pletsch and his brother August worked with J. C. Eckford while I was there. Little Bill Garland went to Montana and Bill Routledge to Manitoba in '86 I think, and Harry Routledge followed Bill in '87. The cheese factory at Dunkeld was run by a Miss Atchison and two Smith girls. They lived in an old log house on the Fleming May farm. John Kerr and his two sisters lived across the gravel road from Peter Clark. Peter knew how to make the best hard cider I ever tasted. When the Riel rebellion broke out, there was great excitement towards the end. The Bruce Battalion was called out. The only local boy [illegible] member who took train for Southampton, was Ratie Parker. The Captain came from Paisley. His name was Hogg. Some unfriendly critic said he was a hog in everything except the bristles. Anyhow he didn't like going West and hired a substitute for $100. The Bruce boys only got to Southampton when a telegram was received stating that it was all over and they were not needed. How many round Dunkeld now remember those days?

BACK FROM THE WEST

Bob Irwin Says Crop Conditions Are Backward—Crowds Enlisting

Mr. Robt. Irwin, of the firm of Irwin Bros. horsedealers, arrived home from a business trip to the West which took him as far as Regina, Moose Jaw and Saskatoon. Mr. Irwin says that seeding operations in the portion of country through which he passed are late this year. Owing to the number of recruits that are leaving the country, the farmers are despairing of handling a big crop this year and are turning a good deal of their land into summer fallow. In the cities conditions have improved considerably of late owing to recruiting and the assembling of large bodies of troops at the various centres. Every little hamlet has its company of men. The recruits are pouring in. At Saskatoon lately, no less than 450 men enlisted in one day.

DEATH OF P. MILLER

An Old Resident of the Kinloss Neighborhood

Death relieved of his sufferings, Peter Miller, an old and respected resident of this section, at his home, McGivern St., on Friday. He had been suffering from cancer in the face. Mr. Miller, who was in his 85th year, was born in Halton County, near Georgetown, but spent most of his years on a farm near Kinloss. Three years ago he retired to Walkerton. A man of quiet disposition, he was admired and liked for his kindheartedness and good neighborly qualities. Besides his widow, four sons and four daughters survive:—Mrs. Thompson of Holyrood; William of Stratford; Herbert of Grimsby; George of Toronto; Mrs. Guest and Mrs. Gleason of Kinloss; Mrs. Palen of Toronto; John of Walkerton. William Yeates of Walkerton and Robt. Yeates of St. Marys are step-sons. The funeral which was held on Monday to Greenock cemetery was largely attended by old neighbors and friends as well as townsfolk. Owing to the illness of Rev. Mr. Rock, Rev. D. A. Walker conducted the service. A large number of brethren of Kinloss Lodge, C. O. F. met the body at the cemetery. The following friends acted as pall-bearers:—J. M. White, Wm. Trotter, Ed. McIntee, Thos. Cunningham, P. Ritchie, Alex. George.

Early Closing

Dr. Halladay's dental office will be closed Saturday afternoons for the summer months beginning first Saturday in May as in former years.

SUNDAY AT HOME

PERSEVERANCE.

He who would endless glory reap
Must here the word of patience keep;
That word which gives, the eye to see
The glorious harvest yet to be.
The husbandman, his seed who sows
Must wait with patience while it grows;
And he who would the oak uprear
Must cherish hope from year to year

The architect who lays the while
The basement of a lofty pile,
By slow laborious toil alone
Can reach the turret's topmost stone

Meek pilgrim Zionward! If thou
Hast put thy hand unto the plow,
O look not back, nor droop dismay'd
At thought of victory delay'd.
Doubt not that thou, in season due
Shalt own His gracious promise true,
And thou shalt share their glorious lot
Whom doing well hath wearied not.
—Bernard Barton.

THROUGH ALL THE AGES.

Through all the ages men have regarded themselves as being born only that they might die. That has always been the great melancholy plaint of life; that has been the distress which has always lain on the soul, even in its moments of happiness. This being so, is there not something great and stirring in the fact that Jesus takes up this word of death and turns it into an utterance of victory? Jesus takes the dirge and turns it into a pæan; makes it the very assertion of the glory of his existence on earth. "I was born," we hear him say, "for a great, a noble, and a splendid purpose that I might through death destroy him who hath the power of death—that is, the devil."

There is something noble in the way in which Christ thus takes these words, "We are born to die," so full of distress and pain on our lips, and turns them into the psalms that ring through the ages and glorify the world; in the way in which he takes the very tears and lamentations of our human life, and shows how at the very heart of them are victory and joy.—Phillips Brooke.

PRAYER.

It is difficult, says Richard Baxter, to distinguish between natural and supernatural grace; but it was to be done, for "Ye must be born again." It is as natural for a man to pray as it is to breathe, but the supernatural gift of prayer is rare, it belongs to the regenerate, it is the atmosphere in which it lives. It is a distinct personal gift, and is never given in the bulk, but to each individual. It contains the elements of companionship, mutual ownership, and communion.

It is not a seed or germ, it is a completed whole (holy), and as Adam never was an infant, so this breathing personality is like the second Adam, the Lord from Heaven, not a fragment, but a whole being. First it is conscious of emptiness, then of fulness. "I was brought low, and He helped me."

The fulness of the Godhead dwelt in Christ bodily, and all that fulness is for the believer, for He gave Himself altogether for us. I live, not I, but Christ liveth in me, it is my joy to walk before the Lord in the light of the living. He is my companion in the path of life, we walk together, because we are reconciled, and He is not austere. Do I tell Him all, get help in all. Give Him all and let not the shadow of an imagination come between us? "Shall I hide from Abraham the thing that I do?" The secret of the Lord is with them that fear Him.

When a well-tuned harp is touched by the hand of the skillful, there is music in the heart, and joy on the face, and beauty in the life, and a great reward in heaven. "I love the Lord because He hath heard the voice of my supplication."

"Walk about Zion, mark ye well her bulwarks." Has she ever been captured, is there any chance that she shall be destroyed? I the Lord do keep her day and night! When eyes are anointed with eye salve the chosen see, the want and the supply are in close proximity. We do not wait for months of harvest, but we reap and gather into barns. The river of God is full of water. His trees are full of sap. His hand is never empty. His people never see a poor day.

The doctrine of prayer is full of mystery, only a small part is revealed. The secret of the Lord is with them that fear Him, and He will show them His covenant, but they cannot show much of that very covenant, they often sail under sealed orders, and it is His delight to hide Himself. The experiences of the saints are like some money orders, not transferable. No two souls are alike, and no two experiences are alike. Some hearts are opened gently in the dark—others are blinded by the light above the brightness of the sun. Now He comes as the dew, at other times on the wings of the storm.

A praying soul learns to stand still and see the salvation of God, learns to be silent before God. In the house of the tempest the voice is heard, "Peace, be still."

"Spirit of light Thou heavenly ray,
O come!
Thou touchest with Thy glory all we see
Till common things are quick with mystery,
And nothing is too mean to be divine.

Good is in all; eyes touched with love can see
More than was dreamed of in the world before,
The undiscovered goodness of our life,
The unpetitioned blessings of our day."
H. T. Miller.

To Ways to Put It.

This is how Johnny wrote his composition in the public school class:

"The cow is a good animal. She has two horns and two eyes and gives milk, which is good to drink. She has four legs and eats grass and hay. Some of them are red, and they have long tails."

And this is how the teacher says he ought to have written it:

"The female of the bovine genus is a beneficent mammal. This ruminant quadruped is possessed of corneous protuberances projecting from the occiput. Her vision is binocular and she yields an edible and nutritious lacteal exudation. She is a quadrupedal and herbivorous, assimilating her food in both the succulent and exsiccated states. Some of them chromatically correspond to the seventh color of the spectrum, and they are endowed with caudal appendages of exaggerated longitudinality."

She—You are, Mr. Jones, I thought you much older than you are. He—Oh, no; not a bit, I assure you.—Boston Transcript.

'TWIXT LOVE AND PRIDE

"You have been sitting here precisely fifty minutes," said her companion in a slightly grieved tone. "It is not a pleasant thing to be told by any one that they are heartily sick of your society after a trial of only one short half hour and twenty minutes. I am sorry you have found the time so tedious, but I suppose Mr. Blount was unaccountably detained. Can I do anything for you? Order your horse, or—"

"The master is just coming across the lawn now, 'M,'" interrupted the polite Mason, the gray-haired servitor at Blount Grange, putting his head round the door at this juncture. "Thought I'd let you know, 'm, after you'd waited so long."

"Very good; I will come and meet him," Mabel said, hastily, anxious to avoid any greeting that might lead to the usual "naming of names" before this questioning stranger. "Please go and let Mr. Blount know that I am here."

After which she gathered up her riding-skirts once more, took her dog in her arms, and her whip in her hand and, finally turning, made a haughty little bow to the tall young man in gray.

"Good morning," she said, coldly, albeit gracefully.

"Good morning, Miss—Manvers," he returned, with an equally punctilious inclination of the head, and a covert smile that was half satirical and wholly amused, while he followed her to the door, opened it, and bestowed upon her there another bow that must have somewhat resembled the ancient dignified salutation with which the "magnificent" Louis was in the habit of dismissing his attendant courtiers.

"Now what was he smiling at, I wonder, in such a hatefully sarcastic sort of way?" pondered Mabel, slowly, as she went down the stairs toward the open hall door to greet the master of the Grange. "Oh, if by any possibility he should be personally acquainted with those Manvers, what in the world will he not think of me? How stupid that this idea should never have occurred to me before. But, no, it is impossible; I believe that under such circumstances it would not be in human nature to resist betraying the knowledge and enjoying the adversary's confusion for the moment, no matter how consoling and lenient one might prove the next instant. How curious he was! How determined to make me repeat my answers! I don't remember ever before meeting so unpleasant and altogether detestable a young man, and hope I never shall again. Catch me mixing myself up with any fellow's rambling debts from this day forth, once I get out of this dilemma, which has been considerably more troublesome than I ever bargained for, and rather more than Eddie himself is worth. How oddly he stared at me—so rude of him—and what a very handsome moustache he has!"

But here she came up with Dick Blount, and therefore it must forever remain a mystery as to whether it was Eddie's or the stranger's moustache she considered so worthy of commendation. Still, as Edward Trevanion's hirsute ornaments consisted at this time of about twenty-two low-spirited and wandering hairs, situated in the region of his upper lip, it was hardly probable that it could have been his.

"Ah, how d'ye do, Mr. Blount!" Mabel said, with a sudden sense of relief and protection, as she held out her hand to the fresh, handsome gentleman advancing so rapidly to meet her.

Dick Blount, or "old Dick," as he was more commonly called by his friends and acquaintances—whose name was legion—was a man somewhat in the "fifties," tall, strong, athletic, and the master of an income close upon six or eight thousand a year. The Grange was one of the loveliest estates in the county situated about two miles or so from King's Abbott, and why the owner of it had never taken to himself a wife was a question often asked in Clifton, but never satisfactorily answered. No woman's name had ever been connected with his—in the matrimonial line at least—since, on his uncle's death, he had come to take possession of the property. How and where he had lived previously was little known to anyone, beyond the certainty that he had spent much of his time abroad, wandering in a desultory pleasure-seeking fashion from city to city, with probably no ulterior reasons, except those of enjoying the present hour to the uttermost.

Had he ever loved and lost? Or wooed and ridden away unmindful of the tear-stained face that watched with passionate despair his gay defection? Or had he through his young days escaped scatheless from the fire of bright eyes and honeyed voices that must here and there have tempted him during life's journey?

None could say in the quiet little country-side where he had elected to spend his later years. One thing was ever known—that when, a long time after this, the new owner was having some furniture in one of the Grange rooms removed, he found behind a bed, sunk deep within the wall, a small framed picture, its face turned from the light. It proved to be an old painting of a bright, fair, yellow haired girl, small of feature, but exquisitely lovely, who looked out from the canvas with large, mocking eyes that perhaps were just a little too closely set to be, strictly speaking, perfect. Immediately below the portrait was written, in a man's hand, the two words: "Aged eighteen," but whether at that early period of her existence this blue-eyed lady had proved fair and false, or been carried to a clay-cold grave, there remained no clew to determine.

Blount himself made no mention of this hidden picture, either when living or in the act of dying; and certainly anything less like a disappointed lover than he always appeared it would be hard to find. Though seldom induced to go anywhere himself, he was particularly addicted to hospitality of all kinds, given in his own domain, such as bachelors' parties, picnics, morning entertainments of every description and usually two or three balls in the year—which latter were conducted on a magnificent scale, and to which the entire county was invited, and went.

Far and near there was no man more universally beloved and respected by all classes. Young men adored him for his genial kindly advice, always so gently given, and his ready assistance, while every child in the neighborhood had reason to remember the good nature of old Dick Blount.

"Dear me, Miss Mabel," he said, "how am I ever to gain your pardon for keeping you such a time in durance vile? The fact is, I never heard a word about your being here until two minutes ago, when Mason came out in a frenzy of excitement to tell me you had been waiting at least an hour."

"Scarcely so long as that, I think; but"—with her eyes bent on Roski's dusky head—"Mr. Blount, I want to speak to you in private, please, for a minute or so."

"So you shall. Come in here," said Dick Blount, and he led the way into his library, the door of which he closed carefully behind her. "Now, what can I do for you?"

"I am going to ask something very dreadful," began Mabel, after a pause, during which she had felt her courage oozing rapidly away—"something that I feel sure no woman should ask; but you must promise not to think too hardly of me for all that."

"I promise you."

"Well, then"—desperately—"I want you to give me three hundred pounds."

Blount laughed.

"Is that all?" he said. "Why, I thought you were about to confess to half a dozen murders at least. Sit down, Miss Mabel, and tell me all that is on your mind."

And Mabel, sitting down, told him all her trouble—all about Eddie's evil behavior, and her father's ignorance of it, together with his inability to pay so much ready money just then, and her own determination to come over to him, as the only person she could think of likely to help her in her calamity. When she had finished, she looked up at him wistfully out of her beautiful hazel eyes.

"I know I have done a very wrong thing," she said, with quivering lips—"a hateful, unfeminine thing that will make you despise me forever. But what could I do? You were the only one I could think of to help me, and so I came."

"I consider you have done me a very great honor," answered old Dick, promptly, "and I feel proud and glad of it. To whom indeed should you come, if not to your oldest friend? I'll tell you what, Miss Mabel—I'll write you out the cheque now on the spot, and you can take it at once to your naughty brother with your love, and we will never tell anyone—you and I—one word about it."

Mabel's eyes filled with tears. She stooped suddenly and kissed the kindly large brown hand that lay on the table near her.

"Nonsense, child," said Blount, hastily; "what did you do that for? Why, the money is lying idle at my banker's, not doing the slightest good to anyone, and I am only too pleased to be able to oblige you so easily. And now what shall I get you after your ride and long solitary confinement in the drawing-room?"

"Nothing, thank you—especially as it wasn't solitary confinement by any means," Mabel declared—"quite the contrary. There was a stranger there the entire time, a Mr. Roy, I think his name was. And that is another thing I want to speak to you about. Please do not tell that gentleman who I am, as he might let some of the other officers at Clifton know all about my visit here, and it would certainly come to papa's ears in the long run."

"What did you say his name was?"

"Roy—at least so Mason told me."

"And who told you he was an officer stationed at Clifton?"

"He looked like it," Mabel said, simply. "And, besides, I know all the men at Broughton. Am I not right? Is he not an officer?"

"Quite right," returned Blount; but he seemed strongly inclined to laugh. "And so he spoke to you, I suppose; and you called him Mr. Roy, eh?"

"Just so," answered "the queen." "And it was very wrong of me, you know. But when, in some way or other, he asked me my name, I said it was Manvers, because, the Manverses being your cousins, people would not think about it if Mr. Roy spoke of his meeting me here."

Dick Blount burst into a perfect roar of laughter.

"By Jove," said he, "that is the best thing I have ever heard! I wonder which he thought you were—Jane or Martha? He must have considered you grown young and wonderfully pretty since last he had the pleasure of seeing you, some fifteen years ago."

"Oh, Mr. Blount, you don't mean to say he knows the Manverses?" cried Mabel, in real distress, her cheeks the color of two soft summer roses.

"I should rather think so, considering you were speaking to my nephew, Roy Blount, who is also a cousin of the Manverses," said Blount, with another heartless explosion of mirth. "And so you told him you were Jane—eh? His face must have been a picture when he compared poor Jane's light blue orbs with your dark eyes, you young witch!"

"And I have been calling him by his Christian name all this time!" declared Mabel, who was almost comical in her despair. "Oh, Mr. Blount, what on earth shall I do? When is he going away? You know I can never look him in the face again, so do say he will be leaving shortly."

"He isn't dreaming of going," said Blount—"not for a full month at all events—not until his leave expires, and then he goes to Dublin to join his regiment. So, you see, you will have to dance with him at my ball the night after next, Miss Mabel, and be sure you are cousinly in your behavior, whatever happens."

"Dance with him!" exclaimed Mabel, indignantly. "How can you go on like that when you know I can never speak to him again? Why, what must he think of my coming here on private business to you, and telling him such a horrid, horrid lie? Mr. Blount"—imploringly—"will you just explain things a little to him, without betraying Eddie—will you? Oh, if you will only be so kind!"

"Of course I will," said Blount.

"Yes, Miss Mildred, heaven be praised for it!" said the woman, stopping opposite to her with tears standing in her dark blue Irish eyes. "An' if it hadn't been for you, where'd he have been now? 'Twas the good word ye had for him with the squire that got him off, I'm tould; an' if the prayers and blessin's of Kitty Dempsey can do ye good, ye have them. Oh, asthore, 'tis little ye know of the sore heart I had yesterday—an' may the heavens above ever keep ye from knowin'! Patsey"—with a sudden and utter change of tone—"'tis throublin' the lady ye are, ye spalpeen of the world, come down off her lap this minit, I'm tellin' ye!"

"Ah, please, no," interceded Mildred's soft voice as she pressed her arm round the boy to hold him closer. "I like him here very much, and he likes being here, don't you, Patsey?"

"I should rather think he did," soliloquized Denzil, at the open entrance. But the child said nothing; he only glanced up in his protectress' face with roguish, sparkling eyes, and laid his head against her shoulder. He was a remarkably handsome lad of about four years old, very dark and bright-complexioned, indeed almost foreign in his style of beauty.

"Tell me, Miss Mildred," began the woman again, with the respectful freedom peculiar to her countrywomen, "is it thrue what I've been hearin' about ye, that ye're going to be married? Is it thrue, alanna? An' to the young lord that's stayin' at King's Abbott?"

"It may be so," said Miss Trevanion, laughing. "Stranger things have happened before now. But I, for my part, have heard nothing about it."

She paused, blushed a little at the woman's earnest, kindly glance, and then Denzil bethought himself that it was high time he should cease to be a listener to this dialogue. Up to this he had been, almost unconsciously, feasting himself upon the girl's sweet, uncommon beauty; but the latter part of the conversation startled him, and betrayed his position to himself as an eavesdropper. He advanced, placed his gun against the lintel of the door, and held out his hand to Miss Trevanion.

"Good morning," he said. "It seems late in the day for that salutation, does it not; but you know we had not the pleasure of your company at breakfast this morning."

"No. Papa, you see, was not going shooting; and, really, all the rest of you chose to get up at such a ridiculously early hour! Have you had good sport?"

"Pretty fair; the others have done rather better, I fancy. But all the shooting here is capital. I have lost my way a little, I think; at least I have got completely separated from my companions, and just came in to ask permission to light my pipe, which accounts for my being here."

He turned as he mentioned the pipe, and bowed courteously to Mrs. Dempsey, who, courtesying in return, told "his honor" he was very welcome.

"Never fear; I will make it all right for you before Thursday night, Miss Mabel; and, as for him thinking anything bad of you, why, he is the best lad in the world, and is, I'll be bound, at this very moment thinking of nothing but the beauty of a certain young lady who claimed kinship with him a little time ago."

"Thank you," returned Mab, feeling slightly better as she listened to his hearty way of putting things; "thank you again and again, Mr. Blount, for all your goodness to me."

"I have done nothing for you," protested old Dick; "and I shall be seriously angry, Miss Mabel, if you ever mention my 'goodness' to me again."

They were crossing the hall at this time, and presently gained the outer porch, where he put her on her horse and gathered up the reins for her hand.

"Well, good-bye, and take care of yourself; and be sure you look your very loveliest on Thursday evening, or Roy will certainly mistake you for Jane."

"Good-bye," Mabel cried, and laughed in spite of herself at the absurdity of her position, as she rode on beneath the elms once more to the highroad on her way home to King's Abbott.

When she reached it she found the house deserted—the two elder ladies, accompanied by Miss Younge, having gone a distance of five miles to return some visits, while the gentlemen had been shooting since early dawn.

"And Miss Mildred—where is she?"

"Miss Trevanion has just gone down by the copse way, toward Grant's farm to see Kate Dempsey, whose 'Jim' has 'been in trouble,'" Jenkins, the footman, informed her.

And so there was nothing left for Mabel but to wait patiently until such time as any of the members of the household should take it into their heads to return.

CHAPTER VIII.

Mildred was finding her way leisurely along toward Mrs. Dempsey's dwelling-place, enjoying thoroughly the fresh crispness of the wintery air as she went while the distant sound of the sportsmen's guns came now and then with startling distinctness to the ear.

"People say, 'Who'd be a dog?'" she thought to herself, gayly, as she walked along; "but I say, 'Who'd be a bird for at least nine months out of the twelve?' Poor little wretches, how unhappy they must be to-day, how terrified. And yet——" Here she was going to add, "And yet what a capital thing cold grouse is!" when her arrival at Mrs. Dempsey's door checked the unsentimental reflection.

Amongst the slaughterers of the birds on that particular morning was Denzil Younge, who having wandered from his companions in more ambitious search of game, found himself presently opposite a certain cottage door, with no assured knowledge of his whereabouts, and without a light for his pipe.

He decided to enter, and ask the good woman of the house permission to light his pipe at her glowing embers, as well as gain some information respecting his position; so he went up to the door, which he found open, and bowed his head to enter. And this was what he saw—Mildred Trevanion—no longer the unapproachable Mildred of his everyday life, but a being soft smiling, lovable—with a little boy upon her knees, whose bare feet kicked triumphantly amongst the many flounces and fur-belows of her dress.

"And so Jim is safely out of his trouble, Mrs Dempsey," she was saying, a pleased glow of satisfaction on her fair face as she watched the little lad in her arms complacently munching the biscuits she had brought him.

(To be continued.)

TREAT EVERY CHILD'S COLD EXTERNALLY RUB ON "NERVILINE"--A SAFE CURE

A Miracle of Healing Power in Every Bottle.

Little children cannot be expected to romp, day in and day out, without some time coming to grief. Some of their games and rough and tumble, cause undue fatigue, and not infrequently the kiddies are bruised, have strains, swellings and aches just like their elders.

When children come in tired and sore, see they are well rubbed with Nerviline. It does wonders in breaking up a cold, has an amazing effect on any sort of muscular pain.

The wise mother always keeps trusty old Nerviline on hand. It has a wonderful list of uses, and a bottle handy on the bedroom shelf often saves calling in the doctor.

Young and old alike can safely use Nerviline—there's no harm in it—just a heap of curative power when you rub it on.

Whenever there is a pain or sickness, Nerviline should be close by. It is a true specific for rheumatism, lumbago, sciatica or neuralgia.

As for earache, toothache, sore back, sprains or strains, nothing else will cure so fast as good old Nerviline. In use about fifty years—sold by dealers everywhere. The large 50c family size bottle is the most economical; trial size 25c, all dealers, or the Catarrhozone Co., Kingston, Ont.

Sir John Lubbock's Ant.

In the biography of Sir John Lubbock, later Lord Avebury, is an amusing story of the notice accorded to an old pet in the Lubbock family. One of two illustrious queen ants, sovereign of one of the colonies upon which Sir John based his famous studies of the ways of the little creatures, attained the venerable age of fourteen years and then died. Several scientific journals spoke of her decease, and the news penetrated to France, where a distinguished French journalist, in whose mind, insufficiently acquainted with the possibilities of English orthography, ants and aunts were evidently confused, offered profuse condolences to Sir John "on the loss of his aged and valued relative."

Better Than Spanking

Spanking does not cure children of bedwetting. There is a constitutional cause for this trouble. Mrs. M. Summers, Box W. 8, Windsor, Ont., will send free to any mother her successful home treatment, with full instructions. Send no money but write her to-day if your children trouble you in this way. Don't blame the child, the chances are it can't help it. This treatment also cures adults and aged people troubled with urine difficulties by day or night.

SAVED BY POETRY.

Plaintive Plea That Moved Lysander to Spare Athens.

When, B. C. 404, after a heroic struggle, Athens, the "City of the Violet Crown," was captured by Lysander there were not wanting clamorous voices to urge that the city whose lust for empire had brought such woes on Greece ought to be laid level with the ground. The Spartan general at first lent a willing ear to his powerful allies, but while the council was still debating this momentous issue a plaintive voice was heard from the city walls chanting those noble lines from the "Electra" of Euripides, that most human of the poets of Greece, in which the heroine contrasts her fallen lot with the splendid exploits of her father, who had dismantled the towers of Troy.

Lysander bent his head and pondered on Fortune's cruel reverses. "Triumphant as Agamemnon, who could tell but that he might be reserved for a fate as cruel?" The lesson of moderation was accepted. Athens was saved.

Milton has immortalized this dramatic event in one of his best known sonnets:

The repeated air
Of sad Electra's poet had the power
To save the Athenian walls from ruin bare.

Brief Mention.

The negro population of the United States is approximately 12,000,000, the larger part (probably 10,000,000) being in the Southern States.

Middle names were once regarded as illegal in England.

The average adult inhales about one gallon of pure air per minute.

The Lakes of Killarney are thought to have been once the site of a large and populous city.

Hammers were fashioned originally after the outstretched human hand and fist.

Shaving a Pleasure --Not an Operation.

"USIT" the wonderful new skin food and wrinkle chaser, is a boon to men with heavy, wiry beards and tender skins.

A man who has used it for a short time said recently: "Shaving is a pleasure now, I used to consider it almost an operation."

It is only necessary to rub a few drops of Usit into the beard before lathering to enjoy an easy, quick shave.

Usit penetrates into the pores, softens the beard and gives a clean, close shave. The beard peels right off, without pulling a hair.

Usit is kind to tender skin. There is no smarting or soreness after shaving. Gives the face a fine feeling of smoothness and freshness.

"USIT" prevents dryness of the skin caused by exposure of excessive winds.

Accept no substitute.

Send 50c to-day for a trial bottle—sufficient for over six weeks' use.

"USIT" MANUFACTURING COMPY.
475 Roncesvalles Ave., Toronto.

How to Measure an Ounce.

An ounce of granulated sugar equals two level tablespoons.

An ounce of flour, four level tablespoonfuls.

An ounce of butter, two level tablespoonfuls.

An ounce of ground coffee, five level tablespoonfuls.

An ounce of cornstarch, three level tablespoonfuls.

An ounce of thyme, eight level tablespoonfuls.

An ounce of grated chocolate, three level tablespoonfuls.

An ounce of pepper, four level tablespoonfuls.

An ounce of mustard, four level tablespoonfuls.

An ounce of salt, two level tablespoonfuls.—Exchange.

Minard's Liniment Lumberman's Friend.

For a dark neck or collar marks, apply a lotion made of equal quantities of lemon juice, hydrogen peroxide and water.

Professional Pawners.

In many of the mean streets of London there are professional pawners—women well-known to the pawnbrokers, who, for small payments, take clothes and household goods to pawn for their neighbors. It is stated that the function of the professional pawner is two-fold. The woman who pawns through a recognized intermediary gets a larger loan than she would if she did the business herself. For the pawnbroker the professional pawner guarantees the good faith of the owner and will be able to exercise pressure in case of default.—London Express.

Keep Minard's Liniment in the house

Dutch Barges in the Thames.

For more than two centuries there have always been some big, broad-sterned Dutch boats lying in the Thames River, with baggy trousered Dutchmen smoking on board, quite calmly. It is the reminiscence of a Dutch conquest. Those boats have moored there, with their eels for London ever since William III gave them the right of traffic. And if there wasn't a Dutch boat for a single second just below London bridge the ancient rights would be lost. But you will always find the calm Dutchman smoking on his "pitch."—Westminster Gazette.

SPRING REMINDERS OF RHEUMATISM

Raw, Damp Weather Starts the Pains, But the Trouble Lies in the Blood.

Spring weather is bad for rheumatic sufferers. The changes from mild to cold, the raw, damp winds start the aches and twinges, or in the more extreme cases, the tortures of the trouble going. But it must be borne in mind that it is not the weather that causes rheumatism. The trouble is rooted in the blood—the changeable weather merely starts the pains. The only way to reach the trouble and to cure it is through the blood. The poisonous rheumatic acids must be driven out. Liniments and rubbing may give temporary relief, but cannot possibly cure the trouble. The sufferer is only wasting time and money with this kind of treatment and all the time the trouble is becoming more deeply rooted—harder to cure. There is just one speedy cure for rheumatism—Dr. Williams' Pink Pills. They act directly on the impure, acid-tainted blood. They purify and strength it and thus root out the cause of the rheumatism. Here is strong proof of the above statement. Mr. Michael Personage, Fenlon, Man., says: "My mother suffered several years with rheumatism. We tried a number of remedies but they all failed to cure. Then we got Dr. Williams Pink Pills, and after using them for some time she was completely cured and has had no sign of the trouble since."

Sold by all medicine dealers or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

THE WORD OF A GER AN.

Your troth was broken ere the trumpets blew,
In the fight with unclean hands you rode;
Your spurs were sullied and the sword you drew
Bore stain of outrage done to honour's [illegible].
And you have played your game as you began,
Where the white flag raised by shattered ranks,
The cry for mercy, answered man to man—
And the swift [illegible] of [illegible] for thanks.
Since Marne we are [illegible] a little shy,
And then forgets [illegible] with you [illegible]
Our old good-nature [illegible] a chain too high
[illegible] its lip, and means to stand no more.
So now, when you profess with bleating throat,
And tender round your wrongs a piteous tale,
Urging the neutral ones to take a note
That we have passed outside the human pale,
The world the fault will know where lies the blame
If [illegible] lets your pleadings go unheard;
To grace of chivalry you've lost your claim—
We've grown too wise to trust a German's word.
—O. S. in Punch.

CHILDHOOD CONSTIPATION

Mrs. Andrew G. Lund, Hughenden, Alta., writes: "Two of my babies were very much troubled with constipation and I tried several remedies without success. A neighbor advised me to try Baby's Own Tablets and they were so satisfactory that now I would use nothing else." The Tablets never fail to cure constipation and they may be given to the youngest child with perfect safety. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Norway Hotel System.

There is a capital hotel system in vogue in certain parts of Norway. In villages where no hotel exists one of the more prominent inhabitants is subsidized by the Norwegian government and in return is bound to provide accommodation for not fewer than four travellers. He may take in more if he chooses, but four is the minimum. The accommodation and food supplied are excellent and the charges moderate.

SPOHN'S DISTEMPER COMPOUND

INFLUENZA

Catarrhal Fever
Pink Eye, Shipping Fever, Epizootic

And all diseases of the horse affecting his throat speedily cured; colts and horses in same stable kept from having them by using SPOHN'S DISTEMPER COMPOUND, 3 to 6 doses often cure; one bottle guaranteed to cure one case. Safe for brood mares, baby colts, stallions, all ages and conditions. Most skillful scientific compound. Any druggist or delivered by manufacturers.

SPOHN MEDICAL CO., Goshen, Ind.

Immortality.

They are not dead, the soldier and the sailor,
Fallen for Freedom's sake;
They merely sleep with faces that are paler
Until they wake.

They will not weep, the mothers, in the years
The future will decree;
For they have died that the battles and the tears
Should cease to be

They will not die, the victorious and the slain,
Sleeping in foreign soil,
They gave their lives, but to the world is the gain
Of their sad toil.

They are not dead, the soldier and the sailor,
Fallen for Freedom's sake;
They merely sleep with faces that are paler
Until they wake.
—Arthur L. Bourinot.

ISSUE NO. 16, 1916

HELP WANTED.

WANTED—COMPETENT MAID-GENERAL. Family of three. Good wages. State age and experience. Address, P. O. Box [illegible], Hamilton, Ont.

GIRLS WILLING TO WORK ON British Army Orders, knitted underwear. Seamers, slain stitchers and learners. Bright, healthy employment. Good wages. Zimmerman Mfg. Co., Ltd., Aberdeen and Garth streets, Hamilton, Ont.

FOR SALE.

FOR SALE—RUFUS RED BELGIAN Hares and Gray Flemish Giants; fully pedigreed. H. C. Waters, 13 Jackson street west, Hamilton, Ont.

FOR SALE—FANCY PIGEONS AND flying homers; prices reasonable. L. J. Holton, 42 Caroline street south, Hamilton, Ont.

MISCELLANEOUS.

WANTED—GIRLS OF GOOD EDUCATION to train for nurses. Apply, Wellandra Hospital, St. Catharines, Ont.

You can't beat
Old Dutch
for taking rust and stains off knives

Seville Nights.

In all the principal places and gardens of Seville moving picture screens are erected and small tables and chairs set out, the exhibitors either making their profits from the drinks sold or by rental of chairs at 2 cents each. Thousands of people go nightly to the different places and gardens, and the entire life of the city for about four months centres around these moving picture shows.

Making the Insects Speak.

In the biographies of the world there is no passage more human and more humorous than the account by M. Fabre of his first interview with Pasteur, who had never seen a cocoon and was astonished that there was anything in it. He concludes the account thus: "Encouraged by the magnificent example of the cocoons rattling in Pasteur's astonished ears, I have made it my rule to adopt the method of ignorance in my investigations into insects. I read very little. Instead of turning the pages of books, an expensive proceeding quite beyond my means, instead of consulting other people, I persist obstinately in interviewing my subject until I succeed in making him speak."—London Spectator.

Minard's Liniment used by Physicians

An Eye for His Colors.

Haiti appears to breed a spirit of sensitive patriotism unknown in other countries. Some years ago a general in the Haitian army ordered an artificial eye. The maker did his best to execute the order satisfactorily, but the eye was returned from Port au Prince, with a letter complaining that "the eye you forwarded me is of a tint that resembles the Spanish flag. I am far too patriotic to wear any colors but those of my own country." After ascertaining from the ministry of Marine the colors of the Haitian standard a scarlet and green eye was dispatched, and this met with enthusiastic approval.

Minard's Liniment Co., Limited:

I was very sick with Quinsy and thought I would strangle. I used MINARD'S LINIMENT and it cured me at once. I am never without it now.

Yours gratefully,
MRS. C. D. PRINCE.
Nauwigewauk, Oct. 21st.

ANTIQUES

The most celebrated pottery-making sites of antiquity were those of Samos, Athens and Etruria, and in these cases the location of the clay beds was in all probability the location of the pottery. The same conditions were doubtless associated with the vast ceramic products of the Orient. It is not so, however, with the bulk of the material used in our day, and for the last century and a half, in the earthen and china wares which have found useful occupation for millions of workers, and scope for thousands of artists to exercise their skill and ingenuity in producing the almost endless variety of utilitarian and artistic objects resulting from the discoveries of potter's claybeds in England, the southwestern counties yielding the best materials for this purpose known and used the world over. Except for a very few years after the discovery of china clay and china stone—the Kaolin and the Petuntze—in Cornwall, the material found has not been used to any extent in the neighborhood of the mines, but is shipped in large quantities to the pottery-making districts in England—mostly in Staffordshire—the European continent and North America. It may be of interest also to know that this material is used largely in other industries than pottery-making; as a matter of fact, the pottery consumption is less than one half of the output of the mines; paper making, calico making, sizing, picture frame making, linoleum, safety fuse manufacture, etc., taking the heaviest part of the supply.

How often, when discussing the artistic merits of a fine piece of pottery, do we pause to consider in any way the raw material of which the object is composed, the clay itself, a substance it may have taken scores of centuries of time to mature to the condition fitting it for use by the potter.

Mid 18th century times seem to have been prolific in the discovery of potter's clays. That great master potter, Josiah Wedgwood, gave much time and attention to experimenting with different clays when he was seeking the best material for use in the development of the various mixtures he later perfected and turned to such profitable account, including the "black basalt" body, from which many of his now well regarded "antiques" were made.

Hearing of a discovery of potter's clay in South Carolina, Wedgewood despatched a special envoy to investigate, and used some of this clay in his experiments.

Again, in 1789, he produced what may now be regarded as antiques in ceramics, in the form of medallions made from a potter's clay found in Botany Bay, Australia. This clay was sent to Wedgwood by his friend, Sir Joseph Banks, President of the Royal Society, who had accompanied Captain Cook on his first voyage round Australia. Josiah Wedgwood was a Fellow of the Royal Society, and the last paper he contributed to the society was headed "An Analysis of a Mineral Substance from New South Wales."

"The Hope of Sydney Cove" was the name given to the medallion referred to. The figure of Hope standing on a rock, with her emblem—the Anchor—at her feet, was most beautifully rendered. Hope appeals to Peace, Art and Labor, to unite in guiding the destinies of and assisting in the development of the newly-explored land. The Cornucopia—the emblem of Plenty—filled to overflowing with the fruits of the earth, a glimpse of the wild country yet to subdue and till, and the suggestion of the vast surrounding ocean for an appropriate background to a delightfully conceived grouping of figures, emblematic of the natural resources of the new colony.

Ask for Minard's and take no other.

Taking an Impression.

The original point of view of Stephen Tawels, the English painter, is seen in the following fable, which was included in a letter to a friend:

The artist peeped into a window of a room where a retired merchant sat, doing a jigsaw puzzle

"Whose is that strange face?" the merchant asked anxiously.

"I saw no one," his wife said.

"I did, I saw a strange face distinctly"—but before he reached the window the artist was gone.

"Do you think it was a burglar?" his wife said.

"We will see if he has taken anything."

Investigation showed that nothing was missing, but the artist had taken away an impression which he sold to that particular merchant for £100.

THE WONDERS OF THE DEEPER SEA

You could plaster a whole city block with the lines that poets have written about the sea, but what do you really know about it? Cowper tells us rhythmically how God "plants his footsteps in the sea," and Shakespeare talks of ships "scattered in the bottom of the sea."

Now what is this bottom of the sea like, where ships—among them the Titanic—lie scattered? What is it composed of? Not the poet, but the scientist who has made expeditions to the bottom of practically every ocean by means of wonderful instruments—who secured samples of the deposits from the bed of the oceans on various parts of the globe—gives an answer to this question.

The largest percentage of ocean bottom consists of red clay. The next largest material that paves the floor of the deep, deep sea is what scientists term blue mud. There are other varieties of mud and ooze in various seas and in various parts of the same sea. Red clay and blue mud, however, is the answer which the average man may give to the question what the bottom of the ocean consists of.

The wonders of the deep, deep sea are many. Before enumerating even a brief half dozen or so of these sea wonders a few words must be said about the extent of the sea.

About three-fourths of the earth's surface consists of oceans. While the land surface of the globe covers 57,000,000 English square miles, or to be exact, 32,088 feet. This deepest ocean spot is located in the Pacific and is known as Nero Deep. The extreme variation of this deepest spot in the sea to the highest known mountain, Mount Everest in the Himalayas, is over eleven and one-half English miles. The mean depth of the ocean is over 10,000 feet, or nearly two English miles.

WATERS WARRING WITH THE LAND.

With land forming but 29 per cent. of the surface of the globe, the question ought to arise whether the oceans are not going to deluge the earth some day. The answer is that the oceans are carrying on war against the surface constantly. They are undermining our little earth. The poor land surface is being washed away by the waters and the crumbled deposits are carried to the bottom of the ocean. But do not worry about it. The amount of material that the earth pays tribute to the ocean is estimated at only 3.7 cubic miles per year. The ocean then is being filled up at the rate of an inch in about ten years. At that rate it will take the oceans about 53,240,000 years to transport the whole of our solid land down to the sea bottom. And by that time who can tell what will happen? Perhaps the oceans themselves will fall victim to atmospheric changes and the seas will cease to be seas. Incidentally this struggle of the waters to crumble away our land surface and sweep it into the sea makes the much dreaded volcanoes appear our real friends. The volcanic outbursts act as a sort of check on the turbulency of the waters and bring to the surface matter to offset the loss of material to the sea.

Mountains are always picturesque. The Alps in Switzerland, the Rocky Mountains delight men's eyes. The sea, too, has mountains, counting elevations, some of them three and four miles long, or rather deep. But the sea mountains terrify instead of delighting the visitor. It is these mountains, which often reach up close to the surface, but not close enough to be noticed, that have sent armies of men and thousands of ships to a watery grave. The progress of marine science has now resulted in the disclosure of many of these mountains in those parts of the oceans which are traversed by vessels. But there are still numerous sea mountains that no exploring expedition has put on the map. These sea mountains are believed to be all of volcanic origin.

ALL GOES TO THE BOTTOM.

The temperature of the oceans is determined by geographical position. In the oceans near the poles the water is ice cold. At the equator the sea has a temperature of 80 degrees Fahrenheit. The distribution of temperature in the depths of the ocean varies. Except in the regions about the poles the temperature of the ocean water decreases from the surface downward to the bottom.

While the poet sang about "ships scattered in the bottom of the ocean," scientists for a long time shook their heads in doubt. They asserted that under great pressure water becomes much denser and that ships and men when they sink into the sea go down ly a certain distance; they "reach eir level," but do not reach the ottom. The giant ship Titanic, for stance, would, according to this theory, be lying at this time somehere midway between the surface and e bottom of the Atlantic. It seems, wever, that the poet was right er all. Latest scientific researches em to favor the theory that sunken ips and men reach the bottom of the ean.

"The Titanic," says a scientist, "is obably now lying at the bottom in ery little altered condition. Only se parts of the structure would be nt inwards ('imploded') into which er could not enter rapidly enough qualize the pressure on both sides of an iron plate." Anything that sink to the bottom of a tumbler ater, scientists assert, will gradlly sink to the bottom of the pest ocean.

OCEAN A LIVELY PLACE.

The oceans are full of life. They m with existence from top to botm. There is life in the Arctic seas d there is life in the seas about the quator. And the mode of existence, the poet puts it, is the same as ere do on land, the great ones eat up e little ones." The total quantity of ing matter in the ocean, scientists imate, exceeds that on the land surce of the globe. In the ocean, as on nd, animal life depends directly or directly on vegetable life.

The rays of the sun penetrate the ean waters to a depth of nearly a ile. In the superficial layer of water egetable life is ever present. Grass eating sea animals feed on these lants. These animals in turn supply food for the carnivorous animals. The color of some of these sea plants is green. Others have a blue green color, while still others are red. These plants, however, may change color if their fixed position toward the rays of the sun changes. The blue plant may become red and the red plants may become purple, green or yellow. The green color, characteristic of most plants on earth, is found in only a few sea plants.

The sea teems with animals. Marine animals are of two classes, warm blooded and cold blooded. Among the warm blooded animals are whales, porpoises, dolphins, seals and walruses. All of these mammals have originally descended from terrestrial species which have gradually drifted into the sea and adapted themselves to an aquatic mode of life. The sea animals consist of two distinct groups. One group is carried along by the current. Another group can swim against the current. Nature has worked out various ways for protecting the smaller animals from the bigger ones. Thus some of the animals are blue colored and when floating at the surface they are practically invisible from below and are thereby in a measure protected from enemies. Immediately below the surface most animals are transparent and colorless. Others are silvery, with a bluish back. Animals living in the vicinity of a floating object take on the color of the object. On the whole, the variations of color in sea animals is determined by the amount of sunlight penetrating or failing to penetrate the ocean.

LIGHT IN THE DEPTHS.

Even those zones of the sea where the rays of the sun do not penetrate are not without light. There is a sort of a sea light there called phosphorescent light. It is a light emitted by nearly all groups of marine organisms. This light is sometimes due to slimy luminous secretions which cover the entire body of the sea organism, while some of the sea light comes from so-called light organs with which certain sea animals are provided. This class of animals lives at a depth of about 1,500 feet. The size of these light organs decreases with the greater depth.

The abundance or lack of light has much to do with the determination of the size of the eye in sea animals. The decrease in the size of the eye often goes with an increase of depth. Phosphorescent light undoubtedly determines the coloring of the deep sea animals, which are mostly red and brown and devoid of any patches of vivid colors. The animals giving out phosphorescent light, scientists believe, have a tendency to gather in groups and become more or less localized. As a consequence there are a great many stretches in the deep sea that are utterly devoid of light. The animals colonizing in the deep sea, it is thought, have migrated there from the shallow reaches of the ocean, especially from the cold regions. In this way scientists explain the similarity between the animals in the polar seas and the seas in the tropical area.

What is the destiny of the ocean? The waters of the seas will in time, according to scientists, become solid rock. Our earth, they point out, is the only planet in the solar system having oceans on its rocky systems. Mars and the moon, according to all indications, have had bodies of water on their surface, but these have disappeared. The same fate they believe is possibly in store for our oceans. They point out that there was a time in the history of our planet when the crust of the earth was in a molten condition, with a temperature of 400 degrees Fahrenheit, and what is now water of the ocean existed only as water vapor in the atmosphere. "We can imagine, therefore," says an authority, "a future when the waters of the ocean will, because of the low temperature, have become solid rock, and over this will roll an ocean of liquid air about forty feet in depth."

"Labby's" Prank at Eton.

Thorold, in his "Life of Labouchere," tells this story of young "Labby" while he was at Eton:

"While the old chapel was being restored a temporary chapel of wood and iron was put up. The corrugated iron roof made the heat intolerable during the summer months, so Labouchere hit upon a plan to put a stop to the nuisance of 'chapel' in the shanty. One boy was to pretend to faint and four others were to carry him out. A fifth was to follow bearing the hat of the performers.

"The plan worked admirably. The service was brought to a temporary stop, and the boys as soon as they were outside scampered merrily off and procured some agreeable refreshment. The repetition of this comedy of course, roused the suspicion of the masters, but, nevertheless, like many of Labouchere's intrigues in later life it produced eventually the desired effect. There was no more chapel during the hot weather until the restoration of the old chapel was complete.

Simple Enough.

A manufacturer of some patent compound came into the laboratory of an analytical chemist one day with a bottle containing an unwholesome looking mixture.

"I would give £20," he said to know what would make the water and oil in this mixture separate.

The chemist looked at the bottle.

"Very well," he said: "write out your cheque."

"Cheque?" the other echoed.

"Yes, your cheque for £20. You say you are willing to give that, and for that price I am willing to tell you what will make the water and oil separate."

The visitor hesitated a moment and then wrote a cheque for the sum named. The chemist carefully deposited it in his pocketbook, and then quietly dropped into the liquid a pinch of common salt. Instantly the water and oil separated, and whether the client was satisfied or not, he had got what he wanted, and he had paid his own price for it.—London Tit-Bits.

Listens for a Dog's Bark.

There is a man in Paris who has a novel way of eking out the small salary he gets as a bank clerk. At night he strolls through the quiet streets of the suburbs, carefully inspecting the closed villas and houses. Every now and then he imitates a dog's bark, yelping and growling in a realistic manner.

If there is no canine response he continues his walk, repeating his yelps in front of other houses. When an answering bark replies to his he jots down the address of the house in a note book.

The next day a city official calls at these houses reported by the night stroller to collect the probably unpaid dog tax.

Evening Gown In Modish Black

With crisp bouffant drapery over the hip, transparent bell sleeves and high crush girdle, this evening gown is a particularly charming model. The skirt is of dull, black chiffon and the banding of the overskirt and sleeve is of jet.

A Bundle of Household Helps

Sausages can be prevented from bursting by rolling them in flour before frying.

When rinsing children's clothes, add a little alum to the water, as this renders them less liable to catch fire.

To clean decanters, mix half a gill of vinegar with a handful of salt. Put a little in each decanter and shake well. Rinse in clear water.

Habitual numbness of the hands may be removed by rubbing them for a short time in cold water, followed with dry friction.

To clean a watch chain dissolve a little sal ammoniac in wine, and put the soiled gold in it. This thoroughly cleanses the gold and makes it quite bright.

It is difficult sometimes, when using essences for cakes or sweets, etc., to measure correctly the number of drops required. If a finger is dipped in water and the rim of the bottle wetted in one place, the essence will be found to drop quite easily.

Cover the patient over while airing the sick-room. Let down the window at the top, swing door rapidly but quickly for a few minutes backwards and forwards. This will quickly pump the bad air out and draw in the fresh air from the window.

An egg that has been too lightly boiled may be put into the saucepan again, even after the top has been taken off, if an ordinary pin be dropped into it in a conspicuous place, when it will be found that none of the egg has been lost. Care should be taken to remove the pin.

If each member of the family wants to sleep in a single bed and there is room for but a double one, this is a good way out of the difficulty: Simply supply double beds with single sheets and blankets for each sleeper.

When storing silver for the summer, wrap each piece separately in a sheet of waxed paper, and when it is unrolled for use again in the fall it will be found as bright and clean as when wrapped.

In roasting any bird place the breast down in the pan when first put in the oven. By so doing the juice will run out of the back into the breast, making it more juicy, instead of the juices from the white meat settling in the back bone, as happens when a bird is placed back down in the pan.

When incandescent mantles are used the ceilings immediately above often become blackened, while the rest remains quite clean. If whitewashed, the place can be cleaned by being rubbed over with a mixture of starch and water of the consistency of cream. A soft flannel cloth ma be used. When quite dry spread a newspaper underneath, and gently rub off the starch. The black stain will come with it.

To keep a coffee-pot sweet put a tablespoonful of baking soda into it. Fill it two-thirds full of water and let it boil for an hour. Then rinse very thoroughly. If this is done about once a week the pot will always smell fresh and clean.

To exterminate ants from the larder, wash the shelves, then dip a small paint brush in a little pure carbolic acid and smear along the edges of the shelves and bottom of the door. This will not leave an unpleasant odor, and will drive the ants out.

To cure squeaking shoes take a large plate and pour just enough oil on it to cover the bottom. Then stand the shoes with their heels propped, so that the soles rest in the oil. Let them stand overnight, and in the morning wipe off any excess of oil there may be.

A good remedy for a cough is to put a lemon into boiling water. Boil it for a quarter of an hour. Then press out the pulp into a jar, removing the pips, and mix it very thoroughly with a quarter of a pound of honey. Take a teaspoonful when required.

If by chance your vegetables or preserves scorch while cooking, remove the vessel instantly from the range and set it in a pan of cold water, letting it remain there for ten or fifteen minutes. At the end of that time you will find that the scorched taste has all vanished from the food.

KIND BURGLAR WELL REPAID

"A house in the country that I had got into by a convenient cellar window and that I came out of by the front door," said the retired burglar, "have proved to be very disappointing.

"I had imagined from the nicely kept lawn and the general appearance of things outside that it must be the home of people of means, but in the whole of upstairs I had not found, of things that I could carry away, enough to pay me for my night's work.

"Then, as I came down from the second story into the front hall I cast my light around there, to see if there was anything there worth while. There wasn't, but on a little tray on a table in the hall I saw three letters addressed and stamped ready for mailing, and I thought I would take those letters and mail them.

"That was just a foolish whim, but then I did a downright foolish thing, something that I had never done before and that I never did again—I wrote a note and left it on the little tray from which I took the letters:

"'I have taken the letters. I am going right past the postoffice and I can mail them just as well as not.

JIMMY.'

"Well, I did mail those letters, and then I never thought of them again till about a year and a half afterward when I saw this advertisement in a newspaper:

"'Jimmy—Thanks for mailing those letters. We want to communicate with you. Write to us where you found us. S. S. O.'

"Now that was something of a jolt, wasn't it? Of course, that foolish note that I left was a clue and now they were following me up, and what should I do about it? Should I communicate?

"All I could do was to trust my hunch, and I trusted it. I wrote, giving a fictitious name, and giving my address as the postoffice. Of course, it would have been the easiest thing in the world for them to have a man watching the office here for me when I called for the letter, but I liked the house and I thought I should like the people that lived in it, and I took a chance.

"In two days I got the letter, and when I opened it there dropped out of it a $1000 bill. Do you fully grasp that? A $1000 bill, and this is what they wrote me:

"'One of those letters that you mailed us was to an uncle who lived in a town not a hundred miles from ours. I don't know whether you noticed the address on the letter or not. A nice old man he was, not an eccentric, nor a hermit, but just an old bach, who lived by himself and went his own way. He did not seek friends, and so far as we know we were his only living relatives; but though he lived so near we had not seen him nor heard from him in a dozen years.

"'Then one day, the day before the night that you called, it struck us that we would write to Uncle William; and just out of a feeling of friendliness and good cheer we sat down that day and wrote him that letter; the letter that you mailed.

"'And what difference did it make, I hear you saying, who mailed the letter? Well, I will tell you.

"'In the ordinary course of things that letter would not have been mailed by us until some of went down to the centre in the afternoon; and mailed then it would never have reached him; for on the afternoon of that very day our uncle moved from the old town in which he had lived so long, and left no address behind him. But mailed when it was, by you, it did reach him. He never answered it himself; but a year later we received a letter from a lawyer in the town to which he had moved saying that our uncle had died in that town and had left us $200,000.

"'He had accumulated $205,000. He had made a will giving $200,000 of this to a hospital that had caught his fancy and $5,000 to us, his relatives, "if still living." But later, clearly after receiving our letter, which he would never have got but for you, he had changed his will, giving $5,000 to the hospital and $200,000 to us; and now, after some six months of legal formalities we have got the money.

"'So you see your mailing that letter made all the difference in the world to us; it brought us a fortune.

"'We still live in the same house, but now we have more things than when you were here. In fact we have some things now that usually we do not keep in the house, but in a box in the bank at the centre; but if you will come over and see us again and will let us know when you are coming, we will leave around the house enough to make this visit profitable; we feel that we are still much in debt to you.'

"But I never went back. Whatever they got out of it I felt as if, just for carrying the letter to the post office, a thousand dollars was all that was really coming to me."—New York Sun.

Travels of a Chimney Swift.

On June 7, 1911, an adult chimney swift fluttered down a chimney into the study of Ernest Harold Baynes in Meriden, N. H., and was promptly banded and released. The band was of the old style and bore the number 6326. At 8 o'clock p.m. on June 16, 1912, two chimney swifts flew from the chimney into the same room of Mr. Baynes' house where the bird had been caught a year and eight days before. And lo! when those birds were taken in hand and examined one of them proved to be 6326. Remarkable as this may seem, this diminutive creature, less than six inches in length, had travelled hundreds of miles to Central America or elsewhere in the tropics, where he spent the winter, and then had made the long return journey at the approach of summer and found again the chimney of his choice in a village in far off New Hampshire. And throughout his journeying the little aluminum ring had travelled with him and had produced not the least effect on the bird's leg.

One wonders if the swift lived always in the same hollow tree in South America.

Bulldozing the Bull.

A few years ago I took the short course at our college of agriculture, and, besides learning how to judge calves and so forth, I learned the university yell. During the following summer our neighbor's bull bothered us at time by breaking through the fence and coming up from the pasture with our cows. Finding this breachy bull in the lane one night, my brother, who also knows something about college yells, and I each took a pitchfork and started after him.

The bull took to his heels and ran until he came to a good sized elm tree. Here he wheeled and started pawing up the earth and bellowing and otherwise showing an inclination to fight. To keep up our own courage we started giving the college yell. The bull gave one startled look and then made for home the straightest and swiftest way. It took him through two barbed wire fences, but they did not hinder him any. He did not trouble us again.

The moral of this is: When you go to college learn all you can, for you never can tell what you may have use for.—Country Gentleman.

Soup Without a Spoon.

Soup without a spoon seems even harder to negotiate than meat without a fork, and we can sympathize with the complaint recorded in the diary of Felix Platter, a young Swiss, who went to Montpelier in 1552 in order to study medicine. He lodged in the house of his professor, Catelan, one of the greatest doctors of his time, and yet, writes Platter, "we were compelled to eat our stew in the usual French fashion—that is to say, picking the meat out with our fingers and then drinking the broth. In vain we begged our hostess to let us have spoons, but not a single one was to be found in the house, the only implement on the table being a large knife fastened with an iron chain. No one here seems to have ever heard of spoons, which we at home find so useful." Montaigne was astonished when he visited Switzerland in 1580 to find that "at all meals they put on the table as many spoons as there are people present."

Garden Society.

"Why is the lily so haughty?" inquired the mushroom. "She barely nods to the rest of us."

"She is very proud," explained the ivy. "She regards you as an upstart and me as a climber."

FLOWERS MOUNT SKYWARD

One of the season's outstanding shapes is topped with a towering cluster of roses which lend a bright color note to this turban of alternate panels and satin braid.

Chats With the Doctor

BY A PHYSICIAN

VALVULAR HEART DISEASE.

Of all the sufferings with which Providence has seen fit to afflict human beings, none are worse than the latter days of those unfortunates who contract disease of the heart-valves. This is quite a different matter from the congenital malformations with which some children—luckily very few—are born; as from the fatty degeneration which attacks the old—particularly those who have indulged too freely in alcoholic drinks. But you find it almost at any age after infancy, and it is brought on generally by acute rheumatism, otherwise "rheumatic fever." When there is not a history of that as precedent, you learn as a rule that scarlatina, "scarlet fever," has caused it. Both lead to intercurrent attacks of endocarditis; that inflammation of the heart's lining membrane, with deposit of lymph on the surface, which subsequently produces adhesions, fibrous bands sticking parts together; and so preventing the normal fair play of the valves.

There may be much trouble following; perhaps no symptoms occur for some years. Then the victim becomes conscious of losing breath at the least exertion; and the sensation gets rapidly worse, until this dyspnoea is continuous, and all active movement has to be avoided. The kidneys and liver are subsequently implicated. The legs swell and there is puffiness under the eyes, and there may be ascites—abdominal dropsy. Finally the patient has to remain in bed; and there struggles for weeks or months with ever-increasing difficulty in respiration, until death mercifully closes the scene.

Something depends on the particular set of valves which are attacked. The mitral valve—so-called because of the supposed resemblance its two cusps bear to the bishop's mitre—is the most frequently implicated, and that which involves the greatest suffering. It separates the left auricle and ventricle. When the semi-lunar valves, which cover the passage from the heart into the aorta, the large artery—are attacked, there is not usually so much trouble. But the condition is apt to produce sudden death.

While the malady is so agonizing, in none is the skilful doctor able to give so much relief—mainly by drugs. And it is always requisite to be under his attendance and observation—never to take things into your own hands. He would rely most upon tincture of digitalis (foxglove) given in water twice a day in the dose of from 10 to 15 drops.

With the foxglove tincture it is often advantageous to combine about half a teaspoonful of sal volatile aromatic spirits of ammonia. When there is prolonged and severe suffering, five drops of tincture of opium may be added. And relief is further afforded by the application of two or three leeches over the heart. But all these things must be done in strict subordination to expert advice.

SPASMODIC ASTHMA.

It is necessary to speak of "spasmodic" asthma, because many people improperly term ordinary chronic bronchitis "asthma"; and also use the word rather loosely for almost any chest affection which involves shortness of breath. The true asthma comes on in fits; while the sufferer, at other times, breathes freely, and is quite devoid of any respiratory trouble. It depends on a spasmodic contraction of the muscular fibres of the smaller bronchial tubes, whereby the air passes to be oxygenated by the air-cells of the lung.

Asthma is mostly inherited, and runs in families. But one does meet with cases in which no hereditary predisposition can be traced, and in which the trouble has arisen spontaneously. These cases are often tubercular; and the asthma only a form of very chronic tubercular consumption, in which the sufferer has narrowly escaped death from the prevalent malady. Asthma is not commonly thought to be contagious, but I once had as patient a very shrewd lady who became a great sufferer, and who had no asthma in her family. She thought she had caught it from her landlady in lodgings; and subsequently told me her suspicions had been confirmed by discovering that sheets, pillows, etc., from the bed of that landlady—a confirmed asthmatic—had been very improperly placed on hers.

Asthma seizures depend very much on locality, and the rules for selection or avoidance are not easy to lay down absolutely. Sufferers have to find what air and what place best agrees with them, and to settle down if possible in the most favorable country or town. Usually they are least liable to attacks in a smoky atmosphere such as that of a factory town, and are most subject, on the other hand, to the fits where other people enjoy best health.

For internal treatment iodide of potassium, in doses of 10 grains dissolved in water, and taken three times a day, may be given from time to time—each course lasting from two to three weeks. When there is suspicion of tubercular mischief—or when the disorder is complicated with chronic bronchitis—there should also be a course of cod liver oil treatment from time to time. A teaspoonful of that should be taken twice a day after meals for a month or six weeks. This is particularly useful at the onset of winter.

The number of inhalants for use when the paroxysm comes on which are in the market is legion. Many or most are very effective; your chemist will recommend the best—I may not. Cigarettes made of blotting paper soaked in solution of saltpetre (nitrate of potash) and dried, are an approved remedy of this kind, as old as the hills.

CORNS, SOFT AND HARD.

The schoolboy protested he had been smoking for corns, but that did not save him from the usual chastisement which awaits those who are caught doing what they had not ought to. If only smoking would cure our corns, how happy we should many of us (relatively) be.

However, you can easily cure the soft corn, which is perfect agony. I learnt that only in recent years from a lady friend. None of the doctors' books said anything about it, and I hardly think the doctors know. All you have to do is to get a little powdered chalk and rub it on with cotton-wool every night. Very soon your trouble vanishes. The sensitiveness is apparently due to the moisture, and disappears when the place is kept thoroughly dry.

You can also cure a hard corn if you have patience and perseverence enough, to endure a good deal of pain and perhaps lameness. Cut off the hard top, and apply strong nitric acid with a bit of stick—the butt-end of a lucifer match will do. Cut off again and repeat—in about ten days; and so on, till all is gone.

But most people don't care to do this and keep themselves easy merely by cutting the corn—until all the white core is out. Then you have comfort for a fortnight or so when the process has to be repeated. It is hardly necessary to be point out that your boots must fit properly. They need not be loose and too large, but they must not press unduly upon one spot, and so produce there the familiar corn.

The Time to Marry.

Hepsey, the maid of color, had told the mistress she was to be married.

"Well, Hepsey," said the mistress, "I'm sorry to lose you, but I suppose it is all for the best. How long have you known the man?"

"About two weeks, ma'am."

"My! No longer than that? Don't you think you ought to wait and get to know him better?"

"No, ma'am," exclaimed Hepsey. "Ef I knowed him any better I sho' never would marry him."

PALPITATION OF THE HEART.

Sudden fright or emotion may cause a momentary arrest of the heart's action, or some excitement or apprehension may set up a rapid action of the heart thereby causing palpitation.

Palpitation, again, is often the result of digestive disorders arising from the stomach, or may be the result of over indulgence of tobacco or alcoholic drinks.

The only way to regulate this serious heart trouble is to use Milburn's Heart and Nerve Pills.

Mrs. J. S. Nicholls, Listowell, Ont., writes: "I was weak and run down, my heart would palpitate and I would take weak and dizzy spells. A friend advised me to try Milburn's Heart and Nerve Pills, so I started at once to use them, and found that I felt much stronger. I cannot praise your medicine too highly, for it has done me a world of good."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25; at all dealers, or mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

Napoleon's "Nine Lives."

The surrender of Napoleon to the captain of the Bellerophon, when that event became known in England, was discredited by many, for at least eight times previously he had been reported dead, says the Westminster Gazette. The list of his deaths published in a contemporary journal is interesting. He lost the first of his nine lives in a battle on the Dnieper, where he received "five mortal wounds and expired as he gave his sword to Prince Kutusoff." Later he was twice drowned, once "while crossing the Mosqua" and again in Moscow, "where he lost his way and fell into a reservoir." During the retreat from Moscow he was suffocated in his tent and a few days later buried 5,000 fathoms deep in a fall of snow. Finally he reached Paris, where his exasperated subjects immediately lynched him. These were some of the many fables concerning Napoleon which found their way into the newspapers a century ago.

Contradictory Science.

The infinitely little and infinitely vast alike baffle the understanding, developed as it is by our concrete finite life. Creation is typified by the sphere. A circle is a straight line that at every point ceases to be a straight line, and the earth's surface is a plane that every moment ceases to be a plane. Following the surface of the earth does not carry us to the under side because there is no more an under side than there is an upper side. There is only a boundless surface. But if it were possible for us to build a globe on the globe as large as the one we inhabit, would it not have an upper and an under side?

The rain causes the grass to grow, and the sun causes the snow to melt, but we cannot apply the idea of cause in this sense to nature as a whole, but only to parts of nature. Gravitation caused Newton's apple to fall, but what causes the earth to fall forever and ever and never to fall upon the body that is said to attract it?

Sunset and Twilight.

Twilight is a phenomenon caused by atmospheric refraction. When the sun gets below the horizon we are not immediately plunged into darkness of of night. Although the sun is below our horizon, rays of solar light are bent or refracted by the terrestrial atmosphere and continues to furnish some slight illumination. The process continues with diminishing intensity until the sun is so far below the horizon that the refracting power of the atmosphere is no longer able to bend the rays enough to produce a visible effect. The time after sunset that the sun reaches such a position varies with the latitude of the place. There is less twilight at the tropic zone than at the temperature or frigid zone. This is due to less time taken by the sun's rays to pass through the atmosphere, at the tropic zone the sun's rays being perpendicular and at the temperate and frigid zones oblique.

Weighing the Earth.

Professor J. H. Poynting, F.R.S., professor of physics at Birmingham University, and better known to the scientific world as the "Man who weighed the earth," has died at the age of sixty-two.

In 1880 he was appointed professor of physics at Birmingham, and in 1890 he published an essay on "The Mean Density of the Earth," for which he was awarded the Cambridge Adams prize. The subject was elaborated in 1892, when he stated that the earth weighs 12,500,000,000,000,000,000,000,000 pounds.

Professor Poynting also attempted to estimate the probable temperatures on some of the planets, concluding that the Equatorial temperature of Mars was probably below the freezing point of water, and that consequently it was unlikely that life, as we know it, existed there.

Never bite off threads with your teeth, or form the habit of taking very hot things immediately after eating anything very cold or the reverse. Such things impair the enamel of teeth and prepare the way for decay.

When the Back Becomes Lame

IT IS A SIGN OF KIDNEY TROUBLE

Doan's Kidney Pills cure the aching back by curing the aching kidneys beneath—for it is really the kidneys aching and not the back.

Doan's Kidney Pills are a special kidney and bladder medicine for the cure of all kidney troubles.

Mrs. Louisa Gonshaw, 683 Manning Ave., Toronto, Ont., writes: "I take great pleasure in writing you, stating the benefit I have received by using Doan's Kidney Pills. About three years ago I was terribly afflicted with lame back, and was so bad I could not even sweep the floor. I was advised to try your pills, and before I had used one box there was a great improvement, and my back was much better. However, I kept on taking them until my back was completely cured. I highly recommend "Doan's" for lame back."

Doan's Kidney Pills are the original pill for the kidneys. See that our trade mark the "Maple Leaf" appears on the wrapper.

Doan's Kidney Pills are 50c per box, 3 boxes for $1.25; at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

WALKERTON TELESCOPE
$1.00 per year in advance.
LORNE A. EEDY - PUBLISHER
Phone No. - 43
Residence - 146

WALKERTON, APRIL 20th, 1916.

EDITORIAL COMMENT

One Canadian soldier fighting in France has been found to have no less than five wives in this country, says the Simcoe Reformer. Think how this fellow would fight to defend his homes.

+ + +

Ontario's $1.00 weekly is cheap, but not so cheap as the community that permits a local newspaper to perish rather than add 50. cents to the present subscription price of once-a-week journals in the province.—Toronto Telegram.

+ + +

A police court magistrate in Toronto fined a man, at the same time reprimanding him in the severest terms, for using bad language over the telephone. The magistrate held that a public utility like a telephone was as sacred as a court or a church.

+ + +

The British army in France was 80,000 in August, 1914—"French's contemptible little army" was what the Kaiser called it. It is now 2,600-000. That is a great growth in twenty months, but it must grow yet if we would see the enemy of civilization defeated, and Canada must help its growth if she would do her duty by the Empire, by herself, and the cause of civilization and liberty.

+ + +

The year 1816, (one hundred years ago) was known as the "Summerless Summer." Snow commenced falling about the middle of June; by the middle of August it was one foot in depth, and from the first fall of snow in June until the following summer the earth remained under the covering of the wintry blanket. Absolutely nothing in the way of crop came to maturity. The year was called "Eighteen Hundred and froze to death."

+ + +

It is gratifying to know that the people of France fully appreciate the sacrifice made by the Canadian soldiers who have fallen in the fight. We are told by one who has lately been in France that "the French think the Canadians wonderful. Canada is now a name to conjure with in France. The graves of Canada's fallen heroes are beautifully kept. On all Saints' Day they were lavishly decorated with flowers, showing the gratitude and appreciation of the French people."

+ + +

A Bill has been introduced by the Ont. Government to provide for the full development of power at Niagara Falls. The premier described the object of the bill as providing for the development of the unalloted water at Niagara Falls belonging to the Province of Ontario, in accordance with the recommendations of the Hydro Commission. Mr. Rowell, on behalf of the Opposition, expressed concurrence in the general principle that the Province should retain control of all undeveloped power for the benefit of the people of the province.

+ + +

Mr. Rowell raised a very important question in the Legislature in urging that the Government extend the powers of the Soldiers' Aid Comission to include Italian, French, Russia, and other reservists of the Allies who had left Ontario to go to the war, so that on their return they might enjoy the benefits of the Commission's activities in common with native-born returned soldiers or those of British origin. That the matter had not occurred to the Government, but was recognized as of the utmost importance, was evident from the manner in which the Premier seized upon Mr. Rowell's suggestion and promised its adoption.

+ + +

"Our grandmothers," says the Port Rowan News, "milked the cows, fed the calves, churned the cream and washed and dressed ten children every morning. No competent woman of this generation need complain about the performance of the ordinary duties of her household." A few items the News has left out. Our grandmothers spun the yarn, dyed it, knitted the family socks and stockings, made and mended clothes, cleaned tripe, made sausage meat, leached lye and made soap, put down pickles, sauces and preserves, peared, cut, cored and dried apples, made candles, looked after the hens, ducks, geese and turkeys, made and tended the vegetable and flower gardens, and helped out the old man when he got behind with his work. Add to all this, and more, the fact that this busy housewife found no difficulty in tidying herself, putting on her best duds, and running over to a neighbor's, a mile or two distant, occasionally to spend the afternoon!"—Orillia Packet.

THAT STATION ROAD

The Station Road which is always bad enough, is in an almost impassable condition at present. It is high time that something be done to fix this roadway. The difficulty is of course that the Town Council is hard put for funds and will be so for several years. A solution of the difficulty would be to issue debentures for expenditure on permanent roadways at the same time as the debentures are to be raised for fixing the Town Hall. Both propositions could be submitted to the ratepayers at once. We believe that such a proposition would be heartily endorsed by the citizens.

BRUCE FARMERS WILL DO THEIR BIT.

Attention is being called through the "Production and Thrift" campaign to the opportunity present conditions afford to Canadian farmers of selling great crops of grain and other farm products, owing to the shortage there will be in European crops. So many men have been taken from the soil to fight, and in several of the warring countries agricultural production has been so disorganized, that it will be years before normal conditions can be resumed and anything like full crops gathered from the farmers of Europe.

Canadian farmers, then, are urged to make full use of their opportunity. They are laboring under a handicap, and a severe one, in the scarcity of help; but determination and ingenuity can accomplish great things, and the farmers of Bruce, we believe, will not be slack in the effort to fill the barns and granaries of the country with the crops of this year 1916.

+ + +

A GREAT V. C.

"There is one award in to-day's list which crowns one of the greatest acts of self-sacrifice that any war and any nation can record," says the Manchester Guardian.

"Second Lieutenant Alfred Victor Smith, an officer in one of the Lancashire territorial battalions, then serving in Gallipoli, was about to throw a hand grenade, when it slipped from his hand back into the trench. In a moment he was in safety, shouting a warning to his comrades.

"But just as swiftly he saw they could not get clear before the grenade was timed to explode, and with a wit that was as great as his valor, he flung himself upon the grenade, taking the full force of the explosion, and was instantly killed. Such a deed needs no words of prologue or epilogue. It has all the elements of a folk-tale or folk-song.

"In the simplicity of its grandeur it will rank with the greatest deeds; those things which from a "traveller" story become the sagas of history and are to be found in the storybooks of the people. There it will have for a companion the act of that Swiss patriot who hurled himself upon the pikes of the enemy's square, gathering their points to his breast, and so breaking a gap through which his comrades could force their way. These are the things which are indeed the redemption of war."

+ + +

BISHOP FALLON ON RECRUITING

Among the many recruiting appeals, written or spoken, that of Bishop Fallon, addressed to the Knights of Columbus in Ontario, of which organization the reverend gentleman is State Chaplain, stand out prominently because of the admirable sentiment his call to the colours voices. In part Bishop Fallon said:—

I shall waste no time in discussing undeniable principles of fundamental truths. That the British Empire is engaged in a just war, that the war is as much Canada's as England's and that Canada's citizens have a bounden duty to spare no effort in bringing that war to a victorious issue are statements so self-evident as to require no proof.

Neither shall I attempt to fix a term to the duration of the war. The time of its ending is known only to Him who holds ourselves and all our interests in the hollow of His hand. But I shall write of what I know. At this moment the Imperial authorities are urging enlistment by every available argument, and are appealing to all British subjects to place patriotism and the national cause before personal considerations. The Canadian Government has issued a call for half a million men. I agree that the provision of such a number of men will tax our population to the limit. What if it does? Is not the cause worthy of the supremest sacrifice? I am not competent to measure the possible effect on commerce and industry of the withdrawal of so vast a body of men from peaceful pursuits. I assume that good judgment and common sense will prevent the crippling of enterprises that are necessary for the proper conduct of the war. With all other phases of finance, commerce or industry, I have no present concern—nor have you. There is a work to be done; our effort must co-operate in the doing.

Honour calls on every Knight of Columbus who is fit and free for overseas service to offer himself for the work. Shall we leave the burden, the duty and the glory of this work to others?

Patriotism adds its urging to the call of honour. The danger is just as real to Ottawa, Toronto and London as to the shores of Sussex or the banks of the Thames. Shall we forget the sacred truth that it is sweet and glorious to die—or at least to offer to die—for one's country.

The rights of humanity require that we make the sacrifice. Have martyred Belgium and stricken Siberia, sorely oppressed France no power to awaken a responsive cry in our bosoms? The defence of civilization demands that we hurry to its assistance. It is our civilization—the civilization that suits us—that is in jeopardy. Are we prepared to willingly accept another kind of civilization? Do we realize that the exercise of personal responsibility in political affairs, upon which rests civil liberty, hangs in the balance?

I say no word of the demands of conscience. It were folly to emphasize that aspect of the present hour. The man who is dead to the appeal of honour and patriotism, of humanity and civilization, is not apt to be alive to the call of conscience?

NEWS ABOUT TOWN

Read the ads.

Good Friday to-morrow.

Ripley has a house famine.

The showers and then the flowers.

Straw hats are reported in the offing.

The temperature is gradually rising.

How long do you think it will last?

The lawn mower season is approaching.

Adam was created before Eve, yet Eve was the first maid.

War cannot dim the glory of the spring millinery display.

What most people need is an occasional dose of anti-talkine.

Read the advertisements in the Telescope, and you can save money.

Alberta has gone dry but they don't mind that up there because the air is so stimulating.

"Hasn't he any friends?" "Friends! Say, that man has fewer friends than a alarm clock."

If a man could read his own biography it would probably surprise him more than any one else.

Brighten up. Clean up. Paint up. Wake up! Next winter you will have a chance to go to sleep again.

Port Elgin purposes raising $5,000 for the Canadian Patriotic Fund by a one day's campaign Wednesday.

Some of the most interesting reading in the Telescope is the ads. of Walkerton merchants. Don't miss them

An author is described by an exchange as a person who uses paper to catch the drip when his brain leaks.

If we don't soon know all there is to know about corsets, it won't be because the corset ads are not vivid enough.

Advertising is part of the news these days. Readers can always tell the wide-awake stores by the advertisements.

Lion's Head has 70 recruits in training and still they come. Get a move on Walkerton and Wiarton.—Lion's Head News.

No man is so much of a failure in life that he doesn't think he is qualified to write in and tell the editor how to run the paper.

If you can substitute potatoes for the dandelion crop in your back yard, do so this year, and become a party to the production campaign.

"Her false hair blew into the bay and I fished it out."
"You're a hero."
"No, I'm not. I'm a hair restorer."

Mr. William Mielhausen disposed of 4 Holstein calves lately, realizing the sum of $600. This is a fair sample of the prices that good cattle are bringing these days.

The Hamilton Herald quite sensibly suggests that the increase in the marriage license fee should be accompanied by a tax on bachelors to make it a square deal.

In looking over the recruiting list, we are lead to suggest that the name of Mildmay be changed to "Weak Sister." She's not mild enough to look "Weir-y.—Lion's Head News.

Clean up,
Clean up some more,
And then some,
And then what
Then some more.

Mrs. E. J. Skelton, secretary of the Daughters of the Empire, acknowledges the receipt of $18 from Mrs. Hepburn, the proceeds of a Parcel Tea which she gave recently.

Said the maiden—"I'm sorry, Mr.
But to you I can be but a sr."
Said he—"It's a go.
Dear Sis, be it so."
And right then and there he 'sr.

The Telescope wants to know of all the doings in town and townships. The telephone is handy, most people have one, just telephone the coming and going of yourself and your friends.

The Township of Elderslie will give a social evening and luncheon for the soldiers of the township on Good Friday evening. Presentations will be made to the men who have enlisted from the Municipality.

1st Frau: "My poor boy Fritz is having a dreadful time. He is with the army in Russia."

2nd Frau: "And what about your other boy, Hans?"

1st Frau: "Oh, HE'S all right; he's in the navy."—Bystander.

If a merchant finds "dead" ads. in his weekly paper he should not only bring his own up to the modern standard demanded by woman but induce other local merchants,—even rivals—to get life into theirs, and line up the newspaperman,—who may be nodding himself—to do the same.—Drygoods Review.

CRUEL AND UNUSUAL

(From the Rochester, Minn., Post)

Mr. Hissinger broke his right arm above the elbow. He was also bruised severely about the city.

THE BRUCE COUNTY EXILE

I'se gwine back to Bruce,
I'se gwine back to Bruce,
Her stalwart sons prepare to fight the foe.
I hear her strong voice calling,
See her stern brow falling,
My heart's gwine back to Bruce, and I must go.

HIGH SCHOOL EXAMS

A semaphore is a young man who is in his second year in college.

A parallel is two lines that can never meet unless they are bent.

A skeleton is a framework of bones without anybody in it.

There are 206 bones in the human body unless a man is a bonehead, and then there are 207.

Diplomacy is the art of saying something that you don't mean to someone who doesn't believe it.

SOME NEEDED INVENTIONS

A lawn mower that will toss nails and rocks over the neighbours fence before attempting to cut into them.

+

A fountain pen that will say "I'm empty" before you start to sign your name, and not silently cease flowing after you have made the first initial.

+

A rocking chair that will crawl out of your path when you are about to tumble over it in the dark.

+

A public building that will expand sufficiently to accommodate a crowd of any size.

+

A mislaid shoehorn that will ring a little bell to show its whereabouts when wanted.

+

A cellar furnace that will open its door and feed coal into itself when the fire gets low.

+

A telephone that will automatically shock a bore who has talked over five minutes.

+

A baseball bat that will magnetically attract the ball to it so that it can be hit.

+

A shoestring that will stiffen out like wire when a knot suggests itself, but will become beautifully pliant when the knot crisis is past.

+

A door bell that will flash a picture of the caller on the inside of the door, and state his business in readable letters below.

+

A match holder that will outline itself with light when it feels a hand fumbling for it in the dark.

+

An alarm clock that will reach out its hands and gently open your eyes and smile down into them instead of scaring you half to death.

FARMERS, ATTENTION!

It has been observed that throughout Norfolk County farmers are refusing to employ men of military age and fitness on their farms, preferring to do the best they can without them. The Government has come to their assistance with the offer to grant a furlough to men in the service who are willing to work on the land. The conditions follow in full, and the worries of any farmer taking advantage of the offer will be greatly reduced. Those who were not previously willing to allow their men to answer the call of duty will now have no reason for persisting in their refusal.

1. Subject to the following conditions furlough for a period not exceeding one month may be granted to non-commissioned officers and men of the Canadian Expeditionary Force for the purpose of enabling them to take part in seeding, plowing, etc.

2. This privilege is limited to non commissioned officers and men of good character.

3. It is granted so as to enable them to work on the land, and for no other purpose; and it will be granted on proof that promise of work has been obtained.

4. They may be provided with return transportation to and from any locality not exceeding a distance of three hundred miles from the station or camp where they are under training.

5. When they proceed on furlough they will wear their working suits, leaving their clothing and equipment with their units.

6. Pay and allowances withheld during the period of the furlough will be paid on the return of the non-commissioned officers or man concerned to the headquarters of his unit and upon the satisfactory evidence that, while on furlough he was bona-fide engaged in farm work.

7. Each non-commissioned officer and man will, therefore, be warned that when he returns to the headquarters of his unit, he will be required to produce a certificate from the person or persons for whom he has been working, confirmed under the signature of his clergyman or of two responsible persons resident in the vicinity of the land in question, or a certificate signed by himself that he has been working on his own land and commanding officers, if not satisfied with the latter certificate, are required to obtain corroborative evidence.

8. Any non-commissioned officer or man, who misconducts himself during furlough, will be liable to forfeit his pay and allowances for such period as may be determined.

9. Commanding officers will be held personally responsible that these terms and conditions are strictly carried out so far as the non-commissioned officers and men of their several units are concerned.

THE CANADIAN BANK OF COMMERCE

Mechanics' SHOES
We call the working men's attention to our excellent shoes built purposely for the mechanic. Nothing in them but good solid leather. Heavy durable soles with uppers of heavy calf or kangaroo. Nothing omitted that would in any way add to their durability, and while they are built for hard usage they are built to be comfortable. They are good looking and moderately priced.

Gentlemen:—Please see me about Residence Telephone Service.

Name .... Address ....

The modern demand—simple, suitable and artistic wall papers—is most amply shown in our new season's offering.

New decorative treatments, dainty and pretty bedroom papers with cut out borders to match—living room and dining room papers resembling cloth so closely that you would have to touch the wall to detect the difference—binders to panel the room, are all represented in the variety of colors, grades and prices.

Before decorating, consult us for new ideas in wall papers.

A booklet in color, illustrating model interiors is yours for the asking.

The Rexall Store

If there's room for more hair on your head we recommend Rexall "93" Hair tonic.

Drives away dandruff, makes the hair glossy without greasiness, stops the falling out and promote's a healthy growth.

Sold exclusively at Rexall Drug Stores, 50c. and $1.00 bottles.

A. P. SIEVERIGHT

. . Your . .
Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letter head for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

Telescope Job Department

FRUIT, THE GREAT PHYSICIAN

Healing Powers of Fruit Proved by "Fruit-a-tives"

The simple juices of apples, oranges, figs and prunes, when transformed into 'Fruit-a-tives' will relieve diseases of the *Stomach, Liver, Kidneys and Skin.*

The truth of this statement has been proved in thousands of cases of Indigestion, Dyspepsia, Torpid Liver, Constipation, Kidney and Bladder Troubles, Skin Diseases, Rheumatism, Neuralgia and Chronic Headaches.

The enormous sales of 'Fruit-a-tives,' are the best proofs of the value *of this fruit medicine.*

50c. a box, 6 for $2.50, trial size 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

POETS' CORNER

KAISER BILL'S PRAYER

While there may be no virtue in the all too prevalent pastime of "Killing the Kaiser with our mouths," there is a quaint humor in this greeting from the trenches by Pte. Tyse, in a London paper that hits the spot:

There's a story now current, though strange it may seem,
Of the great Kaiser Bill and a wonderful dream.
Being tired of the Allies, he lay down in bed,
And, among other things, dreamt he was dead,
And in a fine coffin was lying in state,
With a guard of brave Belgians who mourned for his fate.
He wasn't long dead till he found to his cost
That his soul, like his soldiery would are soon be lost;
On leaving this earth, to heaven he went straight:
Arriving up there, he knocked at the gate,
But St. Peter looked out, and with voice loud and clear,
Said, "Begone, Kaiser Bill, we don't want you here."
"Well," said the Kaiser, "that's very uncivil:
I suppose, after all, that I must go to the Devil."
So he turned on his heel and off he did go
At the top of his speed to the regions below:
And when he got there he was filled with dismay,
For while waiting outside he heard Old Nick say
To his imps. "Look here, boys, I give you all warning.
I'm expecting the Kaiser down here in the morning.
But don't let him in, for to me it's quite clear
He's a very bad man, and we don't want him here.
If he ever gets in there'll be no end of quarrels;
In fact, I'm afraid he'll corrupt our very good morals."
"Oh, Satan, my dear friend," the Kaiser then cried,
"Excuse me for listening while waiting outside;
If you don't admit me here, oh, where shall I go?"
"Indeed," said the Devil, "I really don't know."
"Oh, do let me in, I'm feeling quite cold,
And if you want money, I've plenty of gold.
Let me sit in a corner, no matter how hot."
"Oh, no," said the Devil, "most certainly not;
We don't admit folks for riches or pelf.
Here are sulphur and matches, make hell for yourself."
Then he kicked Wilhelm out and vanished in smoke,
And just at that moment the Kaiser awoke.
He jumped out of bed in a shivering sweat,
And said, "Well, that dream I shall never forget.
That I wont go to heaven I know very well,
But it's really too bad to be kicked out of hell."

News About Town

The man who lets the other fellow know what he has to sell generally sells it.

W. M. McDonald, son of Wm. McDonald M. P. P., is home from Toronto. He has been granted his fourth year in honor science on his standing during the 1915—16 term and leaves in the course of weeks with the Divisional Signallers of the University Corps to train at Ottawa for Overseas Service.

Mr. Isaac Stanley and family, formerly of the Central Hotel, are back to Paisley again after a residence of three or four years in Edmonton. We understand there is nothing definite as to how long they may be here, but we feel certain that the people of Paisley and vicinity would be pleased to have them become permanent residents.—Paisley Advocate

Mr. J. S. Dewar has the work of remodelling the Fisher's woolen building under way. The annex to the west is to be torn down entirely, the third storey taken off, the main building a new roof put on, the foundation walls to be reinforced and other work to be put on the structure. The machinery has all been knocked down, some machines sold and shipped away to make industrial music elsewhere, and others go to the scrap heap. So passeth another institution that once promised to help make Paisley a manufacturing town.—Paisley Advocate.

The natural color of newsprint—the wood-pulp paper used in newspaper construction—is an indefinite cream shade. To get the pure white color, dyes are used, generally a compound of blue and red. These dyes are made only in Germany. Whence the supply is now completely cut off, thanks to the activity of Sir John Jellicoe. Some substitutes have been offered at prices two hundred times the normal charge, but these have proved of no value. The "yellow" tinge in all newspapers will become inevitable until the war is over, unless chemists outside of Germany discover commercial methods of producing the essential dyes.

No man can do effective work if constipated—Rexall Orderlies are an effective laxative. Sold by Rexall Drug Stores only, 15c and 25c boxes. A. P. Sieveright.

$300 and Costs

It was a heavy touch, but it could have been $500 had the magistrate so decreed. It was Joe Currie, liveryman, who was asked to put his hand into his dip and hand over the coin, and the reason was Joe was charged with having sold a bottle of whiskey to Biscuits West and from its contents he and Louis Plante had a toot.—Wiarton Echo

+ + +

Our Altitude

Walkerton is 806 feet above sea level according to the Dictionary of Altitudes just issued by the Dominion Gov't. The G. T. R. station is 931 ft. above the sea. Some of the other figures for Bruce are:—

Mildmay	1,024 ft.
Port Elgin	678 ft.
Paisley	778 ft.
Teeswater	956 ft.
Tara	750 ft.
Chesley	920 ft.
Elmwood	936 ft.
Kincardine	589 ft.

Beating the Devil.

There is an Irish priest in the Province of Quebec who deserves to be popular. He is a hail fellow well met with every one in the village, asks for contributions and gets liberal ones, from Protestants and Catholics alike. One day a delegation of Baptists called on him—men who had frequently contributed to Father W's. church—told him they were going to erect a new Baptist Church, as the old one was too small, and asked him to subscribe to the fund. "Well, boys" he said, after a slight hesitation, "you know my religion forbids my doing that, but I will give you fifty dollars to help tear the old church down."

+ + +

Soldiers Entertained

An enjoyable social evening was given for the soldiers by the members of Knox Church Bible Class on Tuesday evening of last week. A large number of members were present, possibly a hundred. A short but interesting and enjoyable program was introduced by Mr. H. M. Lay as chairman. The numbers included:—Chairman's address; Duet, "Military Gallop," Miss Eleanor Lindsay and Miss Nesbitt; Comic Song, Pte. Roberts; Address, Rev. Mr. Wilson; Solo, Mr. Webb; Duet, Military March, Miss Wilson and Miss Winnie Wilson; Reading, Mr. N. C. McKay; Song, Pte. Roberts; Piano Solo, Miss Warren; Patriotic Song "Boys of the Allies," Pte Webb and Soldiers' Chorus; Reading, Miss McGregor. A very interesting guessing competition followed. Everybody enjoyed a pleasant informal time.

+ + +

A Generous Township.

Last Friday evening the ratepayers of the Township of Saugeen, through their Reeve and Councillors presented to each of the soldiers who enlisted from Saugeen to the 160th Battalion with a cheque for $15. There are about 45 soldiers. The presentation took place at a banquet in the Town Hall in Port Elgin. The Hall was crowded with the men and women of Saugeen. A chorus of young ladies from the Township rendered splendid vocal music. The tables fairly groaned under the weight of the tasty foods supplied by the Saugeen ladies. Reeve Christie presided. The principal speakers were Judge Klein, Major Tolmie, M. P. P. and E. Roy Sales of the Port Elgin Times. The Township is to be commended upon their generous gift which amounts to about $700. The boys in Khaki appreciate the gift very much and all had a very good time.

POINTS TO CONSIDER WHEN PURCHASING A RAILWAY TICKET

A Canadian Pacific Railway ticket does not represent merely a means of transportation between given points. It, in addition provides the traveller with every comfort and convenience, developed by modern railway science, "Safety First," with up-to-date equipment, unexcelled dining car service, palatial sleeping cars, in a word, everything that a railway can provide for the comfortable transportation of its passengers, including courtesy.

BRANT TP. COUNCIL

April 10th, 1916

The Municipal Council of the Township of Brant met at the Township Hall on Monday the 10th day of April, members all present. Minutes of last meeting of council read and declared correct.

Weir—Rowand—That By-law No. 84 A. D. 1916, a by-law appointing pathmasters, etc., be amended by substituting the name of D. W. Gregg Sr. in place of Mack Scott in road div. no. 14, and Louis Liefso in place of David Willoughby in road div. no. 76.—Carried.

Johnston—Rowand—That a committee of D. W. Gregg and A. Weir be appointed to inspect washout on Stancell's hill and have same repaired and report it next meeting of council.—Carried.

Weir—Rowand—That a surveyor be engaged to survey the road allowance between lots 5 and 6 on concession 7 and 8.—Carried.

Gregg—Johnston—That a grant of $15.00 be given the Richardson family, Cargill, cheque to be issued to C. W. Keeling.—Carried.

Gregg—Rowand—That the Reeve and Clerk issue orders on the treasurer for all accounts passed at this meeting of council.—Carried. Viz as follows:—H. M. Norrish, flag for Township Hall, $4.00; Jas. Cahoon, filling washout, 10th sideroad, con. 6, $9.00; Wm. Johnston, council meeting and payment for road repairs, 13.55; Bruce Herald & Times, balance of printing account, 51.00; Municipal World, supplies, 12.05; Walkerton Telescope, advt. township treasurer, 1.70, Wm. Leslie, cement culvert tile, 11.70; John Lambertus, filling washout, Finlay's corner, 5.00, Wellington Jacklin, drawing tile and placing culvert, 3.50, Ed. Connors, refund of taxes by error in assessment, 6.55; C. W. Keeling, relief of Richardson family, 15.00; R. S. Nesbitt, council meeting, 2.70; A. Weir, council meeting, 2.70; W. A. Rowand, council meeting, 2.85; D. W. Gregg, council meeting, 1.50.

Rowand—Weir—That this council do now adjourn to meet on the 25th day of May as a court of revision.—Carried.

M. A. McCallum.
Clerk of Brant Tp.

ELDERSLIE COUNCIL

Gillies Hill, April 3rd, 1916.

Council met on the above date, members all present except Mr. Lewis. Minutes of last meeting read and adopted.

Mr. David Walks, assessor, having completed the assessment of the township, deposited the roll with the clerk. Assessment of taxable property for the current year is $[illegible]7,923.

Fraser—Allen—That the reeve have charge of 30 s.r. and all boundary lines, Messrs. Thompson and Allen 15 sideroad and all roads east, Lewis and Fraser all roads west of 15 sideroad, the sum of $200 being appointed to each division.—Carried.

Thompson—Allen—That we grant the sum of $50 to the Red Cross, this amount being saved by having no election, 1916.—Carried.

Thompson—Allen—That this council give a present to each soldier enlisted from Elderslie in the 160th Batt., the value and nature of the present to be left in the hands of the following committee: Reeve Cass, S. M. Ewart, Councillor Fraser and R. C. Pearce, presentation to take place at the township hall on the evening of Good Friday, April 21st.—Carried.

Fraser—Allen—That Mr. John T. Richardson be appointed sanitary inspector at a salary while on duty of $2 per day and 10c per mile one way.—Carried.

Fraser—Thompson—That the following accounts be paid, and that orders be issued on the treas. for same.—Carried.

The Municipal World, subscription 7 copies, $5.75; David Ruthven, filling washout, lot 17, con. 8, $1; Wm. Pruder, repairing culvert with gravel, 25 sideroad, 50c; David Walks, salary as assessor, $75; John Bowie, repairing washout, 15 sideroad, $3.75.

Allen—Thompson—That this council do now adjourn to meet again the first Monday in May at 1 o'clock p. m. for general business.

R. C. Pearce, Clerk.

Girls Needed for Office Work

So many men employed in offices are answering the call for recruits that within the next few months there will be a great demand for young women to take their places. Already the need is felt and even the banks are engaging young ladies to take the places of clerks leaving for military service. In order that the girls may be quickly trained for office work the Northern Business College, Owen Sound, will remain open throughout the summer. A special course of study has been arranged, commencing April 24th, but students may enter at later dates. Book-keeping, Stenography and all branches of office work will be taken up, so that those taking a course will be fully qualified to take a place in an office. Quite a number have decided to enter the course of studies, but there should be a very large class as the need for assistance in business places will be very great. The courses will be under the personal supervision of the principal, C. A. Fleming. Those interested should write him for particulars.

"I Am Afraid to Quit Advertising!"

ADVERTISING is not only the greatest business of the present day—it is an absolute necessity for twentieth-century business, declared Hugh Chalmers, head of the automobile company which bears his name, in a recent address before members of the Los Angeles Advertising Club and several hundred business men of that city. "I advertise because I have to—not because I want to. Advertising increases my sales in such a fashion that I simply cannot afford to be without it. The only man who can't advertise is the one who has so much business he can't handle it, or the man who has so little business it isn't worth his while. None of us are in the first class, and none of us will admit that we are in the second. I once asked Gerhard Mennen if he believed his advertising was successful—if he thought it was worth doing. He was then spending $850,000 a year. He told me he didn't know whether his advertising was successful or not. 'I will tell you how it is, Mr. Chalmers,' he said. I was running a retail drug store and an advertising man came and said if I would advertise in the town papers I would do more business, and I advertised and I did more business; and they came to me and said if I would advertise all over the State I could get business all over the State, and I advertised and I got the business; and they told me to branch out into New York State and Pennsylvania and I would get more business, and I did, and they were right; and I have gone on from year to year doing more advertising and getting more business, and I will tell you the truth—I am afraid to quit!'"

CROSS PURPOSES

I.

"All women are match-makers—some for themselves, and the rest for other people," said Mr. Francis Leicester. He stood on his own hearth-rug, with his back to his own chimney-piece, and surveyed the subject comprehensively from that advantageous position. And he was entitled to have an opinion of his own about it, for he was nearly three and twenty.

Two ladies were present. "Which am I, pray?" said the younger, instantly accepting the challenge. She looked up at the speaker with great bright brown eyes, like those of some sylvan creature. "Which am I—for myself or for other people?"

Frank laughed, and turned away a little, gazing at a golden effect of September sunshine on an old family portrait. "Oh, I am not going to be personal," he said; "you don't catch me so. I mean women in general."

"Oh, women in general! I don't care for women in general," said Miss Vivian; "and I don't much believe that anybody else does."

"I may say what I like, then?"

She nodded gravely. "Yes; on the understanding that it doesn't apply to anybody in particular."

"I'm afraid, perhaps, that won't be very interesting," said Frank, doubtfully.

"I'm quite sure it won't be; it makes me yawn only to think of it."

"But this does apply to somebody," said young Leicester's mother, smiling from her easy-chair. "Frank means me. Whenever he wants to make rude remarks about anything I do, he always calls me women in general. But this time he ought to be ashamed of himself, for—thank goodness!—whatever I may be, I am not a match-maker."

"Say that again!" Leicester exclaimed. "To-day of all days!"

"Well, I am not!" she repeated, firmly. "I don't want to make a match of it, I'm sure. Only it seemed hard that they shouldn't meet somewhere and have another chance."

"Just so," said Frank. "Let's hope they'll profit by it. I should think they might know their own minds by now; they are getting rather elderly, these lovers of yours, aren't they?"

"Elderly—well, they are not so young as Tiny here; but they are a good deal younger than I am. I don't see why they shouldn't have their feelings as well as other people."

"Oh, I've no objection," said Frank, with his hands in his pockets and his chin a little higher than usual. "If I wanted to make a match, it should be a new one while I was about it, not a rechauffe affair like this. But that's your concern, and I'm sure I wish you all success. Give them their wedding breakfast, if you like. I'll throw old shoes after them, and go in for all the rest of the foolery with the greatest pleasure." He turned to Tiny Vivian. "Will you be bridesmaid?"

Tiny nodded. "If it's a pretty dress."

"That's settled, then. You shall support the elderly bride; I'll be best man, and my mother shall be the rest of the affectionate relatives. Why, we can do it all in the family! No, though! who's to give her away? The best man can't, can he?"

"It doesn't sound quite proper. I wouldn't have the best man give me away," said Tiny.

"Better have the best man to take you," Frank suggested. "Well, it's awkward, but for such a little amateur performance I think I might double the parts."

"Couldn't you manage a slight change of costume as you dodged from one side to the other?"

"Do not be so silly," said Mrs. Leicester. "And do remember that it is a secret—that nobody knows anything about this old love affair. It is quite a secret."

"You hear?" said Frank, turning his head a little, and looking down at Tiny.

"I don't see why you say 'You hear?' to me. I'm sure you're quite as bad or worse," said the girl, smartly.

"Oh, but it isn't that. I wasn't doubting your discretion or my own; but I thought you might have a few spare secrets about you, and not have known where to put them for safe keeping. I wanted you to observe that you might bring them here."

"Now, Frank, you know I always do keep secrets," said his mother. "I shall keep this one," she added, virtuously. "I'm only afraid you and Tiny won't."

"I should keep it better, I think," said Tiny, "if I knew a little more about it. One is so apt to let out half a secret while one is hunting about for the other half—don't you think so?" She laid her hand coaxingly on Mrs. Leicester's. "Do tell me. If nobody knows it, how do you know it?"

"My sister told me—my dear sister, who is dead," Mrs. Leicester replied, in a slightly altered voice. Tiny's brown eyes dilated for a moment, and the corners of her eager, smiling mouth went down a little. It was just the attention which any mention of the King of Terrors ordinarily receives in the course of conversation. "But there's hardly anything to tell," the elder lady went on; "Caroline knew something of young South when he was really little more than a lad, and he liked to talk to her about Miss Fairfax. It was quite a boy-and-girl attachment, you know; I don't think it was ever allowed to be a regular engagement; but Caroline used to tell me about it till I felt as if I knew him. She said it was quite touching to see how the young fellow worshipped the very ground Mildred Fairfax trod on. And then he got his commission, and was ordered off to India. Oh, it's a long while ago! I remember Caroline coming in to tell me that she had just said good-bye to him, poor boy."

"He went away," said Tiny. "Yes, but why didn't they marry afterward?"

"Well, I don't know. After Caroline died, I never heard any more about them. But when Mildred Fairfax was four or five and twenty she married young Austin, and he was a friend of my husband's; so I saw something of her then, of course. We gave them a pair of candlesticks, pink and gold, very pretty; Mr. Leicester bought them in Paris. But I suppose they would be quite wrong now."

"Never mind; most likely they are broken," Frank suggested, in a consoling voice.

"It was Miss Fairfax who didn't wait for Mr. South, then?" said Tiny, pursuing the story. "And did he get married, too?"

"Oh, no; he never married. He wasn't in the army long; he sold out, and went to live with an uncle, who died some years ago, and left him a nice little property. No, he never married."

"Why didn't she wait for him? I shan't like her! Was Mr. Austin rich?"

"Pretty well, I think. He was a barrister, but he had money of his own. She is left very well off altogether. But I had quite lost sight of her for a long time till we happened to meet at the Stauntons' place a month ago, and I asked her to come and stay a few days. That's all."

"I shan't like her," Tiny repeated, softly. "But you haven't accounted for Mr. South, now," she persisted, with pitiless interest.

"Oh, that was rather funny; it was at Mr. Lane's—Minna Wilkinson she used to be. Some one spoke of Mr. Gilbert South, and I was curious. I asked to be introduced to him, and we had quite a long talk about poor Caroline and old times. Wasn't it odd I should meet him just after I had seen Mrs. Austin again? He mentioned her, and told me he used to know her, and began to ask so many questions that I invited him to come and meet her here. And he jumped at it—quite jumped!" said Mrs. Leicester, sinking back.

"He is in love with her still," said Tiny, pensively; "but she doesn't deserve it."

Frank settled his shoulders against the carved wood-work of the chimney-piece. "But how long ago is it since these young affections were blighted?" he inquired. "That's what I want to know."

Mrs. Leicester sat pondering the question. "I don't quite know," she said. "What year was it that young South went out to India? I could find out—I must have got it down somewhere, for it was just when you had the measles."

Frank uttered a very impatient ejaculation. "I wish to Heaven there was something you couldn't calculate in that fashion!" he said. Then he began to laugh, and turned half apologetically to Tiny. "Haven't you noticed? My ailments, whooping cough and mumps, and that kind of thing——"

"Frank, you never had mumps! You are thinking of——"

"—have infected all history. In fact, nothing has happened but my ailments ever since I was born. Ask my mother."

Mrs. Leicester, who had risen to take her knitting from the table, laid her hand on his sleeve. "They haven't been very bad, luckily," she said, looking up at his handsome, healthy face.

"If they had been, the world would have come to an end, wouldn't it?"

"Yes," she said, "it would—for me."

Frank bent his head and touched the smooth forehead with his lips. "For sentimental folly," he remarked, as he disengaged himself, "there is nothing like—like—women in general! Well, good-bye for the present."

"Where are you going?"

"Why, your superannuated lovers can't be here, either of them, for the next hour, and I promised Huntley I'd go and look at those cottages by the river they say ought to come down. It's a shame to spend such an afternoon indoors." He looked at Tiny. "Won't you come, too? You haven't had a walk to-day."

"Not had a walk! Well, you were playing lawn-tennis for hours—I should like to know what you call that!" Mrs. Leicester exclaimed.

"I call it lawn tennis," said Frank.

"It wasn't a walk," Tiny chimed in. "I'll get my hat; I should like to go." She was at the door in a moment, looking back with an eager, glowing little face as Mrs. Leicester called after her, "Mind you are not late coming home."

Frank Leicester was a fine young fellow, good-looking, good hearted, good-tempered, and the owner of Culverdale Manor. Had he described himself, he would have given that last clause the foremost place. He was intensely conscious of the fact that he was a landed proprietor, and family tradition had impressed him with the belief that Culverdale Manor, taking it altogether, was the most desirable spot on the surface of the globe. Any trifling drawbacks were honorably disposed of in the limitation "taking it altogether." Frank could not part himself in his own mind from the estate, which had belonged to the Leicesters for so many years. He was young Leicester of Culverdale, and, if he had not been Leicester of Culverdale, he would hardly have known what he was or what he could be. It may be questioned whether it would have been possible to make provision for Frank anywhere else in the universe. It would certainly have been difficult. In his own house, on his own land, or in any company where there was the requisite knowledge of the importance of Culverdale, he was fearless, outspoken, and perhaps a little conceited, with the happy and harmless conceit of a young fellow who has been petted all his life, and thinks the world at once better and easier to deal with than most of us find it. But in any society where Culverdale counted for nothing, he would have been shy and humble, with a very moderate opinion of his own abilities. Briefly, it may be said that Frank was Culverdale. It was a prosperous, well-managed, wealthy, and sheltered estate, beautiful after a certain trim and English ideal of beauty, but with nothing wild or original about it. It was just so much placid contentment lying in a ring fence. Frank was one with Culverdale when Culverdale was at its best, with the airy and hopeful freshness of spring about it, and the beauty of promise in copse and meadow. Whether he would ever be one with Culverdale when it was at its worst, an expanse of sodden and heavy acres lying drearily under a dull November sky, was a question which might suggest itself to a chance observer more readily than to those who knew and loved him as he was.

Perhaps it is unnecessary to say that Frank was essentially a country gentleman. There was a pleasant harmony between the young squire and his surroundings which would demand a pleasant word to describe it. It is true that he had traveled as much or more than his neighbors, making the most of a limited knowledge of that tongue which is neither English nor French, though it has affinities with both those languages. The fact that Culverdale was not much known on the Continent did not depress Frank. He was sorry for the natives of other lands (comprehensively described as "foreign beggars"), who, owing to misfortunes of birth and training, could not appreciate the position he held at home. As he felt himself unable to explain it with any degree of precision, he acquiesced in their ignorance with the good-humored tolerance of a young prince in disguise. He had read his Murray in a good many historic localities, could find his way, with a sense of old acquaintance, through the streets of Paris, and would have been greatly surprised if any one had told him that he was more countrified than his cousin Tiny Vivian, who had never crossed the Channel and had only enjoyed an occasional week in town. It was true, nevertheless. Tiny, with her bright, innocent brown eyes and eager youthfulness, was so evidently undeveloped that it was impossible to classify her. The budding plant might open in the old garden where it had grown, or might be transferred to a conservatory to blossom more delicately there. But Frank had carried that slight rusticity of his to two or three European capitals, and brought it back to the peaceful English home where the rooks were cawing in the elms outside his windows, and the doves cooing in the tangled copses.

Mrs. Leicester went back to her easy chair when Frank and Tiny had left her that afternoon, and gave herself up to drowsy meditation. "A match-maker, indeed!" she said to herself, as she leaned back, suffering her knitting and her plump white hands to lie idly in her lap. "As if I shouldn't make a match for Frank, if I did for anybody! And no one can say I ever tried that." It was quite true. Mrs. Leicester had perceived that important young men were fatally apt to fall in love in a wrong, or, which was much the same thing, in an eccentric fashion, and she had determined that if Frank would but choose some one fairly unobjectionable she would ask no more. Hitherto, in spite of many little flirtations, he had escaped the snares laid for him at garden parties and county balls, and had returned from all his wanderings apparently unscathed. So far as he showed any real preference it was for Tiny Vivian, who received his attentions in a very guileless and simple manner. It would be great promotion for Tiny to be mistress of the old Manor house, which was a paradise to her girlish fancy, but Frank's mother was quite ready to welcome here there, and was very good meanwhile in the matter of invitations. Mrs. Leicester was an amiable, kindly, easy-going woman, and was really fond of the girl, yet in her fierce motherly fondness she would have sacrificed her any day, body and soul, for Frank. Tiny must take care of herself. If Frank wanted her, well and good, but if the young prince should chance to discover a more suitable princess elsewhere, his little cousin must go back to her own people, heart-whole or heart-broken as the might chance to be.

Mrs. Leicester's thoughts turned from Frank and Tiny to her expected visitors, and drifted idly in the past, to which they belonged. How well she remembered the dull autumn afternoon when Caroline came in to tell her that Gilbert South was gone, and how he had done his best to preserve a manly demeanor to the last. "Poor boy! poor boy! I only hope Mildred Fairfax will be true to him," said the kindly, sentimental Caroline, while her eyes filled at the thought of his sorrow. The sisters were excited over the love story, but naturally it failed to interest the fretful little tyrant who had the measles. Poor Aunt Carrie had to wipe her eyes and relate a wonderful story about soldiers who went away in ships, but who were all coming home again very soon. Mildred Fairfax was not required in Frank's version of the romance. Aunt Carrie told no more stories; she was dead before the young lover reached India; and Mrs. Leicester, looking back across the long years which parted her from her favorite sister, a sad pleasure in taking up the unfortunate love story of whose earliest beginning she had been the confidante. She had a vague feeling that it might please Carrie if she could give Gilbert South a chance of being happy after the fashion that Carrie had planned so long ago. It was a late and unsatisfactory conclusion, perhaps, yet the best that she could see, and there was a sentimental charm about it which appealed to Mrs. Leicester's easily touched feelings; so she sat in her easy-chair, thinking it all over, till the figures of the old story—Caroline, Gilbert South, and Mildred Austin—came and went in something of a confused and softened vision before her half-closed eyes, while the window near which she sat became a great sunset picture of darkly towering trees and yellow sky. The sound of wheels passed through her pleasant dream, which was hardly so much dispersed as a little more defined when Mr. South stood on the hearth-rug where Frank had stood a couple of hours earlier. He spoke in soft, deliberate tones, and looked round the room with a casual inquiry in his glance.

Mrs. Leicester made an effort, and was glad that he had a pleasant drive. "You find me all alone," she said; "Frank is out somewhere, and so is Miss Vivian, who is staying with me. They were playing lawn-tennis all the morning, and they have been walking all the afternoon."

Mr. South expressed his admiration of such unflagging energy. "It wouldn't suit me," said Mrs. Leicester, candidly; "but I have a sort of recollection that when I was young I used to think I would run about all my life."

"Ah, when one was young!" said Gilbert South, with a smile. "And so you are all alone?" he repeated, still looking round with questioning eyes.

Mrs. Leicester awoke to a sudden comprehension of her companion's anxiety. "I shouldn't have been alone long, even if you hadn't come," she said. "I am expecting Mrs. Austin—I told you she was coming, if you remember. She was obliged to put her visit off for a few days, and she arranged to come this very afternoon. In fact, I have sent to meet her."

"How does she come, then? by a later train? You need not have sent twice, Mrs. Leicester—I would have waited."

The Texas Legislature recently passed a bill appropriating $10,000 with which to buy the land on which stood the first State Capitol, at Old Washington, Washington County, Texas.

SUNDAY SCHOOL LESSON

April 23, 1916. Lesson IV.—The Risen Christ—Easter Lesson.—I. Corinthians 15: 1-28.

Commentary.—I. The resurrection a fact (vs 1-8). 1. moreover—Paul had considered several subjects pertaining to the church at Corinth, and now he proceeds to a weighty and effective discussion of the resurrection. brethren—By this affectionate term he addresses the whole body of Christians at Corinth. I declare .... the gospel—The apostle was bringing no new religious system or philosophy to the people, but the same good tidings that he had previously presented to them, Christ's life, his sufferings, his death, his resurrection, and the present and eternal deliverance thereby procured for man. which I preached—During his extended labors in Corinth which also ye have received—The Corinthian Christians had become established in the truths of the gospel, not merely in an intellectual way, but also, and chiefly, through an experience in the grace of God. 2. saved—Saved from sin and from its consequent punishment. If ye keep in memory—"If ye hold fast."—R. V. Their salvation was conditioned upon their constant obedience to the preaching which they had received from Paul. It was not enough to remember it in the sense of Practising it constantly. This involved an active, steady faith. unless ye have believed in vain—They could "have believed in vain" only by failing to grasp the spiritual import and benefit to them of Christ's resurrection or by believing in Christ's resurrection if he did not arise from the dead. Their changed character and life bore evidence to the fact that they had not believed in vain." 3. I delivered ... that which I also received—He does not state the source or sources from which he received the truths which he uttered but it is certain that he was in some measure instructed through his intercourse with the disciples. See Acts 9:19. The expression "first of all" implies that the truths about to be revealed were considered of first importance as foundational to the Christian system. Christ died for our sins—As a sacrifice for our sins; to make an atonement for our sins. The vicarious nature of Christ's death is set forth. He died for us. according to the scriptures—Some of the scripture passages declaring the sacrificial death of Christ are Psalms 22; Isaiah 53; Zech. 12:10. The Old Testament scriptures are doubtless intended, since only portions of the New were then written. 4. he rose again—The tense of the Greek verb indicates the fact that he not only arose from the dead, but that he still lives. according to the scriptures—Psa. 16:10; Isa. 53:10, Hos. 6:2; Jonah 2:10. This last passage having been applied to the resurrection of Christ by himself (Matt. 12: 40; 16:4) may not unnaturally be conceived to be among those Paul had in his mind here.—Cam. Bible.

5. Was seen of Cephas—From a formal statement of the fundamental truths of his preaching, Paul proceeds to mention six distinct and well-authenticated appearances of the risen Christ. Cephas is the Aramaic form of Peter's name. The appearance of Jesus to Peter is spoken of in Luke 24. 34. Then of the twelve—See Mark 16. 14. Paul speaks of the group of disciples as "the twelve," although Judas was dead, this being the original number. 6. Five hundred—Jesus made an appointment to meet His disciples in Galilee after His resurrection (Matt. 26. 32; 28. 10). "What a remarkable testimony is this to the truth of our Lord's resurrection! Five hundred persons saw Him at one time; the greater part of whom were alive when the apostle wrote, and he might have been confronted by many, if he had dared to assert a falsity." Clarke. Fallen asleep—This is an expressive image of death. The fact that Moses and Elijah appeared on the Mount of Transfiguration long after they had died is proof that the soul is not asleep during the interval between death and the resurrection. "This is the usual expression employed in the scriptures to denote the death of saints. It denotes, (1) the calmness and peace with which they die, like sinking into a gentle sleep, (2) the hope of a resurrection, as we sink to sleep with the expectation of again awaking."—Barnes.

7. Was seen of James—The prevailing opinion is that it was James the son of Alphaeus, or James the Less. The particular occasion to which reference is here made is not mentioned. All the apostles—The passages, Luke 24. 50, 51 and Act 1. 4, seem to show the occasions upon which the apostles last saw the risen Lord. 8. Was seen of me also—It is not stated nor understood, that Paul saw Christ before his ascension, but that Christ appeared to Paul on that memorable journey to Damascus (Acts 9. 1-9). Paul was, in part at least, prepared for apostleship by this view of Christ and conversation with Him. Born out of due time—He was not associated with Christ during our Lord's earthly ministry. It is probable that he was not converted until six or eight years after Christ's resurrection, therefore he did not become an apostle in the way, nor indeed in the sense, that the others did. The form of expression here used is believed by some to mean that the apostle felt his utter unworthiness to receive a revelation of Christ, for he had been a bitter persecutor of his followers. The statement in the next verse carries out this idea. He acknowledged that it was all through the divine mercy that he was favored with a view of Jesus.

II. The resurrection preached (vs. 9-11). 9. The least of the apostles—While the other apostles were following Jesus and being instructed by him, Paul was receiving instruction from Jewish rabbis. While they were declaring the truths of the gospel he was persecuting Christ's followers. He missed the blessedness and honor of long-continued companionship with Jesus, hence was "the least of the apostles." Not meet—Not worthy. Because I persecuted the church of God—Paul gives this as a reason why he was not worthy to be called an apostle. 10. By the grace of God—God had mercy upon this persecutor, saved him, and made him a chosen vessel to carry the gospel to the Gentiles. Not in vain—He obeyed the Lord and began the work committed to him. Labored more abundantly than they all—There was not one of the eleven apostles that labored so sedulously and continuously as did Paul. He is willing to admit his inferiority to the other apostles, and gladly attributes what he is to the grace of God. Yet not I—His deep humility urges him to give God all the praise for what he was enabled to do. 11. Whether it were I or they—Whether the gospel was preached to the Corinthians by Paul or by the other apostles, was not so much to be considered as the nature of the truths presented. So we preach—The truths mentioned in verses 3-8. So ye believed—The Christians at Corinth had accepted the truth, and had been made new creatures in Christ Jesus. The gospel had passed over into their hearts and lives. Christ's resurrection became to them an assured fact. "The design of Paul is to affirm that the truths which he here refers to are great, undeniable and fundamental doctrines of Christianity; that they were proclaimed by all the ministers of the gospel, and believed by all Christians. They were, therefore, immensely important to all, and they must enter essentially into the hopes of all." It meant much for either Jews or Gentiles to believe in Christ. It involved the rejection of their previous beliefs. To the Jew it meant to accept the lowly Nazarene as the Messiah. To the Gentile it meant to turn away utterly from idolatry.

III. Victory over death (vs. 12-28). False teachers had attempted to draw away the Christians at Corinth from the true faith. They had attacked the doctrine of the resurrection and Paul defended the truth with vigor and candor. If Christ did not rise from the dead, the hopes of the Christians were baseless. They who professed to be saved from their sins were still bound by sin. The apostle rises to a pitch of triumph when he says, "But now is Christ risen from the dead, and become the first fruits of them that slept." Jesus lives to comfort His followers and to put down all His enemies. Jesus reigns and will continue to reign until even the last enemy, which is death, shall be conquered, and God shall "be all in all." The hope of this glorious consummation was an inspiration to Paul in all his ministry, as it is to all of God's people everywhere, in all ages. There are trials and rebuffs that afflict the Christian, but he is certain of his present acceptance with God and assured that he will at some time enter into the presence of God to go no more out forever. He is glad to join with the apostle in his words, "Thanks be to God, which giveth us the victory through our Lord Jesus Christ" (1 Cor. 15:57).

QUESTIONS.—By whom were the words of the lesson written? To whom were they addressed? What were the principal truths that Paul preached to the Corinthians? What Old Testament scriptures declare that Christ should suffer death for our sins? Quote an Old Testament prophecy that Christ should rise from the dead. Name the six appearances of the risen Lord mentioned in the lesson. Where did Paul rank among the apostles? Why? Where did he rank among them in labor?

PRACTICAL SURVEY.

Topic.—Established truth.
I. The basis of Christianity.
II. The basis of living faith.

I. The basis of Christianity. In this chapter Paul writes as theologian of the resurrection. In opposition to the false teaching which had crept into the Corinthian church, the apostle maintained that the fact of Christ's resurrection was the basis of Christian faith, hope and practice. The results of false teachings were obvious to Paul. In his exposition and defence of the resurrection he asserted it as an established, significant and influential fact. He preached it convincingly, scripturally and humbly. He laid stress upon the death of Christ as the propitiation for sin, and on the resurrection as the demonstration of the efficacy of his death. The resurrection was the disputed and most vital question. The witnesses of the resurrection were sufficiently numerous and diverse to meet the severest test of its reality. Paul put his own personal veracity and that of his fellow apostles into direct issue. The denial of the resurrection involved the falsity of the witnesses. By his resurrection Christ proved that He was the Saviour, foretold in prophecy, that his atonement for sin had been accepted by the Father, that the work of redemption was completed, and that death, as well as sin, was a conquered enemy. Therefore Christ's death and resurrection became the primary teaching of Christianity, and the absolute proof of immortality. The pledge to the church by the resurrection of Christ, is the resurrection of all her members to fellowship with Christ in glory and a blessed immortality. The misery of which Paul spoke was that of a tremendous disappointment.

II. The basis of living faith. In this chapter we have plainly the epitome of the gospel. We have clearly Paul's ideas of evangelical conversion. Here history is bound up with theology. The story of Christ begins and closes with the supernatural, the incarnation and the resurrection. From the first Paul put forward the resurrection of Christ as an essential and fundamental part of the gospel he had received. It was a matter of grateful remembrance to him that he was no longer a persecutor and blasphemer against his Lord. More than ordinary means had been necessary to reconcile Paul to the doctrine of the cross. Since that great event his whole mind was occupied with the two inseparable facts of Christ's death and resurrection, a death "for our sins," vicarious, expiatory, propitiatory. On no other basis could Paul regard the gospel as good tidings. Candidly he acknowledged the circumstances connected with his apostleship. He ascribed all to God's grace, nothing to himself. As he became spiritually great, he had keener regret for his former failures. The Spirit of God gave character to all his activities. Paul's self-abnegation was as genuine as his individuality. He acknowledged that the gifts bestowed upon him had been diligently and faithfully employed. His opportunities and endowments had all been used in such a manner as to have them continued and increased. He was a man of transparent honesty. The Corinthians needed to hear Paul's teaching again and again. Because of some of the heresies which had crept in, some of them could not adopt it in all its integrity. Paul sought to teach them the way of life more perfectly. He never wavered in his declaration that his Lord had risen from the grave. The real triumph achieved in Christ's death was manifested in His resurrection. A denial of this doctrine meant the rejection of the gospel. To destroy the foundation involved the overthrow of other truths which Paul had set before them as a part of Christian doctrine. The resurrection is essentially a Christian truth. Unless the Corinthians continued to embrace it, they could not find salvation through Christ, neither have ground for hope for another and higher life. The resurrection was the confirmation of all Christ's promises as the author of man's salvation. He shall continue as Mediator at the Father's right hand until the redeemed are admitted into full access to their Maker.—T. R. A.

Perfect Pitch.

A fairly large number of people are gifted with a good ear of music, and their friends think it is quite wonderful that they are able to play or whistle tunes which they have heard only once.

But this gift, however remarkable it may seem, is by no means extraordinary or exceptional, especially when compared with the possession of what is called an "ear of absolute pitch." This means that the person possessing it is able to stand away from the piano and tell you what note you are playing or in what key. One well known lady pianist is able to read over the score of a piece of music in the train or omnibus, leave the book behind her and yet play the whole piece through by memory when she reaches home.

Perfect pitch is a gift to some people, but it can be acquired. Indeed, many authorities say that to be a really great musician this power must be possessed.—London Answers.

Made the Enemy Furnish Bullets.

When the British were endeavoring to subdue the Maoris they were long the victims of a ruse that enabled the natives to replenish their stock of bullets at the expense of their enemies. The Maoris would build a dummy and expose it from behind a tree near the British lines. Immediately the British would blaze away at it. Behind the dummy the Maoris would have constructed an earth bank and from this they would later dig their supply of bullets to send back to the British.

RELIGION OF FEAR

A recent novelist speaks of cathedrals as "masses of stone frozen together by Fear." This is by no means a truthful description of what they represent, for many of them are erected through love reverence and adoration, but that such an expression should be used shows in what direction the thought of some people runs. Christianity, they say, is a religion of Fear. That there is much truth in this cannot be denied, that is if we refer only to Christianity of the pulpit. It is said that ours alone of all the world's religions inculcates a fear of death. The God of the pulpit is usually angry. We are advised to live in fear of Him. There are those who believe that the moment a child is born it is subject to the wrath of Omnipotence, and that only by the performance of a certain rite by others can it be saved from eternal punishment, and the same people, who tell us this, also tell us that God is Love. The incongruity of such teachings would be amusing if it were not productive of much harm. But we may be asked how we can explain certain passages in the Scriptures unless we hold that God is to be feared. We do not see the least necessity for explaining them, but a few of the texts most frequently quoted by the teachers of Fear may be referred to. David and Solomon both wrote "the Fear of the Lord is the beginning of wisdom." Some translators are of the opinion that the expression "Lord" where it is used in the Psalms sometimes means King David himself. Take for example the sentence, "The Lord said unto my Lord, sit thou at my right hand until I make thine enemies thy foot-stool;" but here is no necessity for following this line of thought, and we may accept the Fear of the Lord as meaning the Fear of God. Suppose one should say "the Fear of the Law is the beginning of citizenship." The statement would be true enough, but no one would contend that good citizenship consisted of being afraid of the laws. Fear may do for a beginning, but it is not the consummation of either wisdom or citizenship. But it may be said that we are told that "God is a consuming fire." This expression occurs in the address delivered by Moses to the Israelites shortly before his death, and is used to emphasize an admonition against idolatry, a mere figure of speech employed in an oratorical climax, and meaningless if taken literally. Again we read in the Epistle to the Hebrews: "It is a fearful thing to fall into the hands of the living God." This expression that to die unrepentant is an awful thing; but if the chapter in which this sentence occurs is read carefully, it will be seen to have reference to the immediate expected coming of Christ to judge the world. Very much of the misconception of religion arises out of the selection of isolated texts of Scripture, and interpreting them quite without regard to their context. The consequence of this is that figures of speech are taken literally, similes are interpreted as statements of fact, and flights of oratory are regarded as Divine statements of fundamental truth.

Another reason why fear is given a prominent a place in religious teaching is because many teachers think that everything stated in the Old Testament has a direct bearing upon daily life. To the Jews Jehovah was not the only God, but merely the greatest among the gods. Thus we read in the Book of Chronicles that Solomon said: "Great is our God above all Gods." Similar expressions occur in the Psalms. Unless we keep this fact in mind we will miss the real meaning of many things in the Old Testament. This belief in many gods is recognized in the first of the Ten Commandments: "Thou shalt have no other gods before Me," and while it is perfectly true that the whole Jewish religion was monotheistic, yet the Old Testament is full of evidence that the Jews believed there were more gods than one. It is therefore not at all unreasonable that these people should deal with their Deity upon a plane which admits of comparisons. But Christianity does not concede the possibility of more than one Deity. With the Christian Church, God is not simply greater than other gods, but stands alone in unapproachable omnipotence. To the Jews Jehovah was not in any way different from man, except in degree only. They assigned to Him absolutely the same feelings as they assigned to man in eminent positions. He was easily made angry; He was jealous of other gods; He was easily appeased; He was ruthless when [illegible]; He repented of what seemed to be mistakes. A religion based upon the Old Testament conception of Jehovah might be powerful, but it would not be Christianity.

It is worth bearing in mind that to fear and to be afraid may be very different things. A man may fear danger and therefore [illegible] it. To be afraid of danger may mean to be frightened at it. No good Christian ought to say he is afraid of God, although in one sense he may very rightly fear Him. He may fear Him because he knows that God is inseparable from His laws and he [illegible] he knows that offence against these laws is to incur penalties from which there is no escape by mere goodness alone. He may fear God because he realizes that, if he gets out of spiritual touch with Him, his cause is a very bad one; but he may not be afraid of Him or believe that he will be the object of some special [illegible] of Divine anger.

We ought not to have any fear of death, except such as arises from the natural desire not to close a period of existence in which there may be much happiness. A strong, vigorous man in the full enjoyment of his mental powers and surrounded by those he loves may very naturally shrink from the thought of death. There may also naturally be a fear of death arising out of the dread of the unknown; but there is no greater safety in life than in death from the consequences of our misdeeds. We do not, by reason of the process called death, come specially within the reach of the Almighty. "Perfect love casteth out fear." If we attune our lives to the harmony of love, we may face either world without fear.—Victoria Colonist.

SUNDAY AT HOME

PERSEVERANCE.

He who would endless glory reap,
Must here the word of patience keep;
That word which gives the eye to see,
The glorious harvest yet to be.
The husbandman, his seed who sows,
Must wait with patience while it grows;
And he who would the oak uprear
Must cherish hope from year to year.

The architect who lays the while
The basement of a lofty pile,
By slow laborious toil alone
Can reach the turret's topmost stone.

Meek pilgrim Zionward! If thou
Hast put thy hand unto the plow,
O look not back, nor droop dismay'd,
At thought of victory delay'd.
Doubt not that thou, in season due,
Shalt own His gracious promise true;
And thou shalt share their glorious lot
Whose doing well hath wearied not.
—Bernard Barton.

THROUGH ALL THE AGES.

Through all the ages men have regarded themselves as being born only that they might die. That has always been the great melancholy plaint of life; that has been the distress which has always lain on the soul, even in its moments of happiness. This being so, is there not something great and stirring in the fact that Jesus takes up this word of death and turns it into an assurance of victory? Jesus takes the dirge and turns it into a pean; makes it the very assertion of the glory of his existence on earth. "I was born," we hear him say, "for a great, a noble, and a splendid purpose, that I might through death destroy him who hath the power of death—that is, the devil."

There is something noble in the way in which Christ thus takes these words, "We are born to die," so full of distress and pain on our lips, and turns them into the psalms that ring through the ages and glorify the world; in the way in which he takes the very tears and lamentations of our human life, and shows how at the very heart of them are victory and joy.—Phillips Brooks.

PRAYER.

It is difficult, says Richard Baxter, to distinguish between natural and supernatural grace; but it was to be done, for "Ye must be born again." It is as natural for a man to pray as it is to breathe, but the supernatural gift of prayer is rare. It belongs to the regenerate, it is the atmosphere in which it lives. It is a distinct personal gift, and is never given in the bulk, but to each individual. It contains the elements of companionship, mutual ownership, and communion.

It is not a seed or germ, it is a completed whole (holy), and as Adam never was an infant, so this breathing personality is like the second Adam, the Lord from Heaven, not a fragment, but a whole being. First it is conscious of emptiness, then of fulness. "I was brought low, and He helped me."

The fulness of the Godhead dwelt in Christ bodily, and all that fulness is for the believer, for He gave Himself altogether for me. I live, not I, but Christ liveth in me. It is my joy to walk before the Lord in the light of the living. He is my companion in the path of life, we walk together, because we are reconciled, and He is not austere. So I tell Him all, get help in all. Give Him all and let not the shadow of an imagination come between us! "Shall I hide from Abraham the thing that I do?" The secret of the Lord is with them that fear Him.

When a well-tuned harp is touched by the hand of the skillful, there is music in the heart, and joy on the face, and beauty in the life, and a great reward in heaven. "I love the Lord because He hath heard the voice of my supplication."

"Walk about Zion, mark ye well her bulwarks." Has she ever been captured, is there any chance that she shall be destroyed? I the Lord do keep her day and night! When eyes are anointed with eye salve the chosen see, the want and the supply are in close proximity. We do not wait for months of harvest, but we reap and gather into barns. The river of God is full of water, His trees are full of sap, His hand is never empty. His people never see a sour day.

The doctrine of prayer is full of mystery, only a small part is revealed. The secret of the Lord is with them that fear Him, and He will show them His covenant, but they cannot show much of that very covenant, they often sail under sealed orders, and it is His delight to hide Himself. The experiences of the saints are like some money orders, not transferable. No two souls are alike, and no two experiences are alike. Some hearts are opened gently in the dark—others are blinded by the light above the brightness of the sun. Now He comes as the dew, at other times on the wings of the storm.

A praying soul learns to stand still and see the salvation of God, learns to be silent before God. In the houses of the tempest the voice is heard, "Peace, be still."

"Spirit of light Thou heavenly ray,
O come!
Thou touchest with Thy glory all we see
Till common things are quick with mystery,
And nothing is too mean to be divine.

Good is in all; eyes touched with love can see
More than was dreamed of in the world before,
The undiscovered goodness of our life,
The unpetitioned blessings of our way."
H. T. Miller.

"Sages Are Not Really Wise."

Sages are not really wise
Till they read in Folly's eyes
Lore that puts to rout their rules,
Wisdom that escapes the schools.

Tell me, Sages, what love is!
Silent? But what fool would miss
Kiss of laughter, glance or sigh,
Waiting for your slow reply?

Sages, tell me, what life is!
While you prate of "joy" and "strife,"
Mumble, definitions give,
Fools like me rejoice to live!

While you labor, dig and seek,
Dull of eye and gray of cheek;
While you study, delve, explain,
Define, examine, think, refrain.

Ponder on the meaning of
Life and death and joy and love,
[illegible], reasons frame,
We folks are playing at the game!

Sects and sages are not wise,
Lacking wisdom to revise
All they've learned and taught in schools
By the bachelor of us fools!

HALF THE ILLS OF LIFE
Are Caused By CONSTIPATION.

When the bowels become constipated the stomach gets out of order, the liver does not work properly, and then follows the violent sick headaches, the souring of the stomach, belching of wind, heartburn, water brash, biliousness, and a general feeling that you do not care to do anything.

Keep your bowels regular by using Milburn's Laxa-Liver Pills. They will clear away all the effete matter which collects in the system and make you think that "life is worth living."

Mr. D. W. Watson, St. John, N.B., writes: "I have been troubled with constipation for the last three years, and during that time have tried several remedies, all of which failed to help me. A friend recommended Milburn's Laxa-Liver Pills, and after using three or four vials, I felt like a new man. I am now still taking them, and am positively sure that I am on the road to recovery. I strongly recommend Milburn's Laxa-Liver Pills."

Milburn's Laxa-Liver Pills are 25c per vial, 5 vials for $1.00, at all drug stores or dealers, or will be mailed on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

FARM AND GARDEN

HANDLING YOUNG HORSES.

is natural for the colt to scare by when first driven away from This is not an act of meanness part, but more from fear that e sees may hurt him. To then ip and give the reins a jerk ng that young animal a bad le will associate the whip scare, and the next time he frightened there may be which the driver is unable to

st step is to give him a look carefully at this frightand as soon as he is conobject will not hurt him be no further trouble on The man who does not patience to do this should dertake the training of a colt. t advisable to lead him past that frightens him if it can be avoided, as it will make to be led past everything he like the looks of. It is posdrive him past almost anyhe is given a little time to t it.

ost dangerous scarey horse is at will whirl square around when frightened at someof him. Frequently in this gon is upset, the driver d the horse runs away. has acquired the habit round it is best to drive for a while with some l. Afterwards he should ions to some two-wheeled him carefully but firmly. orses, when they scare, try t to run away. They seem no attention to any bit, howere. When a horse is known that habit it should be a rule to allow an aged person, a helpe child, a timid man or a screaming man in the wagon, for their outould only make matters worse, case of a smash-up their helpe might prove serious.

away horses should never be without a severe bit, strong s, strong lines, strong hold-back and a stout rig. It is a misto take chances with such an under the imagination that one andle any horse, for he cannot. of real experience never makes

ally a man who can control and keep cool is able to cond keep down a horse. But men once become rattled the nohorse pricks up his ears and his gait, and gives a bawling, yell, will scare the animal badly as anybody else.

the driver can get the horse's ce, if he can get him to underthat nothing can hurt him so as he is held in by bit and lines, really wonderful what may be plished in the way of controlling the voice alone.

r all, everything depends on the If he has not patience, if he is ool-headed, if he has not suffiinterest to study the horse and t way to manage him, he will with poor success. Excitable, -tempered men are usually cowards. Such as these should never attempt to handle the unruly horse.

FARM NEWS AND VIEWS.

Spoiled silage may not seem to injure some farm animals, but it is dangerous to others, and has lost most of its good value for all. The loss results almost entirely from mould, according to C. H. Eckles, of the Dairy Department of the University of Missouri, and could have been prevented, although the only thing to do now is to study what has happened in your silo and learn how to do better next year. Unless the silo was sealed or feeding was begun immediately after filling, from six inches to a foot at the top is sure to be spoiled. It should be put where it cannot be reached by any farm animals. Lower down, the presence of spoiled silage always indicates the presence of air, as the moulds which give it the appearance of rotten manure could not work without air. The lack of sufficient water in filling is the commonest cause of the presence of air, but sufficient tramping to air-tight structure is also necessary. Red mould, which sometimes causes alarm, is no more dangerous than the less conspicuous forms which often pass unnoticed.

A very acceptable ration is used in the west by letting each animal have daily 25 pounds of corn silage and all the clover hay it will consume. A mixture consisting of 300 pounds of corn chop, 300 pounds of ground barley, 300 pounds of bran and 50 pounds of oilmeal will go very nicely with this roughage. Feed about one pound of this mixture for each three and onehalf pounds of milk produced.

A man may have an inexpensive cow stable, but if he keeps it clean, grooms and feeds the cows long enough before milking to allow the dust to settle, wipes the cows' udders with a damp cloth before milking, and handles the milk in a sanitary way in sterilized utensils, he can produce clean milk. This statement comes from a State agricultural college dairyman, and it's true.

Cows which produce 25 pounds of milk a day require 76 pounds or more of water daily, and instances are on record in which heavy milkers have consumed more than 300 pounds of water a day. This large quantity of water is necessary not only for the formation of milk, but also for the digestion and assimilation of the large quantities of food consumed, much of which is roughage.

It is not wise to permit cows to drink large amounts of ice-cold water, and in order to encourage them to drink a sufficient amount of water in extremely cold weather it is necessary to warm the water slightly.

One pound of rancid lard and half a pint of kerosene mixed thoroughly until a creamy mass is formed and rubbed with a cloth or bare hand, not too thickly, over the backs of sows is recommended as a protection against flies. About three-eighths of a pound is used for each full grown animal.

One of the methods of determining whether hay is fit to stack is to take a handful and twist it as hard as it can be twisted with the hands, and if no juices are forced out of the stems it is considered ready for the mow, as a rule. Where it is cured in the rock it should be spread out to the air and the sun from one to two hours before hauling to the barn.

A jack is harder to exercise than a stallion, but if you will give him a paddock about the eighth of an acre that he can be turned into (by himself, of course) he will keep in good health. Watch his feet; they are inclined to grow fast and the hind feet may get badly out of shape, if not looked after. Get a good blacksmith to trim them down—both front and hind feet—if they get too long, and let the jack go barefoot.

The increase in yield of crops from light application of manure, say six to eight tons per acre, is much greater per ton of manure applied than where large quantities are used at a single application, and the farmers who apply lighter applications at shorter intervals receive better results from a given amount of manure than those who make heavier applications at longer intervals.

When the pigs are from four to six weeks old they will begin to eat with the sows. They should be fed separately by penning off a small space on the feeding floor or hog lot where the young pigs have access to the feed. The feed should be given in a small trough, which can be cleaned easily before each feeding. The pigs may be given the same ration as described above for their mothers during the nursing period and continued on the same ration after weaning.

The business of farming at present demands the richest plant food at the least cost, plain food that will return the largest profits. Rich stable manure has neither an equal nor a competitor. It contains not only the plant food elements, nitrogen, phosphoric acid and potash that the high-grade commercial fertilizers possess, but at the same time excels them in vegetable material for making humus. Rich stable manure is acknowledged to be very efficient in promoting the work of bacteria so necessary in crop production. The manure from animals applied to soil improves the texture and mellowness, increases the water-holding capacity, promotes better aeration and increases the soil temperature. Its mechanical effect on heavy clay land is most beneficial, as here its use helps the close texture by loosening the packed soil grains and thus increases the productivity of the soil.

Healthy sows that have been properly cared for during pregnancy will have little difficulty at farrowing time. They should be housed in proper quarters and up to farrowing time have their usual feed. The period of gestation for swine ranges from 112 to 116 days.

Calls Them One of Her Best Friends

DAME BELANGER TALKS OF DODD'S KIDNEY PILLS.

Tells How They Cured Her Rheumatism and Made Her so Well She Could Work Without Fatigue.

St. Amateur, Gloucester Co., N. B., April 17.—(Special.)—Cured of rheumatism, from which she has been a severe sufferer, Dame Pierre Belanger, well known and highly respected here, is telling her friends that Dodd's Kidney Pills have made her well.

"I consider Dodd's Kidney Pills one of the best friends I have," Dame Belanger states. "I had rheumatism and and the pains in my limbs caused me a great deal of suffering.

"I took six boxes of Dodd's Kidney Pills, and they made me well. My pains are all gone, and I can now work without being fatigued. I will always keep Dodd's Kidney Pills in the house."

Dodd's Kidney Pills cure rheumatism because it is caused by sick kidneys. Rheumatism is caused by uric acid in the blood. If the kidneys are healthy and doing their full work they strain all the uric acid out of the blood, and there can be no rheumatism. Dodd's Kidney Pills always make the kidneys well. They take away that tired feeling by ensuring pure blood and good circulation.

SAUCE COMBINATIONS.

The Right Ones for Fish, for Flesh, for Fowl.

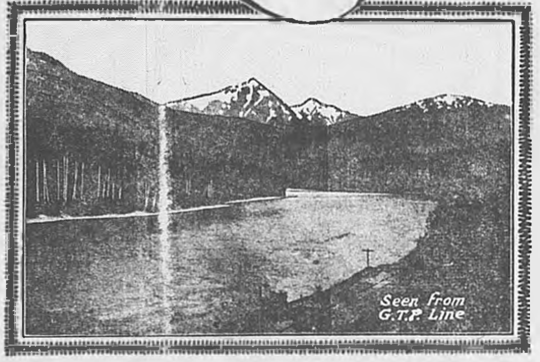
A well-made sauce is said to glorify any dish, but this depends to a great degree on the selection of a right combination. The sauce that enhances the flavor of fish may add nothing to meat. It is generally true that the combination, which seems to be no more than a mere custom of eating certain things at the same time, has in reality a hygienic reason for its long continuance. For instance, a meat like pork or a bird like goose, both require an acid sauce or adjunct because of the excess of fat.

For the benefit of the inexperienced a table with sauce combination is given:

Raw oysters, quartered lemon, horseradish sauce, tobasco.
Baked fish, drawn butter, Hollandaise sauce.
Broiled fish, Maitre d'hotel butter, sauce tartare.
Roast chicken, bread sauce, green grape jelly.
Roast turkey, cranberry jelly.
Roast goose, acid apple sauce, barberry jelly.
Fried chicken, cream gravy.
Roast duck, orange sauce, currant jelly.
Roast veal, tomato sauce, horseradish sauce.
Roast pork, apple sauce.
Roast lamb, mint sauce.
Roast beef, brown gravy, horseradish.
Roast filet of beef, mushroom sauce.
Roast venison, barberry jelly.
Roast quail, currant jelly, celery sauce.
Roast canvasback duck, black currant jelly, olive sauce.
Boiled mutton, caper sauce.
Boiled tongue, sauce tartare.
Corned beef, mustard.
Steamed fowl, celery sauce.
Pork sausage, apple sauce, fried apples.
Frizzled beef, horseradish.
Sweetbreads, sauce bechamel.
Lobster cutlets, sauce tartare.
Broiled steak, Maitre d'hotel.
Lamb chops, sauce bernaise.

Tell a girl she is a vision of loveliness, but never say she is a sight to behold.

MOUNT SIR ROBERT and BORDEN GLACIER



Seen from G.T.P. Line

From now on, while Canada endures, the name of its Premier, Sir Robert Borden, will be perpetuated in the topography of the Dominion. Thus decrees the Geographic Board of Canada, which has just officially adopted the name Mount "Sir Robert" to be applied to the beautiful snow-capped peak illustrated above. On the flank of the mountain is a great glacier, and this has been named "Borden Glacier."

This noble Mountain, whose glittering snow-capped crest rises sharply to a height of between eight and nine thousand feet, is situated 120 miles east of Prince Rupert, to the south of the Skeena River, and nine miles southeast from Doreen Station on the Grand Trunk Pacific line, and is in the heart of the British Columbia Coast Range.

Even on the route of the Grand Trunk Pacific, famous for its mountains, there are few more beautiful peaks than the newly named "Sir Robert," and while the pointed peak in itself is considered one of the most graceful and dignified in the neighbourhood, the huge glacier, fully a mile in width, lends it additional beauty and interest. This serried mass of frozen snow and ice—accumulating rocks, stones and earth as it moves slowly, inch by inch, down the side of the mountain—is apparently drained by a winding mountain stream which empties into the Skeena, and the great sweeping bend of this river, seen in the foreground of the picture, with a fine stretch of the track, indicates the view to be obtained from the railway line. Travellers on the Grand Trunk Pacific get the best view of this lovely peak when two miles west of Doreen Station.

Dynamite.

Dynamite, if carefully made and kept will not explode except by shock or a blow; hence a cap or detonator is affixed to a charge just before firing to set it off. Set fire in open air dynamite burns fiercely with a smoky flame, but does not explode unless several sticks are closely piled together or packed in a box. The most common cause of premature explosion of dynamite is separation of its nitroglycerin, slight friction or shock causing this to explode and, in turn, explode the dynamite. Separation of nitroglycerin usually occurs when frozen dynamite is being thawed out; hence so many cases of explosion by careless or ignorant persons who use a perfectly good stove in a course of instruction in how to handle dynamite. The force of a dynamite explosion is usually greatest downward. Thus a stick of dynamite exploded on a rock without being covered will shatter the rock, but will produce little effect in other directions. Like all explosives, dynamite just be enclosed by produce it pleasanter. Thes last day of the sometimes prepared in granular form for producing certain explosive effects, but its action is too rapid and intense for use in rifles or cannon.

The Coffee Cup in Persia.

The expression "to give a cup of coffee" has in Persia a somewhat ominous significance. This is due to the fact that the coffee cup is one recognized medium for conveying poison. Some years ago the governor of Aspania, having long been at daggers drawn with the chief of a powerful mountain tribe, determined in this way to put an end to all trouble. He professed to entertain a great degree of friendship and esteem for the chieftain and invited him to visit him at his palace. The chief unsuspiciously came, accompanied by his two young sons. For a week they were royally entertained. But at last one morning when the chief came into his host's presence he was coldly received, and an attendant stepped forward with a single cup of coffee in his hand, which he offered to the guest. The latter could not fail to understand that he was doomed. Preferring, however, steel to poison, he declined the cup and was thereupon, at a signal from his host, stabbed to death.

The moment of finding a fellow-creature is often as full of mingled doubt and exultation as the moment of finding an idea.—George Eliot.

At Twilight.

I love to sit by the embers
  As they sparkle, and fade, and creep,
While Twilight gathers her children
  And tucks them away to sleep.

When the sounds of Day are softened
  To a soothing, hollow croon,
Ere the reign of Night is ushered
  By her herald, the weird-faced moon.

There's a magic balm in the gloaming
  For the care-racked weary brain,
And the care-freed fancy wanders
  In the pallid star from pain.

The visions and dreams of [illegible]
  Pass before me clear and bright,
In the changing coals and ashes,
  As twilight fades into night.

The pillar of fire before me
  Takes a deeper and stronger glow;
Calling me onward and upward
  As it did in the long ago.

And I know that my heart grows younger
  That my soul climbs nearer Truth
For these twilight-hour communings
  With the things of my vanished youth.

And I love to sit by the embers
  As they sparkle, and fade, and creep,
While Twilight gathers her children
  And tucks them away to sleep.
—David DeMay Farnsworth, in Pittsburg Chronicle.

"Beauty is only skin deep." "I consider that a wise provision of nature." "Why so?" "With that limitation the girls are kept busy enough."—Kansas City Journal.

Preparedness

Now that all nations are talking preparedness, why not discuss health preparedness. While we have been negligent in protecting our country against the enemy, we have also failed lamentably in fortifying our human bodies against disease germs.

This has been proven in the recruiting offices, where so many men have been turned down by the examining doctors. Weak heart action; diseased lungs; thin, watery blood; defective eyesight, resulting from exhausted nerves. These are among the prevailing derangements which the examining doctors find.

Health has been neglected. The blood has not been kept in healthful condition. The nervous system has got run down, and the subject under inspection is in no condition to fight the enemies of his country or to withstand the attack of disease germs.

Health preparedness means the use of preventive treatment, such as Dr. Chase's Nerve Food, to enrich the blood, reinvigorate the starved nerve cells and keep the health at high-water mark. In this condition you have the strength, vigor and confidence which is necessary to the success and enjoyment of life. You have the vitality to defy disease germs and thereby escape many ills which find an easy prey in the run-down system.

Dr. Chase's Nerve Food, by means of its blood-forming and nerve-invigorating influence, cures headaches, nervous indigestion, sleeplessness and irritability, and prevents such serious diseases as nervous prostration, locomotor ataxia and paralysis.

50 cents a box, 6 for $2.50, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

Dr. Chase's Nerve Food

GILLETT'S LYE

HAS NO EQUAL

It not only softens the water but doubles the cleansing power of soap, and makes everything sanitary and wholesome.

REFUSE SUBSTITUTES.

Early Roman Newspapers

It appears that it is to Caesar that we owe the first western attempt to satisfy the public's demand for printed news. The newspaper was a daily record of not only official news, but also of small scandals, the latest police news, the arrivals in the city, even the gossip of the countryside. There were also extracts from the latest speech of Cicero and the freshest epigrams of Martial. These last appeared by way of advertisement of the author's latest works before they should appear in the collected form and be sold, along with the latest thing of Ovid's and those improper little novels that came from Greece and were displayed in the fine shops that bordered the Forum's edge and stretched round the Palatine Hill.

The Acta Diurna, or Daily News, was the work of literary handwork, careful and elegant, whether written with the stylus on papyrus or inscribed on a wall coated with chalk, the citizens standing around, agog with interest. The lack of a printing press was surely a fortunate circumstance, since it goes far to account for the epigrammatic terseness of the Latin style, for the delightful endeavor to express in one syllable what the garrulous take a couple of phrases to interpret.

Huebener, in his dissertation on the Acta Diurna, has collected 45 passages from ancient authors, all of which relate to these Acta Populi, which is only another name for this embryonic newspaper. They are all of a nature to interest the public, reading or otherwise, even to-day. Fortunately they are told in Latin, in which, for the most part, they had best remain.

The more ordinary relate to public affairs, the sayings and doings of political persons, notably Caesar's refusal to the title of King, the defection of Lepidus and the more notable cases before the courts. Both Pliny and Asconius relate the case of Scaurus as having been fully reported.

Dion Cassius relates the avidity with which men read of the punishments to which important persons had been condemned, and the anxiety of the crowd to learn whether they met their end as gentlemen or cowards. Tacitus mentions the newspaper account of Claudius' Pomerium, the extension of the circumference of the city by the erection of a new wall.

Lampridius tells us that he got his idea of the fulsome adulation with which the Senate acclaimed Alexander Severus from the current issue of this daily paper, a document which must have been, approximately speaking, [illegible] years old, when Lampridius saw it and mendacious at that.

There were extracts from new laws, decisions relating to provinces, and, naturally, passages from the discourses of "the God of Rome."

Under the Empire there was the Court Circular, which chronicled the various doings of the imperial house, the "progresses," the funerals, but not, however, the likelihood of the Emperor's death, as it was only the unwise astrologers who would dare to draw such a bow at a venture.

The Emperor Commodus, so Lampridius assures us, was inordinately proud of his achievements in the arena. No matter whether he was last in the race, it was to him that the palm was awarded, or, rather, he awarded the palm to himself, and then quite magnificently shouted, "Commodus Caesar, victor in the race, gives his crown to the people of Rome!"

Then there were published all the "bits of information" in the city. Pliny cites the newspaper accounts of the funeral of the celebrated jockey Felix. The erection, fall and restoration of public buildings were recorded; so were the births, marriages and divorces in illustrious families; likewise prodigies and curiosities. Pliny has a sneering reference about the record of a rain of titles, and states that so old priest swore that he had seen the arrival of the first Phoenix in Rome.

Petronius gives a parody of what the Roman got in his daily paper. It was during a feast at the house of that ostentatious plutocrat Trimalchion, who so far forgot his imperfect veneer of aristocratic good manners as to describe the origin of his wife to his guests, much to that lady's discomfort, for she was still "climbing" assiduously, and did not relish being thus "given away" to others. In his efforts to impress the world with his magnificence, Trimalchion used to send for his actuary, who read to the company a sort of process verbal, of which the following is a translation.

"VII. Cal. Jul.: There were born on the Domain at Cumae, which belongs to Trimalchion, 30 boys and 40 girls. Five hundred thousand bushels of wheat were transported from the fields to the granaries; 500 oxen were used for the transport. On the same day the slave Mithradates was crucified for blaspheming the tutelary deity of Gaius, our master. The same day 10,000,000 sesterces were taken to the bank because it was impossible to find a use for this money. The same day there was a fire in the gardens at Pompeii, which originated in the residence of the farmer Nesta," etc., etc.

The last mention of this Roman newspaper is in the late days of the Empire. Vopiscus, in his "Life of the Emperor Probus," knew of its existence, after which time, it is thought, it disappeared along with such other literature as Constantine and his new advisers found inconvenient. Nothing similar appeared until that busybody Gutenburg began to flood the world with a literature that has been the outward expression of a great renaissance.

It's all right to be slow and sure, but many a man has missed his train that way.

A Remedy for an Ailment That Is Very Distressing.

Exposure to cold and wet is a usual cause of sore throat, and it may be of rheumatic or gouty origin. Local irritation, as from drinking hot drinks or the inhalation of noxious gases, will cause an acute catarrhal inflammation of the mucous membrane of the pharynx, soft palate and uvula. Going out of doors when very warm, not protected by wraps, will cause an inflammation in the throat. Housekeepers run out into the yard to hang up tea towels, etc., and nine times out of ten never put on a scarf or coat, and then wonder why they suffer so frequently from attacks of sore throat and cold. Much of the ill-health we suffer from can be traced to carelessness and heedlessness on our own part. It is contrary to reason and good judgment to sit down to cool off, when very warm, where the wind will blow directly upon one. To ride about in open automobiles without wearing heavy coats and being protected about the feet by thick robes. The many thoughtless things one does every day will cause a sore throat, which may be severe enough to result in a fatal illness.

The treatment for the symptoms, such as chilliness, fever, stiffness and tenderness in the muscles of the neck, soreness in the throat and painfulness when swallowing—the hoarseness and dry, hacking cough—is by medicines. First a gargle. This may be one of potassium chlorate, used three times a day; or a gargle of bicarbonate of sodium—one teaspoonful dissolved in a teacupful of hot water and used (when warm) every five hours. It is best always to remain indoors for 24 hours, and preferably in bed, whenever suffering from a beginning cold or sore throat. A laxative medicine (whether suffering from constipation or not) should be taken. A bottle of the effervescent citrate of magnesia or a dose of castor oil. If the pain in throat is severe, cold applications are soothing—cloths wrung out of cold water and applied to the neck, changing them as soon as they become warm. Sucking small pieces of chopped ice proves grateful also. If the fever is high and there is an unusual amount of restlessness and irritability always call in a physician.

Wonderful Bilious Remedy Actually Prevents Attacks

There are two great causes of biliousness—they are constipation and defective liver action.

When Dr. Hamilton's Pills are taken, they not only correct constipated bowels, but act upon the liver as well.

Quite unlike ordinary medicines which purge and give temporary relief, Dr. Hamilton's Pills remove the conditions which cause biliousness, and thus permanent cures are effected. No person who occasionally uses Dr. Hamilton's Pills will ever suffer from the headache, bad stomach or bilious complaint. Get a 25c box today.

Eggs.

The egg is pure food.

Nearly all the essential elements of animal tissues are found in an egg.

Eat an egg and you get blood producers. You get food for the muscles. You get sulphur and calcium for the system, and some iron.

Albumen is the chief ingredient in an egg. Albumen is an organic element, mostly carbon, with a small per cent. of sulphur, and containing hydrogen, nitrogen, oxygen, etc.

It is the sulphur in the yoke of an egg which blackens silver in contact with eggs. The bad odor of rotten eggs is also due to the sulphur, sulphurated hydrogen being formed during decomposition.

The raw albumen of an egg is soluble and consequently raw or soft-boiled eggs are merely digestible. The coagulated albumen (formed when eggs are boiled) is insoluble and indigestible for weak stomachs.

There is no other single element of human diet of either animal or vegetable character which is, perhaps, more commonly used the world over, nor served for the uses of man in a greater variety of styles and ways than are eggs.

Eggs are often taken as an antidote in various poisons, including bichloride of mercury (corrosive sublimate), sulphate of copper (blue vitrol), acetate of lead (sugar of lead) and nitrate of silver (lunar caustic, with which albumen forms insoluble compounds.

About six-tenths of all eggs is the white, three-tenths the yolk and one-tenth the shell. And of the white of an egg 80 per cent. is water, 15¼ per cent. dry albumen and 4¾ per cent salts, etc. Even more albumen is contained in the yolk—17½ per cent. The yolk has so much oil (28% per cent.) that it is really an emulsion.

Make Your Body Tingle with life and energy for the day's work by eating foods that contain real nutriment—that do not use up all the vitality of the body in an effort to digest them. Shredded Wheat Biscuit supplies the greatest amount of body-building, energy-creating material with the least tax upon the digestive organs. It is a real whole wheat food, ready-cooked and ready-to-serve, containing the life of the wheat grain—nothing added, nothing taken away. Start the day right by eating Shredded Wheat with hot or cold milk. Serve it for luncheon with sliced bananas or other fruits.

Made in Canada.

CURRENT COMMENT

Who will go to the help of the Canadians?

The German general staff must now see that it is a long, long way to Paris via Verdun.

We can't clean up until the ground dries up.

Some of our baseball pitchers would make excellent bomb throwers.

We do not think that such a section of the Canadian press exists.

It may not be necessary to close the bars after all. The Government may raise the percentage of alcohol in our drinks from two and a half to four per cent.

Neutral and belligerent ships, armed and unarmed, all look alike to the German submarine.

It is understood that Germany denies that one of their submarines sank the Sussex. Perhaps the President believes that.

It looks as if before very long Quebec will be the only "wet" Province in the Dominion, and it is about two thirds dry.

The Zeppelin raiders are not having it all their own way. British guns and aircraft manage to drive some of them off.

The people of Canada have contributed $10,000,000 to the Patriotic Fund, and there is more where that came from.

If you must fall in love with somebody, see that it is not with another man's wife. These alienation suits are expensive.

Bethmann-Hollweg now declares that Germany has no intention of capturing Canada. Well, not as long as the British fleet bars the way.

Mr. Roosevelt is willing to be a Presidential candidate once more, but it must be on a pro-American platform, without many notes, we suppose.

But if Verdun should fall into the hands of the enemy—which heaven and good French artillery forbid—would it be right to hold a Verdun day?

Bethmann-Hollweg's notion of a free Europe is a Europe with Germany the dominating factor, directing and controlling the weaker states.

There are said to be women in Toronto who say that they are quite willing that Germany should win this war. Have they male relatives hiding behind their petticoats?

There is an anti-German feeling in Great Britain, and the Prince of Wales' motto, "Ich Dien," (I serve) has come under its displeasure, being of Germanic origin. "I serve," ought to be good enough.

That section of the Canadian press which would like to see the United States drawn into the war on the side of England looks favorably upon the ambition of Roosevelt to be President again.—Buffalo Courier.

Russia has protested to her enemies and to all neutral countries against the sinking of the Portugal, a hospital ship, and the drowning of many nurses and sailors. But the German people will only laugh at the affair.

A prisoner of war is a prisoner of war. Because he carried out His Beastly Majesty's command and dropped bombs on innocent English babes, is he any worse than the one who carried out His Beastly Majesty's commands and cut off the arms of innocent Belgian babes!

Just at the time the German Chancellor was telling the Reichstag how the British forces were being held up at Kut-el-Amara, General Lake was wiring the War Office that they had defeated the Turks and captured their main barrier to the advance to the relief of Gen. Townshend.

Pittsburg has just celebrated the hundredth anniversary of its birth. Here are the dates of the charters of a number of other American cities: Chicago, Ill., chartered in 1837; St. Louis, Mo., 1822; San Francisco, Cal., 1850; Cleveland, O., 1836; Detroit, Mich., 1824; Buffalo, N. Y., 1832; Kansas City, Mo., 1853; Denver, Col., 1859; Cincinnati, O., 1819; Indianapolis, Ind., 1825; Minneapolis, Minn., 1867; Atlanta, Ga., 1847; Milwaukee, Wis., 1847.

Midwinter is the most dangerous time in regard to fires in buildings, but so far as our forests are concerned, spring is one of the worst periods. The dead leaves of last season and the dead twigs and branches on the ground are more brittle and dry in the first few days of spring, just after the snow leaves, than at any other time in the year. Those who go into the woods for any purpose are, therefore, cautioned to be careful with their camp fires and with matches. They should also see that any cigar or cigarette stubs are dead out before they throw them away. Observance of these precautions will do more for conservation than many meetings and conventions ten years from now and this makes this duty all the more important.

PHONE 81 **J. H. APPEL**

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

RIVERSDALE

Mr. John Moore is employed with Arch. McKinnon for a few months.

At the close of the recruiting meeting held on Friday evening [illegible] of our boys enlisted. [illegible]: Messrs. Albert Kramer and W. [illegible]

Rev C. N. McKenzie and Mrs. McKenzie spent Thursday afternoon at the home of Mr. Archie McKinnon.

The taffy pull held last Thursday night was a grand success but we are sorry to say that a few of our young people missed the good time.

Little Miss Jeanette Dietrich who was on the sick list is now recovered.

Wedding Bells are ringing on the back line.

Master Gus Moore is employed with Mr. Jas. Halliday.

We are sorry to state the death of Peter Miller, a well known pioneer of Riversdale. His death occurred at his home in Walkerton on Friday, April 14th after a long illness of cancer.

Mrs. S. Scharbach and Miss Eva Benniger spent Sunday at the home of Mr. Martin Phelan, Chepstowe.

The woods at Glen Douglas was the scene of a merry party on Saturday afternoon when a number of our young people indulged in a taffy feast.

Mr. Wm. Abbot lost a valuable colt last week.

Mr. and Mrs. Gilbert Chatreau spent Sunday in Walkerton.

Mr. Archie Campbell spent the week-end in the village.

Mr. Nicholas O'Hagan and Mr. Albert Dietrich are busy buying cattle this past week.

Miss Mabel Carganette returned to London on Monday last.

Mr. Anthony Carganette has moved on to the I. D. Brown farm.

The farmers of the vicinity are getting down to business and commencing their spring plowing.

It is fortunate that the ditches are drying up so well as now the young ladies who indulge in love-dreams on their country walks will not be in danger of drowning when they have the misfortune to wander off the road.

Messrs. Herb Carter and Ed Ernewein proved themselves admirable hosts at a surprise party held in their bachelor hall last week.

MILDMAY

The Mildmay Red Cross Society prepared a tasty supper for the local volunteers last Thursday night. The supper was given in the basement of the Methodist Church and was greatly appreciated. At 8 o'clock the Township Council presented each of the soldiers with a nifty Waltham wrist-let watch.

Louis P. Schaus, the Clifford butcher, makes three trips to Mildmay weekly supplying fresh meat.

Major McNally of Walkerton was down to Mildmay on Monday morning and put the local squad through the drill.

Rev. J. Burns left on Monday morning to attend the Evangelical conference which is held this year at Pembroke. On this account there will be no service in the Evangelical Church here Easter Sunday.

The Mildmay Spring Show last Thursday was a good success. The quality of the exhibits was good.

Mrs. Bridges returned home on Monday night from a trip to Hamilton.

Mr. B. B. Patten left for Guelph on Monday morning where he will commence training immediately. The Mildmay recruits presented him with a ten dollar gold piece on Saturday night.

Rev. Mr. Stafford preached both morning and evening in the Methodist Church last Sunday and will again occupy the pulpit on Easter Sunday.

The girls of the village have organized a knitting club called "The Union Jack Knitting Club." They will meet once a week. Their aim is to provide each Mildmay boy in khaki with a pair of socks a month. We hope the boys will keep them busy by increasing their numbers.

HANOVER

Noah Klemmer purchased a hackney show mare "Black Duchess," formerly owned by Miss Wilkes of Galt.

Messrs. Ross Young, Frank Coryell, Fred Glebe and Alvin Kurtz made a canoe trip to Southampton on Saturday, starting at Walkerton. They had a very interesting outing in spite of the cold weather.

SIEFERT—At Hanover, on Monday, April 10th, Jacob Siefert, aged 83 years.

MACKEY—LANGE—At St. Andrew's Manse, Hanover, by Rev. W. I. McLean M. A., Miss Marie Lange to Gordon Mackey.

Pte. Reuben Juckech is the cartoonist of the Twentieth Gazette, a bright little trench journal published in Flanders by the members of the 20th Batt. C. E. F.

Mrs. Wm. Ruttle had a letter from Pte. Herman Manio who is a prisoner of war in Germany. There is very little information in the letter which was no doubt severely censored

Mr. W. C. Koening, formerly of the staff of the Royal Bank here and for the past 5 years manager of the Royal bank at Magrath, Alta., was in town last week en route for his home in Hepworth to visit his parents. He has been transferred to Havana Cuba, and sails from New York on April 12th.

The citizens of Hanover will tender a reception to the Hanover boys in the 147th Greys, and to the boys in khaki from the vicinity, some time in the near future.

GLAMIS

John McLean and family are moving to their new home this week. W[illegible] sorry to lose them from our [illegible]ty.

Miss Kate Rowan of Teeswater is visiting her sister, Mrs. Geo. Fletcher.

Messrs George Smith 2nd con. and Victor Kidd of the 4th con. leave this week to spend the summer on the schooner Sophie, Sarnia.

Two more of our young men joined the 160th Bruce Batt. last week, namely, Archie McLeod and Lorne Reid.

Mr. Alex. McSween is working for John McLean.

Pte. Wendell Russell who left with the 71st Batt. has arrived safely at Liverpool.

Mr. Buchanan of Inverhuron is engaged at Capt. P. McKinnon's.

The many friends of Mr. George Fletcher are sorry to hear of his accident in which he had three ribs broken. All hope to see him out and around soon.

Inspector W. F. Bald of Port Elgin paid an official visit to the schools here last week.

The young people of the Baptist church have organized a B. Y. P. U. which meets on Sunday nights after the evening service.

Mr. and Mrs. Thos. Patterson entertained a few friends on Thursday evening.

A large crowd attended Colwell's sale on Friday and everything sold well.

Capt. Peter McKinnon left last week to start the season's work on the schooner Sophie.

A number from this locality attended the play "Diamonds and Hearts" given by the Young People of Bervie at Kingarf last week. All report having enjoyed a treat.

MAPLE HILL

Mr. David Frook had a swell ploughing bee on Monday. This is the first step in the way of greater production in these parts.

The shares in the Enterprise Beef Ring have all been taken and President John D. Little reports the ring ready for action.

Mr. David Frook has sublet part of the Smith farm to Mr. Thos. Little.

Mr. Adam Gowanlock had a woodbee on Thursday afternoon. The day being warm and the stumps being dry, the boys seemed to think that keeping the camp fires burning was of greater importance than cutting wood at this time.

Mr. Valentine Pletsch of Prospect Hill, who underwent an operation in the Bruce County Hospital, is doing fine.

Contractor James Hyslop of Walkerton has been working for Inglis Bros. moving and remodelling their slaughter house.

Mr. Robt. Wilson is having his windmill overhauled and fixed up. Jim Threndyle, our local knight of the air, is doing the job.

Miss Clara Gowanlock is visiting friends in Wingham.

SCHOOL REPORT

Sr. IV—George Pinkney, Willie Sickle, Layton Glauser.

Sr. III—Pearl Sickle, Ruby McNaughton, Craigie Leach, Percy McNaughton, Wilmer Glauser, Wilfred O'Keefe.

Jr. III—Allan Burrell, Reuben Harnock, Laverne Brockelbank, Mayme Pinkney.

Sr. II—Anna Schilling, Grace Leach.

Jr. II—Douglas Walter, Graham Pinkney.

Sr. Pr.—Audrey Pinkney, Laureana Schilling, Gertrude Harnock, Ornell Piehl.

Jr. Pr.—Emma Fisk, Margaret Fisk.

Ella Teeple,
Teacher.

SOLWAY

Mr. Eugene Deitrich and cousin from Berlin are visiting at the home of the former's mother, Mrs. L. Dietrich here.

Pte. C. A. Bird formerly salesman for the W. L. Rawleigh Co. was collecting in this vicinity last week.

Mr. and Mrs. John Stember returned to this vicinity last week after spending the winter in Desmarton. Mr. Stember is engaged with Mr. E O'Connor.

Miss Eleanor McGarrity who is teaching near Durham spent the week-end with her parents, Mr. and Mrs. Pat. McGarrity.

Our Honour Roll—Pte. C. McWhinney, Pte. D. P. McGarrity, Pte. John McGarrity, Pte. Lorne Craig, Pte. Thos. Faire, and Pte. Thos. Warbrook.

Mr. Louis Altman from Formosa has engaged with Mr. John Streeder for the summer months.

Mr. W. Findlay has engaged Mr McDougal for the summer.

Mr. and Mrs. T. J. Burrell of Maple Hill visited at the home of Mr. Mitche on Sunday.

Mrs. Alex. Knoll spent Wednesday of last week at her old home in Chepstowe.

OTTER CREEK

Mr. Edward Fenner was visiting friends on the 14th con. of Carrick on Sunday last.

Mrs. Peter Hutton from Bruce Township was visiting her parents and friends for the last few weeks.

BORN—To Mr. and Mrs. J. Reich a daughter.

Mrs. John Piehl of the 12th con. is on the sick list.

Quite a number from here attended the Annual Spring Fair at Mildmay last Thursday.

Rev. L. H. Pletsch left on Monday to attend the Annual Evangelical Conference at Pembroke this week.

Private O. A. Fenner spent Sunday with his parents.

PINKERTON

Mr. Jas. Gale left on Saturday for Bethany where he will preach during the summer months.

Miss Alma and Mrs. Capt. J. A. Reid are spending a few days in Toronto.

Death claimed another of our oldest and best known residents in the person of Mr. William Cruikshanks who succumbed on Thursday at the Walkerton Hospital. He was a Liberal in politics and a Presbyterian in religion. His loss is mourned by a grown up family. The funeral which was held on Saturday was conducted by Rev. Mr. Gale.

Pte. Grant spent Sunday at W. Alexanders.

Prayer-meeting this week was held on Wednesday at the home of Miss Gibb.

BRANT

The Sherbrooke, Que. Daily Record had the following reference to a presentation to Miss Lamb, daughter of Mr. and Mrs. James A. Lamb of Brant, who has given up her position as superintendent of the Sherbrooke Hospital and is at present staying at her home in Brant. A very interesting and pleasant event, says the Record, took place at the Sherbrooke Hospital Saturday, when Miss Lamb, the retiring superintendent, was presented by the Hospital Board with a very beautiful solid silver Empire tea service of three pieces, suitably inscribed. Those present were Mr. James Mckinnon, President Board of Governors; Mr. E J. Page, Chairman Executive Committee; Dr. Malcolm McKay, Chairman of the Medical Board; Mr. E. C. Goodhue, Messrs J. P. Wells, K. C. J. Keith Edwards, Mrs. Tuck, Mrs. James Mackinnon, Mrs. Craig, and Mrs. E. J. Page. The presentation was made by Mr. Mackinnon on behalf of the Governors, expressing their keen appreciation of Miss Lamb's work, which had been uniformly successful and satisfactory throughout her term of office. The president referred especially to Miss Lamb's untiring energy and cheerfulness during the trying period of the erection of the new hospital, when her patience and resourcefulness were severely taxed in fulfilling all the demands made upon her. The most cordial wishes were expressed for her future happiness and prosperity, coupled with regret at her departure. Mr. Page, in a few appropriate words, endorsed all that the president had said, and Dr. McKay speaking for the medical Board, said that a meeting had been held that morning, and that he was empowered to express the sincere regret of the doctors at Miss Lamb's retirement, and their recognition of the high sense of duty with which she had carried her responsibilities. It had been a pleasure to work with her and members of the Board joined in the most sincere good wishes for her future welfare. Miss Lamb, who was much surprised and quite overcome with emotion, endeavored, however, to reply, and thanked the Governors and the Medical Board for their kind words and beautiful gift which would always be a souvenir of the happy days she had spent in the Sherbrooke Hospital

One of the first settlers of Brant Tp. passed away at the home of her daughter, Mrs. Henry Dippel jr., Brant, on Tuesday evening in the person of Mrs. David Colwell. Death resulted from a gradual breaking up of her physical forces due to old age. Mrs. Colwell was but a bit of a girl when her parents, the late Christopher and Mrs. Smith, settled in the Brant bush. With the exception of a few years spent in Walkerton, she lived in that township all her life. Like a very true mother, her interest centred around the home and her loss is deeply felt. Four daughters survive:—Mrs. Childs of Lansing, Mich., Mrs. Hoose of Flint, Mich., Mrs. Ashley of Flint. Mich. and Mrs Henry Dippel jr. of Brant.

News About Town

War Hero Returns.

Mr. Wm. Barry of Dunkeld received a telegram on Friday from his son, Pte. Will Barry of the Toronto Highlanders, stating that he had landed at St. John's. Mr. Barry left for Toronto on Monday to meet his son who has been invalided home after spending nearly a year at the Royal Derby Hospital. Pte Barry was wounded in the gallant fight at Langemarck when the Canadians saved the day.

+ + +

Gets Important Post.

We learn from Printer and Publisher that an important promotion has come to an old Walkerton boy, Mr. Frank McNamara, who has been appointed chief editorial writer of the Winnipeg Daily Telegram. Mr. McNamara broke into newspaper work immediately after graduating from Varsity and has worked on the big dailies in Toronto, Montreal, Pittsburg Victoria. B. C. and one or two other cities. The Winnipeg Telegram with which he has been connected for some time, is one of Canada's best dailies. Many old friends in Walkerton will be glad to hear of Mr. McNamara's step up.

Production and Thrift

"TO win the war with the decisiveness which will ensure lasting peace, the Empire will require to put forth its full collective power in men and in money. From this viewpoint it is our true policy to augment our financial strength by multiplying our productive exertions and by exercising rigid economy, which reduces to the minimum all expenditures upon luxuries and non-essentials. Only in this way shall we be able to make good the loss caused by the withdrawal of so many of our workers from industrial activities, repair the wastage of the war, and find the funds for its continuance. It cannot be too frequently or too earnestly impressed upon our people that the heaviest burdens of the conflict still lie before us, and that industry and thrift are, for those who remain at home, supreme patriotic duties upon whose faithful fulfilment our success, and consequently our national safety, may ultimately depend."—*SIR THOMAS WHITE, Minister of Finance.*

PRODUCE MORE, SAVE MORE.
MAKE LABOUR EFFICIENT.
SAVE MATERIALS FROM WASTE.
SPEND MONEY WISELY.

LET US PRODUCE AND SAVE—

The war is now turning on a contest of all forces and resources—men, munitions, food, money. The call to all is to produce more and more. It may be necessary to work harder. The place of those who enlist must be taken by those at home, men and women, old and young. The more we produce the more we can save. Produce more on the farms and in the gardens. Save more and help to win the war.

LET US NOT WASTE OUR LABOUR—

In this war-time all labour should be directly productive or should be assisting in production. Make it as efficient as possible. If your labour is on something that can be postponed, put it off till after the war and make your labour tell now. Making war is the first business of all Canadians. Efficiency in labour is as important as efficiency in fighting.

LET US NOT WASTE MATERIALS—

Begin at home. The larger portion of salaries and wages is spent on the home—food, fuel, light, clothing. Are any of these things being wasted? $20.00 a year saved from waste in every home in Canada will more than pay the interest on a war debt of $500,000,000.

LET US SPEND OUR MONEY WISELY—

Are you spending your money to the best advantage? What do you think of extravagance in war time? Tens of thousands of Canadians are daily risking their lives for us at home. Is it not our duty to be careful and economical? Canadian dollars are an important part of the war equipment. Make them tell. Have a War Savings Account. Buy a War Bond.

GOOD WORK AT WIARTON

That Wiarton leads all Bruce in recruiting for the 160th with a total of 180 men signed up to date is a feather in the cap of Capt. E. Ross Clark, the popular commanding officer of "C" Company, who has been in charge of recruiting in that northern town. Those who know say that Wiarton's big figures represent a whole lot of hard, intelligent work. Capt. Clark appears to be the right man in the right place. The Wiarton boys all swear by him and were delighted when he was appointed to lead "C" Co. But why shouldn't the Capt. be a dandy? Was he not raised, trained, and educated in Walkerton?

Patriotic Meeting at Pinkerton

A patriotic meeting will be held in The Foresters' Hall, Pinkerton on Wednesday evening May 3rd. The speakers will be: Mr. Jno Rowland, Col. Weir, Major Moffatt, and Adjutant Whitehead. An address will be given to Barry, of the 48th Highlanders, who returned from the trenches last week.

+ + +

Walter Pitt in Hospital.

Private Walter M. Pitt, Machine Gunner Royal Canadian Regiment is reported in the Hospital Apr. 6th. Private Pitt was among the first of the Walkerton boys to enlist. He signed up in Aug. 1914 going to Valcartier Camp. He has seen considerable warfare in the meantime, having been in the trenches for some months.

+ + +

Goes To New Field.

Word was received yesterday from the Evangelical Conference now sitting at Pembroke that Rev. L. Pletsch who has been the pastor here the last two years has been transferred to a larger field at Rockingham, in the Ottawa Valley. Though sorry to see him go, members of the congregation are glad to see their faithful and energetic pastor promoted to a larger work. He will be succeeded here by Rev. J. H. Grenzebach of Dashwood.

+ + +

The Price of Gasoline

The astounding prices that gasoline has reached are beginning to alarm the users of it, many of whom were under the impression that the war was the cause of the increase. The Los Angeles Record has studied the matter and says increased consumption is not the cause of the increased price, but that every time the price of gasoline is raised an added dividend is handed over to the few who have the monopoly of the oil wells.

+ + +

A Brant Pioneer.

Death came very suddenly to one of Brant's pioneers, Mr. Samuel Smith. On Monday morning he was found dead in bed at the home of his son in Normanby. Mr. Smith was one of the first settlers of the Maple Hill neighborhood and spent practically his whole life there. It was only a few weeks ago that he left the township to make his home with his son at Normanby. He was a man of quiet, kindly disposition and a good neighbor. He was twice married, his first wife being a victim of the smallpox epidemic in 1872. Nine grown up children survive, most of them living in the West.

+ + +

A Splendid Suggestion

We notice by the Port Elgin Times that Judge Klein made a happy suggestion at a Soldiers Banquet in that town last week. He said that by the 1st of July, 1917 the war would be over, the 160th battalion would be back. On the 1st of July, 1917, Bruce County celebrates its Jubilee, having on that date been fifty years a county. The Judge suggests that on that day a big reunion be held when all the old boys and girls, then living in other parts be asked to make a trek back to the old county, and along with the soldiers, have a big celebration. The suggestion was well received, and should be taken up generally.

+ + +

Old Greenock Resident

Mr W. J. McNally received word of the death at Sarnia, on Monday, of his uncle, John McNally, a former resident of Greenock. He was over ninety years of age. Prior to removing to Sarnia a year ago to make his home with his son, he had lived in the Glamis neighborhood about thirty-five years. Of the four brothers and two sisters, who settled in the Western Ontario bush experiencing all the vicissitudes of pioneer days, only one brother now survives, Mr. Robert McNally of Chesley. Mr. McNally's wife predeceased him last September. Four sons survive:—William Henry, of Bruce Tp.; George of Macaulay, Man.; Robert, near London; John of Sarnia. A grandson, Wallace McNally, was recently killed in Flanders. The remains were brought by train to Pinkerton yesterday and laid in Purdy's Cemetery beside those of his beloved partner in life.

Harry Frost of the 83rd Batt. Toronto, was here last week to say good-bye to his sister, Miss Dorothy Frost before sailing for England with his battalion.

It's A Good Suggestion: Bruce Reunion for 1917

The Coming Year —1917— Suggested by Judge Klein as the "Psychological Moment" for a Great Gathering of the Clans of Bruce. —Many Reasons why the Thoughts and Steps of Bruce Old Boys and Girls Should Turn Homeward in the Year 1917.

Judge Klein made a suggestion in the course of his speech at a big patriotic meeting at Port Elgin, which we believe, will heartily commend itself to the people of Bruce County. The pith of the Judge's proposal is:—

The year 1917 will be the 50th Anniversary of Bruce as a County.

The year 1917 will be the 50th Anniversary of Confederation.

The year 1917 will in all likelihood see the conclusion of the Great War, and the Return of Our Soldiers.

Why not then have a memorable reunion and celebration of the sons and daughters of Bruce in that memorable year?

It is a well-known fact that Bruce Old Boys are scattered from "the rivers unto the ends of the earth"! The majority of them would be glad to come home for such an occasion. It would be the event of a life time!

The Judge suggested that an Old Boys Reunion might extend over two weeks in July or August. A two days' celebration might be held at each of the leading centres of the County such as:—Chesley, Port Elgin, Kincardine, Wiarton, Lucknow, Walkerton and possibly other towns.

The last time there was a Bruce Old Boys Reunion it was entirely a Walkerton affair. That was back in 1900. It was a great success. Our boys came from all parts of the North American Continent and beyond. When they got back to the scenes of their boyhood days many of them stayed all summer. Mr. Arthur Collins, who was secretary of the affair, says that many of them did not want to go home at all. At any rate it was a great success. But it wasn't one-tenth part of the Success that a Bruce Old Boys Reunion with the whole County back of the scheme would be. It would be an occasion on which no son of Bruce in all Christendom would care to be absent.

What do the other towns and townships of Bruce think of the suggestion? It certainly looks good to us. If the scheme is to be taken up, there should be a move in the matter without delay. Possibly the Bruce War Auxiliary which is composed of live citizens, representing every municipality in the County, could handle this scheme to the best advantage, acting in conjunction with the County Council.

1917 IN BRUCE

1917—Jubilee Anniversary of the Formation of Bruce as a Separate County.

1917—Jubilee Anniversary of Confederation of the Dominion of Canada.

1917—Great War Over.

1917—Return of Bruce Boys from the War.

1917—Suggested Reunion of Bruce Old Girls and Boys from the Four Corners of the Earth.

Telescope Letter Box

FIGHT OR PAY!

Walkerton, Ont., Apr. 25th, 1916.

Editor of the Telescope

Dear Sir,

I think the time has arrived when we men of Walkerton and surrounding country who are not enlisting, should ask ourselves if we are doing our duty to our country and to our soldiers. Every one must agree that those who are not doing the fighting should do the paying, and what have we done? With the exception of the County grant and a few straggling subscriptions, not a dollar has been subscribed in Walkerton and the surrounding neighborhood, except what has been raised by the ladies, for the Patriotic Fund.

It won't do for us to shield ourselves behind the County grant of $7,500 a month which covers all the County subscription for every purpose including recruiting. To pay this only requires an annual levy of about four-tenths of a mill on the dollar or 42 cents on each assessment of $1,000. The whole amount that Walkerton has to levy annually to pay its share is only $252.

Port Elgin, which has not more than one-third of the population of Walkerton, last week raised in two or three days $3,000 for the Patriotic Fund. Chesley in one day lately raised in the neighborhood of $2500 for the same purpose and as I said, Walkerton and the surrounding country has done practically nothing since 1914. I don't suppose anyone will dispute the fact that we ought to see that the wives and other dependents of soldiers who have volunteered to go to the front should be provided for, as the soldiers they are depending on would have done so if they had not enlisted and also care for those soldiers who are wounded or back home sick.

A meeting is to be held shortly with the view of making a united effort to obtain subscriptions for the Patriotic and Red Cross Funds and I hope there will be a liberal response.

Yours truly,
David Robertson.

+ + +

"PUNK RECRUITING FORCE"

Editor Telescope,
Walkerton.

Dear Sir:—

In the Bruce Herald and Times, April 6th, 1916, there is an article the heading of which is, "A Punk Recruiting Force." The aforesaid article has reference to a Brant Farmer living in the vicinity of Malcolm. The honourable titles freely bestowed by the Times on the aforesaid farmer we will not rehearse further than just glance at the statement—"a punk recruiting force." Punk, we suppose, means rotten wood, which if dry is easy to set on fire even by a spark. Well, the times hath sent forth its spark intent on setting fire to the so called punk recruiting force but it had no effect on the Brant Farmer only this. It reminded him of the maxim:—When ye are reviled, revile not again which he adheres to in practice. It is possible for a newspaper Editor to live without the farmer but the farmer to live without the Editor would have to pass through dull times. However the food nutriment supplied by the Times for the Brant farmer is hard to swallow and cannot be digested. Neither by him nor his neighbours all of whom know him to be an honest upright and truthful man willing to help in any good cause

With all due respect to the Editor of the Times we can only say that we did not, will not and cannot like his article on the "Punk Recruiting Force."

AN OBSERVER

AN ESCAPED PRISONER

George Day Proves To Be Criminally Insane Convict Who Got Away From Prison Farm.

George Day, vagrant, who was brought down from Hepworth last month to serve 30 days in the County gaol, is now known to be George Smith, a criminally insane convict, who escaped from the Prison Farm, Guelph, on March 10th last. It was on March 21st that a big burly fellow having all the appearance of a tramp, was arrested at Hepworth, where he threatened to do violence to a young farmer. He was sized up as a dangerous character and sent down on a vagrancy charge. About the same time he had called at a farm in that neighborhood and while the farmer was at the barn, attacked the women of the house. A rape charge was laid and word was sent to Walkerton to rearrest him as soon as his thirty days expired. When Day found that he was wanted on a second charge, he became very excited and told Mr. McKechnie and the Constable his whole story. His name, it appears, is George Smith, and he was sentenced to a term in Kingston penetentiary for bigamy. Later his term was extended for making a vicious attack on the late Dr. R. Bruce Smith, provincial inspector of prisons. Smith, with a number of others, was transferred to the Guelph Prison Farm last year.

Smith was taken to Hepworth on Saturday and was ordered sent up for trial by the magistrate. In the meantime Mr. McKechnie communicated with the authorities at Guelph regarding Smith's story. Dr. McKay came up from Guelph on Tuesday identified his man, and applied for an order to have him returned to the Guelph Prison Farm.

Smith is a big powerful fellow of over 60 years although he doesn't show his age. He talks quite rationally, unless crossed. Altogether he is one of the most dangerous characters that the authorities here have had to deal with for some time.

News About Town

Miss Iora Hahn of Preston visited friends here this week.

Miss Ross of Chesley visited at the home of her uncle, Dr. Hall this week.

Mrs. Grant and Miss Grant of Paisley were visitors at the home of Mr. Frank Rennie in Brant on Wednesday.

Mrs. Cunningham received word on Tuesday from her husband, Pte. George Cunningham that he had arrived safe in Liverpool after a very fine passage.

The new classes at the Non-Coms School began yesterday with over sixty men in attendance. The results of the first school examinations are not yet announced.

Don't scold a child for being cross; try Rexall Orderlies, as the trouble is probably with the bowels. Sold only by Rexall Drug Stores, 15c and 25c boxes. A. P. Sieveright.

Two recruits enlisted at Walkerton this week: Allister Hughes, Holyrood, age 20, farmer, born at Kinloss; and J. M. Woollis, Paisley, age 42, farmer, born in Sullivan Tp.

If hogs were worth $10.80 last week what will they bring later on in the season when the price usually goes higher? Some dealers think the price has almost gone the limit.

Mr. J. M. White had a telegram that his son, Sergt. J. R. White, of Toronto, is laid up with quinsy and an ulcerated ear and will be home in a few days on a short sick leave.

Despondency and the "Blues" usually the result of constipation, quickly succumb to Rexall Orderlies. Sold only by Rexall Drug Stores, 15c and 25c boxes. A. P. Sieveright.

Mr. Arthur Cryderman of the Bank of Commerce staff, who has been temporarily located at Wingham as ledger keeper, has been promoted to the position of teller at Niagara Falls.

Mrs. McCrum arrived home on Monday from California. Mr. McCrum stopped off at Boise City, Idaho, to see his brother, and will go from there to Helena, Mont. on a short visit to his son and will probably be home in a week's time.

The Trustees of Todd's School-house, Brant, have purchased a fine Union Jack for the School, and on Saturday (St. Julien Day,) it was unfolded to the breeze. During the holidays a new maple floor is being laid in the schoolhouse. The work is being done by Mr. Albert Marshall of Walkerton.

Mr R. E. Heughan has sold his residence and the adjoining lot, on Victoria St. to Mr. W. M. Shaw for $2700. Mr. Heughan is giving up house-keeping, his daughter, Miss Heughan, having taken a position with Gunn's, Limited, Toronto. Mr. Shaw will remove shortly to his newly acquired property.

An item of interest to Walkerton people comes news of the marriage of Mrs. Mabel McNeill, widow of the late Dr. Wm. J. McNeill to Dr. Chas S. Morley, a prominent physician and surgeon of Detroit. After a short trip to the South, Dr. and Mrs. Morley will be at home at No. 303 Merrick Ave., Detroit.

Call For Tenders

The 160th Batt. are calling for tenders for supplies to mess the Battalion while in Walkerton. A list of articles required can be had on application to Capt. Todd, Quartermaster, or at the Armouries.

+ + +

Only 700 Coming.

The mobilization of the 160th Batt. at Walkerton will begin sometime next week, we understand. Work was commenced yesterday getting some of the quarters around town ready for the incoming soldiers. Owing to the soldiers taking part in the seeding operations, which are very late, only about 700 men will be quartered in Walkerton. Already 400 men are out on the land and the Militia Dept. is urging that every effort be made to assist with the seeding operations.

JOE GETS THE JOB

As long as Walkerton has been a town the figure of "Joe" Lindsay behind a big dray team has been a familiar sight. No man could handle a team better than Joe or has been longer on the job early and late. If a degree were given for the Art of Moving Furniture, Joe would have several letters added to his name. He has been a faithful, steady, industrious worker all those years, and now that he has landed a job as caretaker of the Post Office, that will permit him to take things a little easier, everyone who knows "Joe" which means everybody, is glad to see him get it.

For Sale Or To Rent.

House and two lots opposite House of Refuge formerly occupied by Mrs. Peter Miller. Apply Wm. Yates, West Ward.

+ + +

Walkerton Horticultural Society.

The spring distribution of bulbs has arrived. Members will please call at the home of Jas. Tolton, the Secretary for their premiums.—Jas. Tolton Sec'y.

+ + +

Auction Sale.

Auction Sale of House hold furnit will be held at the premises of undersigned, opposite the Pub School, Walkerton, on Saturday, April 29th at 10 a. m. R. E. Heughan prop.; Wm. Abell, Auct.

+ + +

Died Near Elmwood

The death occurred at his home near Elmwood, on Sunday, of John Gateman a well known thrasher. The deceased, who was a son of Mr. Christian Gateman, of Walkerton, had been suffering for some time from cancer of the stomach. He leaves a wife and family to mourn his loss.

+ + +

Promoted to Sergeant.

Walter Eidt of "A" Company, w has taken the non-coms' course, w promoted to Sergeant and received h three stripes on Tuesday. Sergt. Eid who is now instructing a squad in th new non-coms' class, is the younges N. C. O. in the Bruce Batt. wearing the sergeant stripes.

+ + +

All Boosters Here

Walkerton citizens are all boosters for the county town. They pulled off a clever stunt when they captured the 160th Bruce Battalion for a month. If all the soldiers spend as much money as the members of the Ripley detachment when they receive their cheques, Walkerton will require a large number of booths, picture shows, candy shops, novelty stores, pool tables and a tobacco factory in order to give the 1200 soldiers a chance to spend their money. —Ripley Express.

+ + +

A Recruiting Incident.

Capt. Danard and his detachment here were on a recruiting expedition in this vicinity all last week, and when they visited a farmer's house near Marmion to canvass, the boys were informed that the boys were in the barn. A careful search of the place was made, but nobody could be found until one of the soldiers decided to search the mow and there underneath the straw were the two young men in hiding. It is needless to say that no recruits were got at that place.—Tara Leader

MARRIED

HOUCK—DYKE—At the residence of the bride's parents, Walkerton, on Monday, April 17th, by Rev. R. Perdue, Miss Lily Ann Dyke, only daughter of Mr. and Mrs. Herbert Robert Dyke, to Mr. Milton Houck, youngest son of Mr. and Mrs. John Houck, of Brant.

DIED

McNALLY—At Sarnia, on Monday, April 24th, John McNally, formerly of Greenock Tp. aged 91 years.

Connors—In Greenock Tp., on April 22, Mrs. Patrick Connors.

SMITH—In Normanby, on April 24th, Samuel Smith, late of Brant Tp., aged 90 years.

GATEMAN—At Elmwood, on Sunday, April 23rd, John Gateman.

SPECIAL 160TH EDITION

Copies Will Be Ready For Distribution On Saturday.

The Special 160th Bruce Battalion Edition of the Telescope which is being published by the Walkerton Chapter, Daughters of the Empire, will be on sale Saturday. The ladies of the Circulation Committee, of which Miss Elizabeth is convenor, will open an office next to Mr. Whitehead's, and three doors east of the Telescope Office. Copies may be procured there on Saturday. In the meantime orders may be left with any members of the Committee. As the edition is fairly limited, those who would make sure of obtaining their copies, should leave their order at once.

CROSS PURPOSES

"Oh, no, it's the other line. I am expecting her every minute. You have been running a race without knowing it, and you have won, you see. I thought she would have been here first. She has been with friends in Cornwall."

"In Cornwall!" Gilbert South repeated the words with a touch of startled interest in his voice. "She used to live in Cornwall—I was there one summer a long while ago. I wonder where she has been staying now?" And, after a moment, he added, "Not in the old house, I know."

"It's a beautiful country," said Mrs. Leicester. "Not pretty, like Devonshire, of course."

"No, not like Devonshire; but I like it better, perhaps because I knew it first. The Land's End, on a still midsummer day——" He stopped short in the middle of his speech, and looked down, but his silence was full of remembrance.

"Oh, delightful!" said Mrs. Leicester, fanning herself slowly with a Japanese fan. "Do I hear the carriage? No. Of all places I think the Land's End——" and she glided through two or three soft commonplace sentences.

"Yes," Gilbert interrupted her. "I beg your pardon, I mean I think you do hear——"

"Why, of course I do." There was the sound of an arrival in the hall. Mrs. Leicester put down her fan, but the door at the far end of the room was thrown open before she could reach it, and "Mrs. Austin" was announced. "Here you are at last!" she exclaimed, hurrying to meet the new arrival.

Mrs. Austin bent her head twice to receive her friend's kiss of welcome, and the two came up the room with a soft rustle of drapery. The western sun lit up Mrs. Austin's pale face. "You know Mr. South?" said Mrs. Leicester, and with a smile she answered, "Oh, yes," and put out a gloved hand. He was cool enough usually, but his heart beat fast, and he hardly knew what he said, as he stepped out of a long vista of shadowy years and a confusion of memories to greet Mrs. Austin, newly arrived from a Cornwall whose sunsets, blue seas, and fringe of chafing white waves were those of a summer long gone by. It was only when she said, "Yes, it is a long while ago," that he remembered what his own remark had been.

At that same moment Tiny Vivian, a dainty little rustic figure, swinging a bunch of pale honeysuckle and green-coated nuts, was crossing the corner of a distant field. She had gone some way in silence, with thoughts intent upon the romance awaiting her at the Manor-house. It is true that to Tiny it was a dim and by-gone affair, which had been laid by so long that it could have no better sweetness than that of dried rose leaves and lavender, yet, being a real romance, it was interesting, and it was with an absorbed and earnest glance that she looked up at Frank, and said, "I wonder how those two will meet! Don't you think she will feel rather strange?"

"Why she more than he?" demanded Frank. "I should think they would both feel rather queer after eighteen years." He aimed a blow at a thistle as he went by. "I've been thinking," he said, with a laugh, "it must be eighteen years ago, if it isn't nineteen, since I had the measles. I was a horrid little spoiled wretch, I know—I remember crying because I could not go to a children's party—I used to wear a hideous tartan frock with frills, and had my hair curled. It is certainly eighteen years ago this autumn."

Tiny laughed too. "I suppose I was a baby—my birthday is in August, you know. Isn't it a long while ago? But if he had been waiting all these years, and been true all the while, he has nothing to be ashamed of."

"Might be ashamed of wasting his time, I should think," said Frank. "Don't bestow too much sympathy on Mr. South. And you expect Mrs. Austin to blush for her inconstancy? Not she! I'll bet you anything you like that the faithless widow is much the cooler of the two, and, if there is any blushing when they meet, he will have to do it."

"The sunset is doing it," said Tiny. "Look what a glow there is dying away behind those willows."

"We must look sharp," said Frank. He glanced at his watch and quickened his pace. "You can walk a little faster?"

"Oh, yes—are we far from home?" and, without waiting for an answer, Tiny went on. "I've made up my mind I shan't like Mrs. Austin." There was a determined expression in her brown eyes as she spoke.

"Sorry for her," said young Leicester. "But, to tell the truth, if it wasn't for pleasing my mother, I could very well dispense with the pair of them. I suppose he'll like some shooting; but I can't go out with him to-morrow—I've promised to ride over to Bridge End in the afternoon. I don't know what you'll all do, I'm sure—go for a drive, if you like."

Tiny pushed out a scornful little lower lip. "All packed in the carriage together!" Then, after a moment's consideration, "Well, we might go to the castle."

"Isn't it rather reckless, using up our one show-place the first day?" said Frank. "Though, to be sure, it isn't worth keeping—there's so very little of it."

"And don't you think it might harmonise nicely with their feelings?" Tiny continued, taking a higher range. "Won't they like to poke about little old remains of something that used to be very beautiful and splendid? I should think it would give them a chance of saying all sort of things."

"Oh, go to the Castle—go to the Castle, by all means!" said Frank laughing. "I only hope they'll have your fine sense of harmony, and make the most of the opportunity. Mind you don't interfere—that's all."

"I shall take care of your mother," Tiny answered, loftily. "I shall carry her shawl. And I shall pick ivy leaves off the wall. I hope I know my duty."

"Most people do," said Frank, dryly. "For instance, our duty is to be home in proper time to receive these good folks."

"Shan't we do it?" said the girl, a little apprehensively.

He shook his head. "No, like most people, we shan't! Can you dress in two minutes? You must try to-night, I'm afraid. It's all my fault; the time slipped away, and I didn't notice." Tiny, in spite of her uneasiness, was very happy. They hurried on, the glow in the west grew fainter, and the rooks went by in great clouds, cawing their good-nights overhead.

"I can't think what possessed my mother to want those people!" said Frank, with a sudden burst of irritation, as he helped Tiny over a stile. "I hate having to hurry you like this—you'll be tired out, thanks to them!"

"Oh, never mind me!" said Tiny, breathless, but loyal.

"But I do mind you," Frank answered, hotly. "I wish they were a thousand miles away! Anyhow, their touching meeting must be over by now."

He was right, the meeting was over, and, as he had divined, Mrs. Austin had been the more unmoved of the two. While she shook hands with Gilbert South she did not cease to answer Mrs. Leicester's hospitable anxious questions. She was not tired—her train was rather late, yes, but she really was not tired—she would not have any tea—no, she would not have anything. Gilbert looked at her over the top of Mrs. Leicester's head. There was something of doubt, appeal, almost of entreaty in his glance, and Mrs. Austin did not seem to evade it, and he hardly knew whether it had reached her or not. At that moment he felt it harder to realize how he had parted from Mildred Fairfax than it had been when he stood on the rug and listened through Mrs. Leicester's talk for the sound of approaching wheels. Mrs. Austin's softly-modulated and unhurried speech was like, and yet unlike, Mildred's voice as he remembered it. It seemed like an echo of old days awakened in a strange place. She looked at him with gently inquiring eyes, as if to discover how much he had changed since their parting, and she met the same mute questioning from him. Meanwhile Mrs. Leicester wondered aloud, with much discomposure, what Frank and Tiny could possibly have done with themselves. It was getting late; would Mrs. Austin like to go to her room? and the party broke up, to meet again at seven.

The question which troubled Frank's mother was solved when, at three minutes to dinner-time, she met him on the stairs, looking very hot and dusty. She expressed some views on the subject of punctuality which seemed to make him hotter. "We went farther than I intended—we went along the river after I saw Huntley, and had to hurry back. What's the use of making a row about it?" he said, rather crossly.

"You promised me you wouldn't be late!"

"Well, don't I tell you we hurried home? I believe Tiny nearly ran all the way. I wish I'd made her take it easy, if this is all the thanks we are to get." Frank had the disgusted look of a man who faces an ungrateful world.

"Where is Tiny?"

"Gone up-stairs like a flash of lightning. Look here, mother, it wasn't her fault, you know."

"Well, all I can say is, that it is very tiresome," said poor Mrs. Leicester. "Do make haste, Frank."

"I'm only waiting till you've done talking to me," Frank replied, with sulky doggedness, and stood stock-still with his hands in his pockets. Mrs. Leicester uttered an impatient exclamation, and bounced down to the drawing-room, whereupon Frank went up the stairs two at a time, narrowly escaping a meeting with a very cool and carefully-dressed gentleman who was just coming from his room. He made the most of his time; but it was a heavy-browed and rather sullen young host who made his appearance, when dinner was announced, and offered his arm to Mrs. Austin, with a muttered apology. Frank was profoundly dissatisfied with both his guests and himself. People who were busy with their love affairs while he was a very tiresome little boy getting over the measles, belonged altogether to a peculiarly uninteresting past, and the consciousness that he had been wanting in politeness made him angrily uneasy. He made up his mind about Mrs. Austin and Mr. South between his spoonfuls of soup. There was a slight likeness between them at the first glance. It was hardly enough to suggest the idea of brother and sister, but they might have been cousins. They were both tall, fair and pale; they were very quiet, and when they spoke, it was with a subdued clearness of tone and with a little more finish than Frank himself. The resemblance made them still more uninteresting, and the soft voices struck him as slightly affected. So far as they were concerned, he saw precisely the pair of faded lovers he was prepared to see; but he noticed that Tiny, whose cheeks were a little flushed, and whose pulses were a little quickened by their haste and her fear of his mother's displeasure, looked peculiarly vivid and young by the side of the new-comers. There was something happy and eager in her utterance of the most commonplace remarks which Frank had not observed before. Cross though he was, he flashed an occasional glance of sympathy and encouragement to his fellow-culprit when he chanced to encounter her bright, timid eyes. He would not have Tiny scolded for that afternoon's misconduct, and he watched his mother's manner so jealously that when Mrs. Austin said something about Culverdale, and the road by which she had come, he was preoccupied and answered rather at random. She turned away with a hardly perceptible smile, and spoke to Gilbert South.

It was a little better when the ladies left the dining-room, for Frank contrived to exchange a smile of reconciliation with his mother as he held the door, and so went back to his duty with a somewhat brighter face. But it was not much better. These people were not to his taste. They had the air of having seen and known things beyond the range of Culverdale society and Frank felt shy, young, and half-defiant as he sat over his wine with Gilbert South. He suspected his guest of possibly laughing at his youth and awkwardness. It is true that there was nothing in Mr. South's manner to justify the suspicion. He did not look like a man who was in the habit of laughing at his neighbors; but Frank was in an unreasonable mood that evening. He held himself aloof when they went into the drawing-room still with that heavy consciousness of inhospitable manners upon him, and suffered Mr. South to ask Tiny to sing, and to go to the piano, talk over the songs, and turn the pages for her, while he sat by the table, holding a paper which he did not read.

And then in a moment all was changed—Frank himself—the whole world. Mrs. Austin rose from her seat by Mrs. Leicester, came out of the shadows into the mellow lamplight, and walked to the piano. She simply crossed the room, with the light shining on her pale, beautiful face, as if she were drawn softly by the music. She was utterly unconscious of Frank, who lifted his head from his hand and sat gazing at her astonished and spell-bound, seeing her for the first time. He had been too sulky and absorbed to pay any attention before, he had had her hand on his arm—fool that he was—and had taken no heed. Now as she went by it was like a wonderful revelation, and with a perception which to his own consciousness was singularly quickened, he noted every detail of the picture—the delicate features, the soft, fine hair, the shadowy eyelids, the lips parted a little in a lingering smile, the hand that drooped and held a fan, the dusky softness of her trailing velvet gown, and the web of yellowish lace at her throat, with a white spark of diamond light in it. It was not such beauty as Frank had ever taken pleasure in, or even recognized, before, and for that very reason he was unable to set any limit to his admiration. The charm was that of a pale gleam in an unknown sky, revealing a new world. He was startled at the sudden rush of feeling which carried him out of the narrow boundaries within which he had been eating, drinking, and sleeping till that moment. It seemed to him as if none of the thoughts and words to which he had been accustomed in that earlier life would serve him now. He had scorned poetry as something foolish and unreal; but it struck him that if he took up a volume of poetry he might chance to find it all coming true. Something wonderful, unexplicable, unforseen, had befallen him in that brief minute; but the important events of life may very well happen in a minute which often goes unrecognized. Frank, however, recognized his as it went by.

He moved a little as he sat, to command a better view of the room, and saw how South, who was stooping to untie a portfolio of Tiny's, rose with a swift glance of welcome as Mrs. Austin approached, and silently gave her a chair. She laid her hand on the back, but paused, listening. Looking eagerly at the two as they stood side by side, Frank forgot that he had ever seen a resemblance between them, and would have taken it as an insult had any one suggested that such a resemblance existed. The secret love story, over which he had laughed that afternoon, rose up terribly before his eyes. He remembered every word. He had said how he had proposed to give them their wedding-breakfast, and how he had joked with Tiny about the elderly bride. He hated himself as he recalled the word. Of course, it had been nothing but a joke; Frank knew well enough that a woman who was a girl eighteen years earlier was not elderly; but still he had used it, and the blood rushed to his forehead at the recollection. It was such a detestable word, hard, prosaic, and commonplace; it seemed to vulgarize and spoil whatever it touched. Frank would readily have sacrificed a year of his life (which at his age means that he would have consented to be a year younger) could he have unsaid that hateful word "elderly." His meditations speedily became so unendurable that, in sheer despair, he got up and went toward the piano. Anything was better than sitting there alone, with an idiotic paper in his hand, which would not distract his attention for a moment, and his thoughts full of the remembrance that he had made fun of Mrs. Austin.

It was with a singular sensation of being at once very dull and clumsy, and curiously keen-sighted, that he approached his guests. For the first time in his life he understood that real life could be dramatic, since hitherto he had supposed that novels and plays were interesting simply because of their unreality. To say that such a thing was like a play, meant that it was unlike anything which would really happen to a sensible Englishman. He had not sufficient imagination to enter into the feelings of the people who came and went about him. Long habit might teach him something of their likes and dislikes, hopes and fears, but he had little or no instinct in such matters, and consequently saw nothing beneath the every-day aspect of life. That night, however, his mother's reminiscences had given him a clew to the deeper meaning of what was passing under his roof, and with that secret knowledge of Mrs. Austin and Mr. South he grasped the situation as if it were on the stage. He saw it as if it were on the stage, but he knew that he was more than a spectator.

There was singing, and Frank halted a little way off as if to listen. He had never felt so shy and ill at ease in all his life; never felt so little at home as he did standing there in the Manor-house drawing-room—in the very heart of his kingdom. Of course, he knew well enough that he was the master of Culverdale, but he did not see that Culverdale had anything to do with the matter. In fact, for the first time in his life, he was profoundly dissatisfied with Cloverdale; it was a hole of a place to live in—it had no capabilities. How should they amuse Mrs. Austin? She had been everywhere; she would be bored—she would laugh at it. It was all very well for Tiny, but Mrs. Austin was very different. They might have company, might "call the neighbors in," as the old nursery rhyme has it; but all the neighbors were bores. Frank had not discovered the fact before; but he perceived it now in the light of Mrs. Austin's presence, and reflected that a dinner-party of twenty-bore power would not mend matters much.

Tiny's song came to an end, and Frank awoke to the consciousness that he was looking at Mrs. Austin, in his perplexity.

"Something makes you very grave, Mr. Leicester," she said, with a slight smile.

(To be continued.)

SUNDAY SCHOOL LESSON

April 30, 1916. Lesson V.

Peter delivered from Prison.—Acts 12 1-19.

Commentary.—I. Christians persecuted (vs. 1,2). 1. Now—About the time of the events recorded at the close of the preceding chapter. Herod the king. This was Herod Agrippa, grandson of Herod the Great. He was the son of Aristobulus. It was his grandfather who had the male children of Bethlehem slain after Christ was born, and it was his uncle, Herod Antipas, who had John the Baptist beheaded. This Herod Agrippa came from a family noted for cruelty. He had been made ruler of Palestine by Claudius Caesar. He ruled for three years. His death is described in Acts 12. 21-23. Stretched forth his hands—Made a beginning. To vex—To injure. Herod instituted a scheme of persecution against Christians. He was only partially Jewish by descent, but he identified himself closely with the Jews in keeping the law and in matters of worship, that he might thus gain their favor. 2. James. One of the three most prominent of Christ's apostles, the other two being Peter and John. With the sword—To slay with the sword was considered by the Jews as a disgraceful mode of execution.

II. Peter in prison (vs. 3-6). 3. Saw it pleased the Jews—Herod saw that his plan for becoming popular with the Jews was working well. He was not acting in the interests of the people under his sway, but solely for his personal advantage. The Jewish population greatly predominated in Palestine and Herod was desirous of pleasing them so that his reign might be long continued. Proceeded further—Continued his course of persecution. Peter also—Peter was a strong and fearless defender of Christianity, and his work would be likely to build up the church wherever he might labor. Herod showed cruel cunning in marking these two noble men, James and Peter, for martyrdom. The days of unleavened bread. One of the principal feasts of the Jews. It commemorated the escape of the children of Israel from Egyptian bondage. It is also known as the feast of the Passover. 4. Apprehended him—Arrested him. Put him in prison—Herod used his opportunity in procuring the arrest of Peter, but did not at once have him executed. He put him in prison until a fitting time should come for putting him to death. Four quaternions of soldiers—Four soldiers constitute a quaternion. As the day, as well as the night, was divided into four watches, each quaternion was on duty during a three-hour watch. A soldier was on either side of Peter, chained to him, and the other two were on guard at the inner and outer doors of the prison. Herod believed that Peter could by no possibility escape when such precautions had been taken. Easter—The Passover.—R. V. The Passover feast continued for eight days, and Peter was to be held until the feast was past before being led forth to execution. To the people—By bringing Peter before the people and putting him to death Herod would show how much zeal he had for the Jewish system of religion.

5. Prayer was made—The Christian community believed in the efficacy of prayer and they exercised themselves in this service for the relief of the apostle. "The prayers of the church were offered by assemblies of Christians meeting in various private houses (v. 12), for the persecution would now render public Christian services dangerous, as we know was often the case in the early days of Christianity."—Cam. Bib. Without ceasing—The praying was both earnest and continued. 6. When Herod would have brought him forth—This was after the Passover. The Jews would have been displeased if the execution had taken place during the feast. Sleeping between two soldiers—This expression and the two which follow indicate the care with which the prisoner was guarded. Peter was bound by chains to a soldier on either side, hence it would be naturally impossible for him to attempt to escape without arousing them. Keepers before the door—The means of escape seemed utterly cut off.

III. Peter's release (vs. 7-10.) 7. Angel of the Lord—The Lord sent a heavenly being to bring deliverance to his faithful servant. A light shined in the prison—The light was supernatural. The cell in which Peter lay asleep was illumined as it probably never had been before and never was after that. By this light Peter could see all his surroundings. Smote Peter—To arouse him from his sleep. Raised him up—"Awoke him."—R. V. His chains fell off—The chains with which he was bound to the soldiers were miraculously removed from his hands. Thus far he was free only within his cell, but soon full liberty would be his. 8. Gird thyself—The angel's command was that Peter should gather his loose garments into a belt or girdle that he might move rapidly and easily. Sandals covered only the bottoms of the feet. Cast thy garment about thee—Reference is made to the outer garment or cloak. Follow me—The angel would conduct Peter out of bondage into liberty. 9. Wist not—Did not know. Thought he saw a vision—It did not seem real or possible to Peter that he was set free. 10. The first and the second ward—Ward here means the same as guard. Peter, under the guidance of an angel, had escaped the four soldiers that were placed to guard him. Iron gate—This was the outer gate. It was closed and Peter was still a prisoner, but the power that had illuminated his cell had aroused him and had directed him in detail what to do, would not leave him to the full power of his enemies. Opened to them—No human being was present to push back the lock. Passed on through one street—Peter was still under the guidance of the angel. When Peter reached a street with which he was familiar, the angel left him. He could go to the place where his fellow Christians were praying.

IV. Peter's Testimony (vs. 11-19). 11. When Peter was come to himself—Everything he saw astonished him; he could scarcely credit his eyes; he was in a sort of ecstacy and it was only when the angel left him that he was fully convinced that all was real.—Clarke. (He had) recovered from his bewilderment, and had time to look back upon all the steps that had followed one another in such rapid succession.—J. F. & B. This speedy release was a matter of astonishment to Peter. He had gone to sleep closely guarded and was suddenly awakened by an unfamiliar personage. He was human even though supernatural forces were working on his behalf. It took a little time for him to comprehend the situation. He said—He spoke to himself since he was alone. Now I know of a surety—Peter was fully convinced and him made a strong statement of his belief. The Lord hath sent his angel—His fellow Christians had been engaged in earnest prayer in his behalf and he was sure the answer had been given. "It is one of the profoundest beliefs in my own life that there was a vital connection between the prayer-meeting and the prison."—Jowett. Delivered me out of the hand of Herod—Though Herod was a king, his plans were frustrated by supernatural power. Expectation of......the Jews—As Herod had executed James, so it was the expectation of the Jews that he would put Peter to death also. 12-19. Peter made his way to the home of John Mark's mother, where a prayer-meeting was being held, and knocked for admittance. His arrival there was a matter of so great surprise to the Christians that they could scarcely believe it was Peter. When he came into the house, he declared that the Lord had delivered him and told how it was done. He left Jerusalem at once. His escape from prison was the occasion of great excitement and the order was given that the guard should be executed.

Questions.—Who was Herod? When did he kill? Why? Why did he take Peter? What feast occurred at this time? Why was Peter kept in prison? How many soldiers guarded him? Who prayed for him? How was he delivered? To whose house did Peter go? Who responded when Peter knocked? Why were the people astonished at Peter's coming? What course did Peter then take?

PRACTICAL SURVEY.

Topic—Contending Forces.

I. Worldly policy.

II. Prevailing prayer.

I. Worldly policy. The narrative of the lesson introduces a distinctly new method of persecution. The Sanhedrin had endeavored to crush the young church. In their exasperation they incited Herod against the Christians. He endeavored to destroy the church by aiming directly at its leaders. Everything with Herod depended upon his pleasing the Jews. He presumed to strike a fatal blow at Christianity. His first act was directed against the apostle James, a faithful witness for Christ, before the hard materialism of Roman power and the withered formalism of Jewish bigotry and hypocrisy. Observing that no divine hand was put forth either to protect James or to avenge him, and finding that one murder procured him favor, Herod determined to perpetrate another. "Because he saw it pleased the Jews," more violence was to be done, more wrong inflicted, more grief and lamentation called forth. Peter was marked for martyrdom. The murder of the saintly James, the imprisonment and execution of the apostle Peter, were with Herod a means of purchasing or retaining the good pleasure of the Jews, and perhaps included a further design of strengthening his influence with the emperor, by showing him how he could keep a turbulent province in quiet subjection to Rome. Self-will and self-seeking stood at the beginning and end of Herod's activities.

II. Prevailing prayer. This lesson contrasts sharply the principles and practices of the world and the church. The death of James left Peter the recognized head of the church. With him in prison all his work seemed suspended and apparently all his influence at an end. The church was thoroughly overborne by the suddenness and vigor of the new persecution. They could not tell where the next blow might fall. The delay during which Peter was in prison gave opportunity for human intercession and divine intervention. God opened the door of opportunity through Herod's desire to keep all quiet until after the Passover. The might of prayer was set against the power of Herod. Peter's case was put into God's hands. God's opportunity overtook man's extremity. It would have been as easy a matter for Herod to control the winds of Heaven as to make of no effect the prayers of those early disciples. Peter's hour was not yet come. Until then Herod's power and the expectations of the people were baffled and disappointed. A purpose was working mightier than all human force. Soldiers, chains and prison keepers were significant tributes to Peter's character, a witness to the respect felt for his person and fear for his influence a confession that even Herod was afraid of him. While Peter was used to accomplish great things for others, he was not permitted to perform a miracle in his own behalf. In the extremity of his distress he trusted God and rested. While Herod in his palace must have been uneasy, while the soldiers were wide-awake, while the people were anticipating his death, while the disciples were engaged at prayer, and while an angel was sent on an errand of relief, Peter slept. The angel did not visit the king's palace. He did not enter the temple. God sent his messenger to Peter. The angel had no fear in the prison. He little heeded the ingenuities of Herod. Prison walls, gates or officers presented no obstruction to him. The church, in an attitude of prayer of an imperilled brother, gives a view of the deep and tender sense of brotherhood which pervaded the early church. Peter's imprisonment afforded opportunity to prove the mighty power of prayer. The angel led Peter forth from the desolate prison and the society of soldiers, that he might join the company of praying brethren. They were thus assured that their dangers, sorrows, fears and prayers were all known to God, and that their lives were under his protecting care. Instead of being wasted and destroyed, the church was multiplied. The protection of Providence did not supersede the exercise of caution and prudence. Mindful of divine protection, Peter avoided danger and notoriety. The break of day brought a great disturbance among the soldiers. Peter's deliverance was a triumph of divine power, a reward of apostolic fidelity, the answer to intercessory prayer. It accomplished the overthrow of proud tyrannical rage. Thus Herod's career is seen in its pride and humiliation, and in its short-lived arrogance and defeat. T. R. A.

COURAGEOUS.

(Buffalo Courier)

"One wife too many!" exclaimed Mrs. Wedesly, as she glanced at the headlines of her husband's paper. "I suppose that is an account of the doings of some bigamist?"

"Not necessarily, my dear," replied her husband, without daring to look up.

Don't despise the little things. "If" is a mighty small word, but it causes a lot of trouble.

SUNDAY AT HOME

DAILY STRENGTH AND CHEER.

God lets us go our way alone,
Till we are homesick and distressed,
And humbly then come back to own
His way is best.

He lets us thirst by Horeb's rock,
And hunger in the wilderness;
Yet at our faintest, feeblest knock,
He waits to bless.

He lets us faint in far-off lands,
And feed on husks and feel the smart,
Till we come home with empty hands,
And swelling heart.

But then for us the robe and ring,
The Father's welcome and the feast,
While over us the angels sing—
Through last and least.

—Anna F. Burnham.

REST AWHILE.

You are wearing out the vital forces faster than there is any need, and in this way subtracting years from the sum total of your life. This rush and worry, day after day—this restless anxiety for some thing you have not got is like pebble stones in machinery—they grate and grind the life out of you. You have useless burdens; throw them off. You have a great load of useless care—dump it. Pull in the strings; compact your business; take time for thought and better things. Go out into the air and let God's sun shine down upon your busy head. Stop thinking of business and profit; stop grumbling at adverse providences. You will probably never see much better times in this doomed world; and your most opportune season is now; your happiest day is to-day. Calmly do your duty and let God take care of His own world. He is still alive and is the King. Do not imagine that things will go to everlasting smash when you disappear from this mortal stage. Do not fancy that the curse of heaven, in the shape of the vain task of righting up a disjointed earth, is imposed upon you. Cease to fret and fume; cease to jump and worry early and late. The good time is coming, but you can never bring it. God can and will; take breath, sit, sit down and rest, and take a long breath. Then go calmly to the tasks of life, and do your work well.—Dr. T. Taylor.

WAIT.

How many stand upon the tip-toe of expectation, but as men advance the anticipation grows less? The reason is, the attitude is based on ignorance and emptiness. As men grow in knowledge and fulness, expectation dwindles down to a little thing. Paul wrote in old age and in prison, "I have all things and abound, I am filled. My God shall fulfill every need of yours." Some can say, I wait with Him. I know Him. He is my Mate, my Master, my owner, my teacher, we work together, our ideals are lofty, our instruments pure, our end always in sight; worthy, beneficent, unlimited. Amiel says: "I realize with intensity, that man in all that he does is great and noble, is only the organ of something, or some one higher than himself. Others say, we wait in Him. Passengers wait for a train, for a moment they are one, they do not speak, at the destination they scatter. When we say wait in Him, we mean that we share a common life, of joy, fruitfulness and beauty. There is a common likeness, fitness, atmosphere and argument. When I am on board the gospel ship, how safe am I? outside the bulwarks is death; inside, life: life for evermore! More than that, some have heard the voice; be silent before God. The silence is not terrific, but beatific. We sail round the island of self; mark its headlands, harbors, rivers; we penetrate, we explore. There are thoughts which have no confidant; sorrows which are not shared, visions which cannot be put into words; we dream alone, suffer alone, make our rope fast alone. This silence is not oppressive; it is not a prison, it's a sanctuary. We feel ourselves made fast to the infinite; we hear a voice, feel an impact which is not from men; we are joined to Him whose thoughts we think, by whose knowledge we know, and in whose light we see. How oft have we sung "I waited for the Lord, my God?" Now we don't sing that any more because we love Him. The great discovery is made; we have little to expect—the future is a home country. We look with indifference at to-morrow with its light and rain, its work and wages, its weather and events. These have dwindled to specks, like objects seen through the butt end of a telescope. Do we ask why? It is by reason of the glory that excelleth. I do not say "Come, Lord," for He is here. I have in Him as much as I can hold. To-morrow I shall be larger, then I shall have more of Him. The path of the just is as the shining light, which shineth more and more into the perfect day."

Our day ends in the glory of mid-day. It is one eternal noon.

H. T. Miller.

Beamsville, Ont.

Guncotton Amber.

Nitrocotton that produces such powerful powder also produces a beautiful imitation of amber. Claim is made that if one buys a meerschaum pipe with an amber piece six inches long at what seems to be an unusually low price, one may rely upon it being collodion—a solution of guncotton in ether. The cloudy effect which some smokers like is produced by a large amount of camphor in the solution. Nitrocotton also produces a fine substitute for tortoise shell.

Quebec's Fortifications.

The fortifications of Quebec are obsolete as fortifications, but remain as picturesque additions to the beauty and interest of "the Gibraltar of America." The fortifications standing consist of walls and a citadel built in 1823-32 at a cost of over £7,030,000. Between 1865 and 1871 three forts were built on the Levis side of the river, but were not armed or manned. The citadel occupies more than forty acres. No trace of the old French fortifications remains.

Small Boy—Please, mister, I wants to know if there's a Sugar Trust. Grocer—Yes, my lad. Small boy—Well, will yer trust 'er wi' a couple of pennies?—Wall Street Journal.

SONG OF THE SWAN.

A Vocal Dirge About Which Poets and Naturalists Disagree.

There is an air of legendary mystery about the swan. Some swans are mute, but most have sonorous voices of surprising power and reach. Poetic tradition declares that the swan sings in dying, and so we have the familiar phrase to indicate the last effort of a poet—"swan song." Othello exclaims, "I will play the swan and die in music." And Portia says in "The Merchant of Venice," "He makes a swan-like end, fading in music."

A hundred other poets have used similar expressions, and yet naturalists declare that the swan does not make any music in dying, though it may make a noise. And these same naturalists aver that the great vocal powers of swans are due to a special sounding apparatus formed by "the coiling of the long trachea (windpipe) within the sternum" (breast bone). The crane, whose trumpet call, when a flock is setting off for a long, high flight, can be heard from above the clouds after the birds are out of sight is furnished with a similar vocal instrument.

SOME BEAUTY DON'TS.

A Few Simple Habits That Help Stave Off Seediness.

Don't wear thin shoes and gossamer stockings in cold weather or you will have that pinched, chilled look that is so unbecoming. Don't economize in shoe leather. It is economy which will probably cost you dear.

Don't give up taking exercise even if the weather is bad. A brisk walk on a cold day is a complexion beautifier.

Don't fail to dry your hands thoroughly after washing if you wish to prevent them from getting chapped. Don't forget to wear a veil if your skin is susceptible to cold winds. Don't wear heavy headgear. It is very bad for the hair. Don't let your rooms get hot and stuffy. Always leave the window slightly open at the top.

An excellent lotion for preserving the color of fair hair is made from camomile flowers. An ounce of these should be placed in a bowl and about a pint of boiling water poured over them. Cover the bowl and allow to stand for a couple of hours, then strain carefully and use occasionally, dabbing it into the roots of the hair.

The more fair hair is brushed the better it looks. Brushing gives a gloss which eventually becomes permanent and so is far better than what brilliantine could impart; also it frees the scalp from dust and makes the hair grow. The brushes must be kept scrupulously clean; should be washed every morning and left to dry.

BLUFF IN WARFARE.

British Game at Gallipoli Not the First by Any Means.

The secret evacuation of Suvla and Anzac by our army of occupation under the very noses of the Turks, "the biggest bluff in war's history," as it has not inaptly been termed, bears a close resemblance to the similar abandonment of the Redan by the Russians during the Crimean war.

For months our heavy guns had been pounding unavailingly at this exceedingly strong fortress. Twice we had tried to storm it, only to be repulsed with great slaughter. A third attack had been ordered to take place in September 18th, but on the early morning of that date, before daybreak, Corporal Ross of the Royal Engineers, who was in charge of one of the advanced saps, noticing that the place was strangely still, crept forward to investigate.

He found the work untenanted, save by dead men, and a few badly wounded, and hastened back to report to the British commander, who at first was frankly incredulous. But investigation soon proved the truth of the plucky corporal's statements. The entire garrison had been quietly withdrawn under cover of darkness to the north forts, leaving the road to Sebastopol open.

Ross was awarded the V. C., and was known thenceforward throughout the British army as "Redan Ross."

When the armies of Napoleon were overrunning Europe, General Massena, with 18,000 men, appeared suddenly before the Austrian town of Feldkirch, and demanded its surrender. Instead of complying, the burgomaster issued orders that the church bells were to be set ringing and that the burghers, their wives and daughters, clad in holiday attire, were to assemble in the market square and there make merry.

The result was exactly what he had hoped for. Massena heard the sounds of rejoicing, watched from the heights overlooking the town the gathering throngs in the streets, and came to the conclusion that the townsfolk must have received intelligence that the Austrian army, which was believed to be somewhere in the vicinity, was advancing to their relief.

As to give battle there and then formed no part of Napoleon's general plan of action, Massena ordered a retreat. Feldkirch was saved and by a bluff, for as a matter of fact no relieving force was anywhere near at the time.

A bluff that was eminently successful resulted in the Earl of Peterborough securing possession of Barcelona in the early part of the eighteenth century.

The defences of the city were at that time exceedingly strong. Peterborough had with him barely 2,000 indifferently armed troops, and two small cannon. Halting his force some miles away in the hills, he rode forward, attended only by a small escort bearing a flag of truce, and demanded an audience with the governor.

To him the earl explained that he had been ordered to take the city by assault, but being wishful to avoid useless bloodshed, he preferred to allow him to surrender it of his own free will. Incidentally he mentioned that the force at his disposal amounted to 20,000 men and a powerful siege train.

Incredible though it may seem, this most colossal of bluffs "came off." The governor, after some parleying, agreed to accept the British general's alternative and by nightfall Barcelona was ours.—Pearson's Weekly.

HOPE REVIVED.

(Kansas City Journal)

"Got some data now to go on," declared Diogenes, speaking of his search for an honest man.

"What's that?"

"The income tax statement sent in."

COUGHED SO HARD

Would Turn Black In The Face.

SHE WAS CURED BY USING DR. WOOD'S Norway Pine Syrup.

Mrs. Ernest Adams, Sault Ste. Marie, Ont., writes: "My little girl, six years old, had a dreadful hard cough. At nights she would cough so hard she would get black in the face, and would cough for several hours before she could stop. We tried different kinds of medicines and had several doctors, but failed to do her any good. She could not sleep nor eat, her cough was so bad, and she was simply wasting away. A friend advised me to try Dr. Wood's Norway Pine Syrup. I got a bottle and saw an improvement, and got another. Now I am only too glad to recommend it to all mothers."

Too much stress cannot be laid on the fact that a cough or cold should be cured immediately.

Dr. Wood's Norway Pine Syrup will cure the cough or cold and prove a preventative from all throat and lung troubles such as bronchitis, pneumonia and consumption.

"Dr. Wood's" is put up in a yellow wrapper; three pine trees the trade mark; price 25c and 50c, per bottle.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

MAN AND HIS LAUGH.

Self Restraint and Its Effect Upon Human Emotions.

Laughter is a sign of high develop ment. The nearer one is to the an imal the less one laughs. The mor highly developed we become the mor do we perceive humor. For laughter, it must be remembered, is a sign that an emotion has suddenly been set free. It is like a touch on the trigger of a gun, the gun being self restraint.

No one ever takes an animal (in the wild state) that there are certain things that he must not do. There is no direct prevention of an act that the animal wants to perform. Consequently the animal has no self restraint.

Man, on the other hand, is surrounded by commandments from babyhood onward. He is always being told by some one, first by his parents, then by the laws of society, that there are things that he must not do. The desire to do these things, coupled to the knowledge that he dare not do them, causes a tense emotion. The animal lives as the occasion rises. Man is keyed up by the continuous conflic of occasions.

It is the relief from the keying that gives rise to laughter. The grea er the tension caused by the delay between impulse and act the funn does the thing seem which release Something which would seem moderately funny if it happened i street becomes screamingly ludi in church because of the tensi feeling that one must be solemn. a snowball hits a silk hat th makes one laugh because of th ing that, whatever else a might be intended for, it wa target for snowballs. Exagg are often funny, because th our emotion from a usual to pected channel.

A story teller who laughs at jokes always spoil his storie the man with the mournful fac quips seem the merriest. It is saying that one must "laug grow fat," but modern scie learned that we must "laug grow wise."

Grand In Its Ruins.

On Calton hill, Edinburgh, sta most remarkable unfinished in Britain. It is far more and striking in its unfinished than it ever could be if complet gives Edinburgh the appearanc ancient Athens. Canary Crusts.

Take some stale pieces of bread, into squares and thin slices of cre cheese, also cut into squares. take one piece of bread at a time, for it, place a slice of cheese on bread, cover with mustard and cover with another slice of butt bread, so that when finished t bread is evenly cut and the cheese b tween. Have some butter melted in frying pan, fry to a golden brown serve with a lettuce salad.

"Papa, what becomes of the g little calves when they die?" "If th are very, very good, my son, they come chicken croquettes."

DOAN'S KIDNEY PILL

Relieve The Kidneys and Bladde Like Ordinary Medicines Do The Bowels.

When the kidneys get out of order t back is sure to become affected, and d pains, sharp pains, quick twinges point to the fact that the kidneys n attention.

Plasters and liniments will not cure the kidneys, for they cannot get to the seat of the trouble, but Doan's Kidney Pills do, and cure the kidneys quickly and permanently.

Mrs. Lizzie McInnes, Plympton, N.S., writes: "I am sending this testimonial telling you what a wonderful cure Doan's Kidney Pills made for me. For years I had suffered so with my kidneys I could hardly do my housework. I used several kinds of pills, but none of them seemed to be doing me any good. At last I was advised to try a box of Doan's Kidney Pills. When I had taken the first box I found relief. I have used five boxes, and to-day I feel like a new woman. I cannot recommend them too highly."

Doan's Kidney Pills are 50c. per box, 3 boxes for $1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

When ordering direct specify "Doan's."

FARM AND GARDEN

FEEDING DAIRY COWS.

The economical feeding of dairy cows calls for more skill, knowledge and attention than does the production of food. Just as no two foods are alike in their composition or effects, just so no two cows are alike in their needs for the production of a large yield of milk. Nor are they alike in their digestive ability.

The cow should be given all the palatable food that she is able to eat and assimilate; and this food should contain the various elements, in the proportions in which they are needed, to sustain life and produce milk.

Tests which have been made time and again prove that a 1,000-pound cow requires the equivalent of about 25 pounds of dry food every day, and this food should contain about 13 pounds of carbohydrates or starchy matter; from half a pound to one pound of fat, and from one and one-half to two and one-half pounds of protein.

By dry food is meant food free from water, and when fresh food like soiling crops and silage are used, the total weight must be increased to make up for the moisture, as, for instance, 100 pounds of silage contain only about 25 pounds of dry food.

The perplexing problem of the feeder is to learn how he can mix his different materials so as to form a feed of the best composition—a balanced ration—at the lowest possible cost.

The most expensive element in a ration is protein, and therefore should receive the closest attention. Protein is the element most required in the development of blood and muscle, and for the production of casein or curd in milk.

Starchy or carbonaceous elements form the principal digestible portions of hay and silage made from the true grasses, and of grains—as corn, rice, barley and rye—all of which are poor in protein. But hay made from the clovers, alfalfa and other legumes, and such grain feeds as cotton seed meal, wheat bran and shorts, pea meal, malt sprouts and brewer's grains, contain a much larger proportion of protein.

The perplexing problem of the feeder is how he can mix these different foods so that the whole will have the proper bulk and weight and contain the different nutritive elements in the right proportion. It is a problem which is generally not so easily solved. It is made still more difficult by the fact that cows vary in their requirements with the season, the amount of milk which they give and the period of gestation. But, while even the solution may not be exact, it approximates very closely.

There are few feeds of which a cow can consume 25 pounds daily which do not contain all the carbonaceous material she requires. Therefore, in making up a ration the feeder needs to give little attention to anything beyond palatability, bulk and the proportion of protein.

As protein is costly, and when fed in excess of the requirements of the cow is worth no more than the cheaper carbonaceous elements, no more should be given than is necessary for the maintenance of the cow and for her secretion of milk. While an excess of rotein in the feed does no special arm, any deficiency will be quickly own in the decrease of milk.

Some kinds of hay, like that made m pea vines for example, contain large a proportion of protein as is uired, but the average cow does er when a part of her ration con- of concentrated feed, such as n or meal. Usually it is better to t least a small quantity of such even with a hay rich in protein. vine hay contains about the proportion of digestible protein is found in wheat bran, but a cow do better on a daily ration of 20 ds of the hay and 5 pounds of than on 25 pounds of either the or the bran alone. Bulk of feed cessary to stimulate the digestive s of the cow and keep them in condition, and digestion seems to still further stimulated by the addi- of some grain food to the bulky ration.

here are cases where it will be d advisable to use a feed in which various food elements are not in ly the proportions in which they assimilated by the cow. On every m there is generally a certain ount of food produced which is of h value for milch cows, but which nnot be sold or exchanged for other ds.

An old rule in feeding was to give a und of grain per day for each 100 unds of live weight of the cow, but it was defective in that it gave to a w in full flow of milk or more than a dry cow of equal weight. Some eeders have adopted the rule of feeding a pound of grain per day for each und of butter made in a week. Thus, cow making six pounds of butter in week should receive six pounds of rain daily, while the cow giving 10 ounds of butter weekly would receive 0 pounds of grain as her daily ration. That is a rule much better than the one for feeding, according to weight and regardless of production, but still it should not be adhered to too strictly, nor should all cows receive the same kind of grain.

A cow thin in flesh ought to be fed fattening grain, like corn, a feed which should be avoided for a cow which is inclined to become too fat.

A balanced ration (one which the protein bears the proportion to the carbo-hydrates necessary for the best results) will support the cow on a smaller quantity of food than will a ration in which either element is in excess, but dairymen are not wholly agreed on what the proportionate should be.

For a number of years the rule was to give a feed containing one part of digestible protein for each 5.4 parts of digestible carbohydrates, or, as it is commonly stated, a ration having a nutritive ratio 1 to 5.4. Recent experiment work has shown the economy of varying the proportions with the conditions of the animal, and has led to a general practice of feeding less protein to cows nearly dry, and more to those producing a heavy flow of milk.

FARM NEWS AND VIEWS.

Moisture is largely lost through vegetation rather than from the surface of the soil. The soil mulch assists in retaining moisture under certain conditions, but does not always retain sufficient moisture to pay the cost of maintaining an ideal mulch. Summer tilling the land retains a part of the rainfall and gives some [illegible] against drouth, but the cost of summer tilling has not been fully paid by increased yields of corn or spring grain. While the soil and crops respond to thorough methods of tillage, they do not respond sufficiently to extreme methods of tillage to pay for the added expense. A system of tillage that does not permit the soil to be robbed of moisture by vegetation which has no market value, and that keeps the surface of the soil from becoming hard and smooth, seems to accomplish the practical ends of tillage. While more labor than is required to accomplish these ends may increase the yields, yet the increase is likely not to be sufficient to return as much for a unit of labor expended in the extreme tillage as in the less intensive and more practical tillage. Summer tillage and green-manure crops have increased the yields, but not the profits, because of the increased cost per acre. The results reported indicate that the less-expensive methods give the greater profits. As the yield per acre is increased beyond a certain normal, the cost per bushel, on the average, will be increased. It is probable that the farmer who judiciously combined live stock farming with grain production secured a profit during the most unfavorable season.

There is no color of horse so insensible to heat as the sorrel.

Of ordinary farm implements, the sulky plow has the shortest life in years, but ranks second only to the walking plow in total days of service rendered. Its life is a little over eight years, while its total of days' work is 119, as compared with [illegible] years and 221 days for the walking plow.

Grippe Left Her Seriously Ill

BUT DODD'S KIDNEY PILLS CURED HER COMPLETELY.

Mrs. Halquist Tells Just Why She is the Firm Friend of the Grand Canadian Kidney Remedy, Dodd's Kidney Pills.

Bangsund, Sask., April 24th.—(Special.)—Mrs. Pete Halquist, a well-known resident here is a firm believer in Dodd's Kidney Pills, and is always ready to tell the reason why.

"About a year ago," Mrs. Halquist says, "my little girl was taken ill with the grippe. She was sick in bed for three weeks with pains in the joints. They were swollen and stiff.

"She had cramps in her muscles, so it was awful hard for her to get around for the longest time. After she was able to be around her skin became harsh and came off in scales.

"After using two boxes of Dodd's Kidney Pills she was as well as ever she was in her life. She has been strong and healthy ever since."

The after-effects of grippe are more to be dreaded than the disease itself. That is because they generally act on weak kidneys and put them out of working order. Sick kidneys are the cause of rheumatism, backache, dropsy and numerous other diseases. The one sure way to avoid them is to keep the kidneys toned up and able to do their work. The best way to keep the kidneys healthy is to use Dodd's Kidney Pills.

AUTO COURTESY.

When it comes to courtesy of the road, President M. M. Wall, of Buffalo, the venerable leader of the New York State Motor Federation, cannot be beat. He is so careful of little things of a courteous nature that he seldom drives over fifty miles in a day's run. In his "book of habits" he has inscribed the following courtesy rules which motorists in general might well adopt:

BE COURTEOUS.

First, do not hog the middle of the street. Give the other fellow room to go by and when he attempts to pass you, do not speed up and perhaps crowd him into a safety zone. Be courteous.

Keep out of the safety zones: They are for the pedestrian. It is up to you to make them safe.

When a fellow comes from a side street—Give him room to turn the corner; do not crowd. When you park behind another car, remember he may wish to leave before you do. Give him room to get out; don't crowd. When you expect to stop or turn, do not keep your intentions secret; think of the fellow behind.

Do not dodge in and around cars in line in traffic. Remember they were first and have just as great a desire to get through as you have. Be courteous.

Do not presume too much when you have the right of way. Perhaps the other fellow does not know it. Be courteous.

Do not cut in front of a street car—Remember the motorman is human, and most of them will learn all the courtesy you will teach them. Be courteous.

When you get the "go" signal from a traffic officer, remember to give the pedestrian time to get out of the way.

When you see people on the curb trying to reach a car, or vice versa, slow up; stop if necessary, but let them cross without danger. This is one of the courtesies that will pay the motoring public best.

When a pedestrian does not or will not pay any attention to your horn, remember that the deaf, hundreds of them, use the streets as well as you.

When you have an insane desire to speed—Remember the other fellows you are passing have just as much right to break the law as you have. Think of the sentiment you are creating against motoring. Think of the accidents that may happen by your hitting some other driver coming in from a side street, or pedestrian who does not see you coming. Think of the people in your own car, perhaps, who have a fear of speeding and are trying to be game and not let you know it. It is not sport to drive fast in the city; it is the utmost discourtesy to your fellow motorists and fellow citizens.

When a pedestrian sees you coming and deliberately pays no attention to you, remember that some are mentally deficient and you cannot tell them by the clothes they wear.

When you see a child on a curb, slow up. Remember the child can start quicker than you can stop.

Do not open your cutout on the streets during the day. Remember there are many sick people and people on their death beds. Do not open your cutout at night, for you will probably remember some night when you were disturbed by some fool whose greatest claim to fame was his noise.

And remember that your horn is just a few times worse than your cutout.

Magic Baking Powder costs no more than the ordinary kinds. For economy, buy the one pound tins.

E.W. GILLETT COMPANY LIMITED
WINNIPEG TORONTO, ONT. MONTREAL

EGGS---MORE EGGS

Canada Does Not Supply Enough for Her Own Use.

For many years Canada produced more eggs than she needed and was able to make large shipments abroad. We kept on increasing our poultry but at the same time our towns and cities were growing in size and the consumption of eggs increased more rapidly than the production. The result was, that our experts gradually disappeared, and strange to say, agricultural Canada became an egg importing country. People were surprised to learn through the press that shipments came in, some times from Russia and frequently from China, two of the greatest egg producing countries in the world. Of recent years enormous quantities of cold storage eggs from the United States have been brought into make up for our deficiency. Since the war broke out the foreign supplies for Great Britain have been seriously interfered with. Trade with Russia has been largely cut off. There was, therefore, an opportunity for the shipment of Canadian eggs to Great Britain. In the patriotism and production campaign of last year it was stated that there would be a deficiency of 100,000,000 dozen eggs in Great Britain thus opening up an enormous market to Canada. In addition to the regular consumption there has been an increasing demand for strictly fresh eggs for hospital requirements. The call for fresh eggs has been as insistent as the call for cooks and Red Cross funds. Canadian eggs inspected and graded have found a ready market. This market can be held during the war and after the war if we are ready to take advantage of it. Particular attention is given to this question in The Agricultural War Book for 1916. The outlook as to demand and prices is such as to warrant our people in giving careful consideration to it. Thousands of families that do not keep fowl have here an opportunity. Instructions and suggestions are available in every province. The Dominion Department of Agriculture has a number of very valuable bulletins and every province of Canada has a well organized poultry branch ready to give advice. It is a most interesting problem. The United States calculations are that the American hen on the average lays 70 eggs per year. Our Canadian hen, partly from climatic reasons, falls short of this, some calculate by at least 20 eggs. The profitable flock should show an average of at least 120 eggs. The work carried on in developing bred-to-lay fowl and the results of egg-laying contests open up a most interesting field. The record is to-day held by a hen in Delaware. This hen laid no less than 314 eggs in one year. Last year the Canadian hen did her duty, the best ever—she laid eggs to the value of $30,000,000. She can do much better if we give her a chance. There are thousands of families in villages and towns that can keep a small flock at very little expense, thereby serving their own table and helping to increase the exports. Even with eggs we can help finance the war. Meat prices are advancing and the cost of living is going up. Only a half dozen eggs every day will be a great help for the home table. Perhaps, in addition, you can put away half a dozen for use next fall and winter.

BANISH PIMPLES AND ERUPTIONS

In the Spring Most People Need a Tonic Medicine.

One of the surest signs that the blood is out of order is the pimples, unsightly eruptions and eczema that come frequently with the change from winter to spring. These prove that the long indoor life of winter has had its effect upon the blood, and that a tonic medicine is needed to put it right. Indeed there are few people who do not need a tonic at this season. Bad blood does not merely show itself in disfiguring eruptions. To this same condition is due attacks of rheumatism and lumbago; the sharp stabbing pains of sciatica and neuralgia; poor appetite and a desire to avoid exertion. You cannot cure these troubles by the use of purgative medicines—you need a tonic and a tonic only, and among all medicines there is none can equal Dr. Williams' Pink Pills for their tonic, life-giving, nerve-restoring powers. Every dose of this medicine makes new, rich blood which drives out impurities, stimulates every organ and brings a feeling of new health and energy to weak, tired ailing men, women and children. If you are out of sorts give this medicine a trial and see how quickly it will restore the appetite, revive drooping spirits, and fill your veins with new, health-giving blood.

You can get these Pills from any medicine dealer or by mail at 50 cents a box or six boxes for $2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

KEEPING IT UP.

(Kansas City Journal.)

"Nobody ever invites me to ride in their automobile."

"Well?"

"And when I get one I ain't a-going to invite anybody to ride."

The shadow of human life is traced upon a golden ground of immortal hope.—Hillard.

VERDUN.

(From the New York Tribune.

The battle of the Verdun has lasted a month. It began on February 21st and has continued since then with only a few brief pauses. The flags have been hoisted in Berlin following various claims and rumors of victory. But there has been no German victory of sufficient consequence to deserve a celebration. Various minor local successes have been won at a cost far exceeding their value.

What has happened in the month's fighting about Verdun is this: The French have yielded outlying positions all along the original semi-circle line of entrenchments defending the city from the northwest to the southeast—from Malancourt and Bethincourt all the way around to Fresnes. The Germans have pushed forward in these sectors from three to four miles. The French have fallen back to their main line of defence.

The German attacks have been the fiercest at three points. The first great onslaught was from the north. It lasted from February 21st to February 26th and culminated in the occupation of the dismantled Douaumont fort. From February 26th to March 4th the main pressure was exerted from the east and southeast. This attack was not obstinately resisted and yielded a larger area of territory than the original attack from the north. From March 4th to March 11th assaults were made all along the French line. East of the Meuse the gains were slight, the movement from the direction of Metz being halted at Vaux and Eix. Since March 11th the focus of the fighting has been shifted to the west side of the Meuse. There the Germans have driven forward repeatedly. But their line is still further from Verdun at Chattancourt-Malancourt than it is on the east side of the river at Douaumont or in front of Vaux and Eix.

Taken as a whole, the German offensive at Verdun has yielded nothing at all compared with the effort made. The ground taken is of no special value. The forts of Verdun have been dismantled. They no longer serve as traps for their defenders. Verdun itself could be laid in ashes without affecting in the least the military situation on the Meuse front. So long as the French lines hold, every gain in territory merely calls for another sacrifice on the part of the attacking armies. The German operations around Verdun can bring results worth while only if they wear down the French defence, compel the evacuation of Verdun and the whole Verdun salient and enforce a retirement from the Meuse westward to the line of the Aire.

Such an achievement would have had a decided moral effect if it had come with machine-like precision or startling suddenness. It was that highly impressive moral effect, not only on the Allied powers, but on the neutral nations as well, which Berlin gambled on when the great drive against Verdun was undertaken.

What Berlin needed and hoped for was another demonstration that the theory of numerical exhaustion, on which the Allies have been banking in forecasting German defeat, has not yet even begun to come into play. Another victorious march was to be staged like that through Galicia and Poland or that through Serbia.

Herr Roda Roda, the most brilliant of the Austrian war correspondents, has described picturesquely in the columns of the Vienna Neue Freie Presse the method of the Serbian advance. The heavy artillery started its work daily at about 9 a. m., playing on the Serbian positions and making them untenable. About 11 a. m. the German Austro-Hungarian infantry advanced and occupied the abandoned Serbian lines. The enemy had no artillery with which to hinder such an operation and not enough infantry to indulge in counter attacks. Between noon and 7 p. m. the two armies quit work for the day. It is a war conducted on a leisurely labor union schedule.

Taking into account the somewhat greater capacity for resistance of the Russian armies, the drive through Galicia and Poland was very similarly ordered. But against the powerful French artillery and the indomitable morale of the French troops no such easy progress was possible. The French have yielded ground, but they have never admitted inferiority. So far, they have held their main lines intact. Verdun is still unconquered, and after a month of desperate fighting, with necessarily costlier sacrifices for the attackers than the defenders, the balance of profit over loss is on the French rather than on the German side.

The third demonstration of the overwhelming power of the German offensive has failed. The barren gains at Verdun so far prove that the Allied line on the west front cannot be broken by any effort of which the German armies are now capable. The one in which the Crown Prince was to figure for his own glory and the glory of the house of Hohenzollern has not materialized.

Neutral nations have been more impressed by Turkish reverses in Armenia than by minor fruitlessly exaggerated German successes on the Meuse. There is more unrest to-day in Berlin than there is in Paris. The French do not talk openly of a "victory" at Verdun. They are repressing anything that looks like exultation. But they know now more certainly than ever before that their frontier is secure—that Germany's greatest effort on their front since the battle of the Marne and the battle of Flanders has crumpled in failure.

In a tactical sense, the battle of Verdun is not yet finished. It may drag along for several weeks more. But it is clear that the positive decision at which the German high command aimed cannot now be obtained. Even were Verdun to be abandoned eventually by the French, the extreme, cruelly exhausting effort needed to take it would mark the passing of German capacity to resume another great offensive on the west front, or on any other front, for months to come.

BRIEF AND SCIENTIFIC.

Fifty vocations are taught in the United States navy.

Police women are now employed in 26 cities in the United States.

The annual fire loss of the United States amounts to $2 for each inhabitant.

Salt put in hot water will make it hotter, just as it makes cold water colder.

The pet birds of the United States last year consumed 4,304,625 pounds of bird seed.

Government meat inspection cost each resident of the United States four cents per year.

Eiderdown is one of the poorest conductors of heat, hence its use as a bed covering.

A German substitute for sole leather withstood six weeks' test of the severest character.

A daily paper was recently issued on a train between the cities of Minneapolis and Spokane.

The number of aviators in the world is now estimated at 50,000, and the number is growing daily.

Tuberculosis is the chief cause of the condemnation of meat by the United States inspectors.

The under-sea origin of chalk is indicated by the presence of minute sea shells which are revealed by the microscope.

Heavy firing on the battlefields overhead caused the fall of a 200-ton piece of salt in the mines of Wieliczka, Galicia.

The records show that only 17 per cent. of the applicants applying for enlistment in the United States navy are accepted.

The world's products of lead pencils probably amounts to near 2,000,000,000 a year, half of which are made from American-grown cedar.

Gold, silver, copper, quicksilver or mercury, iron, nickel, tin, zinc, lead and aluminum are the ten minerals generally to be found in every house.

In Switzerland there is one post office for each inhabitant. This is said to be greater facilities than offered by any other country.

Too Tired.

Frank lives in Eastern avenue. A few days ago his companion George caught his clothing on a picket fence. He was held fast, his feet a foot or two from the ground. He pleaded with Frank to release him or run for help, but Frank refused.

"Why don't you go and help George?" his mother inquired from the front porch.

"I'm just too tired," said Frank. "Yesterday I wanted him to 'shoo' my dog out of his yard, and he wouldn't do it 'cause he said he was tired. I'm just as tired as he was."

How We Read.

Oliver Wendell Holmes owned up to his preference for reading in books to reading them through. "When I set out to read through a book," the autocrat wrote, "I always felt that I had a task before me, but when I read in a book it was the page or the paragraph that I wanted, which left its impression and became a part of my intellectual furniture." If we were only franker most of us would confess to being like Holmes in this matter of our reading.—New York Telegram.

"Just as Millet and the widow started up the aisle to the altar, every light in the church went out." "What did the couple do then?" "Kept on going. The widow knew the way."—Boston Journal.

PILES.

You will find relief in Zam-Buk! It eases the burning, stinging pain, stops bleeding and brings ease. Perseverance, with Zam-Buk, means cure. Why not prove this? All Druggists and Stores.—50c box.

Zam-Buk

WHAT SHAKESPEARE DID.

Some of the Reasons Why the Bard is Really Immortal.

What were his achievements? And why do we call him great?

No other writer of drama has such lasting power over our laughter and tears.

Others painted a dull world; Will gave us Arcady.

Where other men draw marvellously, he gives us the life itself.

With infinite skill and infinite zest he heightens comic effect by beauty.

He left us his lyrics, faultlessly lovely and unrivalled, yet for melody and fancy as radiant and as pure.

With an exquisite sense of appropriateness he made of our common language structures of loveliness so consummate as to alter its usage forever.

He brought English historical drama to its perfection and to its close. When he laid down the untangled skein there was no one to take it up.

He opened to highest tragedy a range of undreamed sublimity, and with unparalleled invention created or refreshed a gallery of human types as true to nature as to art, almost endless in variety and matchless in vividness.

His supreme gift to dramatic art is the great gift of character-drawing. In masterly drawing of character he remains unapproachable.

He used every type of humanity fit for tragic or comic art.

None ever framed a woman of prouder or sweeter stuff, or so shrewdly drew her April charm, or so woefully showed to what terror her gentleness may be turned.

None other ever so made the ghastly and appalling natural.

Or so drew the coarseness and fiendish malignity of the Iago side of side with Desdemona's gentle purity.

Or with such matchless eloquence and irresistible pathos painted the terrible, inexorable Jew.

No other so provokes us to laugh at human folly, shudder at human crime, or shrink aghast from horror; yet keeps unchanged our pity and love for fallen humanity.

With the highest secret of comic art, he discovered the sadness of laughter, and put wisdom in the mouth of fools.

In "Romeo and Juliet" he wrote the epitome of all songs or stories of youthful passion and romance that ever were told or sung.

His vocabulary is so vast, his knowledge so comprehensive, that others seem beggars who have been to a feast and come away with the scraps.

Yet the greatest gift his genius shows is his knowledge of human hearts and his innate sympathy.

There was no one like him in his day; there has been no one like him since; and we all shall live a weary while before we see his like again.—John Bennett in St. Nicholas.

KNEW ALL THEIR TRICKS.

Frederick the Great Proved It to His Cavalry Officers.

"Gentlemen," said Frederick the Great, after a review of his troops, "I am entirely dissatisfied with the cavalry. The regiments are completely out of hand. There is no accuracy, no order. The men ride like tailors. I beg that this may not occur again and that each of you may pay more attention to his duty, but I know how things go on. You think I am not up to your dodges, but I know them all and will recapitulate them.

"When the season for riding drill comes on the captain sends for the sergeant-major and says: 'I have an appointment this morning at —. Tell the first lieutenant to take the rides.' So the sergeant major goes to the senior subaltern and gives him the message, and the latter says: 'What! The captain will be away? Then I am off hunting. Tell the second lieutenant to take the men.' And the second lieutenant, who is probably still in bed, says: 'What, both of them away? Then I will stay where I am. I was up till 3 this morning at a dance. Tell the cornet I am ill and he must take the rides.' Finally the cornet remarks: 'Look here, sergeant major, what is the good of my standing out there in the cold? You know all about it much better than I do. You go and take them.'

"And so it goes, and what must be the end of it all? What can I hope to do with such cavalry before the enemy?"—History of Frederick the Great."

Enriching the Language.

The growth and change which are inseparable from all living language cannot fail to interest the student, and a special interest attaches to the incorporation of the names of well-known men. Thus Wellington has come to mean a sort of boot; Brougham, a carriage, and Gladstone, appropriately enough, a traveller's bag, as that great man advocated the "bag and baggage" policy, which seems likely at length to be adopted.

Other names have been turned into verbs as well as nouns. For instance, the murderer Burke's name is perpetuated in the words to burke, burked, burking and burkism, while in quite recent times Captain Boycott's experiences resulted in the language being enriched by the phrases to boycott, boycotter, boycotting, etc.

The most notable case was probably that of the great and good man, Rev. T. Bowdler, D. D., who by publishing a "family edition" of Shakespeare in 1818, added the words "bowdlerize" and bowdlerism" to our language.—Exchange.

The Test of Education.

The test of a good education is the degree of mental culture which it imparts, for education, so far as its object is scientific, is the discipline of the mind. The reader must not overlook what is meant by the word mind when used in reference to education. That some dumb animals are possessed of a sort of understanding is admitted, but it has never been asserted that they enjoy the use of reason. Man, however, has the faculty called reason in addition to his understanding. Accordingly what we mean by saying that the object of education is the cultivation of our minds or that the goodness of an education varies with the degree of mental culture amounts simply to this—that we better perform our functions as rational creatures in proportion as we carry further the distinction between ourselves and the brute creation—that is, in proportion as we are better fitted for the discourse of reason.—John William Donaldson.

CURRENT COMMENT

King Constantine of Greece is not saying much these days. Even his Queen is not talking for publication.

Seeing that Von Papen failed to invade Canada, the Chancellor may think that there is no use trying again.

When the Kaiser hears that the Esquimaux of the North Pole are contributing to Britain's war fund, he may throw up his hands.

Queen Wilhelmina's husband is said to be a pro-German German. But she wears the breeks.

Capt. von Papen is said to be in Holland. He seems to keep as far away from the front as possible.

There will be no prorogation of Parliament before Easter. But there will be an adjournment for perhaps a week.

By strenuous work for three weeks on the part of recruiting officers all over the United States, 1,250 men were added to the United States army. We understood Mr. Bryan to say that at the sound of the first shot a million men would spring to arms. That must have been a figure of speech.

The death of Richard Harding Davis, American author, newspaperman and war correspondent, is announced to-day. Although Mr. Davis had written many books, and was at one time editor of Harper's Weekly, he was best known as a war correspondent, acting in that capacity in the Spanish war of 1898 and in the Boer War. In the present war, Mr. Davis was a strong supporter of the Allies, and was very bitter against Germany for her treatment of Belgium.

The Rochester Times tells of a well known Canadian financier of 66 years of age, who went to England in the interest of his health. He had money enough to live in any way he chose, and his trip abroad was chiefly for the purpose of consulting the best physician obtainable in an effort to learn how he could live to be 100 years old. The physician told him that he could only expect long life by keeping working, no matter how rich he was. The doctor never knew of a man living to extreme old age who had "retired." Perhaps that is what keeps some of us working when we should be resting.

The Canadian Pacific Railway has no fewer than 5,000 individual agents in the United States in connection with the work of the natural resources department. The latter handles some 7,000,000 acres of land—the balance of the 25,000,000 acres the company obtained from the Government at the inception of the line. It looks after four demonstration farms and thirteen mixed farming farms. The department also supplies animals on easy terms of payment to the settlers. For instance, in 1912 it supplied 3,123 cattle, 1,324 swine, 2,173 sheep, and 114 horses on easy terms of payment. Then it has interest in the great irrigation block, which altogether would comprise some 4,000,000 acres. The eastern section is now completed, and comprises some 400,000 acres, which will accommodate 50,000 people.

The Danbury (Conn.) hatters, who were in trouble recently over a boycott, and whose property was threatened with seizure, have hit upon a new plan of increasing their wages. As outlined by a contemporary, the workers think that they should have higher wages, but they also feel that the employers cannot afford to pay higher wages at this time, owing to the increased cost of materials since the war broke out. Instead of striking, therefore, they are planning an investigation of the industry, with a view to showing the cost of manufacture under the new conditions, the position of the employers and the position of the workers. The results of this survey will be made public to prove that the retail price of hats should be increased to meet the changed conditions of manufacture. The employers cannot very well object to the plan. There is or was a Hamilton colony over in Danbury.

WHAT HE WAS WAITING FOR.

(Exchange.)

The minister was hard at work repairing the fence of his chicken yard. Noticing the careful attention given to the work by a small boy of his next-door neighbor, the clergyman asked kindly:

"Are you getting some points on carpentry, Harold?"

"No, sir," said Harold. "Im just awaitin' to hear wot a preacher says w'en he smashes his thumb wit' de hammer."

DIDN'T TRY ANY SOFT SOAP.

(Kansas City Journal)

"Go!" said the girl. "I wash my hands of you."

"Before you do any hand-washing, better take off that ring I gave you," he retorted, frigidly.

WHY, INDEED!

(London Opinion)

"Mother, is gran'ma gran'pa's wife?"

"Of course she is, dear."

"What did he marry such an old woman for?"

MAN IS AS OLD AS HIS ARTERIES

THE failure of the arteries is one of the tragedies of modern life. Men in the very prime of life, and in the midst of business activities, are suddenly cut off. In many cases the blow comes before they realize their condition.

And what is the cause? Most usually overeating and drinking, combined with too little bodily exercise. The blood becomes overloaded with poisons. The kidneys break down in an effort to filter the blood, degeneration of the arteries takes place, an artery in the brain bursts, a clot is formed and paralysis results. Or it may be an artery in the heart that gives way and causes heart failure.

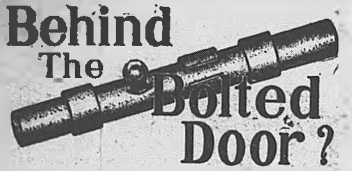
And how is this condition to be avoided? By moderation in eating and drinking, and by keeping the liver, kidneys and bowels regular and active. If you do not get sufficient exercise to accomplish this, it is necessary to use such treatment as Dr. Chase's Kidney-Liver Pills. It is only by the action of these organs that the blood can be purified and the poisons removed from the system. In using

Dr. Chase's Kidney-Liver Pills

you are not making any experiment, for they have no equal as a means of awakening the liver, kidneys and bowels to healthful activity. They prevent such serious troubles as hardening of the arteries, and thereby promote comfort and health and prolong life.

One pill a dose. 25 cents a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto. Do not be talked into accepting a substitute. Imitations disappoint.

Dr. Chase's Recipe Book, 1,000 selected recipes, sent free if you mention this paper.



YOU will find a gripping detective story in the May number of MACLEAN'S MAGAZINE—"Behind the Bolted Door"—by Arthur E. McFarlane. Full of mystery, tense with interest, alive with action, passing strange in plot and incident, it is baffling until the last paragraph of the last chapter.

This McFarlane story is but one of many "specials" in the May MACLEAN'S—an issue really remarkable for its high quality, as witness the following writers. These contributors are, as you will recognize, a most exceptional company—the best known of Canadian writers.

	EDITORIALS BY:
Arthur E. McFarlane	Sir Herbert Ames
Stephen Leacock	N. W. Rowell
Nellie L. McClung	C. C. James
Robert W. Service	James L. Hughes
Agnes C. Laut	J. P. Downey

And next issue (June), the first of ARTHUR STRINGER'S new serial story, "The Anatomy of Love."

MACLEAN'S MAGAZINE

has one feature which commends it to all readers—its Review of Reviews department. Here is reprinted the heart of the best things appearing in the leading magazines and periodicals of the world. So in MACLEAN'S one gets the essence of many magazines.

Rich promise in this May Number of many hours of genuine entertainment and profitable reading. A big 15 cents' worth—more than you find in a $1.50 work of fiction. For the price of a new novel, you can have twelve numbers of MACLEAN'S.

MACLEAN'S MAGAZINE is Canada's best periodical publication. It is out-and-out Canadian and is doing a fine work for the encouragement of Canadian literature and writers. As a good Canadian, you should be a yearly subscriber.

Begin your Subscription with the May Issue, $1.50

Just write your name and address on this advertisement, and mail to the publishers—The Maclean Publishing Co., Ltd., 143 University Ave., Toronto. Bill for $1.50 will be sent later. Enclose remittance if you prefer.

Miss Florence Messmer of Berlin was the guest of Miss Colette Jarvis over the holiday.

While on a visit to Durham on Saturday, Pte. Joe Cain was presented by the town authorities with a razor outfit. That town has given a present to every one of its young men who has enlisted.

Coun. Alex. McCarter, who was in the City says that about the only able-bodied men he saw on the street of Toronto who were not in uniform, were foreigners.

Rev. Mr. Dingman of Mount Forest occupied the pulpit of the Baptist Church on Sunday. Rev. Mr. Rock is still indisposed, but is on the mend.

The Durham Cement Co. is said to have an overdraft of $36,000 with very poor prospects of meeting the demand.

Wool will be some price this year, in fact it is too early to say what the price will be, but one thing is sure, it will be high. A few days ago a load of wool was sold in London for 35c per pound, the highest price paid in 60 years.

The Ripley flax mill has closed down for one month. The employees will spend their vacation assisting the farmers with the spring crop. That word production is catching all along the line, and "back to the land" movement is becoming more popular every day. Some retired farmers who, have done nothing but watch the days go by, are going to get into harness this spring.—Ripley Express.

The annual meeting of the Walkerton Branch of the Women's Institute will be held at the home of Mrs. J. Coulter on Thursday, May 4th.—Edna Wahn, Secretary.

Mr. Con. Hossfeld of Carrick has been laid up the past two weeks with a heavy cold.

Trout season opens next Monday.

The women of Paisley have raised $100 for Red Cross work.

Mr. Gordon Bell of Walkerton, spent over Sunday with his sister, Mrs. Jos. Bailey.—Paisley Advocate.

The ties and poles of the Ontario and West Shore Railway were sold at Kincardine last week. The ties brought $7 to $10 per hundred, and the poles $5 to $8 per mile and a quarter, which are considered very good prices.

Port Elgin raised the full $5,000 aimed at for the Patriotic Fund on Wednesday of last week.

Mrs. Houck sold her double roughcast house near the Fair Grounds to Mr. I. Abell.

Listowel expects to have Hydro-Electric power by next month.

A little Durham girl with a toy soldier that marched when wound up, saw a real soldier come home with her big sister one night, and asked her to "wind him up" so that she could see him go.—Durham Chronicle.

Latest report is that Mr. Arthur Lee, whose condition was causing grave anxiety last week is doing as well as can be expected. Mr. Lee was taken to Wellesley Hospital, Toronto where he is receiving the best possible care and attention. His physician now hopes that with some further treatment followed by a complete rest, the internal disorder which Mr. Lee sustained by falling on the ice last month, will disappear entirely.

From the day of the "gathering of the clans" at Walkerton, the progress of the 160th will be watched with interest by every loyal inhabitant of Bruce, who may rest assured that the city fathers of the capital of the County will excel themselves in their endeavour to provide a fitting welcome to the sons of Bruce who are sacrificing so much for their King, their country, and the honour of the county. We note with pleasure the generous response of the inhabitants of Walkerton to the appeal for money and accommodation—no insignificant undertaking is the feeding of thirteen hundred men,—with ten days yet for preparation. We repeat the conviction that Walkerton will entertain the soldiers in a way that will not readily be effaced from their memories.—Chesley Enterprise.

Production and Thrift

"GAIN or no gain the cause before the farmers of Canada is as clear as it was last year—they must produce abundantly in order to meet the demands that may be made, and I believe this to be especially true in regard to live stock, the world's supply of which must be particularly affected in this vast struggle."—*HON. MARTIN BURRELL, Minister of Agriculture.*

THE FOLLOWING STATEMENTS ARE BASED ON REPORTS CONTAINED IN "THE AGRICULTURAL WAR BOOK, 1916," PUBLISHED BY THE DEPARTMENT OF AGRICULTURE, OTTAWA, ONT.

LIVE STOCK—The herds and flocks of Europe have been greatly reduced. When the war is over there will be a great demand for breeding stock. Canadian farmers should keep this in mind.

MEATS—In 1915 Great Britain imported 664,508 tons of beef, mutton and lamb, of which 364,245 tons came from without the Empire. Out of 430,420 tons of beef only 104,967 tons came from within the Empire.

The demands of the Allies for frozen beef, canned beef, bacon and hams will increase rather than diminish. Orders are coming to Canada. The decreasing tonnage space available will give Canada an advantage if we have the supplies.

DAIRYING—Home consumption of milk, butter and cheese has increased of late years. The war demands for cheese have been unlimited. The Canadian cheese exports from Montreal in 1915 were nearly $6,500,000 over 1914. Prices at Montreal—Cheese: January 1915, 15¼ to 17 cents; January 1916, 18¼ to 18½ cents. Butter: January 1915, 24 to 28½ cents; January 1916, 32 to 33 cents.

EGGS—Canada produced $30,000,000 worth of eggs in 1915 and helped out Great Britain in the shortage. Shippers as well as producers have a duty and an opportunity in holding a place in that market.

WRITE TO THE DOMINION DEPARTMENT OF AGRICULTURE AND TO YOUR PROVINCIAL DEPARTMENT FOR BULLETINS ON THESE SUBJECTS

Tens of thousands of Canada's food producers have enlisted and gone to the front. It is only fair to them that their home work shall be kept up as far as possible. The Empire needs all the food that we can produce in 1916.

Your
Office Stationery

BUSINESS Stationery should reveal the spirit of the business for which it is used. An appropriate letter head for a profession would be inappropriate for a mercantile house.

The typographical appearance of a letter head for a doctor should be small, neat, dignified—almost feminine; for a blacksmith, black, rugged, plain; for a vaudeville performer, loud, showy, big; for a bank, rich, dignified, restrained; for a store, neat, practical, harmonious, and so on.

Correspondence paper should not reflect poor judgment. Everything counts in these days of sharp competition.

Telescope Job Department

"FRUIT-A-TIVES" THE MARVELLOUS FRUIT MEDICINE

Has Relieved More Cases of Stomach, Liver, Blood, Kidney and Skin Trouble Than Any Other Medicine

THOUSANDS OWE THEIR GOOD HEALTH TO IT

Made From The Juices of Apples, Oranges, Figs and Prunes Combined With Tonics and Antiseptics.

"Fruit-a-tives" means health. In years to come, people will look back to the discovery of 'Fruit-a-tives' and wonder how they ever managed to get along without these wonderful tablets, *made from fruit juices.*

"FRUIT-A-TIVES" is excellent for Indigestion, Dyspepsia and Sour Stomach. 'Fruit-a-tives' is the only certain remedy that will correct *chronic Constipation and Liver trouble.*

'Fruit-a-tives' is the greatest Kidney Remedy in the world and many people have testified to its value in *severe cases of Rheumatism, Sciatica, Lumbago, Pain in the Back, Impure Blood, Headaches, Neuralgia, Pimples, Blotches and other Skin Troubles.*

"FRUIT-A-TIVES" has been one of the great successes of the century and the sales are enormous, both in Canada and the United States. 50c. a box, 6 for $2.50, trial size 25c. At all dealers, or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

Mechanics' SHOES

We call the working men's attention to our excellent shoes built purposely for the mechanic. Nothing in them but good solid leather. Heavy durable soles with uppers of heavy calf or kangaroo. Nothing omitted that would in any way add to their durability, and while they are built for hard usage they are built to be comfortable. They are good looking and moderately priced.

POETS' CORNER

THE QUITTER

When you're lost in the Wild, and you're scared as a child,
And Death looks you bang in the eye,
And you're sore as a boil, it's according to Hoyle
To cock your revolver and . . . die.
But the code of a Man says: "Fight all you can,"
And self-dissolution is barred.
In hunger and woe, oh, it's easy to blow . . .
It's the hell-served-for-breakfast that's hard.

"You're sick of the game!" Well, now that's a shame.
You're young and you're brave and you're bright.
"You've had a raw deal!" I know, but don't squeal.
Buck up, do your damnedest, and fight,
It's the plugging away that will win you the day,
So don't be a piker, old pard!
Just draw on your grit; it's so easy to quit:
It's the keeping-your-chin-up that's hard.

It's easy to cry that you're beaten—and die;
It's easy to crawfish and crawl;
But to fight and to fight when hope's out of sight!
Why, that's the best game of them all!
And though you come out of each grueling bout,
All broken and beaten and scarred,
Just have one more try—it's dead easy to die,
It's the keeping-on-living that's hard.

—Robert W. Service.

News About Town

Mrs. (Rev.) Thos. Wilson attended the Convention at London this week of the Women's Missionary Society of the Presbyterian Church.

Mr. and Mrs. Art McCartney and family spent Easter in Brantford.

Walkerton merchants have many things worth while to tell you in their weekly announcements in this week's Telescope.

Read the ads.

Next Monday will be May Day.

Bandsman John Wallace spent Easter at Paris.

Drummer Percy Heath of the 160.b, Corp. Hampton and Pte. O. G. Wright spent Easter at Chatham.

Lieut. Oliver spent the holidays at his home in Toronto.

The Owen Sound Sun says that a woman of that city predicts that the war will be over in two months. The reason she gives is based on actual experience and should commend itself to a discerning public. She says the war will be over in two months because her husband has enlisted, and she has never known him to hold a job longer than that. This should be conclusive.

The month of May is a month of uncertainty. Our soldier boys MAY leave and then again they MAY not.—Lion's Head News.

The Roll Call of the 160th Batt. will appear in the Special Edition.

Better keep them on yet!

Miss Minnie Kerney spent a few days with friends at Guelph this week.

Mr. and Mrs. Geo. S. Schwindt and two children visited friends in town over the week-end.—Hanover Post.

Wingham has raised its transient traders licence $250. Hitherto it has been $50.

Sergt.-Major Britton spent Good Friday at Kincardine.

Sergt. Struthers spent the week-end at his home in Guelph.

Pte. J. Channing spent Easter with friends at Whitby.

Pte. Langley was a holiday visitor at London.

The best proof that Lions Head is still alive and kicking is that owners of some vacant lots are asking about $20 per foot for them and would-be purchasers are buzzing pretty near the price.—Lion's Head News.

Almost the whole world's supply of leather is being made into shoes for the armies of Europe. Shoe manufacturers won't take orders for next Fall.

As Mark Twain put it, the death of Villa seems to have been greatly exaggerated.

A Chinese laundry has opened for business, and every bachelor in town and country around is enjoying the novelty of a clean shirt.—Yorkton Times.

Lieut. McKechnie is a splendid physical instructor.—Tiverton Watchman.

Major McNally and his orderly were here on Monday looking over the local squad, and giving them a few pointers on how to salute.—Mildmay Gazette.

Clarence Krueger left on Monday to take a position with a barber at Coldwater, Ont.

Mr. Howard Todd, who arrived here recently from Red Deer, Alta., left this week, accompanied by his mother, Mrs. F. Todd, on a visit to his brothers Rev. E. J. Todd of Queenstown and Rev. Thos. Todd of Niagara Falls. He has disposed of his business at Red Deer and expects to locate somewhere in Ontario.

Mr. Eamer, teller of the Bank of Commerce spent the holidays at St. Catharines.

Mr. N. C. McKay paid a visit to Guelph this week.

The Kincardine Reporter says that the West Shore Railway is going to be linked up with the hydro radial system.

The plucky people of Brussels celebrated King Albert's birthday, April 8th, in defiance of the German soldiers. Once again we take off our hats to the Belgians.

Senator Choquette should be chequed off.

Another "crisis" for the British Government! Mr. Asquith is the champion survivor of political crises, and he looks good for a few more yet.

A daring case of theft is reported from Elsmere. A week ago last Friday night a thief went to the hog pen of Mr. Adam Geddes and stole a fine big porker. No trace of the culprit has been found but it is hoped he will soon be found. At the price hogs are now, the animal is valued at over twenty dollars.—Tara Leader.

Eight soldiers of the Tiverton Platoon went out recruiting on Thursday last, bringing in three recruits, Messrs A. McLeod and Lorne Reid of Glamis and Stuart McPherson of Boundary East. Tiverton has signed up 77 with the above three recruits of which twelve have been rejected leaving the platoon numbering 65.—Tiverton Watchman.

Greenock Farmer Enlists

William Laporte, a Greenock Township farmer, pulled up stakes this week and enlisted with the 160th Bruce Battalion. Mr. Laporte has a wife and family and leaves a 100 acre farm which he has rented to Mr. Lockie McDonald. Few men had a better excuse to stay at home and let the other fellow do the fighting but William didn't see things that way.

✢ ✢ ✢

Attractive Dining Car Service

Probably nothing helps more to make a railway journey really enjoyable than a visit to the "Dining Car," especially if it be a Canadian Pacific Dining Car, where the passenger is assured of the highest form of efficiency in the culinary art, the choicest provisions the market affords, prepared on the scientific principle known as "Dietetic Blending." Your favorite dish, as you like it, may be enjoyed at reasonable cost, amidst ideal surroundings, while travelling on the Canadian Pacific.

✢ ✢ ✢

Houck—Dyke

A quiet wedding took place at the home of Mr. and Mrs. Robert Dyke, near the Grand Trunk Station, on Monday, April 17, when their youngest daughter, Miss Lily Ann Dyke, was united in marriage to Mr. Milton Houck, youngest son of Mr. and Mrs. John Houck, of Brant. The ceremony was performed by Rev. R. Perdue, rector of St. James Church, in the presence of a few immediate relatives and friends. The happy young couple are leaving shortly to make their home at Hanover, where Mr. Houck has a position.

Chester Clendenning Writes.

Mrs. Thos. Dixon received a letter on Tuesday from Chester Clendenning son of Mr. W. M. Clendenning, formerly of Walkerton, gratefully acknowledging the receipt of a parcel. Pte. Clendenning writes:—Out here in Belgium is where you appreciate more than you do in civilian life, the generosity of your friends at home. We are having very fine weather here. It is better than they are having in England. They have been having heavy snowfall, something unusual there. Fritz sent over several shells a few minutes ago just to let us know he is still alive. We are restricted very much in what we can write about in a letter which makes it rather hard to get sufficient news.

WHY BUY AT HOME?

I buy at home—

✢

Because my interests are here.

✢

Because the community that is good enough for me to live in is good enough for me to buy in.

✢

Because I believe in transacting business with my friends.

✢

Because I want to see the goods I am buying.

✢

Because I want to get what I buy when I pay for it.

✢

Because my home dealer "carries" me when I run short of cash.

✢

Because some part of every dollar I spend at home stays at home and helps work for the welfare of our town and county.

✢

Because the home man I buy from stands back of the goods, thus always giving value received.

✢

Because I sell what I produce to my home people, be it labor or goods.

✢

Because the man I buy from helps support our poor and needy, our schools, our church, es, our lodges and our homes.

✢

Because if ill luck, misfortune or bereavement comes, the man I buy from is here with his kindly expressions of greeting, his words of cheer and, if needs be, his pocketbook.

✢ ✢ ✢

Here I live and here I buy.

LETTER FROM FLANDERS

Pte. Ed. Erdman Sends a Spicy Effusion to His Friend Mr. John May—Thunderstorms Isn't in It with Artillery Fire.

Somewhere in France,
April 2nd, 1916.

Mr. J. May,
Walkerton, Ont.

Dear Johnny:—

Well, old sport, just a line to thank you for your kindness in sending me that parcel of tobacco which I received yesterday and sure was pleased to receive it as Old Chum is sure a treat to me as well as the Macdonalds. Well, Johnny, this life over here is the game, just eat, sleep and help to put the Fritzie bunch out of commission, and believe me, the Huns have got their medicine of late and I think they have hit a snag that will make them guess for all time to come and if our boys keep on handing it to the Germans, why there will not be enough left to even start another war for old Bill to head. Well, you talk about a noise or racket, well we sure get it here. When our guns open up on Fritzie's lines, the noise they make is fierce. Why those old thunderstorms we used to get over there are not in it for a minute. The noise of the guns would almost deafen us but we are used to the fire and noise now and pay no attention to a bombardment when they are taking place and now that the nice weather is on, they keep the guns pretty busy and I don't think the Fritzies can stand up to our fire much longer. They had their chance and day but I think the tide has changed and that they are on the worst end of the game. Well Johnny, it is just like being at home over here with so many old pals around. Why my arm is sore from shaking hands with so many old pals and friends. All the Walkerton boys are around here, Jim Russell, Bill Wesley, Squee Huck, Bert Cartwright, Spot Fields, Simon Small, Dr. Fraser, Dad Sutton and dozens of others, so you see we are right at home. The weather is in our favor, it sure is ideal weather and we can go around in our shirt sleeves and we get good grub and lots of it. Have a game of football, baseball or horseshoes and we have a first rate time even if we are at the front. No doubt you have seen in the dailies where our battalion has been in the trenches and had mishaps and a few casualties. We have been on trench work and have been kept pretty busy but we don't care for work even if we are in danger and I am not sorry for joining as it sure is a great experience if a fellow is only lucky enough to come through alright. Well Johnny, old boy, I think I will close, with best to all and thanking you again for your kindness. We are all well here.

Yours,

Ed. C. Erdman, 2nd Can. Pioneers, "A" Coy. no. 166238, Army P. O., London, England.

HIGH SCHOOL REPORT

Result of the Weekly Exams in the Various Forms for the Month of April.

The following are the results of the weekly examinations during April. The names are given in order of merit in each class.

FORM I

Honors—A. Reinhart, N. Ley, L. Yack, J. Coumans.

Pass—M. Wilson, S. Taggart, H. Everett, A. Johnston, W. Polfuss, W. Small, F. Myles, D. Kenny, C. Wilton, M. Bonnyman, J. Wiser, F. O'Neill, E. Ramsey, J. Michell, A. Milhausen, B. Thompson, H. Jasper.

Below Pass—W. Lettner, L. Elder, J. Paterson, G. Hibbert, B. Farewell, H. Lewis, B. Cunningham, F. Garner, B. Moore, G. Henderson, E. McNab, W. Brown, J. Gill, N. O'Malley.

FORM II

Honors—D. Frost, D. Girvin, T. Queen, A. McCool.

Pass—A. Tolton, E. Hyslop, C. Terrell, B. McCool, E. Coulter, Leander Bilger, E. Glave, G. Lewis, C. Cargill, G. Plohl, A. Weiler, M. Forsythe, E. Baudhauer, M. Baechler, H. Irwin, E. Lindsay, H. Thompson, W. Ramsay, G. Young, N. Pinkerton, L. Bilger, M. Hyslop, V. Eidt, F. Scherrer, V. Tovell, L. Batte.

Below Pass—S. Brocklebank, M. Kenny, M. Chisholm, E. Stevens, N. Wilton, M. Leech, R. Garner, M. Ernest.

FORM III

Honors—A. Pinkney, M. Coulter.

Pass—W. Wilson, E. Everett, O. Fortune, G. Rogers, O. Schwindt, F. Taylor, G. Seigner.

Below Pass—F. Cunningham, E. Bilger, M. Weiler, S. Bush, J. Rowland, A. Garland

FORM IV

Honors—W. Berho.

Pass—W. Tanner.

Below Pass—J. Wells, C. Thornburn, M. Green, K. Foster, M. Coumans.

Seeding is Backward

The wet condition of the ground is preventing the farmers from getting to work on the fields, and it looks as though seeding would be very late. Only a little sod plowing had been done up to the beginning of this week. Fall wheat and clover appear to have come through the winter pretty well. There is yet little indication of winter killing. Unfortunately, the unusually wet weather of last fall prevented the sowing of a large amount of fall wheat and the acreage this season is much smaller than in 1915.

The Home Washer

The easiest running of all washers is on exhibition at our store. Call and see it. Its speed balance wheel and steel ball-bearings make it so easy to run that any child can operate it.

THE FRASER STUDIO

"I Am Afraid to Quit Advertising!"

ADVERTISING is not only the greatest business of the present day—it is an absolute necessity for twentieth-century business, declared Hugh Chalmers, head of the automobile company which bears his name, in a recent address before members of the Los Angeles Advertising Club and several hundred business men of that city. "I advertise because I have to—not because I want to. Advertising increases my sales in such a fashion that I simply cannot afford to be without it. The only man who can't advertise is the one who has so much business he can't handle it, or the man who has so little business it isn't worth his while. None of us are in the first class, and none of us will admit that we are in the second. I once asked Gerhard Mennen if he believed his advertising was successful—if he thought it was worth doing. He was then spending $850,000 a year. He told me he didn't know whether his advertising was successful or not. 'I will tell you how it is, Mr. Chalmers,' he said. I was running a retail drug store and an advertising man came and said if I would advertise in the town papers I would do more business, and I advertised and I did more business; and they came to me and said if I would advertise all over the State I could get business all over the State, and I advertised and I got the business; and they told me to branch out into New York State and Pennsylvania and I would get more business, and I did, and they were right; and I have gone on from year to year doing more advertising and getting more business, and I will tell you the truth—I am afraid to quit!'"

OTHER PAPERS VIEWS

A CLEAN (-UP) JOB.

(Woodstock Sentinel-Review)

General Bertram, chairman of the [illegible] Shell Committee says the committee [illegible] work well," he says. The complaint is that it was a "clean-up" job, and that the cleaners cleaned up too much and too rapidly.

THE VOLUNTEER SYSTEM.

(Chicago Tribune)

Our history has proved, and England is learning to-day, that the volunteer system is grossly unjust, is demoralizing, socially, economically, and politically, is wasteful and delusive in peace, is a failure in war.

AN INSULT.

(Brantford Courier)

In Hamilton, under the direction of the Mayor, they are bringing in bread from outside to retail for six cents instead of the seven cents asked by Ambitious City bakers. Most people had an idea that there was already enough loafing going on in that burgh to keep the municipality from taking a hand in it.

A DRIFTER, NOT A LEADER.

(Toronto Telegram)

It is Sir Robert Borden's fault and his country's misfortune that the Premier of Canada has put himself before the nation not as a leader who controls the currents of political action by his strength, but as a drifter who is controlled by the currents of personal flattery and private sentiment.

THE ANNUAL COMPLAINT.

(Montreal Herald-Telegraph)

The announcement of the date of the opening of navigation is a reminder that the annual destruction of the Niagara peach crop is now about due.

SOME JUSTIFICATION.

(Buffalo Express)

Before complaining too loudly about Canadian censorship of mails to this country, it is well to remember that our own postal department, in piping times of peace, is constantly opening mail from Canada and other foreign lands for no better purpose than to see that the customs laws are not evaded.

UNGALLANT HANNA.

(Brantford Expositor)

This is Leap Year, the one year in which women have a chance to promote matrimony. One W. J. Hanna must have forgotten this when he decided to raise the marriage license fee from $2 to $3 or else he desires to protect mankind from the amorous advances of the fair sex.

NOT THE CANADIAN.

(West Durham Review)

Several members of the British—not the Canadian—House of Commons have notified the Treasury that they do not require any further payment of their salaries as members of Parliament.

OR COMMISSION IN LUNACY.

(Toronto Star.)

The attempt to make Sir Wilfrid Laurier responsible for the utterances of his bitterest enemies in Quebec would be a good subject for the association for the care of the feeble-minded.

MAY BE A JOKER.

(Montreal Star.)

Of course, there may be nothing significant about it, but it is worth noting that the announcement by the London Liquor Control Board of the discovery of a non-alcoholic substitute for beer was made on April 1st.

THE GERMAN OUTLOOK.

(Buffalo Express)

The Germans have taken Bethincourt at last. They were more than two weeks doing it. At the present rate of progress, provided the French are not able to throw them back by counter-attacks, they will take Verdun in about two months, but it will cost them not less than 50,000 men and they will find themselves facing a new and equally strong line of defense three miles south of Verdun.

A DOUBLE MEANING.

(Pittsburg Gazette-Times)

The Russian hospital ship Portugal is reported to have been sunk by a new type of submarine which is larger and speedier than any previous seen. Apparently it can also descend to lower depths.

THE TRUE RESPONSE.

(New York World)

Experience has shown that the German Foreign Office is capable of making different kinds of replies to friendly inquiries as to the fate of neutrals who chance to fall victims to the policy of frightfulness at sea, but the most convincing response is that which is recorded from day to day in the list of new outrages and assassinations.

THE PROBLEM OF VERDUN.

(Philadelphia Record)

If it has taken the Germans 50 days to capture one fort at Verdun, how long will it take them to reduce the 20 fortresses that surround that town? As a problem in arithmetic this seems easy, but as a question in which strategy, resources in men and guns, national politics, dynastic prestige, international relations and a few other factors play a part it must be admitted to be a tough question. Probably the French General Staff could give an answer more nearly correct than any other.

A DOUBTER.

(London Advertiser.)

"Two Toronto men paid $50 each to dance a jig with Mrs. Vernon Castle. That's a long call from the time when we used to play the mouthorgan, call off and dance all at the same time."—Guelph Mercury.

We don't believe you ever did it. No more'n we used to fiddle like mad with one foot on a kitchen chair trying to eat a piece of apple pie at the same time.

THE REASON FOR VERDUN.

(Rochester Herald)

There are those who believe that the German intention is to convince the allies that Germany is still capable of a vigorous offensive, but an offensive that fails is not likely to strike any terror into the hearts of the enemy. There are others who believe that the offensive is being carried on for the moral effect upon the people of Germany, but even that does not seem rational, for surely the German people must know by this time that the effort has not been crowned with much success. There are still others who think that the German struggle around Verdun is intended to prevent the allies from beginning a great offensive of their own this spring, and this seems the most likely explanation that has yet been advanced, although we must admit that we can see no particular reason for regarding it as probable that General Joffre will be seriously embarrassed thereby.

GERMANY AND BELGIUM.

(Providence Journal)

Cardinal Mercier cannot forget the wrongs of the summer of 1914. His heart burns within him, and he insists on being a patriot as well as a priest. He says he put nothing in his pastoral letter that he had not a right to put there. And we believe him. The Germans have misread their neighbors from the outset. They have hoped and believed that once Belgium had seen how advantageous was the form of government given them by the invaders, they would be content. But the reverse has proved true. A national resentment has been awakened that will not die down in a hundred years. Children yet unborn will thrill with horror at the story of the invasion of 1914 and the name of Germany will be spoken with bitterness for generations after General von Bissing, Cardinal Mercier and the other actors in this great tragedy have passed away.

'TWIXT LOVE AND PRIDE

"I fancied men never forget anything relating to their own comforts," said Mildred mischievously, over Patsey's head; "and yet you have evidently forgotten matches."

"Yes, I have a most unhappy memory," Denzil answered—"so short at one time, so unpleasantly long at another."

"Then there are things you would wish to forget?"

"Scarcely, I think," he said, "although in most cases my memory makes my pain."

"Why, how miserable your thoughts must be—at least, so your voice would lead me to imagine."

"Rather, the remembrance of unkind words perhaps more than deeds; but they are none the more bearable or less hurtful for that." He looked fixedly at her as he spoke, and she blushed the faintest tinge of rose in return, and lowered her eyes for a moment.

All this time the boy in her arms had been gazing eagerly, now at Denzil, and now at his gold chain and colored seal as they moved before his eyes. Either one or the other proved too much for his constancy, as presently he called out with wistful, imperative entreaty, "Take me!" and held out his arms to Denzil in a manner natural to children. Younge hesitated, glanced at Mildred, and half laughed. She colored, and seemed a little vexed, but loosed her arms from round the child.

"Yes, take him," she said, "if he wishes it. You see he is changeable and fickle like the rest of you."

"That is a hard speech—is it not?" Denzil asked—"more particularly as I have heard those very failings imputed more frequently to your sex than to ours." As he finished, he took the boy from her, who went to him gladly, and buried his small hands within his hair.

"Fie, then, Patsey," expostulated his mother in the background, "to give up the pretty lady!"

But in her heart of hearts she scarcely blamed the child that Denzil's sunny hair and kind blue eyes should have found such favor in his sight, and charmed him from his first love—so fair did he appear in all women's eyes, save those of Mildred Trevanion.

"That is nonsense," she said, in answer to his last speech, "a popular fallacy, encouraged by your side gladly to hide your own shortcomings. Why, surely, you must have noticed, when reading various histories, how immeasurably the women outshone the men in long faithfulness and tender endurance. And what does Shakespeare say? Have you forgotten?

"'Oh, Heaven! Were man
But constant, he were perfect; that one error
Fills him with faults.'"

"The Pope himself is not infallible," said Denzil, lightly, "and it is likely enough that for once in his life Master Will Shakespeare may have made a mistake about human nature. And yet it is a very complimentary little bit—do you not think?—acknowledging as it does that we can be accused of only 'one error.'"

"But such an error—it actually fills you with faults."

"Now, you are changing your quotation—bringing what was a general accusation to a particular one. It is hardly fair, I think, to make your pronouns so very personal—in one movement changing the pleasant inoffensive 'him' into that appalling 'you.' Besides, the accusation doesn't apply in my case. I know myself so far that I feel that, if I could only get the love I want, I would be true to her through life and death. But then perhaps I am the exception that proves the rule."

"All men are conceited about their own strength," declared Miss Trevanion, obstinately.

"I shall never get her," said Denzil, with a sudden, deep sadness in his tone, and he turned aside to the small, diamond-paned window that she might not see the darkening of his face.

"Ah, then, she is a reality?" Miss Trevanion went on. "In that case—Take care! Your chain is in a bad way, I fear, when Patsey has it."

The boy had wound the chain round and round his slender wrist, and was gazing at it now with childish admiration and delight.

"'Tis pitty," he murmured, softly, and put his head on one side coquettishly, while holding out his hand from him the better to mark the glittering effect.

"I fear I have prided myself too soon on my personal attractions," Denzil said. "See, I am already forgotten. The gold is of more value now in his eyes than I have ever been."

"A common misfortune," answered Mildred, mockingly. Miss Trevanion was in a cynical mood. "I hope it won't happen to you in any more important epoch of your existence. Take care that the lady of your affections—of whom you have just spoken—does not also choose your gold, and not you."

"I hope to heaven that may never happen to me," Denzil broke out suddenly, with such vehement passion stirring his voice that even Mrs. Dempsey, in a far corner, turned from her washing to see what "ailed the handsome stranger." In a moment, however, he had softened his tone, and went on, hurriedly, "Although I would almost rather in that way, if in no other, gain her, than lose her altogether."

"A mean-spirited speech," said Mildred, coldly. "You would be unwise to accept any woman on those conditions. Shall we be going, however? I think we have invaded Mrs. Dempsey's castle long enough; and you are of course dying to get back to your shooting."

"No, I have had enough of it," he returned, placing the child gently on the ground, and putting half a crown into his small brown palm. "Will you allow me to see you home? Remember it will be only common charity on your part, as I have lost my way completely, and you alone are here to pilot me out of my difficulties. Will you not take pity on me?"

"Come, then," she said; and so they passed out together into the biting clear north wind.

Miss Trevanion, slight and tall though she was, scarcely reached her companion's shoulder as they walked along side by side, very silently at first. The chill breeze sent a bright warm glow to her cheeks, and played with and flung about her hair, until she stood transfigured into one of the ancient sirens, come back once more to break the hearts of men. The heart of the man beside her was very surely on the way to breaking just at present, so sweet she seemed to him, so fair past all expression, so hopelessly beyond his power to reach.

"'And of what are you thinking, Jenny?'"

Mildred hummed, gayly, glancing up at Denzil with laughing violet eyes.

"Of you," he answered, simply, "and of that ridiculous conversation we held a few minutes since, and of something else."

"Very explanatory," said Miss Trevanion—"only I want very much to know what the 'something else' is. I hold it as my due to tell me, because I am your Bradshaw just now, and you certainly owe me a return for my services."

"If I told you, it would not interest you in the least."

"I can quite believe that—few things do; but as we have a good long walk before us, with no earthly subject to discuss, as I conclude you hardly feel equal to the weather. Do you?"

"Of course I do; surely you do not suppose that this little gust of wind possesses the power to upset me!"

"I don't mean in that way—how stupid you are! I spoke of being 'equal to,' or as you would say, 'up to' discussing the weather."

"Oh, that, indeed! I beg your pardon; the cobwebs thicken on my brain of late, I fancy. I only hope this lively breeze will blow them all away before Mr. Blount's ball, or I shall find no one there to take pity on me."

"Remove your hat, then, and give your head a chance; the result will probably be a severe cold in it—but that doesn't matter, compared with clearness of the intellect. Are you thinking much about the ball?"

"A little, I confess. A strange acknowledgment, you will say, for a man who has spent his seasons regularly in London for a number of years, but so it is. Circumstances alter cases, you know, and I have a fancy to see Miss Mabel and Miss Sylverton, and—and you in ball costume."

"You cannot imagine any one half as charming as I look in mine," said Miss Trevanion, with gay audacity; "in fact, the other two you mentioned are 'nowhere' when I appear. And, if you don't believe this statement, you may judge for yourself the night after next. So that is why you are thinking a little about it—eh?"

"I would think a great deal about it, if I dared. For instance, I would never cease dreaming of it from this moment until then, if you would promise me the first waltz."

"But at that rate, consider how stupidly insipid you would be for the next two days. I would not have it on my conscience to be the means of reducing you to such a state of imbecility. And, besides, you don't deserve anything at my hands, as you have not told me the 'something else' you spoke of when first we left the cottage."

"Perhaps, if I told you, you would be angry," he said.

"What should there be in your thoughts to cause me anger?" she answered—and just a degree of the light buoyancy that had been animating her voice ever since they began their walk faded out of it, and did not return.

"Well, then, as I stood at the cottage door before entering, I heard Mrs. Dempsey tell you of a report she had heard—a report that gave you in marriage to Lord Lyndon. I was thinking of that when you first spoke to me, and wondering—" He stopped abruptly, and, turning, looked at her with eyes full of a wild entreaty. "Tell me," he said, almost fiercely, "is it true?"

They were inside the gates of King's Abbott by this time, and were rapidly nearing the house. Already the grand, beautiful old mansion appeared at intervals, gray and stately, through the intersecting branches of the lime trees beneath which they walked. Miss Trevanion's face had subsided from its expression of gay insouciance into its usual settled look of haughty impenetrability, and, gazing at her, Denzil felt his heart grow cold and dead within his breast, as hope fled, and dull despair crept in to fill its vacant place.

"By what right do you dare to question me on such a subject?" she asked, her voice low but quick with anger.

And he answered, with sad truthfulness: "By none, I have no right."

After which they continued their walk in utter silence until the hall door was reached, when, drawing back to allow her free entrance, he said, with a faint trembling in his tones:

"And about that waltz, Miss Trevanion—may I have it?"

"No," she answered, with cold distinctness—"I have almost promised it to another," and went past him into the house without further look or word.

CHAPTER IX.

The night of the ball came at last, and a prettier sight than Dick Blount's dancing room presented could hardly have been found. There were lights and flowers and merry voices everywhere, with softest, sweetest music on the air. "The queen," in white, and Frances Sylverton, in satin and pearls, looked more than usually fair; but no one in the room that night could hope to look like Mildred Trevanion.

She was dressed in palest, faintest blue from head to foot, with rich pink flowers nestling here and there amongst the floating folds of her dress. She appeared clothed in clouds of azure, her yellow hair framing her face in a golden glory that made her seem a very angel of beauty to more than Denzil Younge that evening, as, with an almost choking sensation in his throat, he stood and watched her from the doorway.

The wished-for first waltz had been bestowed on Lord Lyndon, to his—Denzil's—bitter chagrin; indeed, since that last walk across the park, Miss Trevanion had been even more than ordinarily cold and distant in her manner toward him.

To-night she seemed almost oblivious of his very presence in the room, though bestowing many a smile and look of greeting on those who chanced to be in his vicinity.

"Miss Trevanion appears to be in great form to-night," said Leslie, one of the "heavies," stationed at Broughton. "Jove, I don't wonder at Lyndon's palpable subjection."

"Is that he next her—the white-headed boy in that A1?" asked Harvey, one of his brother officers, adjusting his eyeglass in his right eye with touching languor. "Very pretty creature she is, to be sure."

"Pretty! Perfect, divine, you mean!" ejaculated young Sunnerly, with indignation. He usually went by the name of "Sonny" in the regiment, on account of his fair hair, boyish expression, and general youthfulness of demeanor, and was one of Miss Trevanion's especial pets. She patronized him largely on all occasions, in consequence of which he was idiotically in love with her. "Talk of Venus, indeed—I don't believe, if she was here this minute, she could hold a candle to Miss Trevanion."

"Take it easy, Sonny, my child," said Harvey, staring at him with intense amusement. "Little boys generally choke when they talk too fast."

"A little too haughty looking for my taste," suggested another, shrugging his shoulders expressively. He was not one of Miss Trevanion's pets, which perhaps accounted for the unhealthy state of his palate.

"Yes, I agree with you, Martley," declared a fifth, with decision; "I should not dream of comparing her with her charming sister, Miss Mabel."

"You're a muff," said Sonny, with open disdain, and walked away from the group with his short nose well poised in mid-air.

The other men laughed, and Leslie, the first speaker, turned to Denzil Younge, who was lounging near them, his thoughts far away beyond the chatter and confusion around him.

"What do you think, Younge?" he asked.

"Of what?" said Denzil, dreamily.

"Of Miss Trevanion."

"I don't know—what should I think? Why do you ask?" he answered, with a quick surprise and irritation, and walked hastily away from his questioner, with the expression of a man just roused from pleasant dreams to the remembrance of actual miseries.

"You shouldn't have asked him that question," some one said when he was gone. "Don't you know that he is desperately hard hit in that direction, and not happily so, if report speaks truly?"

"It never does," put in Harvey.

"Still I am very sorry I made the remark I did," Leslie exclaimed. "Denzil Younge is one of the best fellows I ever met, and one of the last I should care to wound. If I were Miss Trevanion, I know I should take him with half his money in preference to that stupid-looking animal yonder."

"Mildred, Countess Lyndon," spoke Harvey, softly—"it counts, dear boy, it counts."

"Pshaw!" muttered the other, impatiently, and changed the conversation with abruptness.

Meanwhile Mabel, with mingled feelings of dread and curiosity, was watching with covert eagerness each new face that passed her, in search of a certain pair of hazel eyes and a drooping brown moustache. Naturally, she looked in every direction but the right one, and so was presently considerably startled when a voice at her elbow whispered—

"Good evening, cousin; will you not even condescend to look at me?"

"Mr. Blount—Miss Mabel Trevanion," broke in the host's full tones at the same moment, and Mabel, with pretty confusion, turned to find the object of her thoughts close beside her. She blushed crimson, bowing at the same time nervously, after which old Dick left them to their own devices.

"Are you engaged for this?" asked Blount, taking her card from her hand in a matter-of-fact sort of way, and so giving her opportunity to collect her senses a little.

"No, I have only just come," she answered.

"Then I suppose I may put down my name for this, and the fourth and the second galop, and—" writing vigorously.

"And—don't you think that will do for the present?" suggested Miss Mabel, demurely.

"Very good. I'll trust to your tender mercies for a few more toward the end of the evening. There can be no impropriety in your dancing a good deal oftener with your cousin than with the other men, can there?"

"Don't," said Mabel; "It's very shabby of you."

"Is it? Well, then, I won't. But, tell me, whom were you looking for so earnestly just now, when you turned your back upon me in such an uncompromising manner?"

"For you," she answered, with charming candor; and then they both laughed heartily.

"That's better," said Mabel, presently; "there is nothing like a good laugh. I don't feel nearly so much ashamed of myself now. But—oh, dear!" with a sigh of relief—"I am so glad it's over."

"That what is over? Your laughter?"

"No, our meeting—introduction; it was so dreadfully awkward altogether, you know, and—and so generally unpleasant."

"I don't see that at all," said Roy Blount; "and I take it as extremely uncivil your saying so. I know that for my part I never felt so proud in my life as when you insisted on being my cousin. Just fancy being on such terms with you that I can call you 'Mabel' if I like."

"But, if you will take my advice you won't like," "the queen" returned quietly; "otherwise, it may lead to consequences of the most serious description."

"I will risk them," said Blount.

"Will you? My anger, for instance—the loss of my acquaintance—of my good opinion?"

"You have said enough," Blount observed, gently. "I would not risk that last for a good deal. Be assured, Miss Trevanion, that I shall never again call you by your Christian name, in jest or earnest, until you give me permission to do so. Now am I forgiven? And shall we begin our waltz?"

"Yes," whispered Mabel, with shy coquetry, to both questions, and putting her hand in his, she moved away with him, to get lost amongst the throng of dancers.

(To be continued.)

"It seems as though my money is always tied up," said the bachelor. "Why don't you get a wife?" suggested the married man. "She would untie it for you."

"Ex-Congressman Flubdub wants a little write up," remarked the magazine publisher. "What shall we say about him?" "What did he ever do?" "Nothing." "Say he upheld the best traditions of Congress."—Pittsburg Post.

Pains in the Side, Chest, or Back
Aching Muscles Cured Quickly

Even Doctors Marvel at the Penetrating Power of Good Old "Nerviline"

Pains anywhere—in the chest, neck, side, back or muscles—they are always a discomfort.

If the inflammation is severe, the pain will be intense, if allowed to continue, complications will follow.

Physicians say one of the best remedies is "Nerviline"—it can't help curing, because it penetrates through the sore tissues, carrying healing properties that destroy every symptom of pain.

In case of colds, sore chest and pleurisy, there should be a good hand-rubbing with Nerviline, and, of course to prevent the trouble coming back, it's advisable to put on a Nerviline Porous Plaster, which, by absorption through the skin, draws out all congestion.

For general household use, for curing the ailments of the young and old, for destroying all pain, outward or inward, nothing can excel Nerviline; thousands testify to this effect.

For nearly forty years Nerviline has been a renowned and trusty remedy in thousands of homes where practically no medicine is needed.

Nerviline is safe to use. For children's coughs, colds and sore throat, nothing can be used with more certain results.

Get the large 50 cent family size bottle to-day. It is more economical than the 25 cent trial size, and is sure to keep down the doctor's bill and cure a host of minor ills that arise in every household.

All dealers sell Nerviline, or direct from the Catarrhozone Co., Kingston, Canada.

Siberian Camels.

The native camels of Siberia are a source of constant wonder to travelers. On the Mongolian plateaus, for instance, the thermometer often registers a temperature of 40 degrees below zero, but the camels do not mind it at all, walking about as blithely as if the weather were as balmy as spring. On the other hand, the temperature on the Gobi desert in summer is sometimes 140 degrees above zero, and the beasts mind that heat just as little as they do the extreme cold.

Be Bright, Well, Strong, Restore Youthful Looks!

Let your fight for better health begin now! Before you feel any warning of physical collapse, cleanse and strengthen and build up your system. The one remedy for that tired, droopy feeling is Dr. Hamilton's Pills, the acknowledged king of all tonic medicines. Thousands of men and women in the late years of life retain their youthful looks and feeling simply because they regulate their system with this old reliable family remedy. Nothing so good for the bowels, stomach or kidneys. Cures headaches, prevents biliousness, stops aching pains in the back and limbs. Get a 25c box of Dr. Hamilton's Pills to-day.

She Didn't Dance.

In 1736 a gentleman lived in Hampshire, England, named Samuel Baldwin, died after a rather stormy and most unhappy married life. In his will he directed that all his vast estate be given his wife on condition that she should dance upon his grave from time to time. As the will further instructed that his remains should be taken by boat to the Needles and from there cast into the sea, this, of course, prevented his widow from fulfilling the conditions of the will and thus lost her the property. He, however, had his revenge for the various tempers she had exhibited and for the remarks she often made that she would yet "dance upon his grave."

Wonders in the Equine Foot.

The foot of a horse is one of the most ingenious and unexampled pieces of mechanism in the whole range of animal structure. The outside hoof is made up of a series of thin vertical laminae of horn, about 500 in number. Into this are fitted about 500 more thin laminae, which belong to the coffin bone, both sets being elastic and adherent. The edges of a quire of paper inserted leaf by leaf into another quire will furnish a good idea of the arrangement of the laminae in all the feet, amounting to about 4,000. These are distributed in the most secure manner and in a way that every spring is acted upon in an oblique direction.

Widows' Caps.

Who do widows wear caps? This is one of the things that every woman does not know. It is not because caps make them look pretty and interesting. It is because when the Romans were in England they introduced the custom of shaving the head as an sign of mourning. Of course women couldn't let themselves be seen with bald heads, so they made themselves caps.

So though the hideous custom has passed, the caps remain.—London Answers.

Keep Minard's Liniment in the house.

Taking an Impression.

The original point of view of Stephen Tawels, the English painter, is seen in the following fable, which was included in a letter to a friend:

The artist peeped into a window of a room where a retired merchant sat, doing a jigsaw puzzle.

"Whose is that strange face?" the merchant asked anxiously.

"I saw no one," his wife said.

"I did. I saw a strange face distinctly"—but before he reached the window the artist was gone.

"Do you think it was a burglar?" his wife said.

"We will see if he has taken anything."

Investigation showed that nothing was missing, but the artist had taken away an impression which he sold to that particular merchant for £100.

You never can tell. Cool treatment will sometimes only aggravate a hot temper.

A Russian Aid.

The reason why I have heretofore been able to sell my goods so much lower than anybody else is that I am a bachelor and do not need to make a profit for the maintenance of a wife and children. It is now my duty to inform the public that this advantage will shortly be withdrawn from them, as I am about to be married. They will therefore do well to make their purchases at once at the old rate.—Petrograd Oregoloski.

Minard's Liniment, Lumberman's Friend.

SIGNS.

Little signs are in the air,
One may see them everywhere,
Busy bees, they're here and there,
One can hear them humming;
With their news they soar and swell,
In the field and in the dell,
In the very air they tell
That the spring is coming.

Through the cold winter steals a flash
Of a sun-warmed [illegible], half rash,
As though chill it makes a dash
[illegible], then quick returning,
Tiny blades through stiff earth [illegible],
As though wakened from a sleep,
And afraid far forth to creep,
Till the warmth discerning.

In the sky there is a blue
Of a [illegible] and radiance new,
And red blood the pulse leaps through
As fresh forces drumming:
Impulses in nature start,
In her joy the mind takes part,
[illegible] to the heart,
For the spring is coming.

SPRING IN RHYME.

The spring is coming once again,
With winds and frost, and mud and rain,
And snow and floods, and brittle ice,
Which drown or wreck, all in a trice.

The woodman taps his maple trees,
And gathers sap, through every breeze,
And boils it down, for all night long;
When Sunday comes he sees no wrong.

The farmer, too, gets on his land,
And spring birds come, a merry band;
They sing their lays, and build their nest;
The farmer sows or takes his rest.

A balmy fragrance fills the air,
And everywhere is guardian care;
The grain springs up, the fresh ground over;
The birdies chirp among the clover.

The lowing herd turns out to graze,
The milkmaid views the sunset haze;
The plowboy grooms his laggy team
And now I close fond nature's dream

"Mr. Jaggs never opened his mouth while his wife was entertaining her guests the other night." "Oh, yes, he did several times." "I didn't hear him. What did he say?" "Nothing. He yawned."—Baltimore American.

Minard's Liniment used by Physicians

Too many nightcaps will sometimes cause a fellow to talk through his hat.

LIQUID CATARRH REMEDIES USELESS
ONLY RELIEVE--NEVER CURE

They go direct to the stomach, have very little effect on the linings of the nose and throat, and entirely fail to cure. Only by cleansing the air passages by relieving the inflammation and killing the germs is cure possible. No combination of antiseptics is so successful as Catarrhozone. In breathing it, you send the richest pine balsams right to the seat of the disease. Irritating phlegm is cleared out, hoarseness, coughing and hacking are cured. For a permanent cure for Catarrh, nothing equals Catarrhozone. Get it to-day, but beware of dangerous substitutes meant to deceive you for genuine Catarrhozone. All dealers sell Catarrhozone, large size, containing two months' treatment, costs $1.00; small size, 50 cents; sample size, 25 cents.

Publishers don't care how they spend their money. Some of them even pay for poetry.

SPOHN'S DISTEMPER COMPOUND

WORMS

"Worms," that's what's the matter of 'em. Stomach and intestinal forms. Nearly as bad as distemper. Cost you too much to feed 'em. Look bad—are bad. Don't physic 'em to death. SPOHN'S COMPOUND will remove the worms, improve the appetite, and tone 'em up all around, and don't "physic." Acts on glands and blood. Full directions with each bottle, and sold by all druggists.

SPOHN MEDICAL CO., Chemists, Goshen, Ind. U.S.A.

FAIR EXCHANGE.

(Philadelphia Ledger.)

Dora—And so you quarreled?

Lallie—Yes, and I returned all his presents, and what do you think he did?

Dora—Something horrid, I'm sure.

Lallie—He sent me half a dozen boxes of face powder with a note explaining that he thought he had taken as much as that home on his coat since he first met me.

A Gloomy African Pool.

There is a large, deep and mysterious pool in the valley of the upper Kafue river, northwestern Rhodesia. This wonderful pool lies in flat country, and one comes to it quite suddenly, its banks being concealed by dense forest. There is a small native village near the pool, and the inhabitants have a superstitious dread of it. They refuse to drink the water or use it for any purpose whatever. To sit beside this still, pellucid pool of unknown depth, surrounded by precipitous walls in the heart of the tropical forest, would induce a feeling of awe in the breast of even the most civilized man.—London Mail.

A WOMAN'S MESSAGE TO WOMEN

If you are troubled with weak, tired feelings, headache, backache, bearing down sensations, [illegible] sides regularly or irregularly, bloating or unnatural enlargements, sense of falling or misplacement of internal organs, nervousness, desire to cry, palpitation, hot flashes, dark rings under the eyes, or a loss of interest in life, I invite you to write and ask for my simple method of home treatment with ten days' trial entirely free and postpaid, also references to Canadian ladies who gladly tell how they have regained health, strength and happiness by this method. Write to-day. Address: Mrs. M. Summers, Box 8, Windsor, Ont.

Matrimony.

The primary impulse of all creatures is possession. It is that that causes a chicken to tear around the yard with a piece of meat in its mouth and all the other chickens after it. It hasn't time, but the instinct of possession makes him grab and keep it. The same is noticeable among beasts. They like to get a great piece of meat in their mouths and then growl. It is this instinct in man that provokes him to matrimony. He wants something to guard and growl over, so he seeks a hollow tree, a cave or a house and a wife.

The Soldier Laundryman.

In my far-off civilian days,
When my socks were becomingly sticky,
I would rail at my laundress' ways
So incomprehensibly tricky.
Whenever the washing came home
My Mary would beg me be calm, as
I solemnly cursed over buttonholes burst
And the wreck of my nutty pajamas.

But never again, I asserted,
Will I carp at a laundress as silly,
Though in place of my favorite shirt
She sends me back something that's frilly.
For hard, really hard, is the art
That is plied at the washtub for barrels,
This I know, for I tried (in a moment of pride)
To wash my own wearing apparel.

"Behold I'll be spotless clean,"
Was what in my arrogance I bawled;
But my vest turned out mottled of mien—
My pants irretrievable piebald.
Nor was this the worst; they had shrunk
Till at wearing them further I jib,
For the socks, I avow, are but fingerstalls now,
And the shirt is in use as a bib.
—London Opinion.

Baby's Gift.

What shall the baby buy for me?
Dimpled smile and gurgled glee,
Laughing eyes and glowing face
With its witchery of grace
From a far-off world divine
To this weary world of mine.

What shall baby buy but these
Cheeks of living bloom-of-rose,
Lips of music only heard
In the morning world of bird
Where ecstatic music brings
Back the dreams of golden spring?

What shall baby buy but these
What are April's mysteries—
Sun and laughter, smile and gleam,
Blossom of a living dream
Waving on its wand of light
Till the soft dew cloaks the night?

What shall baby buy, we cry,
But the twinkling of her eye,
But the beauty that God traced
On her little visage graved
With the dainty bloom of dove
From the fairy groves of love?

What shall baby buy for me?
Only this—an echoing glee
Of her spirit and her life
Ringing through our daily strife
Till our hearts responsive ring
To her immemorial spring?
—Baltimore Sun.

A MADAGASCAR BANQUET.

Where the Riot of Food Vied With the Riot of Tumult.

The longest and noisest dinner that James Sibree, Jun., the author of "A Naturalist in Madagascar," ever attended was given by the governor of a town called Ankarana. About a score of officers were at the table and seven ladies. After a long grace by the pastor, dinner was brought in and consisted of the following courses:

First, curry; second, goose; third, pigeons and waterfowl; fourth, chicken cutlets and poached eggs; fifth, beef sausages; sixth, boiled tongue; seventh, sardines; eighth, pig's trotters; ninth, fried bananas; tenth, pancakes; eleventh, manioc; twelfth, dried bananas, and lastly, says Mr. Sibree, when I thought everything must have been served, came haunches of roast beef.

There was a big drum just outside on the veranda, as well as two small ones, besides clarinets and fiddles, and these were in full play almost all the time. Then the room was filled by a crowd of servants and aids-de-camp, and the shouting of every one, from the governor down, was deafening. The old gentleman directed everything and every one. I was glad when I could take my leave, after two hours' sitting, but I was not to leave quietly. The governor took me by the hand and escorted me home, while the big drum was hammered at ahead of us all the way.

Dumas' Last Jest.

Dumas the elder was the son of a general of Napoleon Bonaparte, who would take his soldiers by the breeches and fling them over the palisades to an assault.

Dumas inherited much of that same sprit. It is said that Dumas left Paris for the last time taking with him a single gold piece, which he sol- [illegible] the [illegible] room at Puys. Toward the end his eye wandered across the sickroom to this coin, and, pointing to it, he said to his son:

"See there! Fifty years ago when I came to Paris I had one louis in my possession. Why am I accused of being a prodigal? I have preserved and possess it still. See—There it is."

This was Dumas' last jest.

THE BEST MEDICINE FOR THE BABY

The best medicine for the baby is the one that never fails to cure and which, at the same time, the mother may give with perfect assurance that it is absolutely safe. Such a medicine is Baby's Own Tablets. They are the only medicine absolutely guaranteed entirely free from injurious drugs and what is more they never fail to free the baby from those minor ills of babyhood and childhood. Once a mother has used them she would use no other medicine. They regulate the stomach and bowels; drive out constipation; expel worms and make teething easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Felt Like One of Them.

"Tother day," related old Tad Bing, the cattle baron, who is temporarily in our midst, "I was rambling along in a street car when a batch of young fellows got aboard. I judged they were college students by their funny clothes and queer shaped heads. The car was pretty full, and they pushed and snorted back and forth in the aisle, tramping on people's feet and committing similar frivolities that a-way. By-and-by they all r'ared back and fetched loose a long yell. Then the nearest one to me took a look at me and says:

"'Well, my rural friend, don't you like it?'

"'Shore, I like it!' says I. 'I'm half witted myself.'"—Exchange.

Unlucky Hair.

A correspondent of London Notes and Queries writes: Among our peasants it is considered very unlucky to leave lying about or to throw away any, even the smallest, scrap of human hair. They therefore pick it up, sweep up the place where the hair has been cut and scrupulously burn the sweepings in the fire, saying that, if left about the birds would build their nests with the hair, a fatal thing for him or her from whose head it had fallen. They say if a pyet (magpie) got hold of it for any such purpose—by no means an unlikely circumstance, considering the thievish propensities of the birds—the person's death "within a year and a day" was sure.

Ask for Minard's and take no other.

You never can tell. Love in a cottage isn't all cottage pudding.

A Crisp, Delicious "Snack" for luncheon or after-the-theatre, or any old time when the appetite craves "something different" is TRISCUIT, the Shredded Whole Wheat toast. Heat it in the oven to restore its crispness, then serve with butter, soft cheese or marmalades. As a toast for chafing dish cookery it is a rare delight. It is full of real nutriment.

Made in Canada.

French Peasants and the War

(Alphonse Aulard in Chicago Tribune).

[illegible] Aulard is professor of history of the French revolution in the University of Paris and author of the "Histoire Politique de la Revolution Francaise."

I do not think that it is possible to understand how France can support so long and so hard a war as the present conflict with such firmness and with no manifestation of lassitude or exhaustion without taking into account the state of mind and the moral and material condition of the French peasantry.

French peasants have changed a great deal since the Franco-German war of 1870-1871; a foreigner who had not traveled in France during these forty-five years would not recognize them if he should return now.

In 1870 the peasants of many regions were characterized by the most profound ignorance. In some parts of the country they were still of an almost barbarian degree of naivete. Thus, in June or July of 1870, some Perigord peasants, believing on the basis of some absurd rumor or other that a wealthy country gentleman who lived among them had conspired to establish the old order, with feudal rights, etc., actually burned this landlord slowly to death with a green wood fire. Naturally, not all French [illegible] peasants were then in [illegible] savagery, but nevertheless there were occasional incidents of this kind, which did indicate a general condition of peasant ignorance.

Similarly, when Gambetta tried to improvise armies composed chiefly of rural elements he found that he could not obtain from these ignorant peasants the necessary degree of intelligent discipline and solid organization. For this reason Gambetta's armies were generally only heroic mobs, all the more so because the peasants had no particular notion of what France was, so that there was no force of conscious, reasoned patriotism to support them in the terrible trials which they were to endure.

Free education, obligatory and religiously neutral, has gradually, but on the whole rapidly, brought the French peasantry out of ignorance. To-day in all parts of the country, except a few tardy provinces, most peasants can read and write. The republic's normal schools have turned out for them first rate teachers of admirable zeal, capable of furnishing them with all the ideas useful to a free man and a citizen. Extending their thoughts beyond the narrow horizon dominated by the village steeple, French peasants have come to understand that their little countrysides are only units in the great French patrie. The peasant has become a patriot.

It is not alone to the primary school that the credit for this result is due; the children do not remain there long enough. The institutions which we call by a term resembling that used to describe our "extension" organizations [illegible] a great part. The evening [illegible] by schoolmasters to grown people, the friendly individual talks between teachers and former pupils, the general moral influence of the schoolmaster in the village —often of almost preponderant authority — have contributed to the general work of education.

Newspapers have also been a successful medium of peasant education. For the last twenty-five years they have been spreading throughout the country, penetrating even to the most secluded districts. If all the peasants do not read them themselves there is scarcely a family where one member does not do so, and from him the others learn the essential substance of the news.

Such newspapers as the Petit Parisien and the Petit Journal of the Paris press and the Depeche de Toulouse and the Petit Marseillais of the provincial press are excellent educators of the people by virtue of their distribution in an attractive, clear elementary form of historical, scientific, moral, geographical and literary knowledge. They have certainly served to enlighten and to render finer the rude good sense of the French peasant.

It must be borne in mind that the economic condition of the peasantry was immensely improved during the same period that primary education was spreading, and the peasants became happier in the measure that they acquired more education. They came out of the economic slavery of poverty at the same time as they emerged from the bondage of ignorance.

Rapid and colorless as is my exposition of the mental condition of the French peasantry, it nevertheless may serve to account for the fact that the basis of the present French armies, seven-tenths peasant as they are, is so much more soldier than was that of Gambetta's armies, though the present armies, at least as regards the very numerous latest recruits, have been improvised to almost the same degree that Gambetta's troops were. It is for these reasons of social development that we have now such an intelligent and heroic discipline in all our armies, for every peasant knows that in defending France he is defending his village, his family and his property.

In our present armies, whose former officers have almost entirely disappeared under the wear of war, it has been found easy to secure new officers from the educated individuals among the simple privates. The school teachers have been of great importance. Promoted to be non-commissioned officers and lieutenants, they have showed ability to command as well as heroism and good spirit. Led in battle by the schoolmaster in whom he has so much confidence, the French peasant is the stanchest of soldiers.

Besides, his spirit is kept up by the knowledge that during his absence his family is being looked after. He knows that his relatives are not suffering even that they are not in any want. The Government's allowance to soldiers' wives, varying as it does according to the number of children in the family, suffices amply, for life is very cheap in the country. There are some peasants, indeed, who have never found themselves in such good fortune as since the opening of the war.

* * *

In the cities where life is dear, workingmen's wives, on the other hand, are hard put to it. The result is that peasant women, who make up the majority of French women, do not complain very much of the war, do not lament too much on account of its length, and do not write discouraging letters to their husbands at the front. The workingmen's wives in the towns are more inclined to complain and to write discouragingly, but fortunately their husbands are even better educated than the peasants, so that they have an even stronger conviction of the absolute necessity of carrying through the war to a victorious end in order to preserve the very existence of France.

The gloomy letters of their wives, if they do get them at all, do not appear to have made more than a mediocre impression as yet. Further, workingmen of radical convictions, syndicalists who in time of peace were called men without a country because of a childish use of language, have shown themselves particularly ardent in the struggle against Prussian militarism.

To return to the question of peasants, it should be observed that agricultural labor has continued despite their mobilization, because the women, children, old people, and the nonmobilized civil population have kept at work. If the wheat crop was bad it was more due to bad weather than to lack of labor. Hay, potatoes and beans have shown excellent crops. A sufficient amount of wheat has been imported and the price of the grain has been relatively low. Thus, in my country of the Charente a sack of wheat, weighing only eighty kilograms, is now worth from 24 to 25 francs, only 3 or 4 francs a sack more than before the war.

The higher prices paid to the peasants for live stock, for whose feeding [illegible] have they have had ample [illegible] made up for the loss on the [illegible] crop, for the Government has commandeered very little live stock, heavy importations having made this measure unnecessary.

The war is not causing any trouble to speak of to peasants, be they land owners or hired men, in so far as their material interest are concerned. Those who produce are selling at higher prices. Farm wages are twice as high as in peace time. It is only middle class property owners who are suffering materially from the war, and their moral strength is supported by a patriotism of a more enlightened degree than that of the peasants.

It is through the loss of men, above all, that the war is affecting the peasant class. Widely spread education has made the peasants more sensitive of spirit. They mourn their dead more bitterly than in the time of Napoleon, but this suffering, even among the women, is tempered by the spirit and habits of resignation acquired in the continual struggle with nature.

There are many other things which could be said of this subject, so little known to foreigners. But I trust that the little sketch which I have made here will make clear the reasons for the firmness of French public opinion during this long and cruel war.

WAR'S POETIC SIDE.

(Halifax Record.)

We have remarked before about the great dearth of high class verse production inspired by the present war, which is so all-absorbing as to apparently give no time for gentle rumination. Few pieces of any great merit have so far appeared in the English tongue, a different condition of affairs as compared with the American civil war, the Crimean struggle, the great mutiny, and even with the South African struggle. No incident of modern warfare seems to have so deeply touched the fancy as the story of Jessie of Lucknow, the Scotch woman who deep down in the cellar of the besieged Residency caught the distant notes of the bagpipes long before any other ear heard them and some hours before the relieving force attacked the besiegers. Many poems have been written celebrating the event, but best of all was the simple heartfelt lyric by Grace Campbell. If any of our readers have never before read the entire poem, let them read it now:

"Fur awa' to bonny Scotland
Has my spirit ta'en its flight,
An' I saw my mither spinnin'
In our Highland hame at night;
I saw the kye a browsin',
My father at the plow,
And the grand auld hills aboon them a',
Wad I could see them now!

"Oh, leddy while upon your knees
Ye held my sleeping head,
I saw the little kirk at hame,
Where Tam an' I were wed;
I heard the tune the pipers played,
I kenned its rise an' fa',
'Twas the wild Macgregor's slogan
'Tis the grandest o' them a'.

"Surely, I'm no' wildly dreamin'
For I hear it plainly now—
Ye cannot, ye never heard it
On the far off mountain's brow;
For in your southern childhood,
Ye were nourished saft and warm,
Nor watch'd upon the cauld hillside
The risin' o' the storm.

"Aye! Now the soldiers hear it,
An' answer with a cheer,
As 'The Campbell's Are a Comin','
Falls on each anxious ear—
The cannon roar their thunder,
And the sappers work in vain,
For high aboon the din o' war
Resounds the welcome strain.

"An' nearer still, an' nearer still,
An' now again 'tis 'Auld Lang Syne,'
Its kindly notes, like life bluid rin
Through this puir sad heart o' mine;
O, leddy, dinna swoo awa'!
Look up, the evil's past,
They're comin' now to dee wi' us,
Or save us at the last.

"Then, let us humbly, thankfully,
Down on our knees and pray
For those who came through bluid an' fire
To rescue us this day.
That he may o'er them spread His shield,
Stretch forth His arm an' save
Bold Havelock an' his Highlanders,
The bravest of the brave."

It will be remembered that a Halifax man, Brigadier Inglis, performed a heroic part in the defence of the Residency. His wife was with him through the terrible time, and in her "Journal of the siege" there occurs this passage: "In the still watches of the night the sound of the bagpipes was said to be heard. But as the relieving force did not make its appearance, these reports were put down to the imagination."

The relieving force came, however, and the deed has become immortal.

You never can tell. Many a man thinks he's an ace when he is really only a two-spot slightly damaged.

Chats With the Doctor

BY A PHYSICIAN

HOW TO PREVENT CONSUMPTION.

Consumption, in one or other of its forms, still accounts for 10 per cent. of all deaths among children under 15 years of age, and one-third of all deaths between the ages of 20 and 40. (I, of course, am talking of ordinary times, not war time.) It is obvious, therefore, that consumption is far and away the principal enemy of young human life. That the old should die seems to us in the very nature of things, and therefore those diseases which affect principally men and women past middle age seem less tragic in their results. The question at once suggests itself: Is consumption also in the very nature of things, or can it be defeated by human effort and human intelligence. Some people, who pride themselves more on their hard thinking than on their tender sentiment, have argued that consumption is to be numbered among the beneficent gifts of nature to mankind. They argue that it serves as an effective instrument for clearing out the weaklings, [illegible] otherwise might survive and [illegible] their physical degeneracy to hand on [illegible] unborn. Even were generations [illegible] back of this argu- the notion at the [illegible] the majority ment true, I hope that [illegible] so much of people will never become [illegible] the slaves of a heartless logic as [illegible] liberately to stand aside and refuse to save life because of a scientific theory.

But it is by no means true that, even from the point of heartless science, the argument is sound. For, in the first place, consumption attacks, not only the weak and degenerate, but often those whose stock, mental and physical, it is in the interests of the race most desirable to perpetuate. In the second place, the disease proves most commonly fatal at an age when the continuity of the stock has every opportunity of being maintained. And, in the third place, consumption undoubtedly has a deteriorating effect on the race by the weakening effect it has on those numberless individuals whom it attacks but does not kill.

PROTECTIVE MEASURES.

We may take it, therefore, that it is desirable as well for the race as for the individual to do what we can towards stamping out this disease, or at least towards diminishing its ill effects. Now, as most of my readers know, consumption is in a direct sense caused by the multiplication and activities within the body of a particular germ called the tubercle bacillus. In almost all places occupied by man this germ exists, so that it is almost impossible to avoid the possibility of infection. Indeed, the majority of all persons are infected with tuberculosis before they reach the age of twelve years. The greater number of people so affected never display any serious symptoms, and, by reason of the weakness of the infection, or through their resisting power to this particular disease, the tubercle bacilli are sooner or later overcome. Our protective measures, therefore, must aim at two things: First, they must aim at reducing the possibility of infection to a minimum, and, secondly, they should aim at increasing the resisting power of the individual.

Another week we shall have something to say about the means which should be taken, both by public authorities and private persons, to lessen the spread of infection. Now I would only say a word or two on that even more important factor in warding off consumption, namely, that which increases the resisting power of the body, even though exposed to infection.

By investigating an enormous number of cases of consumption, it has been found that the disease is much more common and much more fatal under certain conditions, occupations, living and habits. It is found to be commoner among the very poor, both in town and country. Where there is [illegible] of food and suitable clothing, so [illegible] to be much commoner [illegible] lead sedentary, in- among those [illegible] who lead door lives than among active outdoor ones. Other things being equal, it is more common among the intemperate than among the temperate. Very briefly, so far as choice lies in our power, we should avoid close and ill-ventilated rooms, and dust and dirt in every form; we should take little or no alcohol; we should spend three or four hours a day taking active exercise or working in the open air; we should keep our bedroom windows open day and night; by the avoidance of indigestible food, and by the care of the teeth, digestive troubles should be avoided; by selecting congenial work and the cultivation of suitable hobbies, happy and active mental conditions should be established; and the habit of taking a generous though not excessive amount of really nourishing food at regular intervals should be cultivated. Among people who observe these simple rules—and, unfortunately, this is impossible for many people owing to our social organization—serious cases of consumption will be very rare indeed.

THRUSH IN INFANTS.

Thrush is much more common among bottle-fed babies than among those nursed by their mothers, but to some extent it is found under both conditions. It is a disease of which it may be said, in almost every case, that it might have been prevented. It is due to the growth, on the surface of the tongue and of the lining membrane of the mouth of a white mould or fungus which sets up a painful inflammation, seriously interfering not only with the baby's comfort, but also with its digestion, and consequently with its general health. Cleanliness is its foe. Feeding bottles should always be thoroughly washed with hot water and a brush immediately after every meal, and should be left soaking in a quart of water to which a teaspoonful of powdered boracic acid has been added. All this applies even more strongly to the stopper and rubber teat. Of course, no rubber tubing should ever be used. The babies' comforter or pacifier has a great deal to answer for. Only under the most exceptional circumstances can its use be excused. In those exceptional circumstances, the comforter should be thoroughly washed with boracic lotion and a brush three or four times a day. Once the disease shows itself as small white spots in the baby's mouth, these precautionary measures should be persisted in, and, in addition the baby's mouth should be swabbed out every two hours with a piece of soft linen dipped in glycerine of borax. One grain of calomel may also with advantage be placed on the [illegible]

TOO GOOD TO BE WASTED.

(Tit-Bits)

A lady of great beauty and attractiveness, who was an ardent admirer of Ireland, once crowned her praise of it at a party by saying:

"I think I was meant for an Irish woman."

"Madam," rejoined a witty son of Erin, who happened to be present, "thousands would back me in saying you were meant for an Irishman."

CALIFORNIA BATHING COSTUMES ©INTL. FILM [illegible]

Three of the latest creations from the winter resorts of the Pacific Coast. The centre suit is a knitted jersey; on either side are creations of striped silk.

FORETELL FINE WEATHER.

Many Signs That Can be Relied On to a Large Extent.

If you want fine weather, look for fine-weather signs. Here are some of the most reliable, for they are based in the sea of glory, that is:

When the sun sets in red, you may expect clear weather on the following day.

At night, when the moon is clear and shows clean edges, with no halo or ring of mist surrounding it, there is little danger of rain.

When the wind blows steadily from the west, the weather will continue fair; it very rarely rains in our Eastern states with the wind in the west.

Watch the smoke from a chimney or from your camp-fire—it is a good barometer. If the smoke rises high, it means clear weather. The smoke will also show you from which direction the wind is blowing; so will a flag on an upright staff.

A gray early morning, not a heavy, cloudy one, promises a fair day.

A heavy dew at night is seldom followed by rain the next day. Think of it this way and you will remember: wet feet, dry head.

If there are no clouds at the western horizon, you need not worry about others.

Animals are said often to show by their actions what the weather will be, and there is reason in this. Some of them certainly have a knowledge of coming storms. We are told that spiders are especially sensitive to weather changes, and, when they make new webs, the weather will be fair; if they continue spinning during a shower, it will soon clear off.—Adelia B. Beard in St. Nicholas.

SONG OF THE CARROT.

Tribute to a Modest Vegetable the Poets Have Neglected.

Why does no poet arise to sing the song of the carrot, the hardest worked vegetable in the kingdom? Much is said in favor of the plethoric pumpkin, the gathering of corn is a commonplace theme, but the poor carrot has been neglected—yes, even scorned.

For diversity of use the carrot has pumpkin and corn backed over the garden wall. Men feed carrots to cattle, increasing the dairy output. They feed them to other stock sometimes, improving its temper. A carrot artificially hollowed with a knife makes an elegant Japanese vase. Sufficiently hardened by harsh contact with the world, a carrot may be used for a weapon, either operated like a mallet with a handle or hurled like a Russian bomb.

Carrots are sometimes even used for food by human beings. They are a chief ingredient in vegetable soup. Mixed with butter they improve its color. They make better pumpkin pie than pumpkins themselves. Served as Hubbard squash they make one wonder why squashes were invented.

The answer to the high cost of living cry is carrots. Johnson had his Boswell. Whom will the carrot have?

FOREIGN POLICY.

Real Issue of Coming U. S. Presidential Fight.

New York, April 14.—The foreign policy of the United States will be the real issue of the coming Presidential campaign, according to the Attorney-General, Thos. W. Gregory, who was the chief speaker last night at the Jefferson Day dinner of the National Democratic Club.

"Some of our enemies," said Mr. Gregory, "are charging that we are recklessly rushing into war. Others complain because we have not long since declared with various nations; while all, like Diogenes with his lantern, are looking in vain for a leader who can win."

Aeroplane Wings.

Various kinds of material including linen, silk cotton, celluloid films and aluminium foil, have been tried for covering the wings of aeroplanes, but none has proved so satisfactory so far as linen covered with several coats of a rubber solution. This coating increases the strength of the linen about 5 per cent., makes it more enduring under varying weather conditions and causes it to stretch to an absolutely smooth surface, a feature that is of the utmost advantage in fast flights. Silk, which would seem to make an ideal covering on account of its lightness and strength, has been found unsatisfactory, as it does not withstand exposure to sun and rain and does not lend itself readily to the application of coating compounds.—London Answers.

"Thank God for the Kaiser"

(John Selborne in "The People's Journal," Dundee.)

How all good men and true hate the Kaiser! There are no curses deep enough and blasting enough to heap upon Helmeted Head. We denounce him as the plotter against and the disturber of the world's peace. We proclaim him as the master criminal of the two hemispheres. We call him blood brother to Beelzebub. We have promoted him to a seat higher than the throne of Satan. We regard him as the torturer of a violated and desecrated earth. The crimes and bestialities of Napoleon fade into insignificance beside the deeds of the Bull of Potsdam. Of all monsters who have devastated the world he is the worst and most hideous monster of all. And it is not for his own hideous mentality and personality that we loathe him. We say, and with every justice, that he corrupted and warped the minds and hearts and souls of a great nation. We say with truth that his was the scheme and his the instruction that turned the German people along the braggart path which was supposed to lead to the world dominion of the Hun. By his system he confirmed the whole German people in the belief that they could enslave the world, and yet, in spite of all this, I say to you, thank God for the Kaiser!

* * *

Now, listen! Do not stone me! Listen, and I will prove this, and more than this. I am out to prove that the Kaiser has been the world's greatest friend. No mortal man in history has ever done so much for the world as the Kaiser. Many years on, when the historian, writing in cold blood, gains a true perspective of this war—which is denied us because we are too near to it to focus it accurately—it will be admitted that the Kaiser saved the world. It will be acknowledged that he saved us from the menace of German world dom[illegible]minion, which is the greatest menace the world has ever known. To suppose that he saved us deliberately is, of course, to suppose nonsense. It is not to be imagined that the Kaiser purposely betrayed his own people, that he was in the pay of the Allies. None the less he saved us just as effectually as though he had been a traitor to Germany. He saved us surely as though he had worked for the utter downfall of the German Empire.

* * *

The truth, of course, is that he saved us unintentionally. He saved us because his overweening vanity and lust for power moved him to strike for German world dominion before the deadly disease which is up in him struck him down. He realized that within a few decades Germany must automatically become master of the world by her methods of "peaceful penetration." But he could not wait for the ultimate triumph of Germany which we were too blind to see was drawing nearer and nearer with the certainty of fate. In spite of warnings that Germany's hour had not yet struck, in spite of the incontestable fact that Germany's strength was increasing by leaps and bounds from year to year, he would not wait for Germany's inevitable mastery with the lapse of time. For his own bubble reputation's sake he dared not wait. Germany's hour might strike when he was dead! It might come when his opportunity to rank higher than Napoleon had gone! Seeking for vainglory, he would not delay. He took the great chance in his hands—and failed! And because the Kaiser's vanity cheated Germany of world dominion by over haste in the attempt to achieve it, he might perhaps be written down as a traitor to Germany's cause.

* * *

What the German historians of the future write him down as matters not to us. It should satisfy us that by his precipitate haste the Kaiser struck too soon, and that the whole German plan has failed. For failed it has. It failed so long as Mons. And for the greatest failure in this world's history, which has meant our freedom and salvation, we can truly say—thank God for the Kaiser! I do not think that the average man has the least idea how great and how tenacious and how paralysing a grip Germany had upon this world, and especially upon this country before the war. She had undermined our finance, which is the keystone of all our commerce. She had her agents everywhere. She grabbed our money to build her own factories and great business concerns. She was sucking the world dry of money to boost her own industrial concerns. She had permeated the whole of America with her own doctrines, and she was stealing America from the Americans, and submerging the whole of the United States with brotherhoods and secret societies which were rapidly assuming control of all America's public life.

"By subsidising various industries, she was gradually absorbing the world's trade." By genius, plus bounce and booming, she was annexing science and medicine and chemistry completely as her own. The smallest discovery of her professors was heralded by ingenious advertising devices throughout the world. And the world accepted Germany's quack discoveries as genuine.

She even assumed the lead in politics! Colossal impudence in a country where political freedom does not exist. Germany is notoriously the most police-ridden country in the world, but the smallest of her bureaucratic orders was hailed as an inspiration of good government directed from Heaven. If we wanted to understand what good local government it meant we had to send to Germany to find out. And our good civic councillors who went out to see came back delighted. They were well feted on good Rhine wine, and shown the sunny side of things. They were not allowed to hear the great and growing and passionate cry of the German people for political and civic liberty.

The same system was applied even to music. By the most astute of press agency means Germany established her music all over the world. Her critics and boosters made it almost bad form, and certainly unsound taste, to admire or cultivate any music except that of Hun origin. It was all part of the great game known in Germany as "mass suggestion." That is the theory that you can so mould the opinions of masses of people that you can in the end hypnotise whole nations.".

* * *

Germany had been pursuing the policy of the "mass suggestion" for years. She had permeated nearly the whole of Europe and half America with Germanic ideas. She was slowly by this sheer "mass suggestion" enervating and destroying the individualistic and creative powers of other countries. She was teaching them to look to Germany for everything, whether in science or commerce or art. She was slowly hypnotising the world to gain her own ends to make herself supreme in Europe, in the East, and the United States.

Dope of this "mass suggestion" did for us. And in the spell of this "mass suggestion" nations were rapidly becoming numbed and falling asleep. The poisoned and poisoning tentacles of Germany were ensnaring the world and inoculating it with German ideas and—God save the mark!—German ideals. Before August, 1914, the world was very near to being Germanized. Now if the Germanisation of the world—that is to say, the foistering on the world of the best that Germany had to offer—had been the end of Germany's programme, perhaps the final historian would have said that it did not matter very much. But that was not the end of Germany's programme. We know now that it was by no means the end. First was to come peaceful penetration and then forceful penetration. With the finance and industries and shipping of the world in her hands, with a tame and Germanized Scandinavia and Balkans, and Turkey at her beck and call, with a dominant body of opinion in the United States to support her, and with German-paid people in high places in other countries, wherever the people in high places mattered, Germany was to begin her onslaught on the world. On that great day she would be out for dominion by force. She had made up her mind to that. She would have the power, and she would use it. Might is right, you know. There would have begun an era of economic bleeding of other states. The smaller countries would have become mere vassals in Germany's train on her march to the conquest of the world, and she would have beaten the world [illegible] and starved the world, and thoroughly subjected the world for the thorough and scientific aggrandisement of Germany.

She would have made the world her own. She would have Teutonized it. Every ideal, every mode of life, every hope and aim which was not hers would have been trampled in the bloody dust. The world would never have really known what slavery really—until that day—the day of which we have heard so much. There can be no doubt as to that. We have the red and horror-stained records of Belgium and Serbia before us. We can judge by those.

* * * *

But the world awoke in time. And it was the Kaiser who awoke us. Another two years and I do believe with all my heart it would have been too late. We should have been in financial, commercial and psychological chains which we should have been unable to break. We should have been "doped" too long. We should have first been robbed and then murdered in our sleep. But the vanity of the Kaiser would not let him wait. He feared that he would miss the final credit of German world dominion. He awoke us and he broke the spell. The world in August, 1914, suddenly realized the abyss on the edge of which it stood, and took up arms against Kaiserism in a victorious fight for each nation to work out its own ideal in its own way. The world refused to be "made in Germany." And the man who saved the world from slavery by his haste was Wilhelm II. He saved us! Thank God for the Kaiser!

THE POULTRY WORLD

BROODERS AND CHICK FEED.

A simple brooder can be made from a packing box 3 feet square and high, a common lantern, a 30 inch length of furnace pipe 10 inches in diameter, a piece of tin or galvanized iron 14 inches square, three bricks and a pane of 12 by 16 inch glass. Nail up half the top of the box; make the other half into a door 18 inches by 3 feet. Cut an opening 20 by 14 inches in the centre of the door and cover it with glass to slide in grooves so that it can be opened for ventilation. Hinge the door to one side of the box. The door (originally the top of the box) is the front of the brooder.

Turn the box so that the front faces you. Cut an opening twelve inches square in the top of the brooder. Stand the three bricks edgewise on the floor and on them place the length of furnace pipe. Insert the lantern through the top of the brooder inside the furnace pipe, allowing it to hang down half way. Bend a heavy wire into a T shape hook to support the lantern handle from top of brooder. With a chisel cut a four-inch hole at the centre of the piece of galvanized iron to allow the fumes of the lantern to escape and place this sheet over the twelve inch hole above the lantern. Take off a board six inches wide from either end as the door for the chicks to enter and leave the brooder. Cover this inside with a strip of blanket or old cloth and cut three inch slits every four inches through which the chicks can pass. The curtain is to confine the heat in a cool room.

Cover the floor of the brooder with two inches of clover chaff or short straw. Fill the lantern and light it. A moderate flame is all that is required to warm the brooder to 90 degrees on the floor. This brooder is intended to be operated in a small pen or run, the floor of which is covered with two inches of short straw. The chicks can leave the brooder if they become too warm. If they are cold they will peep and crowd around the lantern. Increase or decrease the heat until the chicks rest near the opening of the brooder and are contented.

Remove the baby chicks to the heated brooder in the morning. Cover the inside of a basket with a blanket to prevent their being chilled. Place them in the warmest portion of the brooder or near the stove and for the first and second days when the stove brooder is employed use a board twelve inches wide to keep them near the heat.

Boil some eggs hard, cut in small particles (discarding the shells) and make this mixture: Equal parts, by volume, of hard boiled eggs, rolled oats and dry bread crumbs. Scatter a little of this egg food on a board and tap the board with the finger nail to attract attention. The chicks will soon commence eating. Feed this mixture sparingly six times the first day, removing the board, and replacing the chicks in the brooder or near the stove when each meal is over.

The second day fill a small box or trough with equal measures of dry wheat bran and rolled oats. Crumple the oats in the hand to break the large flakes. Keep this dry mash constantly before the chicks until they are weaned. Feed the egg mixture three times daily the first week. The third day commence feeding three times daily a mixture of equal measures of cracked wheat, screened cracked corn, crumpled rolled oats, millet seed, rice and one-half measure each of chick size charcoal and chick size grit or sifted creek sand. A commercial chick food can be substituted for the above mixture. It is scattered in the litter of the pen to make the chicks kick and exercise.

Supply fresh water, buttermilk or sour skimmed milk from the start. Buttermilk and sour skimmed milk cannot be surpassed as chick foods. The acid in the sour milk product not only aids digestion and increases the appetite, but it is a preventive and corrective of diarrhoea.

From first week to weaning time the chicks receive the bran-oat dry mash constantly and three times daily a feed of scratching grain in the litter. Twice a week cut some cooked meat in small pieces and feed the chicks liberally. An excellent wet mash is made of equal weights of sifted ground oats, cornmeal and wheat middlings mixed to a crumbly consistency with buttermilk. Feed this mash at noon daily. Chicks that run on a good range cannot be overfed the proper foods, but bear in mind that chicks will not grow on cracked grain or cornmeal alone.

NOTES.

Early-hatched chicks did not have the best of weather during February and the first part of March. Nevertheless, those that enjoyed up-to-date poultry quarters made the rapid growth that all early-hatched chicks do, when properly cared for.

It is hard to beat nature, and a good good hatch of bright chicks that will live motherly setting hen can bring forth a [illegible] But not all hens are good mothers. [illegible] poor, and when this is the case poor results are sure to happen.

The outlook for a good poultry year becomes better as the year advances. Possibly no year has ever been better for those selling day-old chicks. It started early, the indications point to a long season. Eggs for hatching also are in demand. While not up to former years, before the advent of the day-old chick, nevertheless a steady demand has been in evidence since the first of the year by a class of purchasers who wish up-to-date stock.

The care of breeding pens is not given enough consideration. They should never be forced for heavy egg production. The hens should be compelled to take exercise by providing good straw litter, in which the grain is scattered, and fed sparingly of corn, which is fattening. Hens, as a rule, make best breeders, although fully-matured pullets give good results.

The coal-burning brooder stove is becoming more popular every year. The high grade makes are the best brooders ever put on the market. They are self-regulating and give the required heat at all times. No more getting up cold nights to see if the heat is correct when the poultry-keeper has installed one of the coal-burning brooders.

CONSTIPATION

Is Productive Of More Ill Health Than Anything Else.

If the truth was only known you would find that over one half of the ills of life are caused by allowing the bowels to get into a constipated condition, and the sole cause of constipation is an inactive liver, and unless the liver is kept active you may rest assured that headaches, jaundice, heartburn, piles, floating specks before the eyes, a feeling as if you were going to faint, or catarrh of the stomach will follow the wrong action of this, one of the most important organs of the body.

Keep the liver active and working properly by the use of Milburn's Laxa-Liver Pills.

Miss Rose Babineau, Amherst, N.S., writes: "Having been troubled for years with constipation, and trying various so-called remedies, which did me no good whatever, I was persuaded to try Milburn's Laxa-Liver Pills. I have found them most beneficial, for they are indeed a splendid pill. I can heartily recommend them to all who suffer from constipation."

Milburn's Laxa-Liver Pills are 25c a vial, 5 vials for $1.00, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

NATURE IN A BLAZE.

Gorgeous Spectacle of the Midnight Sun at Karungi.

I was glad I stopped at Karungi, Sweden, for I saw the midnight sun—the almost midnight sun, to be exact, for although it was noonday bright all night the sun did make a bluff at setting. It went down at twenty minutes to 12 and rose twenty minutes after 12.

The sun went down blood red, and the sky was crimsoned almost to the zenith. It seemed as if all the north were on fire. The river burned in the glow, and the sky took on tints that ranged from cardinal to pink. Just as the whole place seemed about to burst into flame, the sun dropped out of sight, and the glaring reds began to mellow into softer shades, the river lost its glow of fire, and the sky dulled and dimmed until it looked like a great inverted dome that had been white hot and was cooling slowly.

There were no other shades than the shades of fire—none of the usual maroons and cerises and garnets that come as the aftermath of mountain sunsets. Everything was carmine. The air quivered redly, and the trees and the grass were rubescent. All this softened gradually into a glowing one toned mass of color. Then, at twenty minutes past 12, at a point that seemed not more than half a mile along the horizon from the place where the sun disappeared, they came a golden glory that spread evenly over the reddened sky. The sun was rising and soon was above the horizon. It went down as red as fire. It came up bright, glittering, gleaming, as if during the forty minutes it had been below the horizon some titanic hand had polished it for another day's use.

I asked in Stockholm and Christiania:

"When do you sleep?"

"In the winter," they said. "Then the nights are so long there is nothing else to do."

NOT SUCH A FOOL.

(Judge)

"Here's a strange case," said Mrs. Spotter to her husband. "A man they called the town fool up in New Hampshire died, and they weighed his brain. It was heavier than the average."

"Is that all it says about him?"

"Yes—except that he was for many

Muggins—She's a trim little thing.
Buggins—Naturally. She's a milliner.

Heart Was So Weak Could Not Go Up Stairs Without Help.

When the heart becomes weak and does not do its work properly the nerves become unstrung and the whole system seems to go "all to pieces."

When this happens you need a tonic to build up both the heart and nerves, and Milburn's Heart and Nerve Pills will accomplish this for you, providing you do not let your case run too long and allow it to become chronic.

Mrs. Evangiliste Loverdure, Fort Coulonge, Que., writes: "Last summer my heart and nerves were so bad I could not sleep at night, and my heart was so weak I could not go up stairs without help. My doctor said he could do no more for me as my heart was completely done. A cousin of mine came in one day and told me that Milburn's Heart and Nerve Pills cured her completely. I immediately gave her 50 cents to bring me a box, and since that day there is a box always on my sideboard. I am now well, and my heart and nerves are stronger than when I was a little school girl. I advise anyone with heart trouble to try them. No doctor can beat them."

Milburn's Heart and Nerve Pills are 50c per box, 3 boxes for $1.25; for sale at all dealers; mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

NEIGHBORING VILLAGES & COUNTRYSIDE

News of the Week Collected by Staff of Live Correspondents

MILDMAY

Mr. and Mrs. J. A. Johnston visited friends at Glencoe over the holidays.

Quite a number of the soldiers made a short visit to Clifford on Saturday afternoon.

Misses Irene and Melinda Pletsch spent a few days last week at Guelph and Toronto.

Signaller Geo Helwig of the Divisional Signal Corps stationed at Ottawa visited his parents over the holidays.

The Elora road at Balaclava Hill and at Lewis' Hill in Carrick are in very bad shape. Lighted lanterns are placed each night to warn rigs from the bad spots.

Miss Florence Mason of Rochester, N. Y., was a week-end guest at Mr. Helwig's.

Mrs. Morgan and son Fred of Burr and Mrs. Cunningham and two children of Clandeboye were visiting Mrs. Jane Stewart over Easter.

Mr. Adam Fink is on the sick list this week.

Other Easter visitors in our village were:—Ray Schurter of Berlin, Messrs. Wm. Diebel and George Brahler of Kincardine, Miss Sarah Geibl of Clifford, Mr. Harry Gowdy of Listowel, Miss Dora Wendt of Harriston, Mrs. Reba Schwalm of Harriston, Mr. [illegible] of [illegible], Sask. [illegible]

Rev. Mr. Stafford of Elora preached a stirring sermon to women on Easter Sunday night. A large congregation was present.

Hunstein & Wittich, the firm which recently sold out to Hunstein & Kuechtel, have purchased a dry goods business in Wallaceburg and will commence business there shortly.

The Union Jack Knitting Club gave a tea on Monday from 3 to 7 and served lunch to raise funds for purchasing yarn.

Mr. Chas. Wendt was in Clifford on Good Friday.

Mr Gilbert MacLean of the Merchants Bank spent the past few days at Bothwell.

Lieut. Zinn spent the Easter holidays with friends at Whitby.

PINKERTON

Here for Easter: Miss Mertis and Mr. Frank Donnelly and Mr. Walter Birrell from Toronto, Miss Verna Donnelly and Mr. Gordon Pinkerton from Stratford Normal, Mr. Robert Gale from Alma, Miss Greta Gregg from Paisley, Miss Sylvia Reid from Harriston.

Pte Gordon Garland is visiting in Toronto.

Miss Mary McKee of Stratford Business College has finished her course there.

Mr. and Mrs. Neil Thompson and family moved their household effects to St. Thomas last week where Neil has secured employment in a repair shop.

Mr. Herb Fiddis has left town for his home in Brant and closed up his barber shop here. A good stand is now open to any industrious fellow as our two tonsorial artists have left.

A very pleasant evening was spent at the home of Mr. Albert Pinkerton's on Wednesday evening when the Young People's Society were entertained.

Mr. Godfrey McKee is spending his holidays at his home in Southampton and Mr. Mel. Reid is recuperating at his home here.

Rev. Mr. Gale attended a meeting of the Senate of the Presbyterian Church in Stratford and Mrs. Gale is visiting her daughter at Arthur.

Mr. Richard Trotter of Toronto formerly of here, renewed acquaintances last week.

Miss Mary Culham of Dunnville renewed acquaintances here last week.

Miss Alma Reid was called to attend Mrs. George Mason of Harriston, whom we understand is sick.

EAST BRUCE

Mrs. James Rowley's sale had one of the largest crowds that has been at a sale for a number of years. Auct. Pearce wielded the hammer. Bidding was lively and good record prices were received for all the stock except the horse. Two pigs brought $113.

Mrs. Joe Irwin is on the sick list at present but we hope to hear of her recovery soon.

Mr. Williamson of Toronto was around buying horses last week and bought a number at good prices.

Mr. John Ross enlisted but was rejected.

We are pleased to report that Pte. Rich. Mills is able to be around again again after a severe illness.

Mr. Henry Brown made a business trip to Kincardine last week.

Mr. Jas. Begg is the latest owner of an auto around Paisley.

RIVERSDALE

Ploughing is now the order of the day.

Mr. Eugene Dietrich who is employed with Mr. L. Beninger of Grand Valley is spending a few days at his home here.

Little Frank Cassidy the three year old son of John Cassidy had the misfortune to fall from a wagon and break his arm, but we are glad to state that he is rapidly recovering.

Miss Angela Barry has returned to her home in St. Marys to spend the Easter holidays.

Mr. Wm. Laporte has sold his hundred acre farm to L. McDonald. Mr. Laporte has already joined the colours.

Pte. Vincent Petteplace spent Sunday at his home here.

Mrs. Lawrence Beninger is visiting her daughter Mrs. Ruth of Hepworth.

OTTER CREEK

Mr. and M[illegible] Emerson Schumacher and Mr. and Mrs. Wm. Klein were visiting their parents. Mr. and Mrs. Phillip Gress on Sunday.

Several from Otter Creek attended the party on the 4th con. of Carrick last Monday evening.

Mr. Elmer Kuechtel of Hanover, was visiting friends on the 14th on Sunday.

Some of the farmers have started seeding around Otter Creek.

Miss Lillian Gress of Hanover was visiting her parents here on Sunday.

Mrs. Frank Smith was visiting at Mrs. David Bell's on Monday.

The roads around here are slowly drying up. There are still some bad places, one especially up at what is commonly called Hundt's corner. It extends across the concession. We would draw the pathmaster's attention to it. He should look after it. There may be serious trouble to the pathmaster or the township. Anyone going through with an auto may be in danger of breaking it. A stitch in time saves nine.

GREENOCK

Miss M. Kirktown is spending her Easter holidays at her home in Glamis.

Mr. H. L. Hawthorne and Mr. Massel spent Sunday at Formosa.

Miss Ottilia Koller, who was laid up for a couple of weeks with pleurisy, is able to be out again.

Miss Olive Schurter is spending a couple of weeks with her cousin Mrs. John Zettler near Walkerton.

Wedding Bells will soon be ringing in the West Ward.

Mr. Ted Kraemer spent Sunday at Ambleside.

Mrs. H. L. Hawthorne is spending a couple of weeks visiting her mother at Fergus.

Miss H. Winter is visiting her sister, Mrs. Joe Lawrence at Clifford, for a couple of weeks.

Spring is pretty backward this year, too much rain. Most of the farmers haven't started seeding yet.

Mr. Albert and Miss Lizzie Heldmiller of Riversdale spent Sunday at Greenock.

HANOVER

Master Olaf Wendorf won the prize for oratory, and Miss Vera Zinn the prize for music at the second of a series of silver medal contests held in the Town Hall last week.

The tragedy of the war was again brought closely home to us last week when the casualty list contained the terse statement that Pte. William Perkins had been killed in action. Deceased enlisted at Hanover and went overseas with the 20th battalion of the second contingent. He was a chum of Reuben Jucksch's—Perkins, Unwin and Juckseh being great pals. Deceased worked in the local factories a couple of years before enlisting, and is highly spoken of by the boys around town. The despatch gives his address as Drayton, Pte. Perkins was a machinist by trade and was twenty-one years of age. He was born in Dublin, Ireland. His next of kin, John Perkins, lives in Drayton. This is Hanover's third direct bereavement of the war—Hugh Somerville, Stanley James and William Perkins.

The Hanover Horticultural Society is offering prizes for a front yard improvement competition.

Hanover Y. M. C. A. has reorganized for the coming year.

FATHER AND FOUR SONS

Although he has given all four sons to the King's Colors Mr. David Bell of Goderich, father of Signaller Victor Bell and Mrs. Henry Williams of Walkerton, has not been satisfied to stay at home and let his sons do the fighting. In spite of frequent rejections, he persisted until he finally received a berth as cook for the soldiers at Park Hill. Mr. Bell may be a good many years over the age limit, but he takes no back seat in anything. Just "to show these young fellows," he and a companion took a nice little constitutional the other day, walking from Park Hill to London. They covered the 33 miles in less than nine hours. That is a record which would keep some of the younger fellows stepping.

CARGILL

Mrs. John Loughleen, Sr. is spending a few weeks with friends in Guelph.

BORN—At Cargill, on April 19th, to Mr. and Mrs. M. L. Ziegler, a [illegible].

Mr. and Mrs. Henry Sp[illegible] left on Monday to attend [illegible] the wedding of their son, [illegible] which took place at Goderich.

Pte. Howard Parker of 147th Batt., Owen Sound, spent the holidays with his parents, Mr. and Mrs. Horatio Parker.

Miss Marie Mahoney of the Queen's Walkerton, spent the past two weeks under the parental roof.

Miss Frances Taylor who has been visiting friends for the past three weeks, returned to Clifford on Friday Mrs. E. D. Baillie accompanied and will spend a week there.

Auctioneer John Hall was in Mildmay on Saturday conducting a sale of cattle for Mr. Coutts.

Among the visitors for Eastertide we noticed were:—Corp. R. Loughleen, Barrister Geo. Welstord, Guelph; Chas. Spencer, Milverton; Hannah Loughleen, Drayton; Ed. Jordan, Pt. Colborne; Mrs. McLellan, Fergus; Geo. Mahoney, Southampton; Pte. Zimmerman, and Wm. Jordan, Brussels, Misses Gowanlock, Walkerton; Pte. Nadain Gait; Corp. Hamilton, Pte. Legde, Walkerton; Messrs Sparling and Cliff, Chesley; Miss Edith Jordon, Guelph.

The following were away for the holidays:—Miss Gladys Keeling, Mrs. Dr. Bricker, and Mr. Joseph Clancy, Toronto; Mr. and Mrs. W. Mathews, St. Marys; Mr. E. A. Ruttle, Kincardine; Messrs. Hood and Brown, Neustadt; Miss Neuman, Owen Sound; Mrs. Oakley and Miss Faw, Newton; Mrs. B. Whitehead, Listowel; Mr. A. Hettrick, London; Mr. and Mrs. Jno. Whitehead, Greenock.

Mr. Bert Abell left on Saturday for Brussels where he has secured a position, Mrs. Abell and Bessie expect to join him in the course of a week or so.

GLAMIS

Misses Mary Webb and Nettie Gunn, Stratford Normalites, are spending the holidays at their homes here.

Mrs. F. Bouton of Toronto was here to spend Easter with her father, Mr. McSween, who is ill.

Pte. James Symon of Walkerton Co. is home for a month.

All are pleased to hear that Private J. A. McKinnon who was wounded in France was not serious and he intends returning to trenches soon.

Miss Annie McDonald, school teacher S. S. No. 1, is spending this week at her home in Kincardine.

Conductor C. D. McLean of Parry Sound is home on a visit.

Mrs. Thos. McIntosh Jr. and daughter of Stratford spent a few days here.

Mr. J. K. McLennan spent the week-end with her sister, Mrs. (Dr.) Black of Clifford.

Mr. Dan M. Finlayson has returned to his work in Port Elgin.

Miss Jean McDermid of London spent the Easter holiday at her home here.

Mr. C. J. McKinnon of Wallaceburg is spending the holidays here.

Messrs. Lorne Cair of Royal Bank Kincardine and Roy Stewart of Royal Bank Hanover were week-end visitors at their homes here.

Misses Mable Kirktown of Greenock and Alberta of Paisley spent the holidays under the parental roof.

Mr. Bert Cook has purchased a fine driver from Mr. K. McLean.

Miss Ethel Stewart has returned home after spending six months at McDonald Institute Guelph.

Mrs. (Rev.) P. Keith spent Easter with friends in Toronto.

All are sorry to hear that Mrs. Chas McKinnon is confined to her bed and in a critical condition. All wish her a speedy recovery.

Mr. and Mrs. R. B. Maber (nee Miss Fanny McKinnon) of Mikado, Sask., arrived here Monday on a visit to her parents, Mr. and Mrs. Chas McKinnon.

Mrs. (Rev.) De Mille preached in F. M. church here on Sunday evening while Mr. De Mille preached in the U. B. church, 4th con, Bruce.

Mr. James Gilchrist bought a new driver and outfit from Mr. Sparrow of Paisley last week.

Miss Flossie McLennan spent Easter in Detroit.

Mr. John Gunn had his Bell Telephone taken out last week.

Misses Annie Moffatt of Grand Valley, and Allexia of Stratford and Mr. Petrie Moffatt of Peterboro are home for their Easter vacation.

Master Clifton Maneely is, at the time of writing laid up with the measles.

Mr. Jno. Moffatt is spending a few days visiting his uncle and aunt in Fergus.

A very successful meeting of the Women's Institute was held at Mrs. P. Dale's on Wednesday. There was a splendid turn-out.

Special training for Tiverton soldiers here in this burg on Sundays. "Who wouldn't be in Khaki!"

Miss Lita Keyles was at Mr. Geo. Neldham's on Sunday.

Quite a number from this vicinity attended the reception given by Mr. and Mrs. Rhody Cooper in honour of the marriage of Miss Delissa Cooper and Mr. Perry Swalwell

Mr. Robt. Keyes is busy excavating the cellar for the new house which they purpose to build this summer.

Mr. Will Thacker of Kingarf was at Mr. N. Fitzsimmon's on Sunday.

Miss Agnes Moffatt spent a few days at Mr. Jno. Deabus' last week.

The following was heard on the street the other day between two young men.

Jim—"When do the soldiers leave town, Sim?"

Sim—"In about four weeks, Jim."

Jim—(Hopefully) "Perhaps we will be able to get a girl then."

Sim—(Doubtfully) "Perhaps. It looks though as if you have to be in Khaki."

OUR BATTALION

160th Bruce Battalion! The re- t is indeed fortunate in its name. first place, 160 is a round num- conveying an idea of complete- which would be lacking in such mber as 357. Then, the word ace" calls to mind heroic deeds, deeds of a great soldier who, hting fearful odds," was unafraid; who, after six hundred years is remembered as the hero who gave k to Scotland her freedom. Surely name is a good omen.

And the officers and men of the Re- ment are worthy to bear this honor- name. In the personnel of the staff combined the enthusiasm of youth, wisdom that comes with years, the ecutive ability of the successful bus- ss man, and the experience of the eran soldier. The result of this ppy combination is a record for rap- recruiting and organization; a bat- on raised in three and a months, and the battalion thus ickly raised is not a regiment of s and ends, rejected elsewhere, nor unwilling recruits, but of fine up- anding soldiers, proud to be enrolled the Bruce Battalion. We are able form some idea of the rank and file the Regiment from the Walkerton mpany and the men attending the C. O. school where all the units are sembled. One hears on all sides ed praise of these men, not only efficiency and soldierly bear- llons when one considers time they have been in t also for their gentleman . We hear of disturbances military centres, scenes of which soldiers have taken the men of the 160th have riably [illegible] arise between soldiers n. They have been so ap- of efforts to entertain and them, that it has been a pleasure her than a duty to do one's "bit" this respect.

We are justly proud of our Regiment, and the Daughters of the Empire will follow their fortunes with keen interest, confident that the honour of our splendid county is safe in the keeping of the officers and men of the 160th Bruce Battalion.

I. O. D. E.

The editorial board feels that a paper published by a Chapter of the Order furnishes an opportunity of making some explanation of the objects of the Imperial Order of the Daughters of the Empire. That the organization is immiquently a patriotic one will be evident from the aims as set forth in the constitution.

1. To stimulate and give expression to the sentiment of patriotism which binds the women and children of the Empire around the Throne and person of their Gracious and Beloved Sovereign.
2. To supply and foster a bond of union amongst the Women and Children of the Empire.
3. To provide an efficient organization by which prompt and united action may be taken by the women and children of the Empire when such action may be desired.
4. To promote in the Motherland and in the Colonies the study of the History of the Empire and of current Imperial questions; to celebrate patriotic anniversaries; to cherish the memory of brave and heroic deeds; and the last resting place of our heroes and heroines, especially such as are in distant and solitary places; to erect memorial stones on spots which have become sacred to the Nation, either through great struggles for freedom, or events of heroic and patriotic self-sacrifice.
5. To care for the widows, orphans and dependants of British soldiers or sailors during war, in time of peace, or under sickness, accident or reverses of fortune.
6. Members are pledged to promote unity between the Motherland, the sister colonies and themselves; to promote loyalty to King and Country; to forward every good work for the betterment of their country and people; [illegible] the progress of art [illegible] men's

Between August 1914 and August 1915 the Order as a whole raised $443,733. The Walkerton Chapter raised $2,795. Three separate accounts are kept by the treasurer; one for the soldiers' club room, a second for the Patriotic Service Fund, and a third for general purposes, so that money given for special purposes might be used for the object specified. All donations given for patriotic work are put into the Patriotic Service Fund to be used only for Red Cross Supplies and Field Comforts.

160th. Battalion Officers

LIEUT.-COLONEL WEIR

No better selection could have been made in the choice of a Commanding Officer than Lieut.-Col. Weir, who knew the potentialities of this county from a military point of view better, probably, than any other officer in the Dominion. His personal knowledge of the people of the county and his genial manner have contributed in no small degree to the success of the recruiting.

Lieut.-Colonel Weir commenced his military career in 1881 at the early age of 17, when he entered the ranks as a private in the 32nd Bruce Regiment under Captain Eckford and Lieut. David Robertson. He subsequently held the following positions:—1882, Corporal; 1883, Sergeant; 1886, Quarter-Master Sergeant; 1886, Lieutenant; 1889, Captain of the Walkerton Company, and in 1892, Major of the 32nd Regiment.

In 1899 he was made Lieut.-Colonel and kept that rank until 1907, when he was made Brigade Major of the 2nd Brigade. In 1911 as Brigadier of the 2nd Infantry Brigade, 1st Division, Col. Weir was again promoted, until now he commands the 160th Bruce Overseas Battalion.

In 1902 the 32nd under Col. Weir acted as Guard of Honor for the Duke of York, now King George V, during his visit to Canada.

As a result of these long years of faithful service Col. Weir wears the "Long Service Decoration Medal."

In speaking of the 160th Battalion, the Colonel said how proud he was of it—that to his mind it was finest in the land.

160th. Battalion Officers

LIEUT. WHITEHEAD

Lieutenant R. B. Whitehead, Adjutant of the 160th, was born in Walkerton, August 25th, 1891. He received his early education at the Walkerton Public and High Schools, where he distinguished himself not only in the class room but also on the athletic field, winning prizes for scholarship, oratory and sports. He graduated from Queen's University in 1912 and was called to the bar in 1915 after a three years' course at Osgoode Hall. At College he again demonstrated that the successful student may be also an enthusiastic sportsman.

Immediately after the outbreak of war Mr. Whitehead began his military training as a member of the Queen's Own Rifles, Toronto, with which battalion he remained eighteen months. After train- g as a lieutenant with the Uni- ersity Officers' Training Corps, e joined the 160th Bruce Bat- lion, January 1st, 1916. His cap- ilities as an officer, and his suc- ss in recruiting led to his ap- ointment as Adjutant, March 8, 916, a position for which he is dmirably fitted.

Bruce War Auxiliary

In the autumn of 1915 when battalions were being raised in many counties of Canada, the need of help from Bruce County came under the consideration of the Minister of Militia. After consulting with some of our leading men the Minister instructed Colonel Adam Weir, a former commanding officer of the 32nd Battalion, to proceed to Bruce county and raise the required men for the 160th or Bruce Regiment. Col. Weir viewed the situation and concluded he would require assistance from some source or other, as his officers to be chosen would not be at all acquainted with conditions in Bruce county or the best methods of handling them. A preliminary meeting with a few well known local men settled the question by the formation of the Bruce County War Auxiliary which was finally launched at the meeting held in the Opera House on the 21st of December last. At this meeting Judge Klein was appointed president, with the following vice-presidents: David Robertson, of Walkerton, C. J. Mickle of Chesley, C. M. Bowman of Southampton, Hugh Clark of Kincardine, Gideon Kastner of Wiarton, John Joynt of Lucknow, Chas. E. Start of Tara, I. Shoemaker of Paisley, and Dr. Fowler of Teeswater. George D. Mackay of Walkerton, was appointed organizing secretary. Representatives of the Auxiliary were chosen from the leading men in each municipality, who in turn held public meetings in their respective municipalities and created committees for every polling sub-division in the county. The experience of all organizers has been, that no matter how strong the appeal for any cause, results are not successful unless backed up with a good organization which is the bone and sinew of the effort. The secretary, Mr. Mackay, realized this and lost no time in laying a strong foundation for the work. His intimate knowledge of Bruce county and its people was a valuable asset for the organization and of great assistance in the speedy work of recruiting. The organization did not get actually started until after New Year's, but by the first of February it was in full swing in almost every part of the county. Meantime Colonel Weir and his valuable second in command, Major Moffat, were perfecting ways and means to carry out their plans for the military end of the organization through the many detachments spread over the county. The first five or six weeks was a strenuous campaign for the noble band of workers under the Auxiliary committees and by the first of February the Battalion was about 600 strong with a regimental band. By this time the people of Bruce were becoming very much interested in the formation of the battalion, and meeting after meeting was held all over the county with splendid audiences. In order to accurately arrive at the number of available men between the ages of 18 and 45, the secretary of the Auxiliary through his committees undertook to make a military census of the county to ascertain available men. This was thoroughly completed and the lists embrace over 6000 names of men between the ages referred to. This census, and its methods, in so far as we can learn, is the only complete one for military purposes taken in any county in the province, and recently has been adopted by the military authorities for the whole of the western Ontario division. The 6000 names are all tabulated according to municipalities, with a recruiting card for each man on the list and particulars as to age, occupation, P.O. address etc., for each available. The accuracy of these lists compiled by the secretary is better understood when you realize that in the many thousands of letters sent out, not a single one has been returned through wrong address. The census lists and recruiting cards are supplied to the several recruiting officers throughout the county who become in possession of all the material they have to work on. These methods have been in a very large measure the reason of the successful raising of the battalion in such a short period of time. It must be remembered that Bruce County has the largest occupied area of any county in Ontario, and with a population under 47,000, it would have been an up hill fight to raise a regiment without adequate organization to support the effort. We venture to say that no rural battalion in Ontario has received the same amount of support from its citizens that the 160th has received from the people of Bruce County, and further that it has enabled the Colonel and his officers to have a free hand with their military work with the minimum of outside organization by them. The fact that Col. Weir or his officers had no occasion to tour the county on organization, shows how well the Bruce War Auxiliary completed their work.

Every section of the county is represented in the battalion from Tobermory in the far North to Mildmay and Kincardine in the south. The Peninsula from Wiarton north, especially has covered itself with laurels, when it is remembered that no railroad taps this section of the county for a distance of sixty-seven miles from Wiarton to the "Tub." This is amply illustrated in the case of Lion's Head, which is a mere hamlet compared with the municipalities in the southern part of the county, but at the present time seventy men are in the detachment there.

One of the features that has probably counted for much in recruiting, is that of allowing the men to remain in the town of their home.

The 160th Battalion is now an assured fact. It is composed of officers, who, with pride, can compare themselves with any battalion officers in the province. The men are a superb lot and a striking evidence of the class of boys that our county produces. Clean in mind and body, raised in the homes of the plain folk of Bruce, and offering their services on behalf of our Empire, it is needless to remark that the genuine respect and friendship of all Bruce is due to them. Their course in drill in Canada, their overseas training and their labours in the trenches will always be watched with fervent interest by those who are left behind, and loyally so by the zealous workers of the War Auxiliary. The Auxiliary has done its work well. True there have been a few hard spots where neither they nor any one else could penetrate, yet withal, on the whole an effort crowned with success, and to the lasting credit of the civilian organization.

160th Battalion Officers

MAJOR MOFFAT

Only a few months have elapsed since the subject of our sketch, Major A. McLean Moffat, arrived in Canada from England to serve under Colonel Weir, just as the latter fought under Major Moffat's father, in the Northwest Rebellion, in 1885.

The Major is second in command of the Bruce Battalion, and is an efficient and exceedingly popular officer. He is well fitted for his position owing to the fact that he has been a soldier all his life. He holds certificates in Infantry, Cavalry, Field Artillery and Musketry and is also a veteran of the Spanish-American war. After this war he went to Kentucky, where he occupied several important military positions, finally becoming Lieutenant-Colonel, and holding the responsible position of Inspector-General of the state militia.

Major Moffat has also invented a new hand grenade, which is constructed on the same principle as a shrapnel shell, and bursts five seconds after it leaves the hand, the explosion being automatically timed.

Bruce is indeed proud to claim Major Moffat as one of her sons. Much, if space permitted, might be said of the clever way in which Major Moffat has helped to organize and recruit the Bruce Battalion, and we can only say that every one, both in Walkerton and the surrounding country, feels more than confident that Major Moffat will not only be a master hand as an organizer and inventor, but also a splendid leader, when it comes his turn to meet the Huns in distant Europe.

160th Battalion Officers

CAPT. TODD, Q. M.

Capt. Allen P. Todd's Military career dates back to 1900, when, like many of the boys in his home town of Walkerton, he joined the 32nd regiment. The following year he attended the reception given to the Duke and Duchess of York, in Toronto, as a member of the Regiment, which was then in command of Col. Weir. In 1902, Capt. Todd was one of the two men selected to represent the 32nd Regiment, which went to England for the Coronation of King Edward. In the year 1903 he joined the Dufferin Rifles. For the last eleven years he has spent his time as commercial traveller, for both Eastern and Western firms, but travelling principally in the West, until December, 1915, when he was appointed Quartermaster for the 160th Battalion, C. E. F. As Quartermaster this business experience will stand him in good stead.

THE PIONEERS

Accompanying the 160th Battalion is a body of men called "Pioneers." This consists of ten men who are skilled workmen;—a plumber, a pipe fitter, a saddler, a blacksmith, a carpenter, a brick layer, a stone mason, a wheelwright and a painter. At the head of these men is Sergeant F. B. James, an exceedingly reliable and efficient officer, who, before joining the Bruce Battalion, was well known, in both London, England and Winnipeg as an engineer, surveyor and architect. At present Sergeant James is drawing for the Battalion, maps of the county and town; also of the modern military rifle. These rifle maps are distributed among the men, in order that they may learn something of this weapon before they really come to practise with it. Sergeant James also gives lectures at the N. C. O. school on engineering, surveying and, architecture.

The Pioneers also superintend and help to build and repair the trenches and if a squad of engineers are available these in turn superintend the trench work of the Pioneers. Often, however, the engineers are not at hand, and the Pioneers must do their hazardous work alone.

Besides looking after the trenches, the Pioneers must build huts, cook houses, etc. When not building or repairing, these men with their Sergeant help in the fight by carrying rifles and ammunition.

It is very evident how necessary are the Pioneers to a Battalion and ours of Bruce compare very favorably with those of any other Battalion in Canada.

They are easily distinguished from the other men in khaki, by the crossed axes they wear on their sleeves which are symbolical of the way in which they go before and hew a passage for their Battalion.

THE BUGLE BAND

Bruce county has great reason to feel pride in the Bugle Band which will accompany the 160th Battalion overseas. The formation of this Band was begun on the 14th February, and at the time of writing contains twenty-four members, but when at full strength will number forty. Sixteen of these men will become drummers while the remainder go as buglers.

When Bruce's Bugle Band arrives at the front, the Band instruments will be left at the base, while their owners, the buglers, will become stretcher-bearers, and it is likely that the drummers will help in the different hospitals of France and Belgium. Not all the buglers, however, will leave their instruments at the base, eight going with the different officers to interpret, by means of calls, the officers' commands to the army. The members of the Bugle Band not only play for the army to march to, and help during a battle to carry in the wounded, but also take turns in going on guard each day.

The Bugle Band speaks for itself, in its ability to play first-class martial music, as it practises in the Market Square each day. Besides the marches the bandsmen must also learn about a hundred different calls.

The brilliancy with which the Bugle Band plays, may well be attributed to its instructor and leader, Sergeant Albert Tucker, who is a native of Dover, Eng. Sergeant Tucker's soldierly bearing testifies to his eight years spent with the Gordon Highlanders.

WE THANK YOU

In a list of the wonders of the world, the editor of a "local" newspaper should have at least honorable mention. That he escapes nervous prostration is a profound mystery to us, when we consider his multifarious duties. Unaided, he must collect news, solicit advertising, increase the circulation of the paper, and attend to many practical details of which we know nothing.

In these various departments the Editorial Board has had the able assistance of the following Committees:—

Advertising: Mrs. Appl Mrs. Benton, Miss Havill, Mrs. R. Kreuger, Miss Rowland.

Circulation: Mrs. O. E. Klein, Mrs. MacNamara, Miss Fairservice, Miss Warren.

Woman's Work: Mrs. N. Robertson, Mrs. W. M. Shaw, Mrs. McCool, Miss Rosther.

Military: Mrs. Whitehead, Mrs. Hepburn, Miss Sinclair, Miss MacFarlane, Miss Farewell.

Household: Mrs. Harry Truax, Miss M. Robertson.

Personal: Miss Stead, Miss Duncan, Miss A. Thompson, Miss Henghan, Mrs. Frank Eidt, Miss L. Wettlaufer.

As to the mechanical make-up of a paper we are densely ignorant, and in the arrangement of details, the experience and help of Mr. Eedy, proprietor of the Walkerton Telescope, have been invaluable. We acknowledge gratefully Mr. Eedy's gift of the the engravings used in the Special Edition and also the assistance given by the Officers and Men of the Battalion; by the citizens of the town generally, and by those of the surrounding towns who have advertized in our paper.

The editors regret that, owing to lack of space, it has been impossible to use all the valuable copy sent in by kind contributors.

Lieut. Rowland's conundrum:—

Q.—Why are the Canadian soldiers like hard boiled eggs?

A.—Because you can cut them up but you can't beat them.

This conundrum has a couple of variations, for example:—

Q.—Why is a slacker like a hard boiled egg?

A.—Because he is white outside and yellow inside.

Q.—Why is a slacker like an addled egg?

A.—Because he is chicken hearted.

Non-Coms.' School

The county of Bruce has long held a high place in the annals of our country. Through the splendid qualities of her people as shown at this time, she has added to her already high standing. What other county has so quickly responded to Her Country's call in the raising of a battalion!

One may get just a glimpse of a soldier's life, if he visits even for a limited space of time the Non-Commissioned Officers' School. Here we find young men, who have been selected from different parts of Bruce, who are most earnestly seeking to qualify themselves as non-commissioned officers. All honor to them! For well do we know that the success of any army depends largely upon its non-commissioned officers, since they take an active and prominent part in the duties of fighting.

At the N. C. O. School they commence their day with physical drill. For who knows better than the soldier how necessary it is to have a body that can respond to every impulse of the will? So they labor strenuously to make of themselves well developed physical beings.

Not only is the body trained by this physical drill, but a higher end is attained, for they learn the value of discipline. Their drill would be valueless, if they were not able to apply their knowledge. They aspire to disciplined bodies, disciplined minds, and disciplined wills. They wish to attain military efficiency, so with that in view they cheerfully endure "physical torture," military drill with its many repetitions and movements, signalling and the different studies in Infantry Training. Each one hopes to come forth from the school "An authority on drill and military tactics."

The members of the School consider that they are most fortunate in having their training under the leadership of such an able officer as Major H. McLean, Chadwick. He is one of the county's sons. His birth place is the village of Teeswater. He is the grandson of J. K. McLean, Clerk of the Division Court, a man who has long been held in very high esteem.

Major Chadwick early evinced an interest in military affairs. Although he started life with the intention of being a banker, he soon abandoned his financial career and took an active interest in military life. For eighteen years his attention and energies have been devoted to it. He was a member of the 32nd Bruce Regiment.

A few years ago he severed his connection with the Militia and with others, went to the Great West. He settled in the city of Saskatoon, where he held a lucrative position in the Department of Customs. However, the call of the Bruce Battalion proved so irresistible that he willingly returned to his native county to serve to the best of his abilities. His fine presence, his courtly manners, and his soldierly attainments, have made him a most popular officer with the men, and a very highly esteemed member of the Staff.

As physical drill is of great importance, it is of interest to note that the School has a most competent instructor in that branch of the work. Acting Sergt.-Major Holdsworth holds a certificate of qualification to teach gymnastics in the British Army. He is himself a perfect acrobat and is able to perform almost impossible feats. He does not expect the men-in-training to do what he himself cannot do.

Another officer at the N. C. O. School is a well-known Walkerton boy, Lieutenant Robert Rowland. He has lately returned from the Front, having been recalled to assist in the Bruce Battalion.

In April of last year, as a student at Queen's University, he joined the University Corps. With eighty-six other men he appealed to the Minister of Militia to be allowed to go straight to the Front and help fill the gaps in the Princess Pats caused by their heavy losses at Festubert. Their appeal was granted and in two months from the time he had enlisted, he was at the Front. He served eight months in the trenches. This experience gained at the Front will doubtless be of great value to the men-in-training here.

160th Battalion Officers

MAJOR A. W. McNALLY

Major McNally, Junior Major of the 160th Bruce Battalion, entered upon his military career in June 1909, as a Private in the 32nd Regiment, and the same year was made a Sergeant. In the following year he was given a Lieutenancy, and in 1911 was in command of G Company, and two years later became Captain.

In August 1914, when war was declared, Captain McNally was among the first to answer Canada's call, being attached to the 11th Irish Fusiliers of Canada, in Vancouver, B. C., and going overseas as a Lieutenant in the 7th Battalion, 1st British Columbia Regiment, with that never-to-be-forgotten "Canadian Armada."

The following April he was sent to France with a draft of 300 officers and men, being second in command. Major McNally was wounded at Festubert, on May 24th, and on June 20th, while still in the hospital in England, he was appointed Captain of C. Company, and rejoined his regiment on July 12th. On November 9th, he was again wounded by shrapnel, and, after spending some time in the hospital, returned to Canada on short leave. Upon his arrival he learned of his appointment as Adjutant of the 160th Bruce Battalion, and after filling that position for a short time, he was made Junior Major on Feburary 14th. As Major McNally has come up from the ranks and has had experience of the stern realities of warfare, he will prove a valuable officer in the Battalion.

160th Battalion Officers

CAPT. SHAW

Captain Farquhar Shaw, Paymaster of the 160th Battalion, was born in Walkerton, on March 31st, 1879, and received his education at the Walkerton public and high schools. He had his first experience of military life at London Camp with the 32nd Bruce Regiment in 1899 and this has been supplemented by his work with the Fort Garry Horse in Winnipeg. He has had wide business experience having been identified with the Canada Furniture Manufacturers, Limited, representing their interests in various capacities from the Atlantic to the Pacific. This business experience has helped him to systematize his work as Paymaster of the Battalion.

O. LISTEN TO THE BAND!

When it came to a question of the Band and its leader, Judge Klein and Mr. David Robertson suggested to Major Moffat, who had that proposition in hand, that they could not do better than get Bandmaster Wright. Sergt. Wright had been instructor of the Band of the 32nd for some time in Chesley and eight years ago led the Regimental Band when it was stationed in Walkerton.

The Band is composed of 28 players, and will be equipped with the best English instruments. Bandmaster Wright received his training from Bandmaster Waters, who was for eleven years with the 22nd Oxford Rifles, at Aldershot, one of the greatest military bases of the Empire.

The cost of equipping the Band will be about $2,000, and this sum has been raised largely by private subscription. Messrs. J. R. Shaw, Wm. Krug, Conrad Krug, John Rowland and W. D. Bell each giving $100.

Other donations included $25 from the Daughters of the Empire.

The citizens of Walkerton, having been for some years without a band, show their appreciation of the excellent result of Sergt. Wright's instruction, by appearing at doors and windows to listen to the inspiring strains.

+ + +

BATTALION BAND ITEMS

Bandmaster Wright holds the position but "Colonel Bruce" is the real leader of the Band.

+

The married men in the Band are teaching the young bachelors how to propose.

+

Who says Bert Hodson's married?

+

There are some broken hearts in Chesley since the visit of the 160th Batt. Band. Bass, Alto and Cornet sections, are you responsible?

+

Many of the Bandsmen stood on the river bridge, at Chesley, counting the "dead soldiers" and wishing they were back in Walkerton.

+

The Chaplain of the 160th has already been appointed; one, Mr. C. Curtis, being given the preference, having so ably shown his proficiency in that line while in Chesley.

+

Sammy Wissler says he Dished a Trout but Bill Thompson says he was just Nebbing. Is he (W)right?

+

The Band claim they have a pair of Jacks that will beat three of a kind.

It is rumored that one of the slide trombone players deserted a wife in Tara.

+ + +

Overheard on the street after church parade:—
Officer in command: "Officers—fall out."

+ + +

"I say, George," the old lady whispered, "there's somethin' I can't understand about they sojers."
"What be it, lass?"
"I can't think how they get their laigs into they twisted trousers."

+ + +

Query: Is it fair that Private X because he is so unfortunate as to resemble Private Y should have to part with 10 cts. of his hard-earned pay because Private Y neglected to pay for a shoe shine?

+ + +

A glowing tribute must be paid here to the splendid manner in which the Indians of the county have responded to the call. Their sense of gratitude to the government which has guided their affairs and supported them on their reserves has brought many to the colors. At the present time there is scarcely one able bodied Indian on the Cape Crocker Reserve, who is not wearing the King's uniform. Saugeen Reserve near Southampton has contributed equally as well. A number from both reserves have joined the Bugle Band, and are taking the course of instruction for non-commissioned officers here.

Soldiers, Noon should be late in Rising in the morning, in Case the Cook's Coffey might Burn.

+ + +

Mistress: So you want the day off tomorrow—something private?
Jane: No, mum—sergeant.

+ + +

Why does a certain officer in the 160th pay so many visits to a sick corporal in the Hospital?

That the 160th is not a bantam battalion is evidenced by the regimental records which show that Pte. D. C. MacDonald, of Ripley, and Pte. A. G. Saunders, of Southampton, stand six feet two and a half inches without boots.

+ + +

Pte. A. M. McPhatten, of Hepworth, a member of the Northwest Mounted Police, the force which has kept our Canadian West from becoming too "wild and wooly," is a friend of Michael O'Leary, who won the Victoria Cross, the highest award for bravery in action in the British Army.

Can it be possible that a gallant member of the 160th, in the midst of fond goodnights, was literally swept off the doorstep by an irate parent?

+ + +

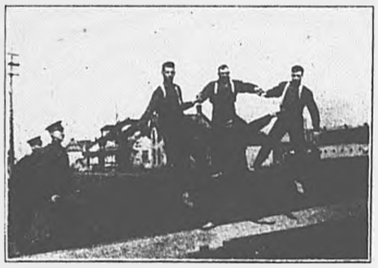
LOST — A certain young officer from the N. C. O. School between "retreat" and "lights out." Any information on the above would be most thankfully received at Headquarters.

+ + +

Officer:— How is this, Murphy—the Sergeant complains that you call him names?

Private Murphy:— Plaze, surr, I never called him any names at all. All I said was, "Sergeant," says I, "some of us ought to be in a menagerie!"

One of Sergt. Holdsworth's Acrobatic Stunts



Why does Mr. Lamont visit Chesley so often? Is it because he loves a quiet Read?

+ + +

Girls, listen! When you are buying your Easter hat, select one of the 160th's favorite colors:— brown, black, gray, green, golden and white, if you wish to gain the favor of the Battalion.

+ + +

Blessings on thee, soldier man,
Khaki boy with check of tan!
With thy puttee'd pantaloons,
And thy merry bugle tunes;
With thy smart step, smarter still
When passing sweetheart near the mill;
With the brightness of thy face
And the glamour of thy race;
From my heart I give thee joy
Blessings on thee, khaki boy!

Should the 160th Battalion consider giving a dinner we would suggest the following menu:—

Campbell's Soup

Salmon, Sturgeon, Trout,

Bacon, Kalbfleisch (veal) and Legge [of Lamb

Brains, Leake with Currie Sauce

Cole (Kohl)

Pudden, Peachpie,

Amman (nuts), King and Baldwin [(apples)

Stout, Porter, Coffey, Syder

Music furnished by Harper, Piper, Fidler and Wissler

MEN OF BRUCE!

The following lines were kindly contributed for our Special Edition by Dr. Thomas O'Hagan, a distinguished Bruce boy:—

Men of Bruce, your country calls you
Gird your swords for Empire's battle!
God hath blessed your standards wide,
Sweep the foe like driven cattle.
You were born where pioneers
Smote the forest, cleared and fallowed;
Men of Bruce, your country calls you,
Sacred is your cause and hallowed.

Men of Bruce, your country calls you,
Hearken to the voice of Duty!
Freedom hears your footsteps fall,
Stayed by neither gold nor beauty
Here beneath the Maple Leaf,
Where God's sunshine cheers all sorrow,
Form your ranks and gird your swords,
Patriots, heroes of tomorrow!

—THOMAS O'HAGAN,
Author of "Songs of Heroic Days."

The Walkerton High School

J. MORGAN, M.A., Principal.

All the courses for Matriculation and Teachers' Certificates, including Entrance to Faculties, are taught.

The record of this school for many years has been excellent. In the senior work, Helen S. Hanlay won last year the first Carter Scholarship of the value of $100; in 1914, Lewis H. Honey won the second Carter Scholarship worth $60.

The Staff consists of experienced and successful teachers. An efficient Cadet Corps is maintained and Physical Culture is taught to all the pupils of the school.

The next term opens on Tuesday, Sept. 5th.

Band Instruments For Overseas Battalions

BESSON'S England's Best

In every country of the World where Band Instruments are used, Besson's are recognized as among the best.

At the famous Championship contests held at the Crystal Palace, London, England, out of the last twelve contests, eleven of the prize winners have been equipped with Besson's.

We have equipped the following Battalions with either of the makes mentioned:— 37th, 56th, 70th, 74th, 80th, 83rd, 93rd, 94th, 97th, (American Legion); 98th, 111th, 124th, 125th, 126th, 127th, 136th, 139th, 141st, 146th, 149th, 155th, 156th, 176th, 208th, 137th, 159th.

HOLTON'S America's Best

Among the professional musicians of this continent Holton's are so well thought of that 90 p.c. of the professional musicians are using them and enthusiastically endorsing them.

Built by musicians who have made a scientific study of the manufacture of Band Instruments, they excell in tone, tune and ease of blowing, making a band equipped with these instruments at least 25 p.c. more efficient than a band equipped with any other make.

Cargill

This enterprising village with a population of about 350 is noted for its clean and thrifty appearance, and for the amount of business transacted. The buildings for the most part are composed of white brick, cement walks on all streets. For fire protection there is a volunteer fire brigade, a large stand pipe, a water main with 3 hydrants on the main street and 2 hydrants in mill yard. An up-to-date two room public school has an attendance of some eighty pupils, teachers are Mr. E. A. Ruttle principal and Miss Gladys Keeling, assistant. There are four churches, Presbyterian, Methodist, Anglican and Roman Catholic, the latter at present worship in the Public Library building, but expect to build in the course of a year or two. The Public Library is one of the best in the county of Bruce, as far as the number and quality of volumes is concerned and is conducted under the latest approved card system. There are some 3,000 volumes on hand. Its success is due in a great measure to the interest taken by the President and Treasurer, Mr. John Clancy.

Cargill Bowling Club have a nice green, comprising six rinks, a successful tournament was held last year, this is expected to become an annual event. Eight of last year's members are now in khaki.

The following are some of the principal business firms:— Cargill Limited. This firm carry on the principal industries, having a large plant for manufacturing staves, heading, barrels, etc. A private railway, operated by gasoline engine, brings timber from Greenock Swamp to the mills. They also have a large planing mill and grist mill. W. D. Cargill, M.P.P., is President and Chas. Kyle, Sec.-treas of the Company. Dominion Well Supply Co., Limited, manufacturers of Wind Mills, Iron Pumps, Cylinders, Etc, also do a general foundry business, are agents for gasoline engines and the "Regal" automobile. This car is equipped with modern improvements and is sold at moderate price. G. F. Saunders is manager. Keeling & Co., general merchants. This business is one of the oldest in Cargill, having been founded by the late Henry Cargill, in 1879. Mr. C. W. Keeling, the present owner, being a clerk in Mr. Cargill's employ for 5 years then succeeded him in the business a few years later. The premises were enlarged and renovated and now make an up-to-date store. The post office and telephone exchange are also in this store. There are over 150 phones connected with this Exchange. Continuous service is given. Miss Mabel Clancy is the popular chief operator. The only hardware store is owned by Mr. F. F. Balsdon. A full supply of general hardware, stoves, etc., kept in stock, plumbing work of all kinds attended to. Sherwin-Williams Paints a specialty. Mr. Martin Bester, barber, recently succeeded Mr. Bert Hoover. Mr. Bester is a young man who recently learned the business and is making good. Restaurant and Confectionery store, owned and conducted by Mrs. Margaret Bell, is a popular resort for the young people, especially during the summer when ice cream is in season. Jas. D. Schuett, undertaker and furniture dealer, also handles cream separators, vehicles and a good line of pianos. This store is noted for the first-class quality of all lines handled. John W. Reaburn, dealer in boots and shoes, manufacturer and dealer in light and heavy harness, and all kind of supplies found in a first-class harness shop. Thos. P. Hood, butcher, always has on hand a good supply of fresh and cured meats, sausage, etc. Customers can depend on getting clean goods and good quality. A. J. Hammore, livery man, has a good stable of horses and rigs, a good bus meets all trains.

The "Power" House, this is said to be the finest hotel building north of Guelph. It is patronized by many commercial travellers, has ample accommodation and good service. Mrs. Agnes Powers, Proprietress. Royal Bank of Canada has a branch here and has a splendid business connection with the surrounding villages and country. Three of the employees of this branch recently enlisted in the 160th. Mr. R. A. Fawlie is the popular manager.

Daughters of the Empire Walkerton Branch

MISS SHAW
REGENT

Shortly after the war began it was realized by the women of Walkerton that there was work for us to do, and that we might more adequately and systematically aid in that work, it was suggested that we form a Society and unite with the larger body known as the "Imperial Order of the Daughters of the Empire," and on Aug. 31st, 1914, a meeting was called at the Armouries which was most enthusiastically attended, and the Walkerton Chapter of that order was organized with Miss S. J. Shaw as Regent and various other Officers were appointed and Committees formed. The Chapter started on its mission with a membership of 100.

Our first step was a house to house canvass of the town for money, shirts, socks, handkerchiefs and the promise to either knit or sew for the soldiers. Great success attended this canvass, and we were thus supplied with money, materials and workers, and so an afternoon and evening of each week were appointed for war work, and at the Armouries, which building was kindly loaned us for our purpose, we met to work, and under the direction of various committees, shirts, night shirts, bed jackets, kimonos or dressing gowns, nightingales and bandages were made, socks knit, and expert knitters on hand ready to instruct all anxious to learn the difficult art of making a sock, and at the end of 1914 we were able to show that we had made and shipped to Valcartier and to Salisbury Plains:— 692 handkerchiefs, 278 pair wristlets, 1 chest protector, 93 cholera bands, 35 helmets, 51 housewives, 104 shirts, 362 pairs socks, 32 pillows, 45 pillow slips, 44 scarfs, 1 pair blankets, 17 bed socks, 6 bed jackets, 28 night shirts, 7 towels, 9 wash cloths, 1,065 bandages.

In 1915 a new branch of work was undertaken, that of making Surgical Supplies for the wounded at the front, and Tuesday evening was practically given over to that particular work.

Under the direction and supervision of several trained nurses, members of our Society, surgical dressings were prepared for the Red Cross Society, and we have already shipped:—

1708 small pads, 696 large pads, 4,595 compresses, 29,008 sponges and 3,457 surgical kits, (each kit containing one large pad, one small pad, 2 compresses and 8 sponges), 1,932 roller bandages, 102 wash cloths, 13 pillow cases, 3 towels, 3 sheets, 12 bed rings, 66 bed pads, 24 pan covers, and a quantity of shaving paper, 832 pairs of socks, 234 shirts, 68 pairs of wristlets, 121 scarfs, 5 caps, 5 cholera bands. We have sent out 1,600 pairs socks.

We have, besides providing comforts and help to the soldiers, contributed towards the Belgian Relief Fund, Tobacco Fund, the Motor Ambulance, the Horse Motor Ambulance, the British Red Cross Association, to the Christmas Fund War Contingent, to the Annex to King George and Queen Mary Hostel for Canadian soldiers on leave, to the support of a war prisoner, also in addition to the amount sent by this Chapter to the Trafalgar Day Fund we raised an additional $12.00 and handed it over to the Walkerton Trafalgar Day Committee.

This branch of the I. O. D. E. also gave a supper to the Walkerton boys of the 34th Battalion, and sent four barrels of fruit and jam to the soldiers, Christmas gifts for the Walkerton boys in the trenches, and have opened a Club Room for the members of the 160th Battalion, at Walkerton.

We have obtained the money and materials for this work by means of various forms of entertainment, viz:— A Patriotic Concert, Carnival, Patriotic Picnic, Refreshment tent on the bowling green, and from donations from various sources and individuals. Also, from the Soldiers' Aid Tea Room, The Women's Institute, the Military Day Committee, the proceeds of a dance given by Mrs. Hepburn and Miss Rowland, and from a card party given by Mesdames Klein, Wisser, Martyn, Player, Hepburn, McNamara and McFarlane, and from a sock shower.

We have received willing and generous help in our work in the way of assistance and money from many people and from many different quarters, and though we have never yet lacked workers, we are always eager to welcome any new helpers in our room at the Town Hall on Friday afternoons at 2.30 o'clock, and Tuesday evening at 7.30.

Women and the War

"Your King and Country need you —now." All too frequently, have we been inclined to think that these words apply only to men, and, particularly, to men of military age. That Canada may be able to answer the call for 500,000 of her best and bravest, seems indeed to be the most pressing question of the moment. But, if the call is to be answered, and more than that, if our sons and brothers are not to fight, perhaps die, in vain, the words must come home with equal force to every woman, as well as to every man, in our land.

The women of Canada have not been slow to rise to the need and to "do their bit" as they have understood it. They have given of their substance, of their time and their energy. Never once have they grown weary of planning and working to raise funds to provide anything and everything, which would in any way, add to the comfort of those who are fighting our battles at the front.

Our zeal has, of course, at times, been a trifle mistaken. Strange inventions have been made even in the line of socks. Enterprising dealers have been able to "wheedle" our hard-earned money from us by labelling the most useless articles "for active service."

And yet, in spite of our mistakes, the war has awakened a new consciousness among the women of Canada. Women of every class are working together, sharing a common anxiety and a common hope.

One of the leading workers of the Speakers' Patriotic League, the other day made a remark which is, perhaps, the keynote of the whole situation. "The greatest need of Canada at the present crisis is that she may be able to enlist the minds of her women." What we have done so far has been good. The Red Cross work, in all its various branches is, in itself, excellent. Do not let us discount that side for a moment. But for a woman to stop short at that is a sin.

Unfortunately, the comparatively few societies, which, before the war, had as one of their aims, the study of national and international conditions have, with one or two exceptions, laid this aside owing to the press of other claims upon their interest. The challenge of the times, to women particularly is that we study the situation here in Canada. Women may or may not get the vote, that remains to be seen, but certainly, in the very near future, we are to have more to do in determining the conduct of affairs than we have had in the past. If we are not prepared to rise to the situation of the moment, or to deal with the problems which will confront us when the war is over, we are failing to live up to our whole opportunity or our whole duty. Our King and Country need us now.

First then, let us look at the immediate need. If 500,000 men are to be raised in Canada, women must fill some of the positions which have formerly been occupied by men. So far, the employers are, quite naturally, unwilling to take untrained women to fill the places of trained men. But, if the war goes on, they will have to come to it. And surely, we as women, will do our best to see that the country suffers as little as possible from the experiment.

To cope, in part, with the situation there has been organized what is known as a Women's Emergency Corps. Their main object, at present, is to register all women who will be willing to do men's work, i.e., office work, industrial or agricultural work, or who are willing to train for such employment, so that, when the demand comes for women, they will be able to meet it. The corps is looking also for women who will go through the country speaking about the necessity of women being ready to do men's work and to meet this emergency.

Clearly defined as are the aim and policy of the Corps, it nevertheless has many obstacles in its path. To get down to hard facts, we, none of us, as yet, have fully realized the situation. Women are still hindering recruiting although this is now perhaps the exception rather than the rule. Then too, how very hard it is for most of us to regard all labor as honorable. There are some things which we might not object to doing but few of us are yet willing to do literally "whatever we can do" or go "wherever our country needs us most." It is no longer a time to wonder whether certain forms of work are "ladylike". Imagine a French or a Belgian woman stopping to consider such a question. And, although the war is not actually devastating our country perhaps because of that very fact our need is all the more urgent. We still have the opportunity before us. Are we going to live up to it?

We must be willing conscientiously to study the problems which will inevitably confront us at the close of the war. Today is the hour of opportunity. If we do not lay hold upon it when the time comes undoubtedly we will be "found wanting." Canada will fail to be the nation which she might have been had we been willing and ready. Unquestionably then Our Country, Canada, needs each of us now.

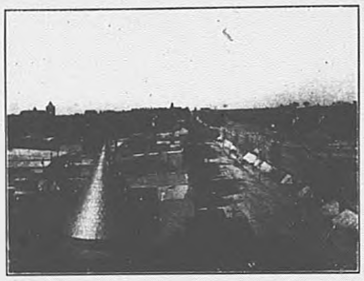
Chesley



A visit to Bruce County without a visit to the beautiful Town of Chesley would be as futile as going to France without visiting Paris.

CHESLEY'S charms lie along such a variety of lines that one, in a brief article, can only state them, and hope that a recital of them will prompt the reader to visit this important centre in Bruce Co.

CHESLEY'S beauty and cleanliness are spoken of by every visitor to our town.

CHESLEY'S waterworks and water supply are of the finest. The supply is drawn from artesian wells 600 ft. deep and is pure spring water.

CHESLEY is surrounded by as fine a tract of farm land as is to be found in this fair county, and her farmers are amongst Ontario's best.

CHESLEY possesses a wealth of manufacturing industries that spells out for her abundant prosperity for future days.

CHESLEY'S seven churches are the pride of her people and tend to her social, moral and religious welfare.

CHESLEY'S High and Public Schools are second to none in the Province, and are a mighty factor in the community life as well as to the great district lying about them.

CHESLEY'S homes are the pride of their owners and our citizens, and the admiration of every visitor to Chesley.

CHESLEY'S stores are a credit to the town, and the stocks carried, and the services rendered, tend to make Chesley the centre for a larger district of outlying country than would naturally fall to Chesley's share.

CHESLEY will be the first town in Bruce to be served by the Hydro Electric Power Commission and the plant being installed will be one of the most up-to-date in the province for a town of this size.

CHESLEY will be a junction point on the new Hydro Radial Railway System when completed.

CHESLEY is not altogether materialistic as her sacrifices in the present world struggle would show.

CHESLEY is represented at the front and in training by 200 men in khaki.

CHESLEY gave to Patriotic purposes last year, $3,000.00.

CHESLEY gave to the British Red Cross Society, $1,100.00.

CHESLEY gave to Equipment Fund for the 160th Battalion, in one day's canvass, $2,500.00.

And our message to the boys of the 160th Bruce Battalion is "If there is anything you lack, Chesley's here to do her 'Bit.'"

WOMEN'S INSTITUTE

Wherever a Women's Institute is established every woman in the community, irrespective of creed, age, social status or place, can belong. Thus they are notable socializers. Combining so many varied elements, from so many classes of life, all bent upon one thing—improvement, makes for the broadest form of club life and is working a marked revolution in the condition of Canadian women, homes and communities.

"For Home and Country" was a most happily chosen motto for the Women's Institutes; it covers a wide field and was never more apropos than today. The amounts credited to the various branches of the Red Cross Society, Hospital Ship Fund, Belgian Relief, etc., go to show that since the war the latter part of their motto has not been an empty one. They have not withheld their sons, money, food nor comforts in this tremendous struggle to have right and not might prevail. The cash contributions by the Women's Institutes of Ontario to the various patriotic funds amount to about $50,000.00, besides thousands of bundles.

Walkerton Branch

The membership of this branch is about equally divided between town and country. They meet monthly on the first Thursday of the month at the homes of the different members, in the country in the summer and in town during the winter months. Previous to the war—which seems to lie a long way behind us—afternoon tea was served, but at the last yearly meeting it was decided to dispense with that but to continue taking up a collection at each meeting for Red Cross work. At the beginning of the war this institute contributed $134.40 to the Red Cross Society. In October of last year they presented a Field Kitchen and equipment to the 71st Battalion at a cost of $509.00. They have since spent about $145.00 for yarn and flannel which is being made into socks and shirts for our men at the Front. They also gave $53.00 to the Walkerton Chapter of the I.O.D.E., to be used for Red Cross work and have a balance on hand of $83.19. Aside from $50.00 donated by the Military Day Celebration Committee, the proceeds of a Pumpkin Pie Social and a tea given by Mrs. Julius Holm, the money for these purposes was raised by personal canvass in the surrounding country and among the members, and they hope by further canvassing to realize the $1000.00 aimed at.

The officers are:— President, Miss B. K. Rowand; 1st Vice President, Miss E. Sheffield; 2nd Vice-Pres., Miss S. Roether; Sec.-Treas., Miss E. Wahn; Directors, Mesdames Latchford, Wm. Morgan, Sillers, Moore and McConnell and Miss J. A. Rowand.

WHAT ONE WOMAN HAS DONE

It is not often that one individual has the courage, perseverance and unlimited energy to undertake unassisted a work that a whole Society might feel proud of having accomplished. We refer to the "Work for Soldiers" which has been organized and carried on by Mrs. M. J. Ramsey, of Walkerton.

Sixteen months ago Mrs. Ramsey received a letter from Toronto asking if knitters could be found in this locality to knit socks for soldiers. Wool would be furnished if only the work could be done. This was the starting point, and at once the work was begun of searching for willing fingers to knit for our boys in the trenches.

The Daughters of the Empire had formed a Chapter and many of its members were already doing their bit in this line, so Mrs. Ramsey started on a work of her own to find those who had not begun to knit and she was not content with only Walkerton knitters but included in her asking those from Brant, Eden Grove, Chepstow, Greenock, Riversdale and Pinkerton.

The result of this campaign was the making of 1,216 pairs of socks besides 75 pairs that were given to soldiers who enlisted in Walkerton. A request for hospital sheets and for night shirts was made for the University Base Hospital. Mrs. Ramsey communicated, verbally and by telephone with a number of ladies and in response received 200 sheets and 45 night shirts.

We cannot help recognizing the good work accomplished by Mrs. Ramsey, and we congratulate her on her success.

At the time when the Belgian Relief Fund was uppermost in the minds of us all, Mrs. Ramsey again proved herself heart and soul in the work, and the supply brought in for that purpose from all parts of the surrounding country was amazing. She has not been discouraged when she has met with rebuffs, but has proved herself an indefatigable patriotic worker, and has been the means of stirring up to active service very many who might not have interested themselves in it. We are glad to give the public this knowledge of a good work which has been accomplished in our midst.

Lost, Strayed or Stolen from the I. O. D. E. Soldiers' Club Room one perfectly good brown piano cover. Would the person who mistook it for a blanket kindly return to the premises before further investigation.

How the Mothers & Sisters Can Help

The Household Editor Furnishes on This Page
Some Useful Hints as to How the Women of Bruce
Can Make Life More Pleasant for the Boys.

PARCELS FOR THE BOYS

Postage on parcels to England 12 cents per pound, limit 11 pounds. Parcels for B. E. F. in France and Flanders, up to 3 pounds 24 cents, limit of 7 pounds, 32 cents.

The following methods of packing are recommended:

1. String double cardboard boxes, preferable those made of corrugated card board.
2. String wooden boxes.
3. Several folds of stout packing paper and additional security is afforded by an outer covering of strong cotton, linen or canvas, securely sewn up. The address of the parcel should be clearly written in ink in at least two places. Name and address of sender must also be written on the outside. The post office supply you with little slips which can be filled in.

In sending parcels to the soldiers don't forget that they like something ridiculous once in a while. A toy that winds up and costs only a few cents will give a whole company a good laugh at a time when they are feeling rather blue. Games, too, are especially acceptable to the prisoners of war.

✠ ✠ ✠

PACKING CANDY FOR LONG DISTANCE.

Take candy on spool boxes; line with oiled or butter paper and pour maple cream or fudge into boxes. In this way it can be packed better and doesn't crush.

✠ ✠ ✠

APPLE SAUCE CAKE

One-half cup butter, 1 cup white sugar, 1½ cups unsweetened apple sauce with 2 teaspoons baking soda beaten in it, 1 cup seeded raisins, 2 cups flour, 1 teaspoon salt, 1 teaspoon cinnamon, ¼ teaspoon grated nutmeg, ½ teaspoon cloves. Mix in order given. Bake from ¾ to 1 hour in moderate oven.

✠ ✠ ✠

RAISIN and PEEL CAKE.

Three eggs, 1 cup white sugar, 1 heaping cup butter, 1 pound seeded raisins, ½ pound mixed peel, 1 teaspoon baking powder, ½ cup milk, 2½ cups flour. Bake in moderate oven about 1 hour.

✠ ✠ ✠

SEAFOAM CANDY.

Two cups brown sugar, ½ cup water, ⅛ teaspoon salt. Boil 'till it threads. Have well beaten white of 1 egg; pour on the syrup holding the dish high.. Beat quickly. Flavor with vanilla and drop on buttered paper.

✠ ✠ ✠

ECONOMY IN HOUSEKEEPING

It is surprising how much the purchasing value of an allowance depends on knowing how to buy. The "canny" may supply a table for four with the same sum another would use for two and yet feed them equally well.

It all turns upon experience and prudence in shopping. The economical housekeeper keeps her eye open for special sales. She knows the right cuts to buy and the right seasons to buy in. By comparing the method of different dealers she learns the reliable places where the prices are the first to drop, and those where the drop is latest. In putting up her own preserves she chooses that moment at the height of the season, when the fruit is cheapest and best. She finds out what articles are most wisely bought in bulk instead of in packages. Those whose incomes relieve them from smaller economies still have ample scope in other directions for learning how to buy. Wealth does not justify unwisdom in the use of money. Rather it puts a larger responsibility upon the possessor to spend it in the channels where it will produce best results.

✠ ✠ ✠

RECIPES.

Try some of these and send them to the boys in Khaki.

DOUBLE FUDGE.

Two cups granulated sugar, 2 squares of Baker's chocolate, ½ a cup of cream, 1 table spoon butter. Boil seven minutes, then beat and spread in buttered tins to cool. Two cups brown sugar, ½ cup of cream, 1 teaspoon vanilla, 1 cup of nuts chopped fine. Butter size of a walnut. Boil ten minutes; then beat and pour on top of fudge.

MAPLE SYRUP CREAM.

Take any quantity of maple syrup and boil until it forms a soft ball. Then beat until creamy and pour into buttered pan. This is a good way to send maple syrup to our soldier boys as it has all the maple flavor.

SHORT BREAD.

Four cups sifted flour, 1 cup brown sugar. Rub into above 1 pound butter 'till well mixed. Turn onto board and knead into soft dough. Roll out about half inch thick, cut in squares and pinch around edge. Bake in moderate oven.

COOKIES.

Two eggs, 1 cup of butter, 1 cup of sugar, ½ teaspoon soda, and flour enough to make a dough; roll thin, sprinkle with sugar and bake quickly.

SOLDIER'S CAKE.

Put 1 cup of walnuts and 3 cups of seeded raisins through chopper, form into little cakes and wrap in oiled paper, or use 1 cup of almonds and three cups of dates, in the same way. These are good to send the soldiers as they are not only palatable but have a good food value.

BRUCE COUNTY HOSPITAL, WALKERTON

We would like to place before the readers of "The Telescope" a few facts about the Bruce County General Hospital, which occupies such a prominent site on the road to the Grand Trunk Railway station. It is so familiar to us that words are not needed to describe its appearance. It seems as if it stood there offering help and rest to all sick and suffering ones. If the patient has means to pay, it is well, but if not there is just the same kindly welcome and as good care and treatment for the needy. Its doors are never shut against sick and suffering ones. Having had the privileges of this excellent institution in our midst for some thirteen years, we would regret to see it, because of financial causes, curtail its work, or fail to come up to the standard established when it was built in 1903 at a cost of $18,645. Additions and improvements have been made to the buildings and equipment from time to time, but perhaps this year has brought about more changes than have been effected since the additional wing was erected about eight years ago. Among these additions was that of a very fine sterilizing apparatus at an expense of about $1,200. The installing of this has filled a long-felt want. Other improvements in the way of renovating and painting, etc., have involved an expenditure of hundreds of dollars.

The Hospital is fortunate in having a most efficient Staff, and many compliments have been paid in regard to the good management as well as the attention paid to patients.

There are many non-pay patients all the time in the Hospital, the care of whom adds to the cost of maintenance something approaching $3,000 yearly, and, because of this, subscriptions from the public are requested. The Board of Hospital Trustees have a constant problem before them how to raise money to provide for all the needs of maintenance. To assist them the ladies of Walkerton, aided to some extent by ladies in other parts of the County, have struggled hard from year to year to make up for lack of revenue, holding Rummage Sales, gathering up old magazines and newspapers and selling them for cash; publishing and selling a Cook Book. We have, they say, done almost everything but ask the public for money. We are, perhaps, apt to overlook the needs of this excellent institution in these days when there are so many calls for help. Therefore we take this opportunity of reminding our readers of the Bruce County Hospital.

SOLDIERS' AID SOCIETY WALKERTON

That the war and the imperative needs of our men at the front has been instrumental in awakening and developing talents and initiative action, is perhaps nowhere displayed to better advantage, than in the work accomplished by the Soldiers' Aid Society, which was organized by the young ladies of our town, to supplement and assist older societies engaged in war work.

They have shown marked capacity in organizing ability, developing schemes for making money, and successfully achieving results with the least possible expense.

For two winters they have carried on a tea room, where they have served tea every Wednesday afternoon and evening and sold home made baking. For this purpose the town and country were divided into sections and canvassed for supplies each week, thus giving every person an opportunity to assist them.

There has been a liberal response from the public. The room was given rent free, and through the generosity of friends, water, lights, wood, stoves, tables, chairs, were all supplied.

Excellent service is given by the officers and committee in charge and every attention paid to detail.

The tea room has been very popular, many ladies have had tea there, and even men have entertained county councillors, fraternal [illegible] and soldiers at this up-to-date place.

The tea room funds are equally divided between the Red Cross Society and the I. O. D. E. The funds outside of tea room work were raised in various ways, by donations, tag days, patriotic dances, flower show and a Trip to the Allies.

The total net receipts from every source, since organization to 31st of March this year, are $1613.95.

The Red Cross Society and I. O. D. E. have each been given $334.50. A field kitchen, with butchers outfit was presented to the 71st battalion, C. E. F. at a cost of $508.60. To military hospital cots $50. To Blue Cross Society $10. To Mrs. Ramsey's sock fund $5, and to Xmas gifts for soldiers $30.51.

Not many other older societies can present so creditable a showing. Too much praise cannot be given the officers and committee who have so generously given of their time and labor, in this most necessary work of making money to provide comforts for the men and boys who are giving their all for our country.

The tea room officers are: Miss Rowland, pres.; Miss Oberle, vice-pres.; Miss Robertson, sec.; Miss Clark, treas.; committee—Misses White, Truax, Goetz, Fairservice, Weltlaufer, Greig, Vogt, Eckel, Benton, McFarlane, Schwindt.

PRACTICAL PATRIOTISM FOR WOMEN

Even in normal times women must do some of the work of men. In this war, probably twenty million men will be put out of action, many killed, many crippled. It is a large order for women to fill the place of these, the world's finest young men. Women in Europe are doing men's work now.

Most of us read all the war news we can and we know that women in Europe are now managing businesses, running hotels, delivering mail, acting as train and tram conductors, as chauffeurs, policemen, bank clerks and farmers; doing almost every kind of work.

In Canada the taking of men's places by women, has only begun. A few munition factories are employing them, banks are advertising for women clerks, stenographers are branching out into superior positions. Women as well as men workers are scarce.

Single men and the first division of married men have been called out in England in accordance with the Derby plan. It might be necessary to extend this plan to Canada. Even if this is not done, if Canada is to keep up her financial standing, five hundred thousand women will have to do the work of the five hundred thousand men who are to fight under the present plan.

Where are those five hundred thousand women to come from? Most of them have homes where they have been living in comparative leisure. Music and other arts should take second place when our country is in peril. In the meantime every woman should feel the call to work just as strongly as the man should feel the call to fight.

The women who are bringing up a family are doing their patriotic duty but the women who are needed to run our homes should do with fewer servants, that these servants may serve the country by doing work more necessary to our country's preservation. How do these women feel when men are offering themselves and their lives, under the thrill of patriotism? Do they realize they are slackers, too?. It is time, women of Canada, to wake up. The problem that Canada has to face is the sowing and harvesting of grain, our country's chief source of wealth. The men have gone, are going. Who is going to do this work?

Every Canadian woman should aim to produce or help to produce something that will add to the wealth of our country. If she fails in this duty she will have cause for shame and regret.

WE HAVE YET TO FIND ONE WOMAN WHO HAS MADE ANY GRAFT OUT OF WAR WORK.

WELCOME SOCKS

Socks, socks, socks, is the continuous cry from the Red Cross Society, and the men in training and actually at the front. The Red Cross appeals to all knitters who can knit socks, to devote all their knitting time to them, rather than spend it on the simpler work such as scarves or wristlets; and almost every letter from the front mentions the joy of receiving dry clean socks from home. A young "non-com" in a Canadian battalion writes from Belgium. "The socks arrived most opportunely, just as we were leaving for the fire trenches. I had four pairs wet at one time, so their usefulness is manifest."

SOCKS WITH COTTON LEGS

Owing to the increasing shortage of wool, the Canadian Red Cross has at last given official sanction to the use of cotton warp in knitting the legs of socks. Samples have been prepared and tested. Socks made according to the new instructions have been worn by men on the march, have been washed, and have proved eminently satisfactory. Those who knit these new socks are strongly urged to adhere carefully to the following instructions, and not to substitute other kinds of cotton, or other sizes of needles and yarn. The cotton warp required may be obtained from the supply department of the Canadian Red Cross, at 77 King street, east, Toronto.

Official instructions for knitting socks in mixed cotton warp and woollen yarn:—

Materials required—No. 13 needle, 4-ply Scotch fingering (grey), about four ounces. Four-eighths grey cotton warp, 3-ply.

Cast on 64 stitches. Rib for one inch (two and two if possible).

Break off cotton and knit with woollen yarn for 1½ inches. This is to make the "cuff" elastic.

Join the cotton again and rib for 1½ inches.

Knit the cotton warp plain for 4½ inches.

Break off the cotton and start knitting plain again with wool, and continue for 3½ inches, which will finish the leg.

Finish the ankle and foot in wool in the usual manner, as indicated on pp. 14-16, of "War Work," the official Red Cross book of instructions.

Note—One cone of cotton warp will knit about eight sock legs, and costs 25 cents, carriage free.

Six cones of cotton warp and six pounds (one spindle) of wool should make about 24 pairs of socks.

TO KNIT SOCKS

Length of foot when finished 11 inches; 6½ skeins of 4-ply Scotch Fingering; 4 needles size 13 in. by Bell Gauge.

Cast on 64 stitches, rib 4¼ inches, 2 plain, 2 purl. Knit plain 7¾ inches (12 in all).

Heel—Knit plain 32 stitches on to one needle, turn, purl back these 32 stitches, turn, knit plain, repeat these two rows (always slipping the first stitch) 14 times (15 in all).

With the inside of the heel towards you, purl 18 stitches, purl 2 together, purl 1.

Turn, knit 6 stitches, slip 1, knit 1, pull slipped stitch over, knit 1, turn, pull 7 stitches, purl 2 together, purl 1.

Turn, knit 8 stitches, slip 1, knit 1, pull slipped stitch over, knit 1, turn, purl 7 stitches, purl 2 together, purl 1.

Turn, knit 10 stitches, slip 1, knit 1, pull slipped stitch over, knit 1 turn, purl 11 stitches, purl 2 together, purl 1.

Turn, knit 12 stitches, slip 1, knit 1, pull slipped stitch over, knit 1, turn, purl 13 stitches, purl 2 together, purl 1.

Turn, knit 14 stitches, slip 1, knit 1, pull slipped stitch over, knit 1, turn, purl 15 stitches, purl 2 together, purl 1.

Turn, knit 16 stitches, slip 1, knit 1, pull slipped stitch over, knit 1, turn, purl 17 stitches, purl 2 together.

Turn, knit 17 stitches, slip 1, knit 1, pull slipped stitch over.

Pick up and knit the 16 stitches down the side of the heel piece.

Knit the 32 stitches of the front needles (on to one needle). Pick up and knit the 16 stitches at the other side of the heel piece. Divide the heel stitches on to the 2 side needles, and knit right round again to the centre heel.

First needle: knit to within 3 stitches of the front end of side needle, knit 2 together, knit 1.

Front needle plain.

Third needle: knit 1, slip 1, knit 1, pull slipped stitch over, knit plain to end of needle.

This reducing to be done every other row until there are 62 stitches on the needles, front needles 32, side needles 15 each.

Knit plain until the foot from the back of the heel measures 9 inches.

To Decrease for Toe—Knit 7 stitches, then slip 1, knit 1, pull slipped stitch over, knit 7 stitches, slip 1, knit 1, pull slipped stitch over, repeat this round the 3 needles. Then knit 6 rows plain, then knit 5 stitches, slip 1, knit 1, pull slipped stich over and repeat round the 3 needles. Then 4 plain rows, then knit 3, slip 1, knit 1, pull slipped stitch over, repeat and 3 plain rows. Then knit 2, slip 1, knit 1, pull slipped stitch over, repeat to end of three needles, then 2 plain, then knit 1, slip 1, knit 1, pull slipped stitch over, repeat to end of three needles, then 1 plain row, then 1 row, decreasing twice on the front needles and once on each of the back needles. This will leave about 5 stitches on front needle and 4 on each of the back needles. Knit the back stitches on to one needle. Break off the wool, leaving about 12 inches. Thread this into a darning needle, put it through the 1st stitch on front needle as if for purling, but do not take the stitch off, then put the darning needle through the 1st stitch on the back needle as if for knitting and do not take off. X Then through the 1st stitch on front needle again knitting and slip off. Through the 2nd stitch on front needle purling and do not take off. Through the 1st stitch on back needle purling and take off. Repeat from X till all the stitches are worked off. N. B.—Each stitch must be gone through twice. Slip off when knitting on front needles, slip off when purling on back needles.

To make the heel very much stronger, knit in with wool No. 20 Dexter's white knitting cotton, price 5c per ball.

N. B.—1. Socks need have not a seam stitch.

2. Socks must not have a ridge under the heel nor at the end of the toe.

3. Do not knit coarse yarn on fine needles.

4. Never finish a toe by placing stitches on two needles and casting off from both needles together. Never do this under heel.

BATTALION NOTES

Interesting Items from the Various Divisional Units Throughout the Length and Breadth of Bruce.

LUCKNOW

On a recent date the Lucknow Detachment of the 160th Batt. made a route march to Whitechurch, where they were royally entertained by the citizens of Whitechurch and vicinity. As the boys neared Lucknow on their return Walter Wagtail Treleaven, the miller, noticed what he thought was a crack in the atmosphere. No such thing! With his civilian eyesight he was mistaken. With our military eyes we could see that it was our brother soldiers, Marshall Graham and Sergeant R. Y. Carrick the only real fat men in the detachment, who came in first having made six miles from Whitechurch in the record time of one hour and thirty minutes, beating to a standstill even Jim Baker's section of six foot jets.

Private Jack Hutchinson after roaming around the cold cruel world for 27 years has struck (Steele)at last.

Private Sidney Plowright being an expert horse-shoer thought of applying for a transfer to a Cavalry Rgt., but nix on that stuff, he'll stay with the 160th.

Private George Twamley has won a local reputation as the champion quick money maker of the Lucknow detachment. But beware son, someone may "cook" your goose.

Our burg was visited Saturday forenoon by her Military Doctor. Out of 63 soldiers examined all passed we believe. Little Davie Kennedy shook in his boots his chest measurement being but a trifle over 44 inches and his weight a trifle over 200 lbs.

Mrs. Kennedy of Whitechurch has one son with the 33rd. Battalion and three sons in the Lucknow detachment of the 160th Battalion.

SOUTHAMPTON

Southampton's first contingent of eleven boys left home in August 1914, and went overseas in the autumn of that year. So far as we know only two of these lads are in the fighting line, some have come home invalided, others are suffering from wounds, and three brave bonnie lads will return no more to their homes on Huron side, as they lie in heroes' graves in a foreign land. Since the formation of the 160th. Battalion thirty from town have enlisted, with nineteen from the surrounding country, making forty-nine in all.

It is also worthy of notice that all have volunteered, willingly little pressure in recruiting being used. Besides these mentioned a number from town have enlisted in other Battalions and are doing their bit wherever they may be, and are never forgetting that they are Bruce boys.

PAISLEY

A gallant young Private named Mills,
Was taken one evening with chills
His eyes became red
So he went to his bed
Till he'd find out the cause of his ills.

Then his food didn't seem to agree
But he felt as one would on the sea,
So the Doctor was brought
And he said Dick was caught
By the measles as sure as could be.

His condition grew steadily worse
So his friend volunteered for a nurse
And there's scarcely a doubt
But that Dick will be out
Ere the printer has published this verse.

Four soldiers of the King is quite a record for one home, the Dobson brothers, Ptes. John, Frank, Edmond and Robert are all with the 160th Batt. The Tooke family take second place, Corp. Harold Tooke is in France while Ptes. Burton and Earle Tooke are with the Paisley detachment of the 160th.

There are several inducements for Paisley young men to enlist. The citizens of the village, through the council, present each recruit with ten dollars ($10.00) the Women's Patriotic League provide each new soldier with socks and mending kit.

Allerane Lodge, No. 205 I. O. O. F., has presented each of its members who is wearing khaki with a military wrist watch. Amongst these fortunate members of the three link order are Bandsman Harry Jack, Ptes. Jas. Forrester, Bert Mawhinney and Ray Heppenstahl with the 160th.

A dashing young sergeant is "Dunk"
In danger he never will flunk,
He handles the cash
And has grown a moustache
Which shows that our "Dunk" has some spunk.

LION'S HEAD

When, three months ago, Lieutenant Ernest Pettigrew, was appointed recruiting officer at Lion's Head, many prophesied that he would be unable to get the required 25 which would entitle the squad to train at Lion's Head. Today the number is about 80 and "last post" has not yet been sounded. About 20 others have presented themselves, but have been rejected as medically unfit. Besides these, several young men of the Townships of Eastnor and Lindsay have enlisted at Wiarton and other places, making a total of nearly six per cent of the total population. If the whole of Bruce County had done as well as these two townships have done more than two battalions from Bruce would now be in khaki.

But not only in numbers are we well represented but in size and physique. Difficulty was experienced in fitting our boys at first because their shoulders were broader than those of the average recruits.

The spirit of self sacrifice that has been displayed by parents in this vicinity should not be regarded lightly. The call of patriotism has been usually one of greater agony to the parents than to the sons, nevertheless the mothers and fathers have risen sublimely to the occasion and in many cases have not withheld even their only begotten son.

The behavior of the boys has been exemplary, no quarrelling, nor drunkenness has manifested itself. We have seen the boys we know, come in, get into line, by degrees the bearing became more erect, more precision of manner and movement resulted; the khaki clothes arrived, and with the bearing of men who have attained a place of admitted usefulness and importance, they go forward, eager and determined to fulfill the traditional attributes of the true British soldier, to bear themselves as "heroes and gentlemen".

In less than a year if hostilities continue these young men will be overseas. The clay of some may mingle with that of the "Mother of Nations" or of sunny France, as their blood may drench the fields of the enemy. They have responded to the age-long call of Freedom, they have replied with a smile and a step forward to the conscription of their conscience, they stand to imitate the tragic drama of the God-Man "who died that we might live". No man can do more for friend or principal.

May God bless and save them all.

ONLOOKER.

KINCARDINE

The Kincardine boys enlisted in the 160th Battalion are from the town and surrounding country and are the best the community affords. They have left good positions, and prospects of education and advancement, not merely seeking adventure, but in the spirit of patriotism and because they realize the seriousness of the situation now facing the Empire.

Sitting—Sergt. F. B. James, Pte. J. Wallace, Pte. H. Woods, Pte. J. Hudson, Corp. Geo. Wanless, Corp. G. M. McCarter, Pte. J. H. Rennie, Sergt. G. W. Moore, Pte. Gordon Sewell, Pte. M. McNab, Pte. J. Scott, Pte. D. Henderson, Corp. H. McDougall.

GLAMIS

The village of Glamis is wonderfully well represented in the 160th. Bruce Battalion. Had all parts of the county responded to the call to don the khaki as Glamis and immediate vicinity did, two Battalions might be the result. The first to sign up was Clyde McKechnie and from that on the lads came quickly and willingly to do their bit towards putting down Tyrant and maintaining the cause of Liberty and Righteousness.

MILDMAY

The young ladies of Mildmay did a very creditable thing this week when they organized a knitting club to supply the local members of the 160th with socks. Nothing is more necessary for a soldier than good footwear.

The smartest looking man in uniform here is undoubtedly our popular dentist, Lt.-Dr. A. H. Zinn. He expects to close his office here at the end of April and go into training.

It is rumured that the local recruits will shortly be transferred to Walkerton. Mildmay will be genuinely sorry to lose its soldier boys.

It takes more than the ringing of bells and blowing of whistles to awaken the young men of this locality to a sense of their duty. The next measure will no doubt be conscription, and there will be consternation in many of the local camps then.

Private George Helwig is the hardest-worked man in the local squad. He has arranged the billeting for all the recruits and recruiting officers, and has been untiring in his efforts to make smooth sailing for the soldier lads.

Private Norman Kaufman was presented with a handsome wrist watch, and a complimentary address, by his friends and former school mates at the big recruiting meeting here on April 7th. The other fellows will receive their's from the County Council—perhaps.

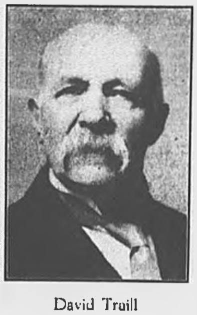
All the members of the local squad are more or less popular with the fair sex, but for genuine gallantry to the ladies the palm must be handed to Private August Heimbecker. He is a second Lochinvar.

Lieut. Bland, of Kincardine, is a most effective recruiting officer. He presents his case in a calm and logical manner and like Mark Tapley "Comes Out Strong" in the face of the most discouraging prospects. The fifteen local men were secured by him, directly or indirectly, which is a mighty creditable showing for this vicinity.

Pte. "Tony" Schultheis is a magnificent type of soldier and we question whether there is a better all round man in the Bruce Battalion. Leave it to Tony and he will find a place among the officers before long.

The local squad are indebted to the Mildmay Red Cross Society for their donation to assist in equipping their recruiting office. The Red Cross ladies are loyal to the local recruits.

The selection by the Commanding Officers of Drill Sergeant Jos. Reichenbach, of Walkerton, to take charge of the local squad meets with universal approval. He is a hard worker and possesses the proper amount of patience and courtesy, and the boys are delighted with him.



David Traill

PRES. OF THE HOSPITAL TRUST

Hepworth

The platoon which has been recruited at Hepworth is second to none in the Battalion. They are certainly a fine body of men, both morally and physically. These men were drawn from all sources—machinists and finishers from the furniture factory, brick layers, who are giving up their profitable business to serve the Empire, bank clerks, school teachers, farmers' sons who have left their fathers to get along as best they can with the farm laborers, in fact all classes that go to make up a community. And when you consider the small area that Lieut. Hall had for recruiting ground, it is indeed surprising that he has succeeded in enlisting so many. Too much credit cannot be given to Lieut. Hall for the manner in which he has conducted his recruiting campaign. He is a quiet, unassuming man, but always on the job, and everything that he does counts, and he was fortunate in securing the assistance of some good efficient men at the beginning of his campaign. It is hard to select any particular names from among so many good men, but Sergt. John Holmes, an old soldier honorably discharged from the Imperial Army, and Corp. Murray McPhatter, an ex-member of the N. W. M. police, both gave him valuable assistance in his work of recruiting and drilling the men at Hepworth.

We need only mention the fact that the territory he had to cover is about five miles square, that he has forty-four splendid fellows in training, besides nine others who enlisted but could not pass the medical examinations, to show how thoroughly the ground at Hepworth and vicinity has been worked and the ready response of the loyal men of Hepworth.

DR. VEITCH, MEDICAL OFFICER

Dr. Veitch, the M. O. of the 160th Battalion, claims Port Elgin as his birthplace. Born in the year 1889, he received his early education in that town. For many years his father had carried on a successful medical practice and the Doctor decided on medicine as his life work. In the year 1911 he graduated from Toronto University with the degree of M. B. and after spending some time practising in a Toronto Hospital and the Northern part of the Province, the Doctor finally settled in his home town and soon made a reputation for himself as one of the most successful men in the profession in Bruce county.

Immediately on the organization of the 160th Battalion, in Dec., 1915, Dr. Veitch was appointed Medical Officer, in which capacity he has worked very zealously. As a result of his efforts all those recruits who gave no promise of being able to withstand the rigors and hardships of a soldier's life were rejected, and owing to his careful scrutiny of every man the physical standard of the 160th has been maintained at a high level.

THE TOWN OF KINCARDINE

In this brief article justice cannot be done to the Town of Kincardine. Its first settlers landed in 1848, and for many years the place was known as Penetangore. Early in its history it was the chief trading centre for the people who had settled in Queen's bush. It has ever been one of the leading industrial centres of the county. Its manufactories have run continuously when depression caused others to close down. During the beginning of the war this was fully exemplified. With a faith in the future our factories kept running steadily and men were given employment. The reason, perhaps, for this is the fact that everything produced is of a high grade and superior quality. The firms which have contributed to this excellence are The Andrew Malcolm Furniture Co., Limited, and when you speak of Malcolm furniture, you have said the last word in artistic design and workmanship. James Malcolm has taken his late esteemed father's place at the head of this institution. The F. E. Coombe Furniture Co., Limited, makes chairs and Chesterfields that find a market in the best of homes, with a growing demand for their high-grade goods. Mr. F. E. Coombe is at the head of this institution, ably assisted by H. R. Magwood. The Hunter Bridge and Boiler Co., Limited, are known throughout Canada for their bridges, standpipes and marine boilers. From a small concern they have grown until they rank with the leaders in their line in Canada. Robert Hunter is the president, but the business is carried on largely by his son, Wm. Hunter, Kincardine's popular reeve. They have added a new industry and besides the above are now making shells for the British government. Henry Coleman is a name that brings pleasant recollections to all. His breakfast bacon is such that he cannot supply the demand. In fact Coleman cannot keep up with orders for any of his meats. He has a method peculiarly his own that makes them more toothsome than others. Steady work the year round is the order in this factory. Wood Bros. factory turn out fine wagons and buggies and is one of the old established industries of the town, presided over by Ben and Geo. Wood.

The Ontario People's Salt and Soda Co., managed by John R. McKay, is another of our staid industries which never closes down. It was managed by the late John Tolmie. The Circle Bar Knitting Co., Limited, has a reputation for turning out the best ladies' hosiery made in Canada. Wm. Mitchell is the energetic head of this concern and has pep and go in him which spells success.

The town is looked after in a monetary way by the Merchants Bank and the Royal Bank, both of which do an exceedingly large business. Telegraph, express and telephone have long been established. In the latter, beside the Bell Co., there is the Bruce System with over 1,000 subscribers all of whom can talk free to Kincardine. Our dock is good and a big breakwater for a new dock has been begun, which gives future hope for a fine harbor. Our public buildings are of the best post office, library, town hall, high school and public schools. Added to these are several fine parks, beautifully kept, which makes the town ideal for residential purposes. A large summer tourist trade is done here and along the beautiful beach are dotted many pretty summer cottages. The residential section of the town is beautifully kept and our homes are the admiration and envy of visitors. But space is limited and the story of the best town in Bruce will have to be drawn to a close. If you doubt all our claims you are invited to pay us a visit. However, if you are happy and contented where you are don't come, for once you have seen our town you will have one everlasting regret and that is that you are not one of the happy family, who get their religious teachings from Presbyterian, Methodist, Anglican and Baptist churches, which make us live at peace and with good will towards all the world.

A word as to what the town has done in recruiting for the 160th Bruce Battalion. The splendid record stands at 130 men from the finest families in our district. When they go to your town to mobilize you will recognize them by their splendid physique and gentlemanly conduct which has been characteristic of them here.

BLUE CROSS WORK

The Humane Society, of Kingston, received an urgent appeal from Lieut.-Col. A. E. Ross, for a Motor Horse Ambulance, for the use of the Ontario Brigade in removing wounded horses from the battle line to the Stationary Veterinary Hospital. Col. Ross was in command of No. 1 Field Ambulance Corps, at the front, where he did heroic and almost superhuman work for several months. He stated the Horse Motor Ambulance was a most crying need and this need was increasing every day. The difficulty and suffering entailed upon horses and men, in an effort to remove the suffering animals to where they could be cared for, was incalculable and many fine horses had to be shot where they fell, on account of not being able to remove them to where they could be cared for and cured.

An appeal was made to all branches of the Humane Society to help in this great work as so many of our men have to depend on these faithful animals to help them carry out their part in this great war.

The Walkerton branch of the Society, with the aid of the I. O. D. E. and Soldiers' Aid, were able to send fifty dollars, to help towards sending an ambulance, which was gratefully received by the Blue Cross Society.

The Walkerton Society expect to come before the public early in May and hope there will be a liberal response to help save many of these valuable animals.

To Mrs. Havill, the energetic President of the Humane Society, in Walkerton, is due unstinted praise for her untiring efforts to relieve all dumb animals.

REAL ESTATE AND INSURANCE

Walkerton - Ontario.

Where you will get Courteous Treatment, Prompt Returns and a Square Deal.

IF YOU want an agent to rent your house, don't leave the key with him, that would simplify the matter too much, as he would not earn his salary. Require him to climb the corner of the house and look in at the windows to see if the house suits.

Should you want him to sell a piece of property, don't give him your best figures and terms. This will enable you to undersell the agent and save the commission, and you can get the benefit of the advertising he has done. The agent does not care for that, he can live on knot holes.

IF THERE is a flaw in your title be careful not to tell the agent about it. He'll find it out when he attempts to close a sale. This will delay or spoil the sale and enable you to hold the property longer. This also has a tendency to stir up the agent and make him earn his commission.

VISIT your agent every day and urge him to make a special effort to sell your property. He will probably advertise your property then as a special bargain and create a demand for it. Then when he brings you a buyer tell him there is so much demand for the place that you have concluded not to sell at the agreed price. He will likely make you pay the commission, but the warmth of feeling which will be engendered between yourself and the agent and the increased respect he will have for you as a business man will probably be worth more than it costs you.

ONE of the finest schemes in the world is to list your property with all the agents in town. Then none of them will make any effort to sell it and you will have all the field yourself. You may not make a sale, but you will save the commission.

FIND out, if you can, whom the agent is trying to sell your property to, and go to the party and offer to throw off the agent's commission. You can save enough in this way to buy a new suit. It may be a LAW suit, but it will wear well.

WHEN your farm is ten miles from town, one-half subject to overflow and the other half a good foundation for toboggan slides, list it as first-class bottom land. The agent will find out what it is when he brings out a customer. Of course he will not make a sale, but he needs fresh air and the horses need exercise. If he has been in the real estate business very long, he will not get mad at a trifling thing like this.

SHOULD you have nothing to sell and no more money than a rabbit to buy with, tell the agent you want a good farm and a nice town residence. After enjoying a half dozen free rides, tell him you "don't want to buy now" but "will think about it." This helps the agent to cultivate a spirit of patience and humility and prevents him from becoming puffed up and arrogant.

Patriotic Work in the Schools of Bruce County

WALKERTON HIGH SCHOOL

The girls of the Walkerton High School, under the able supervision of the lady teachers (who have shown themselves untiring in this work) met once each week from New Year's until Easter last year and did great things in the way of knitting, making numbers of face cloths, socks and wristlets. The boys furnished the money for the material used by taking up a collection.

This year the girls were again formed into a knitting class, by Miss Cummer, and spend one hour a week after school in knitting socks. They expect to have about two dozen pairs finished by May 1st. Some very interesting scrap books were also made, and sent to some of the ex-pupils who are at the Front.

A lecture was given under the auspices of the W. H. S.—by a brilliant ex-pupil, Dr. John McNeil—which was a great success and netted a considerable sum for the Patriotic Fund. The boys and girls sold tickets for this, and for another lecture in aid of Red Cross, and the Cadets acted as ushers. We must not forget that on several occasions the H. S. Cadets acted as a guard of honor to the soldiers, and some of our Cadets are now wearing the King's uniform.

✣

CHESLEY HIGH SCHOOL

The Chesley H. S. Cadets have acted on several occasions as a guard of honor to the soldiers on their departure or return. They have assisted at Patriotic, Red Cross and Military Mass, meetings and on Trafalgar Day.

The Chesley H. S. girls had a booth when they helped swell the funds, by the sale of home-made candy on Trafalgar Day.

The Athletic Association, instead of receiving the usual prizes, gave the proceeds of their annual field day to the Patriotic League.

Twelve of the Chesley H. S. students, who were in 1914 attending classes have volunteered—and ten of them have been accepted and are wearing the universally becoming khaki. The teachers of East Bruce are doing their bit by teaching patriotism in every possible way—by means of songs, talks and stories.

They have also helped in a very practical manner by voting $50 to the Belgian Relief Fund, $50 to the Red Cross Society in 1914 from their Fund, and, while in convention in 1915, each teacher gave one day's pay for patriotic purposes. It amounted to $275.00 and has been apportioned as follows:— Motor Ambulance Fund $100, to the annex to the King George and Queen Mary Hostel, $175.

✣

KINCARDINE HIGH SCHOOL

The Kincardine High School raised by donations $160 for the British Red Cross, and $40 to buy signet rings for eight boys who left the school to enlist. The girls helped the local Red Cross Society.

✣ ✣ ✣

PATRIOTIC WORK IN THE PUBLIC SCHOOLS

The public schools of Bruce county, with a very few striking exceptions (in a certain township which is well known) are showing their patriotism and loyalty in a very tangible way.

To the children this has meant no little sacrifice of both pennies and playtime, to many it has meant a great amount of extra work. Some of the children had war plots of potatoes (the seed being supplied by the Ontario government) which were carefully tended, and, when sold, amounted to the goodly sum of $165, which was sent by Mr. MacKay, of the Agricultural Dept., to the Ontario government and by it used (along with the money raised by the children of forty other counties in Ontario, with their several war plots amounting in all to $1700) to purchase a field ambulance. **We see that the Bruce County pupils headed the other counties of Ontario in this—as did the "Boys of Bruce County Battalion" in enlisting in record time.**

Some of the older pupils knitted socks, wristlets and wash cloths—the boys in some cases vying with the girls in "doing their bit."

Since the war started a number of Bruce county children have learned to knit—and as every little helps they have something tangible to show besides the individual satisfaction of knowing they have added to the comfort of some of our soldier boys.

In some of the schools concerts were given. This meant a lot of time for practise by both teachers and pupils and quite a sum was raised in this way. A number of Box Socials were held this winter and the proceeds given to either the Patriotic Fund or the Red Cross Society.

In some of the school sections Red Cross Societies were formed, and in this way the interest has spread and a great deal of much-needed work has been done.

In some schools the children gave free will offerings of pennies for the sock fund, Testaments and also chewing gum.

The High and Public Schools are arranging for the collection of old papers and magazines, the object being to secure funds for the Red Cross Society. The present campaign will be carried on through the month of May, and if successful, will be continued after the holidays, the proceeds to be devoted to some patriotic purpose. Parents are requested to encourage, as much as possible, the efforts of the children in this patriotic work.

The public school pupils, of Bruce county, are certainly getting well-grounded in loyalty to their Country and their King.

To show just about how much money was raised and to give some little idea of the different means used in raising it, we submit the following:—

Concerts and Box Socials	$1159.85
Contributions and free will offerings	202.61
Trafalgar and Tag Days	33.49
War Plots	165.00
Entertainments, R. S. F. F. and Garden Party	201.52
Belgian Relief	124.40
Total	$1886.87
Socks knitted by pupils	30 pairs
Wristlets (about)	72 pairs
Wash Cloths	105
Jam given by pupils	12 quarts
Red Cross mouth wipes	757
Quilts for Belgian Relief	8 quilts
—Made by girls, linings bought by boys.	
Scrap books made for soldiers	3
Clothes valued at	$12.85
—Sent to Belgians.	

Since the above figures were made up additional reports have been received, bringing the total amount raised up to $2191.42.

Two Rare Veterans

CORP. PILKINGTON and SERGT. HOLDSWORTH

One of the veterans of the Battalion is Corporal W. Pilkington, who was born in Lancashire, England, 35 years ago. He went with the East Lancashire Regiment to South Africa in 1900 where he took part in four engagements, receiving the King's and Queen's medals with 4 clasps. He came to Canada ten years ago and for the past six years has resided with his wife, also a native of Lancashire, in Kincardine. No doubt the gallant Corporal thought that his soldier days were over, but at the call of duty he donned the khaki once more.

Sergeant F. Holdsworth, 160th Bruce Batt., who is physical drill instructor at the N. C. O. School here, holds a Queen's medal for service in South Africa during the Boer War. He enlisted in the 17th Leicestershire Regt., the 24th Jan., 1898, and has served eight years regular service and four years reserve. He served two years in the 2nd Battalion, in Ireland; two years at Alexandria, Egypt, and was then drafted to South Africa where he joined the 1st Battalion on the Blockhouse line at Lewis Spruit, Transvaal, served in South Africa one year, then was transferred to India. There he was stationed for two years at Bellarey, which was used as a camp for Boer prisoners. After another year in India at Belgaum and Secunderabad, where he received a First-class Gymnasium Instructor's certificate, he returned to England, served four years on the Reserve force, after which he received his discharge.

Sergt. Holdsworth has a brother who served in the Loyal North Lancashire Regt., who lost an arm in the early part of the war.

NOTES FROM THE WAR ZONE

Lance-Corporal W. P. Hanley, writing from the front line of trenches, March 15th, manages, despite the thunder of heavy artillery, to send home a most interesting letter, telling of spring in the trenches and of his promotion. He writes in the cheerful strain in which we have become accustomed in the letters of our brave boys overseas, making light of dangers and difficulties and reporting that the boys are in the best of health and spirits.

Major Fraser, writing from "Somewhere in Flanders," comments upon the fact that "French houses seem to have been built to be as uncomfortable as possible, stone floors, little open-faced stoves which hold about a teacup of coal. We sometimes have a stove made of an empty biscuit tin. Did you ever know the usefulness of an empty biscuit tin? Its limitation depends only on the ingenuity of the owner. If I ever furnish a den, I shall get a few empty bacon boxes, a few biscuit boxes and some empty shells. That is absolutely all that is required. If the table made of a bacon box gets too much littered with candle ends, cigarette stubs, etc., why build another, that's all."

NOTE and COMMENT

One youthful observer on first seeing the Band explained "O, its not fair! They've hung the little drum on the big man and the big drum on the little man!"

✣ ✣ ✣

After parade on Sunday, April 9th, the companies drawn up on the Armoury grounds, were inspected at very close range by Mr. Bobby Taylor, the personal friend and devoted follower of the members of the Band.

✣ ✣ ✣

The men of the detachment are chiefly young farmers, though there are also teachers and young men from the village of Lucknow. The medical inspector commented favorably upon the fine physique of the Lucknow detachment.

✣ ✣ ✣

A little girl on going home from church one day asked why the officers always sat at the back of the church. Her mother said the explanation was that they were Scotch and wanted to hold on to their collection as long as possible.

✣ ✣ ✣

Sergeant Major Robert Carrick, in charge of the Lucknow recruiting office, which has added 63 men to the strength of the Bruce Battalion, began his military training in Scotland when a mere lad, and since coming to Canada has been a member of the 24th militia regiment. He is well versed in military drill, and holds a captain's certificate.

✣ ✣ ✣

We quote the chorus of a recruiting song by Mr. David C. Leitch, of Chesley:—

"Fight for your country, peace to our land.
Down with the despots! For freedom we'll stand.
Send out your money; send out your men.
God will bring Britain victory again."

✣ ✣ ✣

The men who make melody in the Clubroom singing "Keep the Home Fires Burning," may be interested to know that the music was written by Ivor Novello, aged 22, whose chief ambition as a boy was to hear his music played by a street organ. This popular song has been arranged for the organ and records have been made of it. It is published in six languages and sung in every allied camp in the war zone. We are informed that it is the favorite song of the brave boys of the 160th.

✣ ✣ ✣

In anticipation of some such record of the bravery of the 160th coming back from the front, the following is given:—The Small Kidd would not take Adair so he walks thro' the woods around a marsh to Battle with a Jergusn near the Hill to the West. He had no Shells to Cleave him so Anstead of Begg(ing) 'Ard for a Good Reed to strike with he Hollers out for a Stout Ash wherewith to Hunt out the Proud Burley Blackman.

He ought to be decorated with a Garland. Anyone with such a Greathead ought to Garner in the Bluhm(ing) Golden Aigles.

✣ ✣ ✣

C. COMPANY NOTES

Lieut. H. E. Hay, son of Dr. H. H. Hay, has been recruiting for Overseas Battalions since 28th August, 1915. He sold out garage business to serve King and Country.

Sergt. Campbell served thirteen years with the colors and has seen service in South Africa, India and West Indies.

Sergt. J. Spicer served for some months with guard at Tobermory. Later enlisted with 160th, and was sent as assistant instructor to Cape Croker. Jack is held in high esteem by the Indians.

Sergt. H. Greig, formerly a sailor on Great Lakes, is now preparing to make a longer voyage to meet the Huns. He has just returned from Montreal after completing course in Bayonet Fighting and Physical Training.

Alexander, J. H., like his namesake "The Great" Joe is on the war path.

Bennett, G.—George was formerly a baker. One day he got his finger in the pie too deeply and lost the end of it. Nevertheless a short finger doesn't prevent his getting a "skirl" out of the pipes. When he tires of that he takes a roll out of the drum.

Benson, W. R.—Since the presentation of wrist watches in the Ottewell Settlement, Bill has had four inches taken off the sleeves of his tunic. It was too much trouble pulling up his sleeve to show the girls his new watch.

Butchart, D.—Is a strapping big fellow and is wearing a suit that becomes him well though the Quartermaster had difficulty in securing a uniform to fit him.

Brady, H. D.—Ate his Christmas dinner, then thought of the boys in France who had no such feast, and went and joined the colors.

Beamish, C. T.—Didn't like the color of his winter overcoat and called at the recruiting office and changed it for a khaki one.

Cooper, J.—Is not a very big man, but "every little bit helps." He was one of the first to enlist in C. Company.

Carter, J.—Who is the lady who said she would like to meet Jimmie Carter.

Hill, A. T.—Hill 60 was a hard one for the Germans to climb, but when they come to Hill 651920 they will have another tough proposition to get over.

Finch, J. J.—Jim is a chip off the old block. He couldn't stand to see dad come down and look the boys over and not see his face there. That fighting blood will show, eh, Jim?

Hachett, P.—Paddy used to run a car, but when he crosses with the Bruce he is not going on any "Ford" mission.

Hunter, G.—After Gordon got over bronchitis he was so thin he could slide through a flute and never strike a note.

McKenzie, W. A.—Instead of taking orders for ice cream and soft drinks from the campers at Oliphant this summer, Bill will be giving a section of "Campers" orders.

Stowe, W. A.—Bill is a bright boy, they all know Bill. He started the ball rolling at the first recruiting meeting in Wiarton.

Black, F.—Fred may have been born Slack but he is no "Slacker".

Speers, P. H.—The Germans have tried nearly every kind of weapon in this war, and the next thing we read about they will be fighting with "Spears."

SATISFACTION SHOPPING

That's what you get at our store. Everything you need or want and plenty of it.

Good Luck to the Bruce Battalion !

While they are preparing for and doing their share of the "Big Job" Overseas, we are doing our best to make honest Canadian Furniture out of good Canadian lumber, in Canadian factories, manned by real Canadian workmen and executives. We are helping to "Keep the Home Fires Burning."

Do your "bit" by insisting upon "Made in Canada" Furniture—made in Walkerton, Southampton and Hanover.
